The provision for loan losses was $1.9 million in the 1990 second quarter, and $2.2 million for the first six months of 1990, compared with $400,000, and $800,000, respectively, for the same periods in 1989. O'Sullivan noted that the provision was increased in the 1990 second quarter from that of the 1990 first quarter, to reflect current market conditions and the potential impact on the corporation's loan portfolio.

The allowance for loan losses totalled $6.9 million at June 3, 1990, compared with $5.7 million at March 31, 1990 and $2.2 million at June 30, 1989; the ratio of the allowance for loan losses to total non-performing loans was 28.41 percent at June 30, 1990, compared with 22.03 percent at March 31, 1990, and 11.09 percent at June 30, 1989.

Warren Bancorp Inc. had net charge-offs totalling $688,000 during the 1990 second quarter, compared with $928,000 in the second quarter of 1989.

Net loans decreased to $434.6 million at June 30, 1990, compared with $443.1 million at March 31, 1990 and $489.5 million at June 30, 1989. Included in net loans at June 30, 1990 are $11.2 million in condominium development loans, $11.7 million in land loans, and $2.4 million in commercial construction loans.

Loans in a non-performing status at June 30, 1990, totalled $24.4 million, or 5.52 percent of loans, compared with $25.8 million, or 5.75 percent of loans, at March 31, 1990 and $20.2 million, or 4.11 percent of loans at June 30, 1989. Real estate acquired through foreclosure and substantively repossessed at June 30, 1990 totalled $9.2 million compared with $12.3 million at March 31, 1990, and $4.2 million at June 30, 1989.

Continuing in a non-performing status at June 30, 1990 are $1.5 million of real estate joint venture projects. Total non-performing assets at June 30, 1990 were $35.0 million, compared with $40.5 million at March 31, 1990 and $24.4 million at June 30, 1989.

Warren Bancorp Inc.'s assets totalled $578.4 million at June 30, 1990, a decrease of approximately 8.2 percent from total assets of $630.4 million reported at June 30, 1989.

Stockholders' equity of $40.0 million was equivalent to $11.43 per share, or 6.91 percent of total assets at June 30, 1990.

Warren Bancorp Inc.is the holding company for Warren Five Cents Savings Bank. A Massachusetts-chartered, FDIC-insured savings bank, Warren Five services the North Shore, Merrimack Valley and Cape Ann communities through eight branches and two loan offices in Peabody, Beverly, Andover and Gloucester.

#90219b0125 08/07/1990 ~Business Wire

DENVER (AUG. 7) BUSINESS WIRE - Speaking at the Tele-Communications Inc.

annual meeting of shareholders Tuesday, John C. Malone, president of TCI, responded to shareholders' questions regarding Liberty Media Corp., the proposed new company which will hold most of the company's cable investments and programming investments.

He said under the plan, the company's investment interest, generally 50 percent or less, in 18 affiliated entities which operate cable systems serving approximately two million subscribers in 28 states under approximately 1,130 franchises and in 12 cable program services would be transferred to Liberty Media.

The cable investments include Lenfest Communications Inc., TKR Cable Co., Intermedia Partners and Kansas City Cable Partners. The program investments include American Movie Classics, The Discovery Channel, QVC and The Family Channel, but exclude Turner Broadcasting System Inc.

Briefly recounting the history, he said that the company announced in January that the directors had authorized development of a plan to distribute these investments to the company's shareholders. In March, the company announced that it was considering effecting the distribution by means of a rights offering to its shareholders which would entitle them to exchange a portion of their shares of TCI Class A and Class B common stock for shares of Liberty.

As currently structured, TCI would contribute its interest in the investments to Liberty in exchange for several classes of Liberty preferred stock. At the same time, TCI shareholders would contribute a certain portion of their TCI holdings in exchange for Liberty securities.

Thus, upon completion of the transaction, Liberty will hold cable and programming investments as well as some TCI stock. TCI would hold certain Liberty preferred stock, and the TCI shareholders would hold all of the Liberty common stock.

Tele-Communications Inc. is traded over-the-counter with Class A common stock and Class B common stock trading separately under symbols of TCOMA and TCOMB, respectively. The company's 11-1/8 percent senior subordinated debentures, 7 percent convertible subordinated debentures, and TCI Rights are traded in the over-the-counter markets, the latter two under the symbols of TCOMH and TCOMR respectively.

NEW YORK (AUG. 7) BUSINESS WIRE - Metro Mobile CTS Inc. (AMEX:MMZ.A,

MMZ.B) reported its operating results Tuesday for the third quarter and nine months ended June 30, 1990:

For the Quarter Ended June 30	1990	1989
Revenues	$49,911,000	$27,434,000
Operating income (loss)	(2,130,000)	(2,345,000)
Net loss	$(22,115,000)	$(11,002,000)
Net loss per share	(35 cents)	(17 cents)

For the Nine Months Ended June 30	1990	1989
Revenues	$166,792,000	$71,252,000
Operating income (loss)	2,201,000	(10,528,000)
Net loss	$(54,299,000)	(33,757,000)
Net loss per share	(86 cents)	(52 cents)

During the third quarter and nine months ended June 30, 1990, 14,000 and 41,000 subscribers were added, respectively, to cellular systems operated by Metro Mobile. Its systems served 128,000 subscribers at June 30, 1990.

Included in the results for the quarter and nine months ended June 30, 1990, are revenues of $12,168,000 and $64,566,000, respectively, of Vision Energy Resources Inc., a wholly owned subsidiary which sells and distributes propane. Vision reported an operating loss of $2,836,000 for the quarter compared with operating income of $1,920,000 for the nine months. Vision was not in operation prior to June 30, 1989.

#90219b0128 08/07/1990 ~Business Wire

RICHMOND, CA (AUG. 7) BUSINESS WIRE - Pixar Tuesday announced ClipObjects Sampler, the first in a series of clip object libraries for three-dimensional RenderMan picture-making on the Apple Macintosh family of computers.

Pixar ClipObjects contain dozens of 3D clip-art objects that provide users with the source materials they need to easily make realistic pictures for visual presentations. The objects may be used with Pixar's new Showplace picture composition software (see related release), or with other RenderMan-compatible applications.

''High quality objects are the foundation for creating photorealistic pictures,'' said Charles Kolstad, president of Pixar. ''Pixar ClipObjects give people who don't have the time or skill to produce a high quality model access to premade 3-D art for presentations and other every-day picture-making.''

ClipObjects Sampler includes a wide variety of models with realistic detail and curved surfaces which eliminate the ''jaggies'' often found in conventional clip art. Since the objects are three dimensional, they may be rotated to the perspective the user needs -- a beverage cup may be viewed from any side, the top, or the bottom.

Each Pixar ClipObject is hierarchically modelled from smaller geometric elements, which gives users the ability to move the parts that comprise each object. For example, a Pixar Showplace user can 'open' the driver's side door on an automobile ClipObject.

Surface appearances can also be changed with Pixar Looks libraries (see related release). Each Looks library includes dozens of surface appearances which provide users with additional picture-making variety -- so the user can change the roof on the automobile ClipObject from blue metal to black vinyl with the appropriate Look.

ClipObjects Sampler includes objects ranging from message bearers like a mailbox and a tombstone, through furniture, symbols, borders, columns and miscellaneous objects, to text presentation vehicles such as t-shirts, a billboard and a ticker tape machine.

ClipObjects Sampler will ship in November for $195. It will be available directly from Pixar, and through standard dealer distribution channels.

#90219b0132 08/07/1990 ~Business Wire

RICHMOND, CA (AUG. 7) BUSINESS WIRE - Pixar Tuesday announced Showplace, the first three-dimensional picture composition software for the Apple Macintosh family of computers.

Showplace gives users an easy, visual way to compose and produce photorealistic pictures on the Macintosh.

Showplace users act much like studio photographers, setting the stage for a picture and then ''photographing'' it. The user:

-- brings in objects or ''props'' from 3D modeling applications or Pixar's ClipObjects supplied with Showplace and also available separately;

-- arranges the objects in a scene;

-- gives each object a distinct appearance - or Look - using the Pixar Looks surface appearances supplied with Showplace and also available separately (for example, the frame of a chair might be made oak, and the seat fabric red wool);

-- locates light sources, such as lamps and windows;

-- sets up a camera to ''shoot'' the picture;

-- creates a finished picture.

Showplace employs a visual, full color user interface to guide the user through operations. Objects may be imported from modeling applications that produce RenderMan-compatible files (RIBs), such as Swivel 3D Professional, or from Pixar's separate ClipObject libraries.

Showplace also lets users place 3-D textual messages anywhere in a scene (such as, engraved on a tombstone, chiseled onto a granite monument, or ''embroidered'' on a sampler).

Showplace pictures may be saved as either TIFF and PICT files, which can then be used in other applications like MacroMind Director, Aldus Persuasion, Adobe Photoshop and QuarkExpress.

Macintosh is a registered trademark of Apple Computer Inc. MultiFinder and QuickDraw are trademarks of Apple Computer Inc. Swivel 3D Professional is a trademark of Paracomp Inc. Photoshop is a trademark of Adobe Corp. Persuasion is a registered trademark of Aldus Corp. MacroMind Director is a trademark of MacroMind Inc. QuarkExpress is a trademark of Quark Inc.

#90219b0141 08/07/1990 ~Business Wire

BOSTON (AUG. 7) BUSINESS WIRE - Oracle Corporation, the world's largest supplier of database software and services, today announced ORACLE Server for Macintosh Version 1.0, the first open database server for all Macintosh computer networks. The product is being demonstrated today at Macworld.

ORACLE Server for Macintosh 1.0 completes Oracle's comprehensive client/server computing strategy in the Macintosh environment. This product complements ORACLE for Macintosh 1.2, the industry's leading Macintosh client database product.

ORACLE Server for Macintosh 1.0 is Oracle's SQL relational database server for the Macintosh. It is the open server that transforms Macintosh networks from simple file and print workgroups to true client/server and multi-server systems. It provides enterprise-wide connectivity for Macintosh environments. Now Macintosh users can take advantage of Macintosh-only client/server computing and can use the same Macintosh computers to access data residing on minicomputers, mainframes and even OS/2 client/server systems.

ORACLE Server for Macintosh is compatible with the Macintosh Operating System (Version 6.0.2 and above) and supports a comprehensive set of end-user, development and administration tools.

ORACLE Server for Macintosh will support a range of Apple networking standards including LocalTalk, EtherTalk and TokenTalk. Oracle's SQL Net for AppleTalk allows Macintosh clients to access ORACLE Server for Macintosh, using the AppleTalk protocol. In addition, to exchange corporate data between Macintosh servers and Oracle databases residing on minicomputers or mainframes, Oracle provides additional protocol support including SQL Net for TCP/IP, DECNet, Async and 3270. ORACLE Macintosh users also will be able to access IBM's DB2 and SQL/DS and Digital's RMS by using Oracle's SQL Connect in combination with SQL Net. Full Server Functionality

Oracle Corporation, headquartered in Redwood Shores, Calif., is the largest supplier of DBMS software and the third largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as families of financial and manufacturing applications packages. All Oracle products are available on PCs, minicomputers and mainframes, and ORACLE is the first and only database to run on supercomputers.

#90219b0145 08/07/1990 ~Business Wire

SANTA CLARA, CA (AUG. 7) BUSINESS WIRE - 3Com Corp. Tuesday announced it has reduced the price of its CS/1 communications server and its EtherLink/MC adapter board for IBM PS/2 Micro Channel computers and compatibles, providing customers with high-quality hardware products at competitive prices.

Reflecting recent design and manufacturing changes, the price of the CS/1 has been reduced by as much as 30 percent, and the EtherLink/MC has been reduced between 14 and 16 percent. The EtherLink/MC also includes improved hardware features that provide customers with increased system performance.

The CS/1, a high-performance asynchronous communications server, supports key industry-standard networking protocols in one product, including Transmission Control Protocol/Internetwork Protocol (TCP/IP), Xerox Network Systems (XNS) and Open Systems Interconnect (OSI).

By supporting these protocols, 3Com meets customers increasing requirements for devices that connect systems from multiple vendors. The CS/1 also provides connectivity for up to 64 asynchronous devices or host ports, allowing customers to expand their networks in low cost increments.

The CS/1 chassis is a component of 3Com's GS/1-X.25 Ethernet-to-X.25 gateway and the CS/1-SNA Ethernet-to-IBM SNA gateway. Both products also benefit from the CS/1 price reduction.

The CS/1 chassis, originally priced at $6,000, is available as of Aug. 1 for $4,500. The 16-port asynchronous input/output (I/O) card for the CS/1 is reduced from $2,500 to $1,500 and the 8-port asychronous I/O card is reduced from $1,900 to $1,300.

3Com's EtherLink/MC adapter now offers improved performance resulting from a faster Intel 82586 Ethernet controller and improved memory access provided through suppression of the adapter RAM wait state.

With lower component count and power requirements, the EtherLink/MC is more reliable. This is because there is less chance for heat-related stress failure on fewer individual components. Also, because the EtherLink/MC now consumes less power from a five-volt power source, additional power is available to run other add-in cards.

Effective Aug. 1, the price of the EtherLink/MC decreases from $495 to $425 and the EtherLink/MC 5-pack is reduced from $2,225 to $1,875, a decrease of $70 per board. The EtherLink/MC is covered by 3Com's recently announced lifetime limited warranty for EtherLink adapters.

3Com Corp. is a leading independent global data networking company, providing multivendor connectivity that spans organizations and businesses

worldwide. The company designs, manufactures, markets and supports networking systems based on industry standards and open systems architecture.

#90219b0148 08/07/1990 ~Business Wire

(AUG. 7) BUSINESS WIRE - Four Seasons Hotels Inc. (TSE/ME:FSH) announced Tuesday that earnings for the quarter ended June 30, 1990 increased 21 percent to $7 million, from $5.8 million for the same period in 1989.

This improvement is attributed to the deconsolidation of the Santa Barbara hotel discussed below, and solid operating results from our management activities. In particular, a strong quarter at the Four Seasons Hotel, Chicago, which opened March 1989; additional fee revenues from the Four Seasons Resort, Wailea, Maui, which opened March 20, 1990; and the fees generated from our hotels and resorts under development helped increase management earnings.

On a normalized basis, earnings for the first six months of 1990 increased 13 percent over the first six months of 1989, after removing the effect of the sale of the Four Seasons Hotel, Ottawa which occurred Mar. 7, 1990 and the effect of the deconsolidation of the Four Seasons Biltmore Hotel, which took place in the second quarter of 1990.

Including the effect of these two items, net earnings for the six months ended June 30, 1990 increased 48 percent to $8.7 million, from $5.9 million for the six months ended June 30, 1989.

Revenues under management for the three months ended June 30, 1990 were $178.7 million, an increase of 4 percent over the same period in 1989. For the first half, revenues under management increased 5.9 percent to $322 million, from $304 million for the first six months of 1989.

A decision has been made to attempt to dispose of the company's 50 percent ownership interest in the Four Seasons Biltmore Hotel, while retaining the long-term management of the hotel. The completion of the renovation program for the hotel, and the operational success the hotel has achieved places the company in a good position to attempt to maximize the value of the asset at this time.

As a result of this decision, operating results, fixed assets, and

long-term debt related to the Santa Barbara hotel have been deconsolidated. Without the effect of this deconsolidation, net earnings for the quarter increased 12 percent over the prior year's second quarter. If the hotel is sold, it is management's intention to use the proceeds to pay down debt.

Four Seasons Hotels is the world's largest operator of hotels and resorts exclusively in the luxury class, and currently owns and/or operates 23 properties in Canada, the United States and England, and has 10 hotels and resorts under development.

Four Seasons resorts under development are located in Kona, Hawaii; Nevis, West Indies; Carlsbad, Calif.; Scottsdale, Ariz.; Costa Isabela, Puerto Rico; and Ko Olina, Oahu, Hawaii. International urban hotels under development are located in Mexico City, Tokyo, Paris and Singapore.

COLUMBUS, Ohio (AUG. 7) BUSINESS WIRE - Buckeye Financial Corp. (NYSE:BCKY), parent of Buckeye Federal Savings and Loan Association, Tuesday announced earnings of $601,000, or 23 cents per share, for the quarter ended June 30.

This compares with earnings of $668,000, or 25 cents per share, for the second quarter of 1989.

Net income was $1.151 million, or 44 cents per share, for the first six months, compared with earnings of $1.236 million, or 47 cents per share, for the like period in 1989.

On March 1, Buckeye Financial Corp. signed a definitive agreement to be acquired by National City Corp. (NYSE:NCC), parent company of BancOhio National Bank. Completion of the merger, which is subject to approval by regulatory agencies and Buckeye Financial shareholders, is anticipated during the fourth quarter of 1990.

National City is a $23 billion regional bank holding company with headquarters in Cleveland.

SANTA MONICA, Calif. (AUG. 7) BUSINESS WIRE - National Medical Enterprises, Inc. (NYSE/PSE/LoSE:NME) (NME) has signed a definitive agreement with Columbia Hospital Corp. to sell NME's Southside Community Hospital in Corpus Christi, Texas.

Terms of the agreement were not disclosed.

Southside Community Hospital, which NME purchased in December 1984, operates as a general acute-care hospital with 164 licensed beds.

Columbia Hospital Corp. became a publicly held company on May 16, 1990, when it merged with San Diego-based Smith Laboratories Inc., a manufacturer and supplier of medical equipment. Founded in 1987 in Fort Worth, Texas, Columbia currently operates 10 hospitals with 1,846 beds in Texas and Florida.

National Medical Enterprises, one of the nation's largest health care services companies, owns, operates and manages acute, psychiatric, and physical rehabilitative hospitals and substance-abuse treatment centers

throughout the United States and internationally.

#90219b0227 08/07/1990 ~Business Wire

SCOTTSDALE, AZ (AUG. 7) BUSINESS WIRE - Famous Restaurants Inc. (NASDAQ:FAMS), operator of full-service Mexican and seafood restaurants, reported net income of $399,000, 6 cents per share, for the second quarter and $905,000, 14 cents per share, for the first two quarters ended July 15 1990, as compared to net income of $486,000, 8 cents per share, and $771,000, 12 cents per share, for the corresponding periods in 1989.

Revenues for the second quarter and first two quarters of 1990 were $24,081,000 and $55,759,000, respectively, compared to $23,040,000 and $47,549,000 for the corresponding periods in 1989, or increases of 5 percent and 17 percent, respectively. These results include the operations of 11 Casa Lupita Mexican Restaurants since their acquisition in May 1989.

Dennis B. Mullen, chairman, president and chief executive officer stated: ''The less than expected results are due to the continued sales softness primarily in Phoenix and Denver where we operate a total of 16 restaurants. We have commenced aggressive marketing activities featuring new price-value television in our Phoenix market. It is anticipated that the television will be expanded to other appropriate markets along with newspaper support.''

The company currently operates 55 restaurants: 44 Garcia's Mexican Restaurants, nine Casa Lupita Mexican Restaurants and two Famous Fish Co. Restaurants. Currently, three Garcia's are under construction which will open before year-end - one in the San Francisco area; one in Sacramento, Calif.; and one in Fort Lauderdale, Fla. There are five franchised Garcia's open, including one recently opened in Thomas River, N.J., which is experiencing large early volumes.

#90219b0230 08/07/1990 ~Business Wire

SUNNYVALE, CA. (AUG. 7) BUSINESS WIRE - Advanced Micro Devices has defeated a legal effort by Intel Corp. aimed at disrupting shipments of the AMD 80C287 math coprocessor chip.

U.S. District Court Judge William Ingram Tuesday ruled that Intel failed to satisfy the burden of proof required to prevent others from using the ''87 product numbering system'' to designate math coprocessor devices.

''The product designation number was the principal issue of concern to AMD in the hearing on Intel's request for a preliminary injunction,'' said Thomas W. Armstrong, vice president and general counsel.

''All of the other concerns raised by Intel were essentially irrelevant because in an effort to expedite the case we had previously agreed to virtually everything subject to today's order.

''We are deeply gratified that Judge Ingram's ruling will allow free market forces to determine the success or failure of this product,'' Armstrong continued. ''AMD never claimed to be an authorized second source for Intel's math coprocessor.

''Indeed, even before the hearing on the preliminary injunction, we had either agreed to or had already put into place each of the actions included in Judge Ingram's order. As a result, today's ruling will have no impact whatsoever on AMD's ability or plans to ship the product.

''The genuine question at issue is whether Advanced Micro Devices has the right to copy and distribute Intel's microcode under a cross-license agreement between the two companies. We believe we clearly have that right, and we are prepared to do everything possible to expedite a court decision on that question.''

HONOLULU (AUG. 8) BUSINESS WIRE - American Savings Bank (NYSE:ASB) a federal savings bank and subsidiary of Hawaiian Electric Industries Inc. (NYSE:HE), received regulatory approval from the Federal Office of Thrift Supervision on August 6, 1990 to acquire the Hawaii branches and deposits of First Nationwide Bank.

American Savings Bank (ASB) is the fourth largest financial institution in the state of Hawaii. As of June 30, 1990, ASB had assets of $1.8 billion and deposits of $1.2 billion, with 36 branches on five islands.

The acquisition will increase ASB's deposit base by nearly $245 million and expand its retail branch network by nine branches. ASB has offered employment to all of First Nationwide's retail banking employees. The

transaction is expected to be completed by early October. The transaction does not include First Nationwide's loan portfolio.

ASB will receive approximately $235 million in cash in the transaction equal to the deposit liabilities less a 3.25 percent premium on the deposits and other deductions which are expected not to exceed $10 million in the aggregate.

#90219b0611 08/07/1990 ~Business Wire

DALLAS (AUG. 7) BUSINESS WIRE - Popular third part software packages for image processing program development, desktop publishing and a Unix graphical user interface are now available for Ramtek's Millennium imaging system.

The Visualization Workbench from Paragon Imaging and Looking Glass from Visix Software can now be ordered with Millennium, a high-performance, high-resolution system designed to accelerate the processing and visual display of technical and scientific data. In addition, FrameMaker can be ordered separately from Frame Technology to operate with Millennium.

Introduced in February, Millennium can turn a Unix-based workstation into a powerful image processing system for remote sensing geophysical, geographical information systems, medical, publishing and other image-oriented applications.

Millennium performs float-point calculations at the rate of 80 megaFLOPS, and can complete Fast Fourier Transformations of 512 by 512 by 8 pixel images in 3.8 seconds vs. 11.6 seconds on an Apollo DN10000 and more than four minutes on a Sun 3/110.

The Visualization Workbench is an application oriented electronic imaging software system that integrates image processing with graphics, visual programming, automatic program generation and graphical user interface tools. Based on Unix and the X Window system, the Visualization Workbench uses Millennium's Imaging Kernel System (IKS) developed by the University of Lowell.

IKS will comply with the proposed ANSI standard Programmer's Imaging Kernel (PIK) and offers an extensive program development tool set. Visualization Workbench can simplify the organization of these tools into application programs, according to Swanson.

FrameMaker 2.1-X workstation publishing software for newsletters, books

and manuals features a WYSIWYG mouse-based interface with icons, dialog boxes and pull-down menus. The system offers complete document design and layout features, full word processing, graphics drawing and handling, and specialized book-building and math support features.

Looking Glass is a powerful desktop manager that lets users take advantage of the functionality of Unix through an easy-to-use icon and mouse-driven interface.

The full range of Unix file and directory operations is intrinsic to Looking Glass, which is implemented in compliance with the OSF/Motif look-and-feel standard.

Looking Glass can be customized with user-defined icons and operations. Standard file management commands include Create, Open, Copy, Move, Link, Print, Change Properties, Information, Build, Find and Select By Pattern. A proprietary File System Server overcomes built-in Unix limitations with accurate iconographics file display and high-speed directory access.

The Visualization Workbench is available from Ramtek for a unit price of $5,500: Looking Glass, available from Ramtek, ranges from $795 for the SparcStation 1 version to $1,295 for the Sun 4 version; FrameMaker from Frame Technology is $2,500.

Ramtek Corp., headquartered in San Jose, designs and manufactures high-performance imaging and graphics display systems and peripherals.

VANCOUVER, BC (AUG. 7) BUSINESS WIRE - Clearly Canadian Beverage Corp. (NASDAQ:CLCDF; VSE:CLV), the registered holder of the trademark ''Clearly Canadian'', Tuesday announced that sales for the month of July exceeded $3.9 million (Cdn. $4.5 million) as compared to $1.1 million (Cdn. $1.3 million) for July 1989.

Case sales for the month of July were approximately 940,000 versus 164,310 cases during July 1989.

The company stated that July sales surpassed the company's previous record monthly sales of $3.1 million (Cdn. $3.6 million) achieved in June 1990.

''We are extremely pleased to announce another record month,'' stated Douglas L. Mason, president and chief executive officer of Clearly Canadian Beverage Corp. ''Our July sales results are testimony to the

product's increasing consumer acceptance, a trend that we anticipate will continue throughout our first quarter and fiscal 1991.''

In a separate announcement, the company stated discussions with a number of qualified parties regarding an investment in the Company have taken place and continue to progress.

Clearly Canadian Beverage Corp. produces and markets ''Clearly Canadian'', a line of natural and flavored sparkling mineral waters. Through distribution agreements, ''Clearly Canadian'' is sold in 30 states all of Canada, Japan and England.

LAKEWOOD, COLO. (AUG. 7) BUSINESS WIRE - Capital Associates Inc. (NASDAQ:CAII), a financial services and asset management company, announced Tuesday that it is anticipating a loss in its fiscal fourth quarter and year ended May 31.

The loss is expected to result largely from reserves to be established for assets leased to companies experiencing severe financial difficulties. The company is in the process of closing its books for the fiscal year just ended, and cannot yet quantify the amount of the fourth quarter loss, although it is expected to be substantial.

Richard Kazan, the company's chief executive officer, stated: ''We do not expect to release our operating results until later this month. However, timely communication to the financial community is essential to the continued success of Capital Associates. Therefore, I want to inform the market place at this time.''

Kazan stated that he will not be able to provide further information regarding the company's financial performance until the full operating results are available. He noted that, ''Although incurring this loss is painful, the company is going through a transition period in which a number of positive steps have been taken, including the restructuring of the company's administrative and management functions.

Capital Associates Inc. has arranged approximately $2 billion of asset financing. The company provides its predominantly Fortune 1000 customers with innovative and customized solutions to their equipment financing needs. Capital Associates is headquartered in the greater Denver area

and maintains 20 offices nationwide and in Japan.

SAN JOSE, CALIF. (AUG. 7) BUSINESS WIRE - Laserscope (NASDAQ:LSCP) Tuesday announced that it had granted a sole sub-license for ophthalmic use of KTP crystals to Biovision S.A., a privately held French corporation.

Under the sub-license agreement, Laserscope will receive certain royalty payments.

Laserscope has an exclusive license from E.I. du Pont de Nemours & Co. for in-vivo medical applications of KTP under certain U.S. patents. The sub-license applies only to ophthalmic applications. Laserscope markets its own KTP/532 and KTP/YAG Surgical Laser Systems to the hospital market for use in several specialties, including gynecology, general surgery and ear, nose and throat surgery.

Commenting on the sub-license, Herbert Taus, Laserscope chief executive officer, stated: ''We are pleased to have Biovision expand the use of KTP lasers to this additional market segment. We have been impressed with the capabilities of Biovision's management and with the quality of its products.''

Biovision distributes KTP laser systems for the ophthalmic market. Initial sales have been in France and distribution will now be expanded to the United States upon receipt of FDA clearance. Biovision indicated that it anticipates FDA clearance shortly. The company is based in Cournon D'Auvergne, France, and operates in the United States from Walnut Creek, Calif.

Laserscope designs, manufactures and markets an advanced line of KTP/532 and KTP/YAG surgical laser systems and related accessories and disposables. These systems employ the company's proprietary laser technology based on KTP crystalline material and enable the surgeon to cut coagulate and vaporize tissue in a wide variety of applications and procedures.

SANTA CRUZ, CALIF. (AUG. 7) BUSINESS WIRE - The Santa Cruz Operation Inc. announced Tuesday that it is now shipping Microsoft Word 5.0 for AT&T 3B2/400, 3B2/500 and 3B2/600 computers running the AT&T 3B2 UNIX Operating System, and for AT&T 6386 computers running the AT&T UNIX System V/386 Release 3.2 Operating System.

Microsoft Word 5.0 for UNIX Systems brings the sophistication of MS-DOS word processing features to U.S. government agencies and other organizations running multiuser, multitasking UNIX Systems. Designed for offices of any size, Microsoft Word 5.0 makes it easy to create a full spectrum of documents, including columns and graphics.

The UNIX System version is functionally similar to the MS-DOS version, including menus with prompts, as well as speed keys for bypassing menus. Microsoft Word 5.0 requires fewer keystrokes than other word processors to set tabs, margins, headers and footers, or to execute other routine processing tasks.

Microsoft Word 5.0 provides a full set of workgroup productivity tools, all of which are designed to work with the powerful multiuser, multitasking features of the UNIX System.

These tools include links to other applications, so that graphics and spreadsheets can be integrated into word processing documents; style sheets that ensure consistent, high-quality output; an advanced outliner that makes it easy for groups to brainstorm and restructure documents quickly; annotation and redlining features which take the confusion out of editing documents within a workgroup; and advanced tools for archiving and retrieving documents.

Microsoft Word 5.0 for UNIX Systems is available now from SCO authorized distributors and resellers in the United States and Canada for the AT&T 3B2/400 at a U.S. list price of $1,495, for the AT&T 3B2/500 and 3B2/600 at a U.S. list price of $2,395, and for the AT&T 6386 running AT&T UNIX System V/386 at a U.S. list price of $1,095.

For further information on these products, call 1-800/SCO-UNIX (726-8649) in the United States and 1-800/461-6962 in Canada.

#90219b0625 08/07/1990 ~Business Wire

DEERFIELD, IL (AUG. 7) BUSINESS WIRE - Schwitzer, Inc. (NYSE: SCZ) Tuesday reported second quarter net income of $1.0 million or 15 cents per share for its second quarter ended July 1, 1990, compared with pro forma net income of $1.5 million or 22 cents per share reported in the second quarter of 1989.

The 1990 tax rate is abnormally high due to the effect of Brazilian currency exchange rates on Brazilian taxes. Results for the 1989 quarter are reported on a pro forma basis due to the company's spinoff from Household International in April 1989. Revenue for the second quarter was $29.3 million, down 10 percent from 1989's second quarter revenues of $32.5 million.

For the first six months of 1990, net earnings were $2.0 million or 28 cents per share compared with year ago six-month pro forma earnings of $3.0 million or 43 cents per share. Revenue for the first six months of 1990 was $60.3 million, while 1989's six-month revenues were $66.1 million.

Gary Dillon, president and chief executive officer of Schwitzer, said, ''While Schwitzer's sales for the second quarter were 10 percent below

last year's, published truck industry information indicated that first quarter truck production declined by 20 percent in North America and 9 percent in Europe, including 45 percent in the United Kingdom, one of our key European markets. Similar trends continued during the second quarter.

Looking ahead, Dillon said that Schwitzer's third quarter is traditionally its lowest volume quarter, due to key customer vacation shutdowns in the summer months. The company expects sales volume in the second half of 1990 to be similar to the second half of 1989, with somewhat stronger earnings, depending on the level of activity in the truck and construction markets worldwide. Schwitzer's Brazilian business was affected by a two-month major industry volume decline as the government's economic reforms went into effect during the quarter. Subsequent months' activity has improved; and, while the economic climate in Brazil remains uncertain, the company expects its operations there to be profitable for the year.

Schwitzer is a leading producer of turbochargers, engine cooling systems and vibration dampers for major non-passenger car engine manufacturers worldwide. The company has state-of- the-art manufacturing processes and facilities strategically located for serving the company's global markets for medium and heavy-duty engine components.

LENEXA, KN (AUG. 7) BUSINESS WIRE - Syntro Corp. (NASDAQ:SYNT) and The Upjohn Co. (NYSE:UPJ) jointly announced Tuesday resolution of their dispute regarding patent rights to a genetically engineered pseudorabies vaccine for swine.

The agreement will end litigation brought by Upjohn claiming that its patent is infringed by a pseudorabies vaccine sold by SyntroVet Inc., Syntro's animal health subsidiary. The agreement, with Syntro taking a license under the Upjohn patent and paying royalty to Upjohn, provides worldwide cross-licensing in exchange for royalties under each companys' patent rights in the field of pseudorabies.

Both companies market pseudorabies vaccine products claimed in the Upjohn patent, Upjohn's TOLVID vaccine and SyntroVet's PRV/Marker.

''We are pleased to have this matter behind us,'' said Dr. J. Donald Todd, Syntro's president and chief executive officer, ''and have the dispute settled in a reasonable and equitable manner which recognizes the value of both partys' technology. Syntro will now focus our resources on additional applications of our technology.''

According to Gerald A. Welch, Upjohn senior vice president and general manager for the Agricultural Division, ''Upjohn's patent resulted from our pioneering research program in veterinary biotechnology. We are pleased that this settlement provides further recognition of our scientific efforts.''

Syntro and Upjohn have been involved in litigation since March 1989 when Upjohn filed suit in Delaware charging Syntro with infringement of the Upjohn patent. A similar suit was filed by Upjohn in Kansas against SyntroVet in September 1989. Counterclaims had been filed by Syntro against Upjohn in the Delaware action.

Syntro Corp., founded in 1981, is a Lenexa and San Diego based biotechnology company engaged in the development and commercialization of technology in the health sector. SyntroVet, a wholly owned animal health subsidiary of Syntro, was established in 1985 to manufacture and market products resulting from Syntro's research program.

The Upjohn Co. is a world-wide, research-based provider of human health care products and services, animal health products, agronomic and vegetable seeds and specialty chemicals. Headquartered in Kalamazoo, Mich., the company has been dedicated to improving health and nutrition for more than a century.

LOS ANGELES (AUG. 7) BUSINESS WIRE - Winners Circle Inc. (NASDAQ:WNRS), dba High Five Sportswear, announced Tuesday its agreement to manufacture and sell garments with a total value of $94,000 to Commtron Video in connection with that company's upcoming home video distribution of the Paramount Pictures film ''The Hunt for Red October.''

The sale includes jackets with a ''The Hunt for Red October'' embroidered logo that will be used to stimulate sales of the home video to retail outlets.

''These types of sales to home video distributors who use our products to promote purchases have become increasingly important to us and our customers as competition in the home video market has increased,'' commented Joel Serber, Winners Circle's senior vice president responsible

for corporate and promotional sales.

''This year alone, our sales to this industry have increased substantially partially as a result of another sale to Warner Home Video of about $45,000 worth of jackets that were used in the home video release of 'Lethal Weapon 2,''' Serber continued. ''We look forward to further penetration of this market,'' he concluded.

Under the name High Five Sportswear, Winners Circle designs, manufactures and markets a line of domestically produced recreational-wear garments, including satin, leather and cotton jackets, as well as sweat shirts and pants and T-shirts, which are embroidered or silk screened with corporate logos, slogans or promotional messages, for the corporate promotional market.

Under the name Team Systems, the company also produces a line of high-fashion lycra and spandex junior wear for various retail department stores and specialty chains.

#90219b0638 08/07/1990 ~Business Wire

MOUNTAIN VIEW, CA (AUG. 7) BUSINESS WIRE - SynOptics Communications Inc. (NASDAQ/NMS:SNPX) Tuesday announced it will incorporate wide-area networking into its LattisNet intelligent concentrator products with the addition of remote bridging capabilities.

Integrated as a module in the LattisNet System 3000 intelligent wiring hub SynOptics' LattisNet Model 3356 Remote Ethernet Bridge interconnects geographically dispersed Ethernet local area networks (LANs) over a variety of high-speed, wide-area serial links such as T1.

The LattisNet Model 3356 offers the advanced features expected in a high-performance remote bridge, including adaptive routing (AR), multilink and triangulation. Adaptive routing provides increased network efficiency. For example, in Spanning Tree networks with AR, the remote bridge will route traffic over serial connections held in Spanning Tree standby mode, optimizing the use of all available bandwidth.

Multilink allows a single station to transmit over the full bandwidth of two serial lines. Data is interleaved across the two lines on a packet-by-packet basis, doubling the throughput capacity available to the user. This reduces delays due to line congestion and ensures full utilization of available bandwidth.

Triangulation enables a single Model 3356 with two serial interfaces to route traffic between two different remote LANs, without generating any load on the local LAN. The advantage of triangulation is that a network connection between two remote sites can be created through a central point without increasing the local traffic on the central LAN.

In addition, the auto configuration feature allows the bridge to configure itself automatically upon installation. The bridge senses line speed and configuration directly from the serial line and automatically configures transmission speeds and buffer sizes.

The LattisNet Model 3356 Ethernet Remote Bridge, available now through SynOptics' direct sales force and value-added resellers, is priced between $11,800 and $14,600 depending on serial lines used.

SynOptics Communications Inc. designs, manufactures and markets local area networking products based on its Network Utility Architecture, a value-added product strategy that incorporates network connectivity, internetworking and network management solutions into an integrated networking system.

#90219b0640 08/07/1990 ~Business Wire

HOUSTON (AUG. 7) BUSINESS WIRE - Landmark Graphics Corp. Tuesday announced the availability of SyntheSeis, a productivity tool for seismic interpreters and the company's second product designed under the OpenWorks software framework.

In the search for oil and gas deposits, seismic interpreters often create a synthetic seismogram -- an artificial, computer generated model of the subsurface -- based on actual measurements from a nearby well.

The ''synthetic'' is then compared to the actual seismic data to verify accuracy of the data itself. The creation of a synthetic is a reiterative process; typically completed on a system other than an interpretation workstation. Thus, the process of reformatting the synthetic for use on a different system and making changes to it are tedious and time consuming tasks sometimes offsetting the value of the technique.

Designed under the OpenWorks software framework, SyntheSeis enables

interpreters to efficiently access and itegrate well information from a common database shared by the company's seismic and OpenWorks applications. Synthetic seismograms can be generated and modified interactively during the interpretation process or as new data becomes available. The ability to create and display them on one system will allow interpreters to use synthetics on all interpretaion projects when well data is available.

''The use of synthetic seismograms is a means of linking geophysics and geology to obtain a more accurate picture of the subsurface. However, the value of this technique is often sacrificed due to the difficulty and time necessary to complete the process,'' says Gene Ennis, Landmark president and chief executive officer.

Landmark is the leading supplier of computer-aided exploration (CAEX) technology with systems installed in over 27 countries. The company's user base encompasses 18 of the 20 largest multi-national oil companies, national oil companies, large independents, and young exploration and production companies. -0- OpenWorks is a registered trademark of Landmark Graphics Corp. SyntheSeis and Voyager are trademarks of Landmark Graphics Corp.

#90219b0642 08/07/1990 ~Business Wire

EMERYVILLE, CA (AUG. 7) BUSINESS WIRE - Cetus Corp. (NASDAQ:CTUS) reported a net loss of $61,513,000 for the fiscal year ended June 30, compared to a net loss of $49,911,000 for fiscal 1989.

The increased loss was due principally to spending increases associated with establishing the company's marketing and manufacturing infrastructure to support anticipated sales of Proleukin interleukin-2 (IL-2), and a significant decrease in net interest income.

''We are disappointed that the FDA Biological Response Modifiers Advisory Committee did not recommend approval of Proleukin during the drug's first hearing on Monday, July 30,'' said Robert A. Fildes, president and chief executive officer.

''The committee's request for us to meet with the FDA and resolve various issues regarding the Proleukin filing will result in a delay in the review of the product for the U.S. market. It is not possible to estimate the length of the delay until we are able to meet with the agency, but we are working with FDA officials to get the meeting scheduled as soon as possible.''

Costs and expenses increased significantly over the previous year. ''We expect to make adjustments in our spending to reflect the delay now anticipated in the regulatory review of Proleukin in the United States, and intend to implement such actions after we determine the probable extent of that delay,'' Fildes said.

Total revenues for the quarter and the fiscal year increased by 75 percent and 54 percent compared with the like periods in the prior year. These increases were due primarily to initial product sales of Proleukin in Europe and improved product sales in the company's research instrumentation and generic chemotherapeutics joint ventures.

Revenues earned by the company's unconsolidated joint ventures have increased due primarily to improved sales of the DNA Thermal Cycler instrument and related reagents by Perkin-Elmer Cetus Instruments, and sales of doxorubicin, a generic chemotherapeutic, by Cetus-Ben Venue Therapeutics.

Costs and expenses of these ventures increased as a result of the expanded sales and product development activities. Improved venture profitability resulted in the increased income allocated to the company's venture partners.

Net interest income declined from period to period in response to a lower average portfolio of cash and marketable securities and a decrease in capitalized interest expense.

The company's cash, cash equivalents and marketable securities at June 30 were in excess of $155,300,000.

Cetus Corp. is a leading biotechnology company primarily engaged in the development, manufacturing and marketing of pharmaceutical products to treat cancers and serious infectious diseases. The company also is developing commercial applications of its GeneAmp polymerase chain reaction technology. Founded in 1971, Cetus is based in Emeryville and also operates EuroCetus in Amsterdam, Netherlands.

#90219b0643 08/07/1990 ~Business Wire

MARLBORO, MASS. (AUG. 7) BUSINESS WIRE - Stratus Computer Inc. (NYSE:SRA) and Perception Technology Corp. (Canton, Mass.), Tuesday announced an agreement to market Stratus XA 2000 Continuous Processing Systems with Perception's voice processing systems through joint marketing and sales

support programs.

The joint marketing program is aimed at those telecommunications suppliers and corporate network users who can use the Perception-Stratus solution for a variety of voice-based applications in the telecommunications, financial services and retail markets. Applications include telemarketing, talking telephone directories, telephone banking, order processing, and 800-number services.

Prior to the marketing agreement, Perception and Stratus had installed Perception's advanced voice systems and Stratus' fault-tolerant online transaction processing (OLTP) computers together at several customer sites.

For example, the Atlanta-based service bureau, United States Advanced Network Inc. (USAN) runs the Perception-Stratus solution to provide voice-response services to telecommunications firms.

In addition, JBS Associates in Ringwood, N.J., uses the Perception-Stratus system to provide online check guarantee and verification services to retailers and banks.

''This relationship will afford Perception an opportunity to penetrate the many market segments that we have been unable to reach through our direct sales force,'' said Raymond Phillips, Perception's manager of reseller programs. ''The strength and breadth of Stratus' sales force coupled with its recognized technology, provides Perception with a significant advantage in this marketplace.''

Based in Canton, Mass., Perception Technology designs, manufactures and markets voice processing solutions to a broad spectrum of industries and for a wide variety of applications.

Stratus Computer Inc. is a leading supplier of fault-tolerant systems for critical online applications, such as online transaction processing and online data communication and telecommunication applications.

#90219b0644 08/07/1990 ~Business Wire

DALLAS (AUG. 7) BUSINESS WIRE - RasterOps Corp. (NASDAQ:ROPS), a leader in color display technology for Sun, Macintosh and IBM platforms, Tuesday introduced the first high-resolution, 24-bit live video-in-a-window

capability for the Sun Microsystems SPARCstation line of workstations.

The PIP (Picture-in-Picture) Video Option is a card installed directly onto the SPARC Card TC (True Color) product, RasterOps' recently released 24-bit color SBus display card. The two products together provide users with the ability to work with more than 16.8 million colors simultaneously to produce photographic quality images, as well as importing and capturing live video images.

This capability is ideal for applications such as desktop publishing, color pre-press, image processing, multimedia and interactive training. True Color is especially crucial in applications where the computer-generated image must be of high or photographic quality.

The SPARC Card TC provides two frame buffers on a single card -- a 24-bit and 1-bit buffer. The 24-bit buffer also can be used as a fully functional 8-bit buffer to run dedicated 8-bit software.

Live television and video can be integrated directly onto the screen with the PIP Video Option, providing a sizable live video window that can be placed anywhere on the screen.

The video window acts as a standard Sun window from any application. Video can be run simultaneously with other applications (e.g., GIS packages, graphic design, layout, spreadsheet, etc.) providing users with a dynamic information input source.

The SPARC Card TC is a double-size SBus card which plugs into two of the SPARCstation SBus slots. It supports Sun's 16-inch and 19-inch monitors, as well as RasterOps' 19-inch Trinitron monitors. Because these monitors display 1152-by-900 pixels, the SPARC Card TC can show 1,036,800 different colors at a time.

The SPARC Card TC PIP Video Option is a daughter board and occupies no additional slots. It supports inputs of NTSC and PAL signals in composite, S-Video and RGB/Sync formats. Typical input devices would be TVs, VCRs, laserdiscs and video cameras.

Suggested retail price for the RasterOps SPARC Card TC is $4,995. The RasterOps SPARC Card TC PIP Option has a suggested retail price of $1,995. Both products are now available.

RasterOps Corp., with headquarters in Santa Clara, Calif., designs, manufactures and markets photorealistic color-imaging products primarily for the graphic arts, publishing and related industries. RasterOps is the only company that provides 24-bit color display products with live video-in-a-window capability for multiple manufacturers' platforms, including its own line of high-resolution monitors.

#90219b0645 08/07/1990 ~Business Wire

PICKERINGTON, OH (AUG. 7) BUSINESS WIRE - Physicians Insurance Company of Ohio (PICO) recorded consolidated net income of $690,000, or 22 cent per share, for the second quarter of the year, up from $584,000, or 19 cents per share, a year ago.

For the six months ended June 30, the company's consolidated net income was $1.3 million, or 43 cents per share, up from $1 million, or 34 cents per share, for the same period last year.

The company's results include an extraordinary credit from utilization of a net operating loss carryforward; this tax benefit was $338,000, or 11 cents per share, for the first half of 1990, compared to $318,000, or 10 cents per share, a year ago. For the second quarter, the tax benefit was 7 cents, compared to 6 cents during the same period last year.

Consolidated revenues for the Pickerington-based insurer were $33.2 million for the six-month period, up slightly over the previous year. These revenues include premium income earned, net investment income, and income from non-insurance operations.

According to Robert L. Dion, president and chief executive officer, operating results from medical professional liability nearly doubled in the second quarter of 1990 to $955,000, up from $484,000 for the same period a year ago. For the first half, operating income from medical professional liability increased to $1.63 million from $1.25 million a year ago.

Dion said the company's emphasis upon operating efficiencies and its focus on profitable market segments have contributed to the company's stronger results. Total operating expenses in the first half of the year were $8.2 million, down more than 14 percent from the comparable period in 1989.

PICO and subsidiaries reported total net premiums written of $19.5 million for the first half of the year, up nearly 9 percent from $17.9 million in the comparable period the previous year.

Premium income earned by American Physicians Life Insurance Co. (APL), a PICO subsidiary, rose substantially during the second quarter to $978,000,

compared with $215,000 for the same period a year ago. APL provides life and health insurance and annuities to select markets, and has increased its efforts in the marketing of major medical plans.

Investment income, net of expenses, increased during the first half, from $7.6 million in 1989 to $8 million in 1990.

Net income from continuing operations increased 23 percent in the second quarter, and by 38 percent in the first half over comparable periods one year ago. PICO has recorded nine consecutive profitable quarters from continuing operations.

The company's reserves for unpaid losses and loss adjustment expenses, primarily on medical professional liability claims, were $132.1 million at mid-year, compared with $135.5 million at the close of 1989.

Shareholders' equity at June 30 was $28.5 million, or $9.24 per share, compared with $26.1 million, or $8.49 per share at the end of 1989. The company's total consolidated assets at June 30 were $223.8 million.

#90219b0647 08/07/1990 ~Business Wire

NEWARK, N.J. (AUG. 7) BUSINESS WIRE - The National Management Association (NMA) today announced the selection of Dr. P. Roy Vagelos, chairman, president and CEO of Merck & Co., Inc., as 1990 American Manager of the Year.

The award is presented annually by thirty national cosponsoring organizations.

Representing one of the nation's highest management distinctions, the award honors an ''executive whose leadership, integrity and management skills have profoundly, visibly and favorably influenced the outstanding performance of a key element of American business, industry or governmental activity such as to set the person apart among contemporaries.''

The presentation was made today during a news conference held at the Newark International Airport Marriott Hotel.

Dr. Vagelos joins President Ronald Reagan and other past recipients of the award: Donald E. Peterson, chairman and CEO, Ford Motor Company; Kenneth H. Olsen, president, Digital Equipment Corp.; Stanley C. Gault chairman and CEO, Rubbermaid Inc.; Roger B. Smith, chairman and CEO,

General Motors Corp.; and J. W. Marriott, Jr., president and CEO, Marriott Corp.

Dr. Vagelos was elected president and chief executive officer of Merck in July 1985 and chairman of the Board of Directors in April 1986. He was previously executive vice president of the worldwide health products company and before that, president of its Merck Sharp & Dohme Research Laboratories division, which he joined in 1975.

In nominating Dr. Vagelos for the award, NMA President Ronald E. Leigh said, ''Under Dr. Vagelos' leadership, Merck has become synonymous with outstanding levels of competence, dedication and product innovation -- a direct reflection of the leadership of its chairman.''

Merck's discovery, development and subsequent donation of supplies of Ivermectin -- a medicine that treats a disease known as ''river blindness '' which affects millions of people in Africa and Central and South America -- was highlighted during the award presentation.

Merck & Co. Inc., the world's largest pharmaceutical company, discovers, develops, produces and markets human and animal health products and specialty chemicals. The company has over 34,500 employees, 17 research centers and manufacturing facilities in 18 countries.

INDIANA, PA. (AUG. 7) BUSINESS WIRE - Biocontrol Technology Inc. (NASDAQ:BICO), recently concluded a restructuring of its long-term debt by selling its building and land in Indiana, Pa., to a consortium of investors for $800,000.

The company will lease back the property from the investor partnership.

David L. Purdy, president of the company, said proceeds from the sale would be used by Biocontrol Technology to pay off present mortgages and satisfy its financial obligations with holders of maturing debentures.

The remainder of the funds, he said, will be used to finance development of the company's new non-invasive glucose sensor, a device designed to measure glucose in the blood of diabetic patients without pricking the finger for a blood sample and to provide working capital for Biocontrol.

SANTA ANA, CA (AUG. 7) BUSINESS WIRE - Microsemi Corp. (NASDAQ:MSCC) Tuesday reported improved fiscal-year 1990 third-quarter results.

Revenues for the third quarter increased 5 percent over the prior quarter of fiscal-year 1990 to $23,576,000 and net earnings increased to $377,000 in the third quarter from $214,000 in the second quarter, which included a non-recurring gain of $200,000.

Compared with the prior fiscal year, revenues for the third quarter of this fiscal year decreased 11 percent from $26,426,000 to $23,576,000. The prior-year third quarter included $3,904,000 in revenues from businesses either disposed of or planned for disposition.

Net earnings improved from the year-earlier quarterly loss of $707,000 to net earnings of $377,000 for the current quarter. Third-quarter fiscal-year 1990 per-share earnings improved to 5 cents from the 9-cents-per-share loss for the year-earlier quarter.

Revenues for the first nine months of fiscal-year 1990 decreased 17 percent to $65,358,000 from the $78,318,000 for the first nine months of fiscal-year 1989. The prior-year nine-month period included $13,477,000 in revenues from businesses either disposed of or planned for disposition.

Net loss for the first nine months of fiscal-year 1990 is $39,000, compared with net earnings of $1,050,000 for the corresponding prior-year period. Per-share earnings decreased from 14 cents for the first nine months of fiscal-year 1989 to a per-share loss of 1 cent for the first nine months of fiscal-year 1990.

It should be noted that net earnings and earnings per share in the first nine months of fiscal-year 1989 included $570,000, or 8 cents per share, from the re-purchase of the company's convertible debentures at less than face value.

The third-quarter earnings, as well as for the first nine months, continue to be affected by the conditions experienced in the first two quarters of this fiscal year but to a lesser degree. Although improving, operating income in the Semiconductor group continues to be lower than prior years and the company continues to experience operating losses within the Microelectronics Assemblies and Testing group.

The decrease in operating income in the Semiconductor group is due to shifts in products-sales mix to products which require considerably more high-reliability screening as well as more-complex packaging techniques. This has resulted in stretch outs and delays of shipments.

As the company has increased its capacity in several key areas this situation has continued to improve. The net losses in the Microelectronics Assemblies and Testing group, which have subsided somewhat in recent months due to cost-control measures and improved marketing, resulted from lower demand for these products and strong competitive pressures on pricing.

Phil Frey Jr., president, chairman and chief executive officer, stated, ''We are pleased to report sequential improvement in quarterly operating income and we continue to examine new methods and strategies to improve our performance.''

Sales-order backlog was $44.1 million at July 1, 1990, a 15-percent decrease from the backlog of $52 million a year earlier and 4 percent less than the backlog of $45.8 million at the beginning of the quarter. The prior-year backlog included $6,050,000 from businesses either disposed of or planned for disposition.

Frey commented further: ''Although we continue to see our competitors reporting lower sales in the military and related markets, as well as more price competition and despite the modest drop in backlog, we remain confident that our reputation for providing the highest-quality power conditioning and related products and services remains solid and should provide the continuing foundation for our rebuilding program.''

Microsemi is a leading supplier of high-reliability discrete semiconductors, microelectronic hybrid and surface-mount assemblies and hi-rel screening and testing services for the electronics, computer, telecommunications, defense/aerospace and medical markets.

PHOENIX (AUG. 7) BUSINESS WIRE - Phoenix-based America West Airlines (NASDAQ:AWAL/PSE:AWA) reported increased traffic of 979.2 million revenue passenger miles, or 44.2 percent over July 1989s level of 679.1 million.

Available seat miles for the month rose 37.4 percent over last year to 1.6 billion producing a load factor of 61.2 percent. The carrier's July 1990

load factor was 2.9 points higher than July 1989.

Peter Otradovec, vice president of planning, said, ''We continue to experience a positive trend in our traffic growth. While year-to-date available seat miles have increased approximately 32 percent over last year, revenue passenger miles have more than kept pace at nearly 43 percent growth.''

He continued, ''Advanced bookings remain strong and we are optimistic that our year-end traffic results will reflect tremendous development and the maturation of America West's route system.''

America West currently operates a modern, fuel efficient all-Boeing fleet of 94 aircraft including 747s, 757s, 737s and de Havilland Dash 8s. The airline employs nearly 13,000 people in its 60 city route network which stretches from coast-to-coast and across the Pacific to Honolulu.

The following is a summary of America West's July and year-to-date traffic for 1990 and 1989: -0- T

	JULY 1990	JULY 1989	PERCENT CHANGE
Passengers enplaned	1,344,617	1,178,337	14.1
Revenue passenger miles (000)	979,219	679,117	44.2
Available seat miles (000)	1,599,781	1,164,550	37.4
Load factor (percent)	61.2	58.3	2.9 pts.

	YEAR-TO-DATE 1990	YEAR-TO-DATE 1989	PERCENT CHANGE
Passengers enplaned	8,979,084	7,547,625	19.0
Revenue passenger miles (000)	6,273,294	4,389,979	42.9
Available seat miles (000)	10,117,366	7,645,443	32.3

HOUSTON (AUG. 7) BUSINESS WIRE - Landmark Graphics Corp. Tuesday announced it has begun customer shipments of several new enhancements to its seismic interpretation software.

Landmark's highly successful ZAP! Zoned Auto Picker software has been replaced by a new product, Turbo ZAP! a fully interactive and significantly faster version.

In addition, the company is now shipping the 20th release since 1984 of its industry leading seismic interpretation software.

When introduced in 1989 ZAP! Zoned Auto Picker provided the unique ability to accurately and automatically pick horizons across an entire 3D survey. Before ZAP!, this crucial step in the interpretation process could take from weeks to months to accomplish.

With ZAP!, the productivity improvements realized by users reduced the time required to hours. Landmark's new Turbo ZAP!, with speed improvmements of 50-60x, makes horizon picking truly interactive and makes dramatic breakthroughs by reducing the time required to autopick entire 3D data sets to minutes.

It tracks at speeds up to 150,000 traces per minute. Also, a new tracking mode has been added specifically designed for picking horizons in highly complex faulted areas.

''The interactive capabilities of Turbo ZAP! provide users with results while ideas are still fresh. The ability to instantly test new ideas and reinvest time savings into deeper analysis or new projects offers unique productivity advantages for our customers,'' stated C.E. Ennis, Landmark's president and chief executive officer.

Release 20 of Landmark's seismic interpretation software dramatically increases 3D interpretation capabilities. New map analysis tools allow users to highlight subtle features such as faults and reefs which may not be apparent on structure maps.

Specific new features include: azimuth maps which show direction of dip relative to a reference location; difference maps which calculate the amount of displacement along a fault or mistie in the inline or crossline direction; dip maps which calculate true dip; and edge detection maps which exaggerate any subtle feature for easier identification.

Landmark is the established leader in CAEX technology, with more than 550 systems installed worldwide. Landmark's user base encompasses 18 of the 20 largest multinational oil companies, large independents, and young exploration and production companies. -0- ZAP! and Turbo ZAP! are trademarks of Landmark Graphics Corp.

CAMBRIDGE, MASS. (AUG. 7) BUSINESS WIRE - Atlas Venture Tuesday announced

the closing of a $1.25 million venture capital investment in Boston & Pacific Co. Inc.

Other investors in this financing are SEAVI, a leading Southeast Asian venture capital fund affiliated with Advent International and, Ssang Yong Cement Ltd., a major Singapore-based cement producer. Boston & Pacific--headquartered in Boston--designs, manufactures, and distributes disposable medical products for international markets. This product line sold under the brand name 4 Sure, includes urological products such as a comprehensive range of catheters and drainage bags, as well as examination and surgical gloves, gauze dressings and other disposable products.

Boston & Pacific has operating subsidiaries in Penang, Malaysia; Australia--responsible for distribution in Australia and New Zealand; and Miami, Fla.--responsible for distribution to Latin America and the Caribbean. European and North American markets are supported from the Boston headquarters.

This is Boston & Pacific's first venture capital financing. The company was formed in the summer of 1989 by former employees of the Kendall Co. led by Gio Oritz, who was previously responsible for Kendall's Far East operations. Oritz, CEO of the new company, decided to seek venture capital financing in order to permit the company to accelerate development of its international operations and product range: ''Boston & Pacific selected venture capital firms that could provide active support for Boston & Pacific's international strategy. Our three investors collectively have broad-based experience in the European, U.S., and Southeast Asian markets and can offer strong support for our products through their local offices and partners,'' he said.

Atlas Venture is an international venture capital group managing $100 million from offices in Boston, U.S.A.; Amsterdam, the Netherlands; and Munich, West Germany. The U.S. partnership specializes in investments in the healthcare and information technology industries.

HORSHAM, PA (AUG. 7) BUSINESS WIRE - Advanta Corp. (NASDAQ: ADVN) announced Tuesday that its board of directors has authorized the purchase of up to an additional 200,000 shares of the company's common stock, bringing the company's total 1990 authorization of stock repurchases to 600,000 shares.

At the same time, the company's board of directors declared the third

quarter dividend, approving a 20 percent increase in the quarterly dividend from 2.5 cents to 3 cents per common share. The dividend will be payable to stockholders of record on Aug. 31, and will be paid Sept, 18.

Dennis Alter, chairman of the board and chief executive officer, said, ''We believe that our stock remains a very attractive investment for the company at current price levels. Our strong liquidity position and anticipated record earnings enable us to continue to take advantage of this opportunity. At the same time, we are increasing the dividend as a way of sharing the success of the company with our shareholders.''

The purchase of the additional 200,000 shares may be made from time to time, in the open market or negotiated transactions. The company currently anticipates that it may commence purchasing shares as soon as practicably possible.

In February 1990, Advanta's board had approved the purchase of 400,000 shares of the company's common stock. These purchases were recently completed.

Advanta Corp. is a financial services holding company that operates through its subsidiaries to market credit cards, home equity loans, equipment leases and deposit products to consumers nationwide. The company manages assets in excess of $2 billion at June 30, including more than $600 million of receivables serviced for investors.

#90219b0670 08/07/1990 ~Business Wire

SAN DIEGO (AUG. 7) BUSINESS WIRE - Synbiotics Corp. (NASDAQ:SBIO), the developer of advanced biomedical technologies, Tuesday announced record revenues and decreased losses for their first fiscal year quarter, which ended June 30, 1990.

Revenues for the three months ended June 30 rose to $1,944,000 from $1,638,000 in the same period a year earlier. The company reduced losses by 31 percent in the June 30 quarter compared with the same quarter last year. Net losses declined to $981,000 (20 cents per share) from $1,324,000 (29 cents per share) a year ago.

These gains were made possible, according to Dr. Edward T. Maggio, Synbiotics' president and chief executive officer, by increased sales in the company's companion animal-products business and reduced-cost demands from internal research and development.

''Our core business of providing advanced medical products for companion animals is the principal contributor,'' Maggio said. ''Increased success in this area during the quarter was due to expanded marketing programs and particularly strong sales of VacSyn/FeLV, our first vaccine product.''

VacSyn/FeLV, a proprietary vaccine for feline leukemia, was introduced last year.

''Reduced research and development costs reflect the company's recent reorganization and strategic focusing,'' Maggio stated. ''Our research emphasis is now centered on near-term product opportunities in animal health.

''Other product areas will be explored through our subsidiary companies, which will be independently funded by partners and investors -- but in which Synbiotics will retain a major ownership position.''

''For example,'' Maggio continued, ''the company's wholly owned subsidiary UniSyn Fibertec, which produces cell-derived materials, on June 26 purchased all of the assets associated with the cell culture business of The Dow Chemical Company's CD Medical subsidiary.

Maggio said that UniSyn and another recently created subsidiary, ImmunoPharmaceutics, which was created to exploit products in the area of antibody-directed drug design and compound-screening techniques, are ultimately expected to make ''important contributions to the consolidated results of Synbiotics.''

#90219b0671 08/07/1990 ~Business Wire

HOUSTON (AUG. 7) BUSINESS WIRE - Chiles Offshore Corp. (AMEX:CHC), the Houston-based offshore drilling contractor, achieved increased revenues though experiencing a net loss for the second quarter of 1990.

This announcement was made today by William E. Chiles, president and chief executive officer of the company.

Drilling revenues for the three months ended on June 30 totaled $11,979,000, an increase of 36 percent from the preceding quarter. However increased depreciation and interest expenses associated with three mobile jackup units purchased by the company late in the first quarter resulted

in a net loss of $475,000, or 4 cents per share, for the second quarter.

On a year-to-date basis, the recent quarter's performance brought the company's drilling revenues to $20,778,000, while the company's net loss totaled $214,000, or 2 cents per share.

Utilization of the company's expanding fleet averaged 92.7 percent for the second quarter and 91.9 percent for the first six months of the year, Chiles reported.

''It was a gratifying quarter in light of our initial public offering and the enlargement of our fleet by more than 40 percent,'' said Chiles in making the announcement.

Chiles said that the company's initial public offering in May produced net proceeds to the company of $64,600,000. That capital is being held in short-term interest-bearing securities while the company considers investment opportunities that fit into its long-term growth strategy.

Chiles Offshore Corp., with offices in Houston and in Lafayette, La., is engaged in the drilling and workover of offshore oil and gas wells. The company works on a contract basis for major and independent oil and gas companies. In addition to operating its own fleet of 10 mobile offshore jackup units and the three bareboat charters mentioned above, the company manages a self-contained platform rig owned by Conoco Inc.

LISLE, IL (AUG. 7) BUSINESS WIRE - Molex Inc. (OTC:MOLX), an international electronic connector company, Tuesday reported record sales of $158.8 million for its fiscal fourth quarter, ending June 30, up 7.4 percent over last year's $147.9 million.

Sales were adversely affected in this quarter by the higher value of the U.S. dollar vs world currencies. This reduced sales by $1.6 million compared to a $5.5 million reduction for the same period last year.

Net quarterly earnings of $16.5 million were recorded, down from the company's year-ago fourth quarter report of $18.8 million. The strong U.S. dollar vs prior year exchange rates reduced earnings by $343,000, compared to a $208,000 reduction for the fourth quarter last year.

Earnings per share were 33 cents for the fourth quarter, compared to 38 cents for the same period last year. Last year's fourth quarter results

include 4 cents per share from the disposition of holdings in another firm. Earnings per share figures have been retroactively adjusted for the stock dividend issued to shareholders on July 25.

For the year, Molex sales were $594.4 million compared to $571.9 million last year, a gain of 3.9 percent. The strong U.S. dollar adversely affected the reported sales increase for the year by $14.9 million, compared to a year-ago increase of $683,000.

Earnings for the fiscal year were $62.1 million, a gain of 7.6 percent over last year's $57.7 million. The strong U.S. dollar reduced earnings for the year by $2 million, compared to an increase of $1 million over the previous year.

Earnings per share for the year were $1.24 compared to the previous year's earnings of $1.14 per share.

Molex's backlog on June 30 was a record high of $120.4 million, compared to $98.6 million for the same period last year, an increase of 22.1 percent.

A Fortune 500 company, Molex has 46 plants in 20 countries manufacturing connectors, electronic interconnect systems, ribbon cable, switches and application tooling. The 52-year-old company is based in Lisle and employs 6,700 worldwide.

DALLAS (AUG. 7) BUSINESS WIRE - AT&T Computer Systems announced Tuesday that the SABRE Travel Information Network will use AT&T networked computers in SABRE travel agencies and its administrative offices in Europe, Canada, the Caribbean, and the Pacific Rim.

The SABRE Travel Information Network, a division of American Airlines, is the marketing arm of the SABRE computerized reservation system.

The multi-million-dollar agreement calls for AT&T to provide SABRE travel agencies worldwide with the latest in technology to handle today's personal computer office functions, while also assuring compatibility with emerging software development in the future.

AT&T will provide its 6386/SX and 6386/25 WorkGroup Systems. The AT&T computer hardware platform will provide SABRE subscribers with products to better meet their growing office automation needs. SABRE is the first

computerized reservation system to offer 386 technology in the travel agency environment.

''The decision to use AT&T's personal computers was based on AT&T's ability to deliver outstanding technology and products,'' said David Collier, vice president-Europe, SABRE Travel Information Network.

The agreement with the SABRE Travel Information Network is in addition to a major US-domestic computer contract awarded to AT&T by American Airlines in June, 1989. Under the new international agreement, AT&T will provide personal computers to SABRE travel agencies in the United Kingdom, Germany France, Spain, Belgium and several other European nations, as well as in Canada and the Caribbean.

''This agreement represents another important milestone in AT&T's growing relationship with American Airlines,'' said Roger Dudley, AT&T Computer Systems Regional Sales Vice President and General Manager. ''This opportunity is important because we are able to demonstrate AT&T's global capabilities in the full range of customer service.

SABRE is the world's largest privately owned, real- time computer network. The computerized reservation system connects more than 200,000 computer terminals, ticket printers, boarding pass printers and other devices to American Airlines offices as well as more than 17,000 travel agencies worldwide.

#90219b0690 08/07/1990 ~Business Wire

NEW YORK (AUG. 7) BUSINESS WIRE - In the quarter ended June 30, Harris & Harris Group Inc. (''H&H Group'' or the ''Company'') reported net income of $36,000 vs. $59,000 in the second quarter of 1989.

Revenues declined by 11 percent to $2,357,000 vs. $2,646,000 last year.

For the six months ended June 30, H&H Group reported net income of $141,000 or 2 cents per share vs. $355,000 or 4 cents per share last year. Revenues increased by six percent to $5,322,000 vs. $5,023,000 last year.

The decline in net income and revenues in the second quarter reflected the expected decline for the period in net income and revenues at the company's Harris & Harris of Kentucky insurance-brokerage subsidiary. As previously noted in the company's report to shareholders for the quarter ended March 31, 1990, dated May 7, 1990, ''Harris & Harris of Kentucky's results were aided in the first quarter by the timing of the receipt of a portion of its revenues, which will make its earnings and revenue comparisons in the second quarter more difficult.'' In the current quarter ending Sept. 30, revenue growth in the company's wholly owned operations, as well as in its 50 percent owned affiliate, Ag Services, is budgeted to resume.

The increase in revenues in the six months' period reflected continued strong growth by Capital Trust Co. and a near doubling of revenues by the company's smaller insurance-brokerage operation, Harris & Harris of Georgia.

The company's income from operations more than doubled in the first half, from $178,000 last year to $393,000 this year, reflecting the growth of Capital Trust and smaller losses by Harris & Harris of Georgia. The decline in net income in the first half of this year, to $141,000 from $355,000 last year, reflected the inclusion in last year's first half of $441,000 in net gain on investments (vs. $19,000 this year) and $140,000 in extraordinary items (vs. $7,000 this year).

Revenues generated by the parent corporate entity (as opposed to those of the operating subsidiaries) declined sharply in both the second quarter (to $67,000 from $243,000 last year) and the first half (to $198,000 from $383,000 last year). This decline reflects decreased interest income, owing to the company's $2 million cash repurchase of shares on June 19, 1989 and the company's $3.3 million cash investment in Ag Services of America Inc. on April 12, 1990.

Pre-tax income in the three months' and six months' periods ended June 30, was boosted by $200,000, representing the company's equity interest in the earnings of Ag Services. This figure equals 50 percent of Ag Service's net income in the two months ended May 31 (after amortization). Ag

Services reports its results on a Feb. 28 fiscal year, and more than one hundred percent of its net income is realized in the first six months ended Aug. 31 or each fiscal year.

H&H Group is using the equity method of accounting for Ag Services and not consolidating the results of Ag Services in its own results, which means that Ag Services revenues are not included in H&H Group's revenues, and only 50 percent of Ag Service's after-tax earnings (after amortization) are included in H&H Group's pre-tax earnings. For accounting purposes, H&H Group records income taxes against its share of Ag Service's net income, even though such taxes would be actually payable only upon sale by H&H Group at a profit of shares of Ag Services.

MANHASSET, NY (AUG. 7) BUSINESS WIRE - Martinair Holland is offering reduced fares to Amsterdam that afford travelers savings of almost 25 percent off normal, low fares. The airline's "End of Summer" fares are available from New York, Newark, Detroit, and Minneapolis/St. Paul.

From Newark and JFK, travelers can fly non-stop to Amsterdam for $224 each way, a savings of $85 off the regular air fare. This special, low fare is valid on departures from August 19 with the purchase of roundtrip travel.

A $249 one way fare is obtainable with the purchace of a round trip ticket from Detroit and Minneapolis through September 6. The fare is $65 less than the normal, half roundtrip fare from Detroit and $80 lower than the comparable Minneapolis fare. Travelers departing from these cities also receive an extra bonus: a free Ford Fiesta, or equivalent Group A rental car, with unlimited mileage for one week.

The car rental offer is valid only on departures August 16 and 30, and September 6, 1990. Contact Martinair for information on conditions and restrictions.

Headquartered in the Netherlands, Martinair Holland operates passenger and freight service to Amsterdam Schiphol Airport from 12 North American gateways: Baltimore/Washington, Detroit, Los Angeles, Miami, Minneapolis, Newark, New York, San Francisco, Seattle, Tampa, Toronto and Puerta Plata in the Dominican Republic. Its toll-free reservation number is 800-FON-HOLLAND.

HERNDON, VA (AUG. 7) BUSINESS WIRE - EDS has signed a dual award contract with the U.S. Army Information Systems Selection and Acquisition Agency for technical support services to the Army's Information Systems Software Center (ISSC) at Fort Belvoir, Va. Maximum life cycle value is approximately $116 million.

The contract will run for five years in one-year increments and will provide life cycle management services of Standard Army Management Information Systems (STAMIS). The indefinite delivery/indefinite quantity contract will include cost plus fixed fee, cost plus award fee and firm fixed price task orders for a wide range of software engineering services.

Under the contract, EDS will support ISSC by providing system development, conversion and maintenance for various STAMIS. Assigned systems under the contract include financial, payroll, personnel and force development among others.

Work will be performed at Fort Belvoir, Fort Benjamin Harrison, Ind., the Army MELPAR building in Falls Church, Va. and EDS' Eastern Regional Headquarters in Herndon, Va.

''This is EDS' first major systems engineering services contract with the Army,'' said Robert McCashin, Group Executive for EDS' Federal Government business. ''It is in keeping with our strategy of expanding our professional services work with the government.''

''This contract will enable EDS to assist the Army during a critical period of transition and consolidation,'' said George Sibley, president of EDS' Military Systems Division. ''The contract will improve the ability of the existing STAMIS to respond to functional user need and provide more timely and accurate information to all levels of the Army.''

EDS has operations in 27 countries and is the leader in providing information technology services to customers around the world. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

MINNEAPOLIS (AUG. 7) BUSINESS WIRE - Modern Controls Inc. (MOCON) has acquired the technology, known as the Model 100 Film Thickness Gauge, from Strato-Tec Inc. The Model 100 is a portable instrument which measures the

thickness of plastic films.

"The Company is investigating incorporation of this technology into its exisiting Profiler line of gauging instruments," said Chairman, William N. Mayer. "The acquisition of this product will help the Company meet its present goals of increasing earnings at an average rate of 20 percent over a five year period."

MOCON is a leading developer, manufacturer and marketer of high technology instrumentation designed to test packages and packaging materials for permeation of gases and water vapor. The company also has a new line of thickness gauging systems used to measure plastics and coatings on and off the production line.

MOCON testing instrumentation is used in quality control and research laboratories in the food and pharmaceutical industries, to test plastic packaging materials for cost effective protection against loss of color, flavor, fragrance, texture, potency, and freshness.

The company also manufactures weighing and sorting instrumentation that helps the pharmaceutical industry maintain the rigid weight tolerances needed in producing drugs in capsule and tablet form.

MOCON's shares are traded over-the-counter and are listed in the NASDAQ National Market System. The company's electronic NASDAQ trading symbol is MOCO.

PHILADELPHIA (AUG. 7) BUSINESS WIRE - Fleer Corp. (NASDAQ:FLER) Tuesday reported record sales and earnings for the period ended June 30.

Net sales for the second quarter increased 69 percent to $40,359,000, compared to $23,818,000 for the same period last year. Net income for the quarter increased 132 percent to $7,068,000, or 91 cents per share, compared to the prior year's pro forma quarterly results of $3,050,000, or 42 cents per share.

Net sales for the first half increased 82 percent to $80,551,000 from $44,368,000 for the same period last year. Net income for the first half increased 192 percent to $13,472,000, or $1.78 per share, compared to pro forma net income of $4,621,000, or 63 cents per share.

Fleer became a public company in June, 1990 by issuing 1,955,000 shares of common stock. As a result, the company has 9,456,103 shares of common stock outstanding on a fully diluted basis.

Fleer is a leading marketer of sports picture cards (baseball, basketball and football) and confectionery products, including Dubble Bubble gum products.

BALA CYNWYD, PA (AUG. 7) BUSINESS WIRE - Global Entertainment Ltd. (OTC) announced Tuesday that it has signed an agreement with Synchronal Marketing Inc. for the production of up to eight ''Fun Time Shopper'' programs per year over the next five years.

Under the terms of the agreement in principle, Synchronal will fund a portion of the production costs of the ''Fun Time Shopper'' programs that it and Global Entertainment mutually agree to produce and market. In exchange, Sychronal has the exclusive worldwide rights to market and exploit the ''Fun Time Shopper'' programs that the companies jointly produce.

Global Entertainment will receive a portion of the selling price of any product or service sold as a result of a ''Fun Time Shopper'' program produced by Synchronal and Global Entertainment.

Synchronal sells personal-care, kitchen and home, motivational and other consumer products through 30-minute and 60-minute television commercials (''infomercials''), a technique that Synchronal pioneered. Synchronal's sales for its last fiscal year (1990) exceeded $180 million, which represented an 85-percent increase over 1989 sales.

Global Entertainment's subsidiary, Corsa Ltd., has developed the 30-minute infomercial, the ''Fun Time Shopper,'' as a vehicle for marketing APLON hair remover and other products directly to television viewers. The ''Fun Time Shopper'' is filmed before an audience and relays commerical information in an entertainment format.

Global Entertainment previously announced on Aug. 2 that it had signed a five-year agreement in principle with Synchronal for the marketing of APLON hair remover.

Global Entertainment licenses entertainment properties and television shows, produces and sells television shows, sells products on television directly to the consumer, produces and sells prerecorded videotape, and sells other related entertainment products.

Global conducts its business through three operating subsidiaries: (1) International Artists Inc.; (2) Clebrity Fundraisers Inc.; and (3) Corsa Ltd.

FORT WORTH, TX (AUG. 7) BUSINESS WIRE - Clifton H. Morris Jr., chairman and chief executive officer of URCARCO Inc. (NASDAQ/NMS:CARS) announced net income for the year ended June 30, 1990, of $15.8 million or 68 cents per share as compared to $2.9 million or 20 cents per share for the year ended June 30, 1989.

Earnings per share increased 240 percent. Sales for the year increased 292 percent from $38.4 million to $150.4 million.

For the fourth quarter ended June 30, 1990, sales were $51.0 million vs. $20.3 million, an increase of 151 percent over the same period in 1989.

Net income for the quarter was $5.7 million, as compared with $2.1 million for the fourth quarter last year, up 180 percent. Earnings per share for the quarter were 21 cents, as compared with 12 cents for the same period last year, a 75 percent increase.

Morris also noted that results for the fourth quarter ended June 30, 1990 increased as compared to the third quarter 1990. Sales were up 16 percent over the third quarter figure of $43.9 million. Net income increased 19 percent over the previous quarter's $4.8 million and earnings per share were up 17 percent from the third quarter's 18 cents.

URCARCO sold 18,692 cars during the year, as compared with 6,500 units the previous year, Morris added, and the company is now operating 17 retail facilities.

URCARCO Inc. operates a chain of ''we finance'' used car retail lots in Fort Worth, Dallas, Houston and Austin, Texas, selling quality used cars and light trucks and typically financing customer purchases.

#90219b0727 08/07/1990 ~Business Wire

DALLAS (AUG. 7) BUSINESS WIRE - Mars Microsystems, a new U.S. high tech start-up, and Tatung Co., the largest Taiwanese SPARC licensee, Tuesday introduced the Mariner 4i, the first product that combines SPARC and PC technology in one workstation.

The product is significant because it enables both UNIX and DOS applications software to run on the same platform with full functionality.

With a base price of $5,995, the Mariner 4i provides a low-cost platform that bridges SPARC workstations and MS-DOS computers. This makes it potentially appealing to both corporate and scientific/engineering users. Because it is based on an ISA (PC/AT) architecture, users can configure their workstation at lower costs than any other Sun compatible or SPARC-based system.

A Mariner 4i equipped with a 19-inch color monitor and 207 MB hard drive costs $8,995.00. A similarly configured SPARCstation 1+ costs $15,000.00 While the SPARCstation offers the ability to run some DOS applications, compatibility is achieved by emulating a PC in software, providing greatly diminished performance.

The Mariner's 4i optional DOS compatibility adds a genuine 386 processor and VGA to the base SPARC system, enabling it to provide optimum performance in either environment.

With its optional DOS module, the Mariner 4i is the first SPARC compatible UNIX workstation to provide true, full-featured PC capability. The plug-in module lets users replace their PCs with a 386 processor with cache, VGA display and memory, independent of the SPARC/UNIX system.

The Mariner 4i runs SPARC/OS 1.0, a derivative of SunOS, Sun's version of the UNIX operating system, making it fully compatible with the 2,100+ hardware and software solutions available for SPARC workstations.

The Mariner 4i's low cost PC compatibility enables high-end PC users to upgrade to the power of a high performance SPARC workstation while preserving their investment in PC applications and peripherals. This approach contrasts sharply with Sun's more limited DOS capability. Sun SPARCstations offer optional PC/XT class emulation in software, which runs PC applications at lower performance and does not allow users to take advantage of low-cost, proven PC peripherals.

Headquartered in Mars, Pa., Mars Microsystems is an independent designer and developer of innovative SPARC compatible workstations and peripherals. Tatung Co. is a $2 billion manufacturer of PCs, monitors and consumer electronics based in Taipei, Taiwan.

#90219b0732 08/07/1990 ~Business Wire
HAUPPAGE, NY (AUG. 7) BUSINESS WIRE - Richard Projain, president and chief executive officer of ElectroSound Group Inc., (AMEX:ESG), Tuesday reported the operating results for the fiscal year ended May 31, 1990.

For the year the company incurred a loss of $207,000 which included the following special items:

-- A gain of $418,000 on the June 1989 sale of the assets of the company's commerical duplicating equipment manufacturing operations.

-- A charge of $200,000 for the costs associated with relocation of duplicating capacity from a closed facility.

-- A fourth quarter gain of $138,000 from the settlement of an insurance claim.

The prior fiscal year loss of $8,267,000 reflects charges of $9,409,000 associated with the company's investment in Memory-Tech, the compact disc joint venture with Mitsubishi Corp. This joint venture was sold to Mitsubishi at the end of the prior fiscal year.

As a result of the June 1989 disposal of duplicating equipment and computer peripheral distribution activities sales declined 31 percent for the year to $23,602,000.

Sales of duplication activities declined 8 percent for the current fiscal year. During the fourth fiscal quarter, sales declined 56 percent including a 32 percent decline in duplicating services. These declines reflect the overall slowness in the music industry.

The relocation of the company's West Coast audio tape duplicating capacity to its other existing operations on Long Island and Indiana has now been completed.

#90219b0752 08/07/1990 ~Business Wire
FAIRFIELD, N.J. (AUG. 7) BUSINESS WIRE - Gibralter Biological Laboratories Inc. of Fairfield, received approval July 12 from the United States Environmental Protection Agency to offer its in vitro Hepatitis B protocol.

The announcement follows the EPA approval June 11 of Gibralter Laboratories in vivo Hepatitis B protocol. Before these protocols became available, no protocol for disinfectants was recognized by the U.S. EPA as effective in destroying the deadly Hepatitis B virus (HBV).

According to Dr. Dan L. Prince of Gibralter Laboratories, ''The availability of this approved protocol, for the first time, will allow disinfectants to be tested to assure they will kill HBV. This will help eliminate infection from this deadly virus.''

The EPA's recognition of this protocol will enable a direct test for disinfectant manufacturers to certify their product kills the HBV virus, thereby enabling hospitals, physicians, dentists and other health care agencies to provide safer health care.

Hepatitis B, which is spread through blood, sexual contact, and on contaminated medical/dental utensils, causes chronic liver disease in human begins.

It is the leading cause of cirrhosis and liver cancer and the world's ninth largest killer. One to one-an-a-half million Americans are chronic carriers of HBV, and approximately 300,000 new cases appear each year in the United States (a 200 percent increase since 1975 in adults aged 25 to 29). Worldwide, 5 percent of the world's population is chronically infected.

The in vitro protocol offers a tremendous stride forward as it eliminates the need for controverisal animal testing. This makes it the most consumer-acceptable technology available for the formulation of disinfectants efficacious against HBV.

By allowing manufacturers to certify that their disinfectants kill Hepatitis B virus, the new protocol will be critically important not only to hospitals, health care professionals and patients, but to the business community, as it opens new marketing niches for antimicrobials in the $350 million U.S. disinfectant marketplace, and ushers in a new area of high-technology disinfectants.

The in vitro Hepatitis B protocol is also approved for use in West Germany Austria and Switzerland.

#90219b0757 08/07/1990 ~Business Wire

WOODBURY, CT (AUG. 7) BUSINESS WIRE - Graystone Cos. Inc. Tuesday announced preliminary results for the second quarter ending June 30.

The company reported revenues of approximately $413,301 and a pre-tax net loss of approximately $377,556.

For the six months ended June 30, the company reported revenues of approximately $1,041,215, a 45 percent increase over revenues for the same period in 1989 of $721,064.

Net loss for the six month period 1990 is approximately $627,381.

The company previously reported the cancellation of credit lines with two major Connecticut banks. Efforts to secure replacement financing have not been successful to date. The company has filed a Form S-1 application with the Securities and Exchange Commission to register 575,000 additional shares of common stock for public sale through warrant offerings proposed by the company.

The company continues to attempt to borrow or raise equity capital of approximately $250,000 which it believes would give it sufficient working capital through October 1990.

The Graystone board of directors rejected on Aug. 3 an offer of short term financing from Hibbard Brown & Co., New York City, because of lending terms the directors felt were unacceptable.

As cost cutting measures, the company recently took the following steps:

The workforce has been reduced to 30 full time employees, a reduction of 10 persons from its 1990 high. Additional layoffs are anticipated. The company closed its Washington D.C. sales office, eliminated all research and development activities and drastically scaled back its marketing activities.

William Giarratana, vice president - marketing communications, and a director, has taken an unpaid leave of absence for an indeterminate period.

The company will further abandon its lease at its Woodbury location and integrate its prinicpal executive offices into the newly-expanded Waterbury facilities.

In other developments, the company announced that Stephen B. Hadelman resigned as a director effective Aug. 3.

NORTH SPRINGFIELD, Vt. (AUG. 7) BUSINESS WIRE - Vermont Research Corp. announced that net product sales for the third fiscal quarter ended June 30, 1990 increased substantially from the third quarter of 1989.

Net product sales were $1,173,000, up $282,000 from $891,000 one year ago. There was a net loss for the quarter amounting to $16,000, or $0.01 per share as compared to net income for the third quarter of 1989 of $342,000 or $0.10 per share.

The quarterly net income of last year resulted primarily from a one-time gain on the curtailment of a pension plan.

Operations have improved in each successive quarter of this fiscal year. In the third quarter of this year net sales increased by $201,000 over net sales in the second quarter of this year and the quarterly net loss decreased by $40,000 in the third quarter.

As indicated by the increase in sales, the company has received orders and has shipped products at a higher level than in the previous quarters of the year.

The company announced a new product for the telephony industry during the past quarter and shipments are expected next fiscal year. Over one year ago the company conceived of an additional solid state storage product, designated the K2, to supplement the standard Model 4256 solid state product now being sold.

The K2 is in final development and production will start in 1991. A significant order for prototypes of the K2 has been received from a major computer manufacturer. Other computer manufacturers have shown significant interest in the K2.

WESTBURY, NY (AUG. 7) BUSINESS WIRE - E-Z-EM Inc., an international

manufacturer and distributor of diagnostic products, has signed a licensing agreement with Baylor College of Medicine, in Houston, for the exclusive worldwide rights to a patented antigen of Helicobacter pylori.

Commonly known as H. pylori, this bacterial infection of the gastrointestinal tract is the predominant cause of gastritis, and peptic and duodenal ulcers. The antigen was developed in the laboratory of Dr. David Y. Graham, one of the world's leading H. pylori researchers, and his associates at Baylor College of Medicine, Dr. Doyle J. Evans Jr., and Dr. Dolores G. Evans.

H. pylori is a recently discovered bacteria that infiltrates the stomach lining and plays a key role in the development of inflammations and the subsequent occurrence of peptic and duodenal ulcers. These painful irritation strike 1 out of every 50 Americans each year. In 1987 alone, the National Center for Health Statistics recorded 4,580,000 new cases of peptic ulcer.

Dr. Graham, Chief, Gastroenterology Division, Baylor College of Medicine and Chief, Digestive Disease Section at the Houston VA Medical Center, stated that, ''With recent research showing H. pylori as having a clear link and potential major role in the pathogenesis of gastric duodenal ulcers, the need to detect and diagnose H. pylori is critical.''

According to Philip Meyers, M.D., E-Z-EM co-founder and Medical Director, ''This agreement is a major demonstration of our long-term corporate commitment to the detection and diagnosis of gastrointestinal diseases and disorders. Efforts are already underway to introduce at least two H. pylori test products into the marketplace within the next year. Strategically, we see these tests supporting the need to perform upper G.I. barium studies, thus enhancing our core business as the leading manufacturer of barium sulfate diagnostics in North America.''

Herbert Hechter, E-Z-EM vice president and chief scientist stated that, ''This patented antigen has demonstrated a specificity for the H. pylori antibodies of 100 percent, and a sensitivity of 98 percent.

Gastrointestinal disease is the number one reason why individuals seek out medical care from their family physician or local hospital. According to the National Digestive Disease Information Clearinghouse, upper gastrointestinal distress is also a leading cause of absenteeism in the U.S. accounting for over 200,000 cases each day.

HOUSTON (AUG. 7) BUSINESS WIRE - Cooper Industries Inc. (NYSE:CBE) announced today that it has signed an agreement to acquire AB Sani Maskiner of Malmo, Sweden.

Terms of the agreement were not disclosed.

AB Sani Maskiner is a privately owned manufacturer of machinery for the assembly of window blinds and shades, and of components for the fabrication of blinds and shades. It has annual sales of approximately $20 million. Its manufacturing facility is located in Malmo, Sweden, and it maintains warehouses in the U.K., West Germany and the United States.

AB Sani Maskiner would become part of the Kirsch Division of Cooper Industries, which manufactures drapery hardware and window products. The Kirsch Division is part of Cooper's Tools & Hardware business segment.

Houston-based Cooper Industries, with 1989 revenues of $5.1 billion, is a diversified, worldwide manufacturer of electrical products, electrical power equipment, tools and hardware, automotive products, and petroleum and industrial equipment.

#90219b0788 08/07/1990 ~Business Wire
ALBANY, N.Y. (AUG. 7) BUSINESS WIRE - Lawrence Insurance Group Inc.'s (AMEX:LWR)(LIG) net earnings for the three months ended June 30 were $1,773,000 which represents a 35 percent increase over net earnings of $1,309,000 for the same period in 1989.

Operating results for the second quarter of 1990 reflect the positive impact on earnings generated as result of LIG's acquisition of United Republic Reinsurance Co. (URRC) during the fourth quarter of 1989. Per share earnings increased to 13 cents on 14,121,482 shares outstanding from 12 cents on 10,963,587 shares for the same quarter last year.

Gross premiums increased 51 percent over the second quarter of 1989. Consolidation of URRC's financial data with LIG for the three month period ended June 30 accounted for 22 percent and 29 percent was contributed by the other companies, United Community and Senate.

Net premiums earned increased by 78 percent reflecting the fact that less reinsurance was purchased, thus keeping more of the business in-house. Net investment income rose 59 percent reflecting the increase in the average invested asset base between the second quarters of 1990 and 1989.

Total operating expenses rose in approximately the same proportion as the increase in net premiums earned.

On a year-to-date basis, net earnings for the six months ended June 30 increased 46 percent to $4,048,000 from $2,773,000 for the same period in 1989. Earnings per share increased 16 percent to 29 cents on 14,121,482 shares outstanding from 25 cents on 10,963,587 shares.

Through its subsidiaries, Lawrence Insurance Group Inc. is currently licensed or accredited in 45 states and Washington with applications in process in the remainder.

The group is comprised of United Community Insurance Co.; United Republic Reinsurance Co.; Senate Insurance Co.; and Commercial Resources Insurance Co. Executive offices of Lawrence Insurance Group Inc. are located at 770 Broadway, in New York City, while the operating headquarters is at 33 Elk Street, Albany, N.Y.

#90219b0796 08/07/1990 ~Business Wire

ROCHESTER, NH (AUG. 7) BUSINESS WIRE - Cabletron Systems Inc. (NYSE:CS) one of the local area networking industry's fastest growing companies and a leading supplier of connectivity hardware and software products, Tuesday announced that David Kirkpatrick has joined the company as chief financial officer, while John Caruso has been hired as director of manufacturing.

According to Craig Benson, Cabletron's chairman and chief operating officer, ''We are pleased to be able to welcome these seasoned

professionals to our management team. We have hired individuals who share similar experiences with dominant corporations within their industries, and we believe those experiences will enable Cabletron to anticipate the ongoing growth and demands of the networking industry.''

Reporting to Benson, Kirkpatrick is responsible for all areas of finance, accounting and related functions for Cabletron's worldwide operations.

Kirkpatrick assumes his new role on Aug. 20, 1990 after 15 years of extensive experience as vice president, finance and chief financial officer with Zenith Data Systems, a micro computer division of the $1.5 billion Zenith Electronics Corp. Mark Lapham, Cabletron's current chief financial officer has agreed to work through an interim and transition period with Kirkpatrick before pursuing other career interests.

''David brings a tremendous track record and background with him to the chief financial officer position. At Zenith, he has proven his abilities with one of the largest corporations in the world,'' said Benson. ''During his tenure with Zenith, David helped the company grow from $60 million to $1.5 billion in sales. We believe this type of experience will be instrumental in Cabletron's future growth.''

Kirkpatrick holds a masters in business administration in finance from Northwestern University, and a bachelor of arts degree in economics from Dennison University.

Caruso joins the company as director of manufacturing with complete responsibility for worldwide manufacturing operations including overseeing production control, materials, purchasing, quality assurance, test engineering and manufacturing engineering.

Caruso assumes his role after 12 years with Data General Corp. where he has served as a plant manager, director of technology and corporate quality, and director of manufacturing for the $1.3 billion manufacturer of microcomputers, minicomputers and medium-range computer systems.

Caruso began his extensive career with the RCA Corp., where he spent eight years in various roles including manager of labor relations, compensation and employee development.

Caruso holds both a masters in business administration at Fairleigh Dickinson University and a bachelor of science degree in business administration at Oklahoma City University.

Cabletron Systems Inc.., headquartered in Rochester, develops and manufactures networking products based on its Integrated Network Architecture, a strategy which provides standards-based products and services necessary to build and manage a global, distributed platform of

interconnected local area networks. The company currently has a worldwide installed base exceeding 1.3 million nodes.

#90219b0808 08/07/1990 ~Business Wire

WAYNE, PA (AUG. 7) BUSINESS WIRE - Laurentian Capital Corp. (ASE: LQ), a life insurance holding company based in Philadelphia, is pleased to announce continued increases in earnings following a period of operational restructuring.

The company Tuesday reported unaudited consolidated net income for the second quarter of $1,690,000, or 10 cents per share, compared to a net income of $923,000, or 5 cents per share, for the correspondiing period in 1989.

The increase in earnings of $767,000 over last year reflects improved business performance. For the six-month period ended June 30, the company had an unaudited net income of $2,794,000, or 16 cents per share, as compared to an unaudited net income of $1,437,000, or 8 cents per share, for the corresponding period in 1989.

Consolidated revenues were $63,312,000 for the first six months of 1990 as compared to $72,948,000 for the corresponding period in 1989. The decline in revenues is due primarily to past divestitures of certain unprofitable lines of business in 1989 as well as lower realized investment gains.

Investment income continues to improve following a period of restructuring of the investment portfolio. Earnings per share for both the three- and six-month periods ended June 30 were based upon 16,229,000 shares outstanding for both 1990 and 1989.

The improvement in earnings follows a period of change with administrative and operational restructuring, divestitures and consolidations to produce the expected efficiencies in the business. The company continues to invest and concentrate on sales and distribution development with its life and health insurance specialty markets.

Laurentian Capital Corp. has assets of approximately $890 million and total life insurance in force in excess of $7 billion. Laurentian's primary life insurance subsidiaries are: Loyal American Life Insurance Co. of Mobile, Ala.; Prairie States Life Insurance Co., of Rapid City, S.D.; and American Defender Life Insurance Co., of Raleigh, N.C.

#90219b0813 08/07/1990 ~Business Wire

CLEVELAND (AUG. 7) BUSINESS WIRE - The Steel Service Center Institute (SSCI) Tuesday forecast that business activity for most major metal-consuming industries would hold steady through year-end, propelling the $24 billion steel service center industry to higher shipments in 1990.

Andrew G. Sharkey, SSCI president, today predicted that total 1990 steel service center shipping levels would climb 1 percent ahead of the 23.7 million tons shipped last year.

''Total service center shipments in the range of 23.9 million tons is now a likely scenario, and would result in the industry's eighth consecutive record shipping year,'' said Sharkey. ''Unfortunately, volume doesn't necessarily translate into operating profit and margin. Economic conditions continue to vary widely for SSCI members both by region and by product.''

Through six months, service centers' average daily shipping rate is running 1.5 percent ahead of last year's pace, when service centers shipped more than 23.7 million tons of steel products for the year.

In the first half, all product categories, with the exception of carbon flat rolled, showed average daily shipping rate increases over the similar 1989 period. The average daily shipping rates for structurals and plate were up 9.7 percent and 8.8 percent, respectively, through the second quarter.

The Steel Service Center Institute is a trade association representing the interests of 85 percent of the steel service center industry. America's steel service centers purchase and distribute one out of every three tons of carbon industrial steel products and nearly half of all stainless steel produced in the United States.

Service centers are the largest single customer group of the domestic steel industry and serve the metal supply needs of more than 300,000 manufacturers and fabricators through plant locations nationwide.

WINDSOR, CT (AUG. 7) BUSINESS WIRE - The board of directors of ADVO-System Inc. (NASDAQ/NMS:ADVO) has approved the purchase by the company of up to 500,000 shares of the company's common stock.

The purchase will be for cash from time to time within the next few months at prevailing market prices, either in the over-the-counter market, in private transactions, or otherwise, for corporate purposes.

The company currently has 12,790,637 outstanding shares of common stock.

Robert Kamerchen, chairman and chief executive officer of the company said that the company is undertaking this program because it believes that its stock is undervalued at current market prices. He also said that the company has no specific plans regarding the use of the shares to be purchased.

ADVO is the nation's largest company specializing in Direct Mail and Direct Mail Marketing services. The company's brand of shared mail, Marriage Mail and Mailbox Values, are distributed nationally to over 52 million households weekly.

ADVO also processes solo mailings and offers limited printing and transportation services. It has 20 production facilities and 69 sales offices nationwide. ADVO's Corporate headquarters are located at One Univac Lane, Windsor, Conn., 06095.

#90219b0820 08/07/1990 ~Business Wire

PROVIDENCE, RI (AUG. 7) BUSINESS WIRE - Nortek Inc. (NYSE:NTK) announced Tuesday that net sales from continuing operations for the second quarter of 1990 totaled $283,715,000 compared to $286,250,000 for the second quarter of 1989.

Net earnings for the quarter were $3,700,000 compared to $5,100,000 for the second quarter of 1989. The 1989 second quarter included a net after-tax extraordinary gain of $5,450,000 from the exchange of senior notes for convertible debentures, compared to a gain on debt requirements in the 1990 second quarter of $3,600,000.

Pre-tax operating earnings from continuing operations for the quarter were $8,951,000, a 39 percent increase over $6,440,000 reported for the second quarter of 1989.

For the second quarter of 1990, net sales increased slightly at the Air Conditioning and Dixieline Products Groups, offset by a 7 percent drop in sales at the Plumbing Group, as compared to the second quarter of 1989.

Pre-tax earnings improved significantly at the Building Products Group and more than doubled at the Air Conditioning Group, but these gains were partially offset by losses at the Plumbing Group, as compared to the second quarter of 1989.

During the quarter, the company purchased, at a discount, $16,608,000 face amount of its outstanding subordinated debentures.

For the first six months of 1990, net sales from continuing operations were $549,434,000 compared to $551,296,000 for the first six months of 1989. Net earnings for the first six months were $400,000 compared to net earnings of $2,450,000 for the first six months of 1989.

The first six months of 1989 also included a net after-tax extraordinary gain of $5,450,000 from the exchange of senior notes for convertible debentures and $1,250,000 gain on retirement of debt, compared to a gain on debt retirements of $5,300,000 in the comparable 1990 period.

More significantly, pre-tax operating earnings from continuing operations for the first six months were $14,019,000, a 25 percent increase over $11,181,000 reported for the first six months of 1989.

For the first six months of 1990, net sales increased at the Air Conditioning and Dixieline Products Groups, offset by lower sales levels at the Wood and Plumbing Groups. Pre-tax earnings trebled at the Air Conditioning Group and increased at the Building Products Group, partially offset by a significant drop in earnings at the Plumbing Group, compared to the first six months of 1989.

Operating results at Universal-Rundle Corp., in the Plumbing Group, have been particularly hard hit by weak market conditions, lower volume of shipments to its major customer and a shift of product mix from high volume wholesale customers to retail and other markets, which carry much higher selling costs.

The company continued, and is continuing, its debt reduction program. During the first six months of 1990, the company purchased, at a discount, $28,152,000 face amount of its outstanding subordinated debentures.

Richard L. Bready, president and chief operating officer of Nortek Inc., stated that ''the improvement in our operating earnings reflects the investments made and strategies put in place over the past year and are encouraging.

''Our operations do, however, continue to be impacted by weak market conditions in the building industries and continued improvement in our operating results are highly dependent on conditions in home building and the other industries that we serve.''

Nortek Inc. is a diversified Fortune 500 corporation, manufacturing and marketing residential and commercial building products and commercial ventilating and air conditioning systems.

HOUSTON (AUG. 7) BUSINESS WIRE - Sanifill Inc. (AMEX:FIL) has entered into letters of intent to acquire three nonhazardous disposal sites.

Two of the sites receive construction and demolition waste, and one is a special waste site, permitted to dispose of nonhazardous industrial waste.

For their respective years ended Dec. 31, 1989 these companies reported unaudited combined revenues of approximately $8,191,000 and unaudited income before taxes of approximately $4,559,000.

Consideration will consist of Sanifill common stock and cash. Each of these proposed acquisitions is subject to the performance and completion of extensive environmental and financial due diligence and the negotiation of final acquisition agreements.

Threrafter, closings are expected to occur on or before Sept. 30.

Sanifill has also terminated negotiations on a previously announced letter of intent to acquire a new permit on a construction/demolition site.

Currently Sanifill has six letters of intent outstanding, including the three announced above.

Sanifill Inc., headquartered in Houston, is an environmental services company specializing in nonhazardous waste disposal.

#90219b0840 08/07/1990 ~Business Wire

EL SEGUNDO, Calif. (AUG. 7) BUSINESS WIRE - Softsel Computer Products Inc. (NASDAQ:SOFS) Tuesday reported a net loss of $1,104,000 for the second quarter, down from the same period in 1989, while earnings per share decreased to a loss of 4 cents.

Net income for the calendar year 1990 decreased to $1,379,000, down 34 percent from the same period in 1989, while earnings per share decreased to 7 cents.

Net sales for the second quarter were $325,377,000, up 129 percent from the same period in 1989. Net sales for the six months ended June 30, 1990 increased to $529,613,000, up 83 percent from the same period in 1989.

''The increase in our sales level is not only reflective of our recent merger with Microamerica and our consistent increase in international sales, but also the continued growth rate of the combined entity of Softsel and Microamerica,'' said President and Chief Executive Officer Michael D. Pickett.

''We are very pleased with the sales level, and operating expenses continue to run slightly higher than expected in the U.S. and Canada as the merger process progresses. We are essentially still on track to complete the merger process by October 1990 and to achieve the economies of scale we expected.''

In June, Softsel chose Merisel as its new company name, reflecting the company's desire to combine the best of Microamerica and Softsel. This name change is pending a shareholders' vote, scheduled for Aug. 21, 1990.

Softsel Computer Products, soon to be Merisel, is one of the largest distributors of microcomputer hardware and software products to computer resellers worldwide. The company presently stocks over 7,000 products from more than 400 hardware and software vendors for sale to 35,000 computer resellers in the United States.

International operations account for approximately 30 percent of sales and consist of seven wholly owned subsidiaries serving resellers in Canada, Europe, Latin America and Australia. The company supplies products for microcomputer platforms including Apple Macintosh, IBM and compatibles, and a variety of UNIX systems, in addition to offering a wide range of services to help resellers support these products.

SCHEDULE 14D1

SEC - AMENDMENT NUMBER: 4

ANNOUNCEMENT:

The offer expired on Aug. 6, 1990, with a total of 10,456,788 common shares and 17,750 series B shares tendered and accepted, representing 96 percent and 100 percent, respectively, of the outstanding common and B shares.

-30- 452
#90219c0080 08/07/1990 ~Comtex
SCHEDULE 14D1

SEC - AMENDMENT NUMBER: 3

ANNOUNCEMENT:

The company announced in its 14D-9 filed on Aug. 2, 1990 that its board has determined that the offer is inadequate. On Aug. 6, 1990, the purchaser filed an amended complaint in Missouri alleging that the company made false and misleading statements in its 14D-9 filing. The company is seeking, among other things, an order forcing the company to call a special meeting and provide a shareholder list to the purchaser, and injunctive relief to remedy the violations.

NEW YORK (AUG 7) COMTEX - Today's weekly auctions of Citicorp Auction (CAPS) Paper set rates of 7.793% for 91-day paper, down from 7.8192% last week, and 7.7186% for 182-day paper, down from 7.728% last week.

For the 91-day paper, accepted bids ranged from a low rate of 7.789% to a high rate of 7.797%. A total of $410 million in bids was submitted, of which $50 million was accepted. Citicorp said that 100% of the bids at the high rate were accepted on a pro-rata basis.

For the 182-day paper, accepted bids ranged from a low rate of 7.698% to a high rate of 7.73%. A total of $370 million in bids was submitted, of which $50 million was accepted. Citicorp said that 100% of the bids at the high rate were accepted on a pro-rata basis.

Citicorp will take bids totalling $50 million on new 91-day paper and $50 million on new 182-day paper next Tuesday.

TOKYO (AUG. 7) - Crude oil prices rose to 24.75 dollars a barrel on Tokyo's spot market Tuesday morning, up 2.5 dollars from Monday's closing level, traders said.

It was higher than the closing price of 24.05 dollars in New York overnight.

Crude oil prices have been on the steady rise on the Tokyo market since Thursday, when Iraq invaded Kuwait.

SINGAPORE (AUG. 7) - Chinese Premier Li Peng will make a three-day visit to Singapore from Saturday, the foreign ministry confirmed Tuesday.

A ministry statement said Mr. Li, who is making the visit at the invitation of his Singapore counterpart, Lee Kuan Yew, will call on President Wee Kim Wee.

He will also have talks with Mr. Lee and First Deputy Prime Minister Goh Chok Tong.

Mr. Li will be accompanied by Chinese Foreign Minister Qian Qichen, Minister for Foreign Economic Relations and Trade Zheng Tuobin and senior officials, the statement added.

NEW DELHI (AUG. 7) - Nine children were killed and 20 injured Tuesday when a school bus in which they were travelling was hit by a passenger train in the northwestern Indian state of Rajasthan.

The accident occurred at an unmanned railway gate near Jaipur city. Seven of the injured children were in critical condition in local hospitals.

United News of India news agency quoted local officials as saying the bus driver miscalculated the time for crossing the railway track while the passenger train was approaching the point.

TOKYO (AUG. 7) - Japan's Trade Conference, chaired by Prime Minister Toshiki Kaifu, decided Tuesday to set up a working panel to further promote imports, officials said.

The body, called the Import Board, will be made up of Japanese government officials as well as Japanese and foreign businessmen, and will study measures to boost Japanese imports, they said.

The 30-member Trade Conference is composed of economic and trade ministers and private sector trade experts.

WASHINGTON (AUG. 7) - Iraqi President Saddam Hussein told a ranking U.S. diplomat that Iraq would attack Saudi Arabia if it shuts down oil pipelines carrying Iraqi crude across its territory to the Red Sea, The Washington Post reported Tuesday.

The Post, citing an unidentified official, said Mr. Hussein delivered the specific warning Monday in a meeting with U.S. charge d'affairs in Baghdad, James Wilson.

The Iraqi president further warned that if U.S forces intervened in the region, Iraq would "embarass" the United States, the official told the Post.

Mr. Hussein also told Mr. Wilson that Kuwait now belongs to Iraq and there would be no going back, administration officials told the Post. One official characterized his message as: "It's a done deal."

State Department spokeswoman Margaret Tutwiler noted Monday that Mr. Wilson had been summoned to the meeting with Mr. Hussein but declined to comment on the contents of the two-hour discussion.

"We viewed it as a very serious meeting," she said.

Meanwhile, the Pentagon presented U.S. President George Bush with a proposal for a multinational naval force, including the Soviet Union, should it be necessary to enforce a U.N. trade embargo against Iraq, the Post said.

The newspaper, citing U.S. officials monitoring the buildup of naval forces in the Middle East, said a Soviet guided missile destroyer with two supply ships was reported entering the strait of Hormuz, which leads into the Gulf.

The French government was preparing to send three warships to supplement two French ships already stationed in the Gulf and Briton has ordered in

two more ships to support the cruiser HMS York, the officials told the Post.

The United States has aircraft carrier-led battle groups in the eastern Mediterranean and in the Arabian sea, and has ordered the carrier Saratoga the battleship Wisconsin and eight other ships to set sail Tuesday for the eastern Mediterranean.

MANILA (AUG. 7) - An army sergeant was acquitted Tuesday of the 1986 murder of Rolando Olalia, leader of the Philippines' largest legal leftist group, government television reported.

A local court in Antipolo town east of here acquitted Sergeant Franco Espartero of the murder of Mr. Olalia and his driver in November 1986, saying it had no evidence he was involved, state-run television reported.

Sgt. Espartero spent the past three years in jail after he was arrested on murder charges.

The killing of Mr. Olalia, who headed the New Nationalist Alliance (BAYAN), the country's largest leftist labor coalition, sparked a public outcry amid accusations that the government of President Corazon Aquino was incapable of controlling the military.

BAYAN has been accused by the military of being a front for communist insurgents, and rightist forces in the military are widely suspected of having abducted and killed Mr. Olalia and his driver.

SYDNEY (AUG. 7) - Australia's largest bank, Westpac Banking Corp., said Tuesday it would cut its prime rate and home loan rate in response to Canberra's recent easing of monetary policy.

Stuart Fowler, Westpac's managing director, said the prime rate for business customers would be cut 0.5 percentage points to 17.75 per cent next Monday.

The floating home loan rate will also be cut by 0.25 percentage points to 16.25 per cent on September 3, he said.

Mr. Fowler said he welcomed the recent move easing of interest rates by the central Reserve Bank, which last week cut official cash rates by about one per cent.

MANILA (AUG. 7) - The Philippine Air Force is seeking as much as 76 billion pesos (3.16 billion dollars) over 10 years to upgrade its aircraft and equipment, spokesman Avelino Abiol said here Tuesday.

Colonel Abiol said the air force commander, Major General Gerardo Protacio, had made the request at a meeting with legislators Monday.

The congressmen were reportedly sympathetic to the general's call for the 10-year modernization program, which he estimated would cost between 62.52 to 76.1 billion pesos (2.6 to 3.16 billion dollars).

The plan would cover the acquisition of advanced fighter aircraft and weapons, including missiles, and upgrading radar and communications facilities.

The program is aimed at bringing the Philippine Air Force to par with other forces in the region, Col. Abiol said.

The Air Force hopes to acquire at least two squadrons of fighters and is eyeing the U.S.-made F-16 or F-5E, the French Mirage 2000, the Israeli Kfir or the British Harrier.

Col. Abiol said the F-16 was the first choice, but they may not be able to afford it, adding that the air force hoped to pay for the aircraft and materiel as much as possible through countertrade or the exchange of goods.

The Philippines used a counter-trade package to pay for 18 S211 trainer jets from the Italian firm Agusta early this year.

The Philippine Air Force is one of the most primitive in the region, its only fighter aircraft consisting of more than a dozen F-5 jets acquired in the 1960s.

Col. Abiol said the air force also expected to acquire 29 MD 520 helicopters from the United States, the first four arriving in mid-August and the rest spread out in small groups until 1992.

#90219d2850 08/07/1990 ~French/German News Agency
BANJUL (AUG. 7) - The United Nations High Commissioner for Refugees (UNHCR) is currently providing aid to nearly 400,000 Liberian refugees in neighbouring countries, a UNHCR official said here Monday.

Of this refugee total, 215,000 were in Guinea, 110,000 in Ivory Coast and more than 50,000 in Sierra Leone, Maxime-Leopold Zollner de Mederios, UNHCR delegate to West Africa, told Agence France-Presse.

The exodus was creating enormous problems for the host countries and the for international community assisting the three nations, he said.

"Figures rise so fast that contributions we have received up to now no longer cover all needs", he added.

He was in Banjul to discuss the refugee issue with Salim Ahmed Salim, secretary general of the Organization of African Unity (OAU).

Mr. Ahmed Salim attended a mini summit of the Economic Community of West African States (ECOWAS) that opened here Monday focussing on the Liberian civil war and the possible dispatch of a peace-keeping force to Liberia to end the fighting.

BAGHDAD (AUG. 7) - The new pro-Iraqi government in Kuwait Tuesday decided to equalize the value of the Kuwaiti and Iraqi dinars, the official Iraqi News Agency (INA) reported.

INA, citing a statement issued by the "provisional government of free Kuwait," said the move was consistent with the "national relations of the two brother countries as well as supreme Arab... principles."

But INA did not say when the step would be implemented.

Before the Iraqi invasion of Kuwait last Thursday the Iraqi currency was trading at 1.115 Kuwaiti dinars.

BONN (AUG. 7) - The West German unemployment rate rose in July for the first time this year to 6.4 percent of the workforce from 6.2 percent in June, official figures showed on Tuesday.

A total of 55,700 people became unemployed in July taking the total to 1,863,700.

The head of the federal labour office Heinrich Franke said that the increase was due entirely to seasonal factors linked to the end of the school year.

But the number of jobs available increased in all sectors of the economy because of the effects of the process of German unification, he said.

Meanwhile the economy ministry reported that the number of people employed in June hit a record high level of 28.4 million people, representing an increase of two million since 1983 and of one million during the last two years.

Most of the new jobs were created in service industries, and 60 percent of them were done by women.

TOKYO (AUG. 7) - The International Finance Corp., an affiliate of the World Bank, announced Tuesday a 10-year bond issue for 10 billion yen (66 million dollars) with interest payable in Australian dollars.

The so-called dual currency offering, lead managed by Nikko Securities Co. Ltd. and Long-Term Credit Bank of Japan Ltd., carries a coupon rate of 7.1 per cent, the bank's Tokyo office said.

The issue price has been discounted to 95 per cent of face value, offering a yield to investors of around 7.47 per cent.

BANGKOK (AUG. 7) - Iraqi troops have killed one Thai national and detained more than 200 others in Kuwait, labour department officials said here Tuesday.

The victim, identified as Sangiam Kankaew, was a construction worker for the UGCC oil company, they said. He was shot dead Thursday while driving to a site near the border.

At least 200 Thai workers from sites near Kuwait city are still detained while eight workers were trapped in the Kuwait Tower, the officials added, citing a report from the Thai labour office in Iraq.

Prime Minister Chatichai Choonhavan said Monday he was ready to order the evacuation of thousands of Thai workers in Iraq and Kuwait if necessary.

BAGHDAD (AUG. 7) - An attack on Iraq or Kuwait would have "disastrous repercussions," a leading newspaper warned here Tuesday, as the official

press insisted that the two countries were prepared to foil any foreign intervention.

"Iraqi troops knew very well what they were doing when they decided to back the revolution in Kuwait. They have studied all the possibilities and have decided to cut off any arm raised against Kuwait or Iraq," vowed the influential Al-Joumhouriya newspaper.

Iraq said it sent troops into Kuwait last Thursday at the request of the "provisional government of free Kuwait," which it claimed had toppled the ruling Al Sabah family.

But Al-Joumhouria stressed that "Baghdad needed no authorization to intervene ... because Kuwait is but a part of Iraqi territory that ... the British colonial powers took away from Baghdad to weaken Iraq and deprive it of a real outlet on the Gulf."

The Iraqi operation came two weeks after an oil and border dispute in which Baghdad accused Kuwait of stealing oil and encroaching on its territory in an unmarked part of their frontier.

Ath-Thawra newspaper warned those "getting ready to carry out an aggression against Iraq and or to foil the Kuwaiti revolution."

"They must think beforehand of the disastrous repercussions that any aggressive act on their part would trigger," the newspaper said.

The remarks were echoed by all newspapers here, with the warnings aimed at the United States and their "Zionist (Israeli)" allies.

"Wiping up the remains of imperialism is a sacred national duty that Iraq has taken upon itself to purge the Arab nation of plotters," said Al-Qadissiyah,
 published by the defense ministry.

"The Al Sabah regime is finished and a new situation is moving, created by our united people on its united territory in Kuwait and Iraq," the newspaper added.

MANILA (AUG. 7) - Philippine President Corazon Aquino on Tuesday declined to wholly endorse broad sanctions imposed by the U.N. Security Council against Iraq, saying Manila would decide on specific measures with "our own national interest" in mind.

She said the United States would have to undertake "prior consultation with

our government" if Washington decided to launch a military operation against Baghdad from U.S. military bases in the Philippines.

"We will support all peaceful means to resolve this dispute, including those within the framework of the United Nations," Mrs. Aquino But she said "specific measures" would have to be decided "in the light of their merits in each given case depending on the facts and circumstances prevailing and taking into account our own national interest".

The U.N. Security Council on Monday overwhelmingly passed a resolution imposing mandatory trade, financial and military sanctions against Baghdad.

Philippine foreign department sources said its experts had counselled Manila to go no further than to support the current U.N. effort to seek a peaceful resolution to the conflict and that no condemnation should be made.

They said Manila needed Baghdad's support within the Organization of the Islamic Conference (OIC) to foil the membership bid in the OIC of the Moro National Liberation Front, which has been waging a separatist campaign in the south of the country.

The sources, who asked not to be named, said foreign department experts also feared the country's oil imports from Kuwait and Iraq would be cut and were concerned for the safety of close to half a million Filipino overseas workers in the Gulf if war engulfed the whole region.

The Philippines has up to 80,000 workers in Kuwait and 5,000 workers in Iraq. It imported more than 20 per cent of its oil from Kuwait and Baghdad in 1989.

Manila had recently been negotiating with Baghdad a new framework for an economic relationship based on Iraqi oil exports and a flexible commitment to buy Philippine products.

PORT MORESBY (AUG. 7) - Australian miner CRA Ltd. on Tuesday said it hoped to return to Bougainville island in Papua New Guinea, the site of its giant copper mine and the focus of the South Pacific's bloodiest conflict since World War II.

Speaking two days after the end of peace talks between the government of Papua New Guinea and secessionist rebels on Bougainville, Ian Johnson, CRA's chief here, said the company was keen to return to the island once the crisis was over.

"We certainly hope to go back to Bougainville and we are fully committed to going back," he said.

The company, which owns 53.6 percent of Bougainville Copper Ltd. (BCL), believes most of its assets have been damaged on the island since the government imposed a transport and communications blockade in May in response to a unilateral declaration of independence, he said.

Representatives of the Bougainville Revolutionary Army reached an agreement with the government this week to return services to the island, the site of a 16-month war which claimed more than 80 lives before a March cease-fire.

The Bougainville mine was mothballed in May last year during the height of the conflict, which began when government forces took the side of the company against local landowners seeking compensation for damages caused by mining.

"The government is clearly engaged in an activity that is much bigger than the Bougainville mine and at a subsequent time we will be asked to get involved in negotiations," Johnson said.

"We have been told of course that there will be re-negotiations of the mining agreement and the terms and conditions under which it operates.

"We are ready to do that when called upon," he said.

BCL's copper agreement, which should have been reviewed twice in 1981 and 1988, was allowed to lapse.

The company initially estimated that damage to equipment would be about 75 million U.S. dollars, but according to Johnson the figure could be higher.

BERLIN (AUG. 7) - The official number of people unemployed in East Germany in July was 270,017 or 3.1 percent of the workforce, representing an increase of 130,000 over June, officials said here on Tuesday.

Secretary of State for Labour Horts Kinitz said that 656,200 people were on part-time work which was particularly marked in agriculture where 12 percent of employees did not have work for a full week, textile and clothing 12 percent, and electronics nine percent.

At the end of July the economy had 27,728 job vacancies.

East Germany Secretary of State for the Economy Martin Dube said on Tuesday

that one million East Germans were either wholly or partially unemployed.

Meanwhile the official responsible for privatising East German companies, Reiner Golke, said that the East German economy was in chaos and that the next six months would be the most difficult.

"The economic situation is more dramatic than I had imagined, it is complete chaos, nothing is normal," Golke, who is responsible for privatizing 8,000 companies, told the East German Neue Zeit daily newspaper.

Golke, who was formerly head of the West German Bundesbahn rail network, said: "We're going from one abyss to another."

But he said that he was confident because the economy had "remarkable resources" and "well-trained people", and that "company chiefs are incredibly motivated, they see their salvation in the market economy".

BRASILIA (AUG. 7) - Brazil has invited 30 of its creditors holding more than half its foreign debt with private banks to send representatives to Brazil for an exchange of ideas before formal debt restructuring talks begin.

The government issued invitations to its principal creditor banks Monday by telegram, the government's chief debt negotiator, Jorio Dauster, told reporters.

The talks, he said, would give the government the opportunity to learn the banks' position before presenting them with a debt renegotiation proposal.

He said the talks probably would be held between Aug. 20 and Sept. 14, probably after the conclusion of negotiations with the International Monetary Fund for a 1.4 billion dollar stand-by credit.

An IMF technical mission is currently in Brasilia gathering information on the Brazilian economy for a report to Michel Camdessus, the IMF's managing director.

After that report is approved, Brazil will draft a letter of intent with the IMF to obtain a loan and then begin formal negotiations with the World Bank, the Inter-American Development Bank, the member countries of the Club of Paris and the commercial banks.

The 30 commercial banks invited to Brasilia hold 54 percent of the country's 72.1 billion dollar debt with private international banks.

Brazil's foreign debt, the Third World's largest, amounts to 114.7 billion dollars.

Without officially declaring a unilateral moratorium, Brazil suspended interest and amortization payments on its foreign debt in July 1989, because its foreign reserves had dropped to the critical level of seven billion dollars.

Brazil's foreign reserves are currently about eight billion dollars while its arrears total some 5.5 billion dollars, Dauster said.

#90219d3890 08/07/1990 ~French/German News Agency

LONDON (AUG. 7) - The WPP Group, the biggest advertising group in the world, on Tuesday reported that six-monthly profits were up by 76 percent from 26.03 million pounds in the same period of last year, to 46.03 million pounds (86 million dollars).

Sales rose by 74.6 percent to 2.25 billion pounds against 1.288 billion pounds.

The results were better than had been expected by analysts who had forecast 44 million pounds.

For the first time the results included the performance of Ogilvy and Mather which was taken over in June 1989.

In early trading WPP shares rose by 17 pence to 583 pence.

#90219d4000 08/07/1990 ~French/German News Agency

LONDON (AUG. 7) - Four Britons resident in Liberia are among 16 hostages taken in the capital Monrovia by maverick rebel leader Prince Johnson, the Foreign Office said here Tuesday.

The others included five Lebanese, two Liberians, two Germans, a Dutchman, an American and an Argentinian.

News from Liberia was "confused", the Foreign Office said, but Mr. Johnson had apparently said the captives would soon be freed, though without making it clear whether they would be released all together.

Some of the hostages had reportedly met up with journalists and were said to be in good health.

Mr. Johnson threatened last Saturday to arrest foreigners, which prompted intervention by U.S. marines from warships offshore.

Using helicopters, they evacuated nearly l00 people, mostly Americans, on Sunday and Monday.

Mr. Johnson was one of the leaders in the offensive launched late in December by former civil servant Charles Taylor to oust President Samuel Doe. He has since fallen out with Mr. Taylor, and their guerrilla forces have been fighting each other on the outskirts of Monrovia.

MOSCOW (AUG. 7) - Soviet deputy foreign minister Alexandre Belonogov met Tuesday with the U.S. Ambassador in Moscow, Jack Matlock, to discuss the Gulf crisis, the Soviet news agency Tass said.

The two diplomats "studied questions linked to the situation created in the Gulf by Iraq's invasion of Kuwait", the agency said.

-30- 507

#90219d4060 08/07/1990 ~French/German News Agency

MOSCOW (AUG. 7) - The Soviet Union is to have an exchange market next year where companies operating in the country can buy and sell foreign currencies against rubles, TASS news agency said Tuesday.

The decision marks a first step in the process towards making the ruble convertible, the date for which is usually given as the year 2000.

The authorities are now anxious to speed up the process given the current economic crisis, observers said.

The cabinet had decided Saturday to set up such a market as of January 1, TASS said.

The move was aimed at preparing the transition to a market economy and "developing wide cooperation of many types with foreign countries", the official news agency said.

The government's decision provided for the setting up of a "permanent federal market in Moscow, as well as regional and republican markets, which will be the centres for all dealings concerned with foreign currency to be carried out on the basis of market rates," TASS said.

The ruble is currently a non-convertible currency, with several rates operating. The dollar is officially worth 0.6 rubles at the commercial

rate, six rubles at the rate offered tourists and some 15 rubles on the black market.

"As of January 1, 1991, all enterprises having a judicial status in the Soviet Union will have the right to buy and sell foreign currency with Soviet rubles at the market rate," the government announcement said.

Trading would be based on "supply and demand on Soviet territory through interbank operations, operations on the exchange market, auction sales and other forms allowed by the law," it added.

Operations in the exchange markets would be controlled by the state bank, Gosbank, the foreign trade bank Vnechekonombank and the finance ministry.

The rate of the ruble could be regulated by using the federal and republican governments' exchange reserves and "foreign banks' means", TASS said.

Two foreign currency auctions have been held in the Soviet Union in the past year, and reforms to the law on enterprises in 1988 gave enterprises the right to open foreign currency accounts for their foreign dealings.

Since August 1, Soviet citizens have been allowed to hold foreign currency and spend it in special shops which accept only foreign money.

MANILA (AUG. 7) - Richard Lugar, head of the U.S. Senate subcommittee on Asia-Pacific affairs, will visit the Philippines from August 12 to 15 and will tour U.S. facilities in this country, diplomatic sources said here Tuesday.

He will meet President Corazon Aquino, Finance Secretary Jesus Estanislao and Defense Secretary Fidel Ramos, the sources said.

Mr. Lugar will also visit the northern city of Baguio, which was devastated by a major earthquake on July 16, they said.

He is to visit the U.S. Clark Air Base and Subic Naval Base in the northern Philippines as well as tour two U.S.-assisted economic projects in the southern city of General Santos, the sources added.

#90219d4200 08/07/1990 ~French/German News Agency
NICOSIA (AUG. 7) - Iraq on Tuesday denied it had threatened to attack Saudi Arabia, citing its non-aggression pact with the kingdom, as reports emerged of preparations to evacuate foreign residents from both Iraq and Kuwait.

An Iraqi spokesman said Baghdad was convinced that Saudi Arabia would not shut down a vital pipeline that carries Iraqi oil across Saudi territory to export terminals on the Red Sea.

"We don't believe that Saudi Arabia will stop crude oil from passing through its territory because this would seriously harm Iraq and nothing would justify such an action," said the spokesman, quoted by the Iraqi News Agency.

The United States was meanwhile moving swiftly to bolster its eight-vessel naval presence in the Gulf, as were Britain, France and -- according to U.S. press reports -- the Soviet Union.

Two U.S. aircraft carriers, the USS Eisenhower and the USS Independence, moved within range of launching warplanes that could reach Iraqi targets, U.S. Defense Department sources said.

The Iraqi spokesman denied a report earlier Tuesday in The Washington Post that Iraqi President Saddam Hussein had told the U.S. charge d'affaires in Baghdad that Iraq would attack Saudi Arabia if it shut down the pipeline.

He dismissed the Post article as part of a "conspiracy" aimed at "sowing confusion and dividing (Arab) ranks."

Regional analysts have said the Saudi pipeline, along with two others passing through Turkey to the Mediterranean, will have to be closed if an international embargo on purchases of Iraqi oil is to be effective.

The campaign to isolate Iraq has been spearheaded by the United States in the aftermath of Baghdad's August 2 invasion of neighboring Kuwait.

Amid speculation on Saudi reluctance to antagonize Iraq and its million-strong army, U.S. Defense Secretary Dick Cheney travelled to Jeddah on Monday to meet King Fahd.

As Baghdad's standoff with the rest of the world intensified, concern mounted over the fate of some 200 foreigners, mostly British and American, who had been rounded up by Iraqi troops in Kuwait on Monday and taken by

bus to Iraq.

But in Amman, Jordan, a Western diplomatic source said preparations were underway there for the evacuation of foreign residents from both Kuwait and Iraq.

In Rome, Iraqi Ambassador Mohammad al-Sahaf declared that his government "had made clear its readiness to facilitate the evacuation of foreigners to Iraq, where they could leave for Jordan."

There are some 3,800 U.S. citizens living in Kuwait, as well as 3,000 Britons, 300 West Germans and 250 French residents.

The United States warned that Iraq would be held responsible for the safety of the U.S. citizens detained on Monday, but added: "It's premature to call them hostages."

Nevertheless, the status of foreigners in both Kuwait and Iraq could prove a factor in U.S. military planning. White House spokesman Marlin Fitzwater said Monday that Washington was discussing "military possibilities" with Gulf states to prevent Iraq from expanding its invasion into Saudi Arabia.

Defense analysts in Washington have said the United States is not contemplating a land-based operation but has not ruled out air strikes on Iraqi economic and military targets.

The six-nation Gulf Cooperation Council, grouping Saudi Arabia, Kuwait, the United Arab Emirates, Qatar, Oman and Bahrain, was to hold a ministerial meeting in Saudi Arabia later Tuesday.

The members of the GCC, with enormous oil resources, are seen as being most vulnerable to any Iraqi expansion in the region.

Iraqi forces invaded Kuwait last Thursday after Baghdad accused its southern neighbor of joining a U.S.-inspired conspiracy to exceed its oil production quota and harm the Iraqi economy by depressing world prices.

#90219d4230 08/07/1990 ~French/German News Agency

BANGKOK (AUG. 7) - A lasting peace in Cambodia is closer than at any time since the war began 11 years ago, Australian Foreign Minister Gareth Evans said as he wrapped up a two-day vist to Thailand on Tuesday.

Mr. Evans, in an upbeat mood after a 30-minute meeting with Thai Prime Minister Chatichai Choonhavan which included discussion of Cambodia, said a comprehensive solution was "closer to completion than has been the case in any previous time.

"There are many more pieces in place than before," he added.

But he stressed that a proper agreement must include the Khmer Rouge, saying that if it is left out a genuine, lasting solution would be impossible.

"The Supreme (National) Council (a proposed transitional body), whatever the composition, must genuinely represent all strands. If any group is left out it is more likely to put the chances of peace back," said Mr. Evans.

The future role of the Khmer Rouge, held responsible for killing hundreds of thousands of Cambodians while in power from 1975-1979, has been the major stumbling block to peace in Cambodia.

Mr. Evans described recent suggestions that the Khmer Rouge was dangerously close to taking Phnom Penh as being alarmist.

He said the guerrillas' present tactics "were nothing much more than hit and run. There is no risk at present to Phnom Penh falling," he said.

#90219d4270 08/07/1990 ~French/German News Agency

LONDON (AUG. 7) - The British Broadcasting Corporation said Tuesday Iraq had stepped up attempts to jam its World Service broadcasts in Arabic since the invasion of Kuwait.

A number of shortwave frequencies were affected, but none carrying World Service programmes in English.

''Jamming the Bbc is always the last resort of those who wish to suppress the truth. In a way it is a tribute to the role of the World Service at times of crisis,'' said service deputy chief David Witherow.

The Bbc said its engineers traced the jamming to a site south of Baghdad. It displayed a so-called ''wobble-type'' electronic modulation typically associated with Iraqi interference. Iraq had first tried to jam the Bbc during the war with Iran.

#90219d4390 08/07/1990 ~French/German News Agency

ROUBAIX, France (AUG. 7) - French thermal underwear maker Damart said Tuesday it had taken control of the Valero company and its Orvale holding, France's leading lingerie maker.

Damart already held a 25 percent stake in Orvale and will inject 100 million francs (18.5 million dollars) into Valero.

Valero, set up in 1986, produces lingerie under the Silhouette and Tropic labels and under licence for Yves-Saint-Laurent, and had a turnover of 700 million francs (129 million dollars) last year.

Damart saw its consolidated net profit fall 4.8 percent last year to 145.6 million francs (27 million dollars), and said the Valero acquisition would enable it to pursue the necessary diversification of the thermal underwear specialists after three mild winters.

#90219d4410 08/07/1990 ~French/German News Agency

ANKARA (AUG. 7) - Turkey, as Iraq's neighbor a new focus of attention in the Gulf crisis, for the last 10 years has allowed the U.S. Army use of "facilities" where U.S. fighters and bombers maintain a permanent rotation.

Western military sources here said under the agreement, 14 to 18 U.S. F-111 bombers and 44 F-16 fighters were in permanent rotation on the Turkish air base of Incirlik, near Adana not far from the Syrian border and 600 kilometers (375 miles) from the border with Iraq.

The F-111 from bases in the United States and Britain and the F-16 from the base in Toreron in Spain are all part of rotating squadron known as the 39th tactical group, the source said.

The latest group of 14 F-111 bombers arrived in Turkey on July 19 and was scheduled to return to Britain on August 10, a separate source close to the U.S. Embassy here said.

Turkey temporarily cut back these "facilities" in a retaliatory measure in late 1989 when the U.S. Senate tried to push through a resolution to designate a date of national remembrance for the "Armenian genocide of 1915 to 1923" under the former Ottomin Empire.

But the Senate failed to pass the resolution and Ankara later restored use of the facilities.

They are part of a five-year framework between Ankara and Washington called the Defense and Cooperation Agreement (DECA), which is due to expire on December 18.

DECA, signed on March 29, 1980 in Ankara, granted U.S. military forces various "facilities" in 12 installations under Turkish Army headquarters, under the heading "support for North Atlantic Treaty Organization defense plans".

The Incirlik air base is the biggest of these installations, and under the DECA accord the U.S. Army has use of its airfield, of the Mediterranean port of Iskenderun, and access to oil supplies at Yumurtalik, at the terminal of an Iraqi pipeline that crosses Turkey.

The number of U.S. military personnel present in Turkey is a classified secret. The sources estimate their number at 5,000 to 10,000, though said it was difficult to know how may were there with NATO or how many as military instructors in the Turkish army.

-30- 2372

#90219d4540 08/07/1990 ~French/German News Agency

LONDON (AUG. 7) - The five percent increase in fuel prices since Iraq's invasion of Kuwait could push Britain's inflation rate to as high as 10.7 percent in August from the current 9.8 percent, according to some City economists.

Oil companies have already raised petrol prices by between 5.5 and 10.5 pence per gallon (2.3 to 4.3 U.S. cents per litre).

David Cocker of Chemical Bank said these rises would push year on year inflation to 10.7 percent in August, instead of the previously predicted 10.1 percent and the current 9.8 percent.

James Capel is predicting year on year inflation of 10.6 percent in August, while UBS-Phillips and Drew put it at 10.3 percent and 9.25 percent for the whole of 1990.

The rise in oil prices will have only a marginally beneficial effect on the country's balance of payments and public coffers, given that North Sea oil accounted for only 6.4 percent of exports and 1.2 percent of state revenue last year.

The London Business School has calculated that oil prices of 28 to 30 dollars a barrel would mean a 0.2 percent reduction in the growth of the British economy in 1991 and 1992.

-30- 1343

#90219d4550 08/07/1990 ~French/German News Agency

TOKYO (AUG. 7) - Japan, by showing solidarity for the first time with the United States and the European Community over a Middle East crisis, appears ready to assume an international political role compatible with its economic might, analysts here said Tuesday.

In the past, Japan always maintained its own economic interests above any

political considerations, they said, citing as an example Tokyo's refusal to participate in the embargo against Iran during the 1979 hostages crisis.

The Japanese government has displayed unusual political courage not only by joining the embargo on Iraqi oil and following U.S. and EEC actions, but by announcing its own sanctions without even waiting for the United Nations commercial, financial and military boycott to be voted.

As early as Sunday evening, Prime Minister Toshiki Kaifu had banned all crude imports from Iraq and Kuwait, suspended all exports to the two countries and branded President Saddam Hussein's invasion of Iraq's small southern neighbor as the "unpardonbable conduct of a sovereign state."

It was the first time Japan, which is totally dependent on imports for its oil needs, had decided on such an embargo.

But it was not an easy decision.

Iraq and Kuwait together provide 12 per cent of Japan's oil needs, and Tokyo's powerful ministry of international trade and industry (MITI) did not favor such harsh action.

One reason is that Japanese businessmen fear Iraq will simply stop paying back some 700 billion yen (about 4.6 billion dollars) it owes them.

Another source of concern is that by joining the international sanctions against Iraq, the government may have jeopardized the safety of some 200 of its citizens trapped in Kuwait by Thursday's invasion.

But the firm action by Mr. Kaifu, whose popularity in opinion polls is constantly on the rise, is only the latest in a series of assertive moves by Japan to seek international diplomatic clout comparable to the economic power it wields.

In June, the government organized a meeting among rival Cambodian factions in a bid to bring peace to the war-torn Southeast Asian country and end 11 years of strife there.

Japan has begun a dialogue with communist North Korea to thaw the ties frozen in a Cold War atmosphere for more than four decades, with former vice-premier Shin Kanemaru, an influential leader of the ruling Liberal Democratic Party, expected to visit Pyongyang in late September.

The Iraqi invasion of Kuwait is also likely to give an added dimension to the Middle Eastern tour Mr. Kaifu will undertake later this month.

The trip, which had been planned and announced well before the latest crisis in the region, will take the premier to Turkey, Saudi Arabia, Oman,

Jordan and Egypt from August 15 to 27.

It will likely be the first trip to the region by a head of government actively participating in the anti-Iraq boycott.

The aim of the visit was originally to promote economic and cultural ties with the five countries, but the international community will now be observing the visit with particular care.

The tour -- the first to the Middle East by a Japanese premier in 12 years -- will give Mr. Kaifu the opportunity to tell the region how petroleum importing countries feel about the clash with Baghdad, and also to sound out regional countries on how to achieve peace in a part of the world whose oil supplies are vital to Western industrial powers.

But he will not be able to play the conciliatory role he apparently relishes -- as he has done in the Cambodian conflict -- because of the firmness of Japan's stand against the Iraqi invasion.

"Japan is not in a position to mediate in the conflict," a Japanese official commented, "because we have put our thumbs down on Iraq."

#90219d4650 08/07/1990 ~French/German News Agency

NAIROBI (AUG. 7) - Kenyan political prisoners are being held in the psychiatric wing of Nairobi's Kamiti jail in filth and squalor reminiscent of Stalin's prison camps, a journalist freed last week said Tuesday.

Gitobu Imanyara, a lawyer and editor of the Nairobi Law Monthly, was detained without trial for three weeks after calling for multi-party democracy in one-party Kenya, shaken by anti-government riots that cost 22 lives last month.

He was released two weeks ago only to be arrested immediately and then charged with sedition for publishing articles advocating political reform.

''After my arrest, I was transferred to a windowless cell in the psychiatric wing of Kamiti where I was held in custody for a week before being freed on bail,'' Mr. Imanyara told AFP.

''It's squalid and degrading. You never see sunlight. Political prisoners like myself and at least four others I saw were in solitary confinement, with dangerous certified lunatics in the adjoining cells.

''Their doors were left open, and they would run up and down the corridor and threw urine through the grill in my door into my cell. The stench and filth were sickening.

''I was given a chamber pot which I was allowed out to empty once a day. I had to use it as a washbasin too. We had to queue for meals with the lunatics in the corridor outside our cells.

''It's like the Gulag Archipelago,'' Mr. Imanyara said, referring to the novel about life in Soviet prison camps by exiled writer Alexander Solzhenitsyn.

''The idea is to dehumanise you. You've got to be strong to last two weeks without breaking.'' Mr. Imanyara faces a seven-year jail term if convicted of sedition.

JERUSALEM (AUG. 7) - Israeli Defense Minister Moshe Arens warned on Tuesday that Israel would "act" if the Iraqi Army entered Jordanian territory.

"The Iraqi invasion of Kuwait, has, so far, not had geo-strategic consequences for Israel, but if such a change occurs as a result of Iraqi troops entering Jordan, we'll act," he told parliament.

Israel has already warned that it would not tolerate any threat to its security, notably since it shares a sizeable border with Jordan.

"Israel is following with the greatest interest (Iraqi) President Saddam Hussein's machinations and is capable of defending its interests and security," Mr. Arens said.

Prime Minister Yitzhak Shamir said Friday he did not exclude the possibility of a "military initiative against Israel by the Iraqi president. We must be ready for that and be able to face all eventualities."

The armed forces chief of staff, General Dan Shomron, said Friday that "President Saddam Hussein knows that if he attacks us, he'll pay a high price...We have various answers to Iraq's chemical weapons and missiles."

SOFIA (AUG. 7) - Prime Minister Andrei Lukanov handed in his government's resignation on Tuesday, as planned following the country's first free elections last June, though the composition of a new cabinet was still uncertain.

Mr. Lukanov, a member of the Socialist Party, the former communists who won a clear majority in the June elections, will now be charged by the new President Zhelio Zhelev with forming a new governement.

Until now, the opposition has refused to enter into a coalition governent dominated by the former communists. The Socialist Party, in turn, has refused to govern alone as Bulgaria takes on a new democratic system and tries to rise out of its deep economic crisis.

Observers said they expected the solution to be the formation of a government "of national responsibility" composed largely of technocrats.

This could be held off until September, after the various political forces in parliament reach a consensus on program of reforms to open the way to a market economy.

Until then, the outgoing government will stay on in a caretaker capacity.

MOSCOW (AUG. 7) - Some 850 Soviet citizens were in Kuwait during the Iraqi invasion of Kuwait, and the women and children are to be evacuated shortly, the Soviet news agency Novosti said Tuesday.

The official news agency, quoting informed Soviet Foreign Ministry sources, reported shell damage to the fourth and fifth floor of the Soviet embassy, but said that no Soviet citizens had been killed or wounded during last Thurdsay's invasion.

Those to be evacuated would be taken to Dubai by sea before flying to Moscow.

The Soviet nationals working in Kuwait are embassy or trade mission employees, but are also concerned with technical maintenance or training Kuwaiti officials.

Some Soviet engineers and technicians are involved in constructing Kuwaiti oil installations at El-Ahmed, Novosti said.

The Soviet specialists, who live close to the Kuwaiti armed forces general staff where fighting raged after the invasion, would be "evacuated later", Novosti said.

It added that the Iraqi military had insisted on the evacuation of the building occupied by Novosti, "on the pretext of wanting to establish a security perimeter".

#90219d4800 08/07/1990 ~French/German News Agency
PIETERSBURG, SOUTH AFRICA (AUG. 7) - A South African farmer is to sue the South African Air Force (SAAF) after a pilot dropped a practice bomb near a farm worker in an onion field -- 16 kilometres (10 miles) off target.

Farmer Lourens de Jager said one of his workers, Elisa Huma, was blown clean into the air when the bomb landed on his farm about 400 kilometres (250 miles) northwest of Johannesburg, the Afrikaans daily newspaper Beeld reported Tuesday.

Mr. De Jager said it was the fifth time it had happened in the past three years. "If the air force can't hit the target, maybe the solution would be to move the target to where the bombs fell on my farm," he said.

#90219d4810 08/07/1990 ~French/German News Agency
TOKYO (AUG. 7) - A group of 22 Japanese tourists crossed into Turkey from Iraq by bus Tuesday without difficulty, according to a television report here.

They were the first batch of Japanese to leave Iraq since the country closed its airports and borders after sending troops into Kuwait on Thursday.

"We could get out without much difficulty," Masako Nakata, one of the tourists, said in a telephone interview with a Japanese television network from the Turkish border town of Mardin.

The 22 were visiting Iraq as part of a group tour to see historical sites in the Middle East when Iraq invaded Kuwait.

Mrs. Nakata said the group was able to complete its itinerary in Iraq as planned.

They were among the 182 Japanese holidaymakers and businessmen visiting Iraq. There are also 307 Japanese nationals on long-term stays.

#90219d4820 08/07/1990 ~French/German News Agency
HAMBURG (AUG. 7) - Citing higher costs on the Rotterdam oil market in the wake of the Gulf crisis, West German oil companies Tuesday announced price increases for petrol and heating fuels.

Esso was the first to raise per-litre prices for all grades of petrol by

six pfennigs (4 U.S. cents). Soon afterwards, other companies such as British Petroleum, Shell and Dea (formerly Texaco) announced price hikes on the same order.

An Esso spokesman said that since the Iraqi invasion of Kuwait last Thursday, petrol prices in Rotterdam had shot up by 10 pfennigs per litre.

Heating oil prices were also rising on Rotterdam, a Dea spokesman said. Light heating oil there was now running at 395 Deutschmarks (251 dollars) per tonne, compared to 290 marks before the Iraqi invasion.

Fuel oil traders reported that end-user prices in West Germany were accordingly running at 7 to 10 Deutschmarks per 100 litres higher than a week ago.

However, there had been no panic buying by customers, the Dea spokesman said. Demand was lively but apparently people were awaiting further developments. Another factor was that many German households had already made their heating oil purcsases when prices were low in June and July.

A mobil Oil official in Hamburg said ''the whole scare will be over in a few days or in a week at the latest'' because in fact no real crisis in oil supplies was foreseen.

LISBON (AUG. 7) - A new attack by Mozambican troops backed by Zimbabwe units could derail a second round of direct peace talks due to be held in Rome this week, the rebel movement RENAMO warned here Tuesday.

It said Zimbabwean troops were gathering in the Gorongoza region of the central province of Zambezia to boost government forces which aimed to recapture Inhaminga, Inhamitanga, Maringue, Canxixe and Inhamicala.

RENAMO leader Afonso Dhlakama "does not understand why Zimbabwe troops are preparing to back the government offensive at a time when Mozambicans are seeking a negotiated solution" to the 15-year conflict, a rebel statement said.

After a number of false starts in the past few years, the Maputo government and RENAMO (Mozambique National Resistance) had their first direct talks in the Italian capital last month.

LONDON (AUG. 7) - An Italian court has ordered the lifting of a freeze on

796 million dollars held by the Italian subsidiary of British bank Lloyds, a Lloyds Bank spokesman said here Tuesday.

The court at Pisa had ordered the freezing of the money on the request of two Italian businessmen involved in a three-year-old dispute with the British bank.

The same court had now lifted the freeze, the Lloyds Bank spokesman said, but could give no further details on the reason for the Italian court's decision.

The dispute with the Italian subsidiary involved two Italian import-export agents, Roberto Esposito and Antonio Marinari, who were arrested in 1987 in Manchester after trying to draw on their Lloyds account using Philippines letters of credit.

Lloyds believed that the letters of credit, received by the two Italians in payment for a contract in Lebanon, were false and had the two arrested.

Esposito and Marinari were acquitted by a British court in 1988 and have since tried to claim reparation through the Italian courts.

KIGALI (AUG. 7) - The chief editor and three journalists on Rwanda's oldest newspaper, the Catholic fortnightly Kinyamateka which was founded in 1933, have been charged with sedition, sources at the publication said here Tuesday.

The charges relate to articles appearing from June to December last year asserting that the authorities were appropriating people's goods by buying vast properties.

Fr. Andre Sibomana, the editor, and writers Sylvestre Nkubili, Antoine Rwagahilima and Gaspard Gasasira are to appear in court in mid-September.

PARIS (AUG. 7) - The Paris stock market recovered on Tuesday after Monday's 5.12 percent plunge, with the CAC-40 index ending the day up 2.15 percent.

The market had opened the day down 0.93 percent, and was down one percent in early trading, but then started to recover on news from the Gulf, as Iraq denied it was planning to attack Saudi Arabia following last week's invasion of Kuwait, and indicated that foreigners would be evacuated from

both Iraq and Kuwait.

#90219d5280 08/07/1990 ~French/German News Agency
HAMBURG, WEST GERMANY (AUG. 7) - The East German leadership knew about Libya's preparations to bomb a West Berlin discotheque frequented by U.S. servicemen and did nothing about it, the Hamburg mass-circulation Stern reported in its Thursday issue.

The bombing triggered the U.S. bombing of Tripoli.

Stern said that the East German intelligence service knew as early as 1985 that Libyans operating out of the Libyan Embassy in Berlin were planning to bomb "La Belle" discotheque in West Berlin.

They informed several leaders, including the East German leader Erich Honecker, who told them not to interfere.

The April 5 1986 bombing, in which three people died and 204 were injured, was followed on April 9 by the expulsion from West Germany of two Libyan diplomats.

On April 15, U.S. warplanes based in Britain and on aircraft carriers in the Mediterranean bombed Tripoli and Benghazi, killing 37 and injuring 87. In retaliation, three hostages, two Americans and one Briton, were executed in Beirut.

Stern added that on this past July 19, a Berlin court issued arrest warrants against six persons suspected of being the authors of the discotheque bombing.

They were identified as a Palestinian, Yasser Shraidi; a Libyan, Musbah Abdulgazem Eter; two Moroccans, Hamadi Abu Yabber and Mohammed Suleiman Benalli, and two Lebanese, Imad Salim Mahmoud and Ali Fuad Mansur, who was arrested in West Berlin on July 25, Stern said.

#90219d5290 08/07/1990 ~French/German News Agency
ISLAMABAD (AUG. 7) - Pakistan's sacked prime minister Benazir Bhutto vacated the official residence here Tuesday and left for Karachi.

Ms. Bhutto, 37, whose 20-month rule ended abruptly Monday after President Ghulam Ishaq Khan dismissed her government, was allowed to travel for the last time on the special Boeing jet which had been hers to use as prime minister.

But party sources said other facilities at the premier's official residence were withdrawn shortly before her departure. Reporters watched as her household goods were packed up and transported to the airport in a truck.

U.S. Ambassador Robert Oakley met with Ms. Bhutto before she left Islamabad, diplomatic sources here said.

Dozens of her Pakistan People's Party (PPP) supporters were present to bid good-bye to their leader, who appeared composed. Talking to reporters, she reiterated that the president's move had been unjust.

"If he was sincere he would have appointed an impartial person as prime minister instead of naming Mr. Ghulam Mustafa Jatoi," she said, referring to the leader of the parliamentary opposition appointed caretaker premier.

About 50 party leaders, including ex-ministers and aides, accompanied her to Karachi on her flight.

Ms. Bhutto is expected to convene the PPP executive committee's meeting in Karachi before leaving for Larkana, her home town about 480 kilometers (300 miles) north of the port city.

NAIROBI (AUG. 7) - The United Nations Environment Programme (UNEP) has appointed Ed Nijpels of the Netherlands its goodwill ambassador, UNEP's executive director Mostafa Tolba annouced here Tuesday.

Mr. Nijpels, mayor of the Netherlands city of Breda and former Dutch housing, physical planning and environment minister, joins such other goodwill ambassadors as entertainer Olivia Newton-John and Swedish actor Max Von Sydow.

Mr. Nijpels, who is also chairman of his country's the World Wide Fund for Nature (WWF), the Forest Against Carbon Dioxide Emissions (FACE) foundation, and Foundation for the Recycling of Durable Consumer Goods, will help to promote U.N. goals, programmes, and activities dealing with environmental issues, particularly the threat of global warming and climatic change.

His appointment comes at a time of growing public concern for the environment and considerable pressure on governments and the United Nations to take action to avert a number of looming environmental crises.

It also coincided with the opening here Monday of a three-week meeting of the preparatory committee for the U.N. Conference on Environment and Development (UNCED).

#90219d5410 08/07/1990 ~French/German News Agency
CAIRO (AUG. 7) - U.S. Defense Secretary Dick Cheney left the northern port of Alexandria (eds: correct) Tuesday afternoon after a brief visit and talks with President Hosni Mubarak on ways of ending the crisis between Iraq and Kuwait peacefully, the official MENA news agency reported.

Mr. Cheney, had arrived Tuesday from Saudi Arabia, where he discussed the Iraqi invasion of Kuwait with Saudi officials.

Mr. Mubarak also met with Izzat Ibrahim, vice-president of Iraq's decision-making Revolutionary Command Council. It was the Egyptian leader's first meeting with a senior Iraqi official since Baghdad invaded Kuwait August 2.

The United States has led a campaign to isolate Iraq because of the invasion, notably through a world-wide embargo on purchases of Iraqi oil. For the embargo to be effective, regional analysts say, Saudi Arabia will have to agree to close down a pipeline on its territory that carries Iraqi oil to Red Sea terminals.

Amid fears that Saudi Arabia might be reluctant to take such a step, Mr. Cheney conferred with the Saudi monarch, King Fahd, on Monday, and saw Defense Minister Prince Sultan ibn Abd al-Aziz on Tuesday before leaving for Cairo.

He was accompanied on his visit by dozens of senior military and intelligence specialists, reliable sources said.

#90219d5440 08/07/1990 ~French/German News Agency
BAGHDADKUWAIT (AUG. 7) - Iraqi President Saddam Hussein met Tuesday with Colonel Ala'a Hussein Ali head of the ''free provisional government of Kuwait'' installed following the Iraqi invasion.

Iraq meanwhile showed no indication of whether it would go ahead Tuesday with a second phase of troop withdrawal from Kuwait.

Last Sunday, Baghdad said it had pulled out troops from its estimated 140,000 force, said the second phase would take place Tuesday, but by afternoon Iraqi state-run media made no mention of any withdrawal.

In a related development, the Iraqi National Assembly, was called into extraordinary session at 2200, an announcement broadcast over Iraqi television said.

-30- 885
#90219d5480 08/07/1990 ~French/German News Agency
VIENNA (AUG. 7) - Foreign ministers of the 12 EEC nations are to meet in Brussels Friday to thrash out a common position on the Gulf crisis ahead of a NATO meeting, French Foreign Minister Roland Dumas said here Tuesday.

He made the announcement after talks with his West German and Italian counterparts Hans-Dietrich Genscher and Gianni de Michelis, in Vienna for the funeral of former Austrian Chancellor Bruno Kreisky.

European ministers would assess European Economic Community and United Nations Security Council measures already taken against Iraq following its invasion of Kuwait, and consider if further action was needed "to contain" Iraqi aggression, Mr. Dumas said.

On the safety of foreigners on Iraqi and Kuwaiti soil, Mr. Dumas and Mr. Genscher had asked Italy, which currently holds the EEC presidency, to back up bilateral moves with EEC action.

Mr. Dumas said Iraq's invasion had been a "serious attack" on practice governing relations between sovereign states and had "increased the risk" of conflict in the region.

-30- 1234
#90219d5550 08/07/1990 ~French/German News Agency
CAIRO (AUG. 7) - The widely condemned Iraqi invasion of tiny and rich Kuwait has ''shaken the Arab nation to the core'', in the words of an editorial in the daily Egyptian Gazette.

The newspaper was not alone Tuesday with its assessment. Analysts in the Middle East see the Arab world in a deep dilemma after the first time in recent history that an Arab state has invaded another and effectively annexed it.

Most Arab governments fear a foreign intervention in this Gulf conflict because it would remind them of how dependent they are on the West.

''Any foreign intervention, be it by Israel or otherwise, in the Arab world will have a reaction and could set the area ablaze,'' King Hussein of Jordan warned Monday.

Hussein must be worried because his country, whose population is mainly Palestinian, is squeezed between Iraq and Israel. Any confrontation between these powerful neighbours could be carried out or could spill over to Jordanian territory.

Observers in the region do not rule out the possiblity of a panicky Iraqi President Saddam Hussein grabbing the bull by the horns and ordering a military strike against Israel, in a move to rally the Arab governments behind him.

Experts say Arab military intervention in the Gulf is impossible. Since a truce stopped its eight-year war with Iran in August 1988, Iraq has built up with western and Soviet help the strongest army in the region besides Israel.

Military pacts between Arab states proved useless in the event of the current crisis.

Until now, no Arab leader has seriously put forward the idea of implementing the mutual defence accord, which links the 21-nation Arab League and pledges military backing for an attacked Arab state.

Another military pact linking Egypt, Iraq, Jordan and Yemen within the Arab Cooperation Council (Acc) failed miserably.

To this can be added that Saudi Arabia, Oman, the United Arab Emirates, Qatar and Bahrain did not even try to rescue Kuwait under a military agreement linking them with Kuwait in the Gulf Cooperation Council (Gcc).

''The Acc is a grouping which raises questions, and the Gcc collapsed in its first test,'' the Egyptian newspaper al-Akhbar said.

Iraq now stands alone in an Arab world having difficulties imposing western-style sanctions on Baghdad.

#90219d5560 08/07/1990 ~French/German News Agency
TOKYO (AUG. 7) - Japan's Hitachi Ltd. claimed a world first Tuesday after successfully transmitting 40 gigabits of information per second over a single strand of optical fiber.

At present, most facsimile machines and computers optically send information at a rate of 1.6 gigabits per second. One giga means one billion.

Hitachi officials said the 40 gigabit transmission signal remained constant over a distance of 40 kilometers (25 miles).

The success has paved the way for development of very large capacity optical transmission systems, the officials said.

Optical fiber is replacing copper wire with its ability to carry vast amounts of data and video images at lightning speeds over telephone wire.

#90219d5580 08/07/1990 ~French/German News Agency

ISLAMABAD (AUG. 7) - Ousted Prime Minister Benazir Bhutto's Pakistan People's Party (PPP) rejected accusations of corruption Tuesday and said it was ready to seek a fresh mandate.

Senior party leaders deplored as unconstitutional President Ghulam Ishaq Khan's decision Monday to dissolve the National Assembly and provincial assemblies and remove the 20-month-old Bhutto government.

They warned the president and interim Prime Minister Ghulam Mustafa Jatoi that a delay in polls would be dangerous for the country.

At a meeting chaired by Ms. Bhutto here, party leaders dismissed the president's action as "arbitrary, illegal and unconstitutional."

Meanwhile, the new cabinet held its first meeting under Mr. Jatoi. An official spokesman here said the discussions focussed on various administrative matters. Mr. Jatoi's cabinet has six members in addition to the caretaker premier.

At the end of their meeting, PPP leaders issued a strongly worded statement, the party's first since Mr. Ishaq Khan's decision to dismiss the government and impose a state of emergency in the country.

"The (president's) action not only subverts the nascent democratic order in Pakistan but also deals a grievous blow to the valiant and brave struggle of the Kashmiri people" waging a war against Indian rule, the statement said.

"The action has strengthened our enemies, whose forces are poised on borders, by demoralising the nation," the statement said, referring to the alleged buildup of Indian troops along Pakistan's borders.

The statement said the PPP would press just one demand: "Hold fair and free elections, on schedule, and let the people decide."

Party leaders said there was "hardly any difference" between Mr. Ishaq Khan's statement and late military ruler General Mohammed Zia ul Haq's comments when he sacked Mohammed Khan Junejo's government on May 29, 1988.

-30- 2103

#90219d5610 08/07/1990 ~French/German News Agency

DHAKA (AUG. 7) - Iraqi authorities have detained 61 Bangladeshi civilians working at a Kuwaiti air base and another 17 are reported missing, a foreign office spokesman said here Tuesday.

The detainees were employed as civilian officers, technicians, cooks and cleaners at Ahmad Al-Jaber Air Base, the spokesman said.

The 17 missing persons were working for a local cleaning company not attached to the base.

Bangladesh appealed for their immediate release, through its embassy in Baghdad and the Iraqi mission in Dhaka.

The Dhaka government also called for safety guarantees for Bangladeshi nationals in Kuwait, the spokesman said.

Some 70,000 Bangladeshis were working in Kuwait when Iraqi troops invaded its tiny southern neighbour Thursday.

Foreign Minister Anisul Islam Mahmud called on the Kuwaiti ambassador Tuesday and conveyed Dhaka's support for resolutions adopted by the U.N. Security Council, the Arab League and the Organisation of Islamic Conference, the official BSS news agency reported.

The resolutions called for the immediate and unconditional withdrawal of all Iraqi troops from Kuwait and restoration of the legitimate government of Sheikh Jaber Al Ahmed Al-Sabah, the agency said.

#90219d5770 08/07/1990 ~French/German News Agency

MOSCOW (AUG. 7) - A senior Soviet official has urged the United States to "be prudent" in considering military action against Iraq following the invasion of Kuwait, the government newspaper Izvestia reported Tuesday.

Deputy Foreign Minister Alexander Belonogov told a news conference for Soviet journalists that U.S. intervention "could turn around the Arabs, and the prevailing anti-Iraqi feelings could become anti-American."

Speaking Monday, he said however that U.S. intervention might be envisaged "if something tragic happens to American citizens in Kuwait, or if Iraq invades Saudi Arabia."

He noted that the new strains in Soviet-Iraqi relations "don't make us very happy, but we had no choice." Moscow currently has about 1,000 military advisers in Iraq.

Moscow initially opposed the economic sanctions voted by the United Nations Security Council, but changed its position because of lack of support from other nations, Mr. Belonogov said. "The Soviet Union will apply the resolution rigorously," he said.

The Kremlin has no plans to recognize the Iraqi-installed Kuwaiti government, he added.

He said a message sent by Iraqi President Saddam Hussein to President Mikhail Gorbachev yielded "no extenuating circumstances" on the invasion, and a Soviet reply urged Baghdad to follow a U.N. resolution and withdraw unilaterally.

Mowscow has not received a reply from that note, he said, but the

publication of an anti-Soviet article in the Iraqi government-controlled press "is no accident -- it's a warning to us."

However the Soviet foreign ministry "feels it is unlikely that Baghdad will accept a degradation in its relations with the Soviet Union" because "Saddam Hussein has no interest in making another enemy."

In Vienna, Spanish Prime Minister Felipe Gonzales also spoke out against U.S. military action, saying "We defend the principle of non-intervention."

He made the remarks during an interview with Spanish television while in Vienna to attend the funeral of former Austrian chancellor Bruno Kreisky.

"In a region that is so explosive, I think this principle should be maintained with extraordinary firmness," he added.

LONDON (AUG. 7) - Aluminium and nickel reached their highest level since last October on the London Metal Exchange (LME) Tuesday, in the wake of copper, supported by expectations of higher demand in the fourth quarter, traders said here.

Base metals were also supported by the sentiment that Monday's losses, based on fears of recession due to soaring oil prices, had been overdone, they added.

Aluminium was quoted at 1,808 dollars per ton on the kerb, having closed at 1,812 dollars on the afternoon ring, the highest level since October, against 1,759 Monday.

Nickel finished at 10,500 dollars per ton on the kerb, against 10,550 on the afternoon ring and 10,200 dollars Monday. The metal had reached 10,650 dollars at the close of the morning ring, its highest level since October.

Copper finished at 1,533 pounds per ton on the kerb against 1,537 pounds on the ring and 1,483 Monday. The rise occurred despite a 3,425-ton rise in LME stocks, at a seven-months high of 107,775 tons.

Lead and zinc were also stronger, but tin lost ground.

#90219d5840 08/07/1990 ~French/German News Agency

PRETORIA (AUG. 7) - South Africa's gold and foreign reserves rose by five percent to 5.434 billion rands (2.066 billion dollars) in July from 5.159 billion rands (1.997 billion dollars) in June, the Reserve (central) Bank

said here Tuesday.

The rise was mainly due to an increase of 236.64 million rands (91 million dollars) in the gold reserves, which totalled 3.108 billion rands (1.186 billion dollars) on July 31.

The valuation of gold rose by 22.46 rands (8.57 dollars) to 863.72 rands (332.2 dollars) per fine ounce during the month of July, the bank said.

Foreign exchange reserves also rose -- to 2.325 billion rands (887.4 million dollars) from 2.287 billion rands (863 million dollars) at end-July.

#90219d5850 08/07/1990 ~French/German News Agency

WASHINGTON (AUG. 7) - The U.S. State Department and Iraq are discussing a plan under which some of the estimated 500 Americans in Iraq would soon leave that country by land, U.S. officials said Tuesday.

"We are currently exploring the possibility of moving some people out by road within a day or two. We will continue our efforts and report on them when they succeed," the official said on condition he not be identified.

The Italian foreign ministry had said Monday that Iraq's ambassador to Rome, Mohammed Al Sahaf, said Baghdad was prepared to evacuate foreigners in Kuwait to Jordan via Iraq.

Iraqi forces overran Kuwait Thursday in a lightning invasion that ousted the emirate's ruling family and has prompted global sanctions against the regime of Iraqi President Saddam Hussein.

The presence of foreigners in Iraq and Kuwait, including U.S. citizens, has raised fears in the United States that a hostage crisis could develop if the situation in the Gulf deteriorated further.

That concern was accentuated Monday when dozens of foreigners in Kuwait, including 28 Americans, were rounded up from hotels and put on buses apparently bound for Baghdad.

Another U.S. official said some of the foreigners have been taken to a Baghdad hotel that was already housing 11 American oil field workers picked up by Iraqi forces Thursday.

#90219d5880 08/07/1990 ~French/German News Agency

BAGHDAD (AUG. 7) - The administration set up in Kuwait after the Iraqi

invasion announced Tuesday that the country had been proclaimed a republic.

A statement read on Iraqi television said the emirate's regime had been abolished forever.

The official INA news agency, quoting the statement by the provisional government of free Kuwait, as it is termed, said that following an "uprising" against the ruling family of Sheikh Jaber al-Ahmad al-Sabah, "the government decided to abolish the princedom in Kuwait and declare the republic."

It added: "By this, the corrupt satellite regime installed by colonialism is entombed forever."

On Saturday, Iraq announced the makeup of a military government installed Thursday after the invasion.

The administration is headed by Colonel Ala'a Hussein Ali, also appointed commander-in-chief of the armed forces, minister of defense, and acting interior minister, the news agency said.

Eight other members of the government are all military officers.

The government had announced the overthrow of the Al Sabah family and seizure of Sheikh Jaber's fortune as well as those of several royal family members and senior Kuwaiti officials.

Iraqi troops invaded Kuwait at dawn Thursday after the collapse of Iraqi-Kuwaiti talks in Saudi Arabia on August 1 over a bitter dispute about oil production quotas and border markings.

In a related development, Iraqi President Saddam Hussein held talks here Tuesday with the head of the pro-Iraqi government in Kuwait ahead of an emergency meeting of Iraq's 250-member national council, parliament.

The official Iraqi News Agency (INA) said the meeting between Mr. Hussein and Col. Hussein Ali was the first since last week's formation of the provisional government.

According to INA, Colonel Hussein Ali "thanked Iraq and the Iraqi army for their support to the uprising of the Kuwaiti people." Iraq has said it intervened in Kuwait at the request of revolutionaries dissatisfied with the regime.

President Hussein praised the new government, saying it had "restored Kuwait to its national and Arab dimension."

The Iraqi leader is to make a nationwide address late Tuesday to mark what

Iraq considers its victory over Iran, which it had fought for eight years.

#90219d5950 08/07/1990 ~French/German News Agency
LONDON (AUG. 7) - The British Government welcomed Tuesday the decision by the African National Congress to suspend the 29-year armed struggle against white rule in South Africa.

Prime Minister Margaret Thatcher was pleased with "progress made between the South African Government and the ANC in opening the way to peaceful negotiations on South Africa's future."

The ANC's decision to suspend the armed struggle was meanwhile welcomed by the Foreign Office, who called it "a significant step forward."

Mrs. Thatcher who held talks with ANC leader Nelson Mandela in early July said she had "been pushing for this for some time" and that the suspension "echoed conversations held when Mr Mandela visited Britain."

In response to the ANC decision, South African President F.W. de Klerk agreed to the release of political prisoners and the return of political exiles.

#90219d5980 08/07/1990 ~French/German News Agency
BANGKOK (AUG. 7) - Burmese security units and high school teachers dispersed about 60 students demonstrating for democracy in Mandalay Tuesday, state-run Radio Rangoon said in a broadcast monitored here.

Similar demonstrations broke out a day earlier at several high schools in Mandalay, but security personnel broke them up without any incidents or injuries, the radio said.

About 200 Buddhist monks also took to the streets Monday in downtown Mandalay, the former Burmese capital 590 kilometers (366 miles) north of Rangoon, but they dispersed peacefully when troops arrived at the scene.

The radio dismissed as rumours allegations currently circulating that government soldiers killed six students, two of them female and two monks, during a recent street confrontation.

It attributed the allegations to elements wanting to incite mob violence against the military regime.

Local traders were also blamed for fanning an atmosphere of unrest, allegedly to take advantage of the unstable political situation to raise

prices of commodities and consumer goods.

#90219d6020 08/07/1990 ~French/German News Agency
BAGHDADKUWAIT (AUG. 7) - Iraqi President Saddam Hussein will deliver a major address on television and radio Tuesday evening, Iraqi television announced.

It said the address would be broadcast at 1700 Gmt.

Saddam met earlier Tuesday with Colonel Ala'a Hussein Ali, head of the ''free provisional government of Kuwait'' installed following the Iraqi invasion.

Iraq meanwhile showed no indication of whether it would go ahead Tuesday with a second phase of troop withdrawal from Kuwait.

Last Sunday, Baghdad said it had pulled out troops from its estimated 140,000 force, said the second phase wuold take place Tuesday, but by afternoon Iraqi state-run media made no mention of any withdrawal.

In a related development, the Iraqi National Assembly was called into extraordinary session Tuesday evening, an announcement broadcast over Iraqi television said.

FREETOWN (AUG. 7) - President Joseph Momoh said forces being sent to Liberia soon would play a peace-keeping role and "nothing more", when he returned here on Tuesday after the emergency ECOWAS summit in Banjul on Liberia.

He told reporters at the airport that "the plight of Liberians deserves worldwide sympathy. It is necessary for the widespread indiscriminate killings of innocent civilians to stop."

He stressed that peace-keeping troops expected to "enter Liberia soon" will only "play a peace-keeping role and nothing more".

Diplomatic sources in Freetown said Tuesday that a secret meeting of military advisers of the member-states of the ECOWAS mediation committee was held in Freetown on Saturday and took a decision to send the peace-keeping force to Liberia on Monday.

The sources said the delay in getting troops in was due to the last minute decision by two unnamed countries which had asked that the troops be held

back until the end of the emergency summit.

Government officials here refused to comment on the issue.

JOHANNESBURG (AUG. 7) - The African National Congress (ANC) defended on Tuesday the watershed ceasefire pact it signed with the South African government in the early hours of the morning, claiming it had made real gains.

"We took historic steps to shape the future of South Africa," said ANC Secretary General Alfred Nzo, one of the five ANC leaders who emerged from 15 hours of talks with the government shortly after midnight with an agreement to suspend the ANC's 29-year armed struggle.

Answering accusations at a press conference here that the ANC gave away more than it gained, Mr. Nzo said the government had made very specific commitments.

It had agreed that political prisoners -- estimated by the ANC at some 1,500 -- would be released, that ANC exiles would be allowed to return to South Africa, and that security legislation would be re-assessed.

He revealed that Justice Minister Kobie Coetsee would soon invite public criticism of security laws, which would then be re-examined.

Earlier, the ANC's main anti-apartheid rival, the hardline Pan Africanist Congress (PAC), branded the accord one-sided in favour of the government.

Ailing PAC president Zeph Mothopeng said at a press conference that the government had agreed to amend only "irrelevant" sections of the Internal Security Act (ISA), but had left intact the infamous section 29, which allows indefinite detention without trial.

But Mr. Nzo and another ANC delegate to the talks, South African Communist Party General Secretary Joe Slovo, stressed that if the government reneged on its deal to amend the ISA, the accord would collapse.

"The repeal of section 29 is going to be an important issue," Mr. Slovo told the press conference, warning that the ANC would not tolerate its use against anyone, whether left- or right-wingers.

WASHINGTON (AUG. 7) - U.S. efforts to resolve the Gulf crisis were

centering Tuesday on the enforcement of sanctions against Iraq mandated by the U.N. Security Council with the despatching of a flotilla of ships capable of maintaining a naval blocade of Iraq and Kuwait.

As soon as the Security Council agreed, by a 13-0 vote, on the sanctions against Iraq for its invasion of Kuwait, President George Bush called for "full and total implementation of these sanctions, ruling out nothing at all."

He made that pledge Monday as he greeted British Prime Minister Margaret Thatcher and the secretary general of the North Atlantic Treaty Organization (NATO), Manfred Woerner, at the White House to discuss a coordinated allied strategy to the crisis.

The two countries considered essential to the success of the U.S. objective are Turkey and Saudi Arabia, the two transit points for most of Iraq's oil exports.

U.S. Defense Secretary Dick Cheney -- accompanied by Mr. Bush's deputy National Security Adviser Robert Gates, the central U.S. Army Commander General Schwarzkopf, and Under-secretary for Defense Paul Wolfowitz -- was in Riyadh Monday to discuss strategy with Saudi officials.

By Tuesday, the aircraft carrier USS Saratoga and four escort ships -- the guided missile cruiser Philippine Sea, the frigate Elmer Montgomery and the destroyers Spruance and Sampson -- were steaming out of their northern Florida base.

The Pentagon said the Saratoga battle group was headed toward the Mediterranean. Military analysts said it could be diverted to the Gulf.

At the same time, some 2,500 U.S. Marines from Camp Lejeune, North Carolina, were being shipped out to the coast of Liberia which has been brought to its knees by civil war.

Marine Colonel W.C. Fite, commander of the 26th Marine Expeditionary Unit, told journalists as he left Camp Lejeune: "We haven't been told about our future plans. As far as we know, this is a routine deployment. We have plans to go to Spain, which is routine, and also plans if needed to go to the coast off Monrovia, Liberia."

But officials here were saying that the diplomatic efforts in Riyadh were key to U.S. plans as Washington wants full cooperation from Saudi Arabia, which is considered the next potential target for Iraq.

This cooperation, Washington believes, should not be limited to simply closing the Iraqi oil pipeline through its territory, but should also include military assistance.

Mr. Cheney reportedly had with him detailed reports from U.S. intelligence detailing the threat posed by recent Iraqi movements toward Saudi Arabia.

U.S. officials believe Saudi cooperation will be essential should the U.N.-mandated sanctions fail. Logistically, U.S. and allied forces would need ground facilities in the region for their military hardware.

Meanwhile, U.S. Secretary of State James Baker was expected Thursday in Turkey, already the scene of intense diplomatic activity with the arrival since the weekend of the Iraqi regime's deputy leader Taha Yassin Ramadan and Iranian presidential adviser Ali Reza Moayeri.

According to several U.S. officials, who spoke on condition of anonymity, Mr. Baker's visit to Turkey is primarily to reassure this NATO partner that Washington and other allies will ensure that it does not suffer economically by joining in the Iraqi economic blocade and closing down the Iraqi pipeline through its territory.

One U.S. official, cited by The New York Times Tuesday, said Mr. Bush had asked Mr. Woerner to get the assurance of all members of the 16-nation NATO alliance that they would support Turkey.

The official was quoted as saying: "The message to Woerner was: there are very few things that would threaten NATO more than the implication of the Iraqi invasion of Kuwait or some Iraqi push into Saudia Arabia. NATO has to be prepared to play a military role either collectivelky or through individual states."

Despite planning for some sort of possible military intervention, administration officials are insisting that they are concentrating on winning through economic measures.

White House spokesman Marlin Fitzwater, talking of the U.N.-mandated economic sanctions, said, "We expect them to work."

But a Pentagon official, insisting on anonymity, said that -- en route to Riyadh -- Mr. Cheney had stopped off in Cairo to ask Egyptian President Hosni Mubarak for permission for the aircraft carrier USS Eisenhower, now in the Mediterranean, to pass through the Suez Canal.

Another carrier, the USS Independence, and its escort group were already in the Arabian Sea, at the mouth of the Gulf, on Tuesday, Pentagon swources said.

SRINAGAR, India (AUG. 7) - Indian paramilitary soldiers sprayed gunfire into Moslem homes in Kashmir's summer capital here overnight, killing at least 15 people, police sources and residents said Tuesday.

Meanwhile 18 people, including 12 suspected Moslem militants, died and 28 were injured in other violence related to a bloody Moslem secessionist campaign in the strife-torn Kashmir valley Monday night and Tuesday.

Border Security Force personnel deployed on internal security duty burst into several houses in the curfew-bound Hawal area here, apparently choosing the targets at random, and opened fire, residents said.

Police officials in Jammu, Kashmir's winter capital, said 15 people were killed. The Press Trust of India (PTI) news agency said another 16 people were wounded.

They added that several women said they had been raped by the troops, who allegedly set two houses on fire.

Kashmir Governor Girish Chandra Saxena said police had filed charges of murder and rape against the soldiers and launched an investigation.

An Agence France-Presse correspondent saw nine coffins at a mourning ceremony attended by more than 5,000 people who defied a curfew to assemble at Srinagar's Islamia college, near Hawal in the heart of Srinagar.

The ceremony was followed by a mass funeral joined by thousands of Moslems shouting anti-Indian and pro-independence slogans, witnesses said.

There was no violence at the funeral, which security forces allowed despite the curfew.

Residents in Hawal, a middle-class Moslem neighbourhood, said they did not know what provoked the soldiers to go on the rampage.

"We were sitting at home, all of a sudden soldiers broke into the house," said a teenaged girl, whose father Gholam Qadir, 40, and two younger brothers aged 13 and 11 were shot and killed.

"My mother tried to stop them, but she was overpowered," she said, pointing into a room whose walls were splattered with blood. "The men went upstairs and without saying a word they shot my father and two brothers and left."

Blood-soaked mattresses littered the bedroom in another house, where residents said troopers had shot dead Basheer Ahmed, a 40-year-old tailor, his two sons aged 16 and eight, his mother and a colleague.

BAGHDAD, (AUG 7) - Iraqi President Saddam Hussein on Tuesday justified the invasion of Kuwait by Iraqi forces last Thursday, saying it was the legitimate outcome of Iraq's victory over Iran.

In a speech broadcast on Iraqi television, Mr. Hussein said the operation "ended the colonial division" which separated a rich minority from the less fortunate majority.

He praised the planners of the August 2 operation, in reference to the provisional Kuwaiti Government made up of nine unknown officers who proclaimed the former Gulf emirate a republic on Tuesday.

BRUSSELS, (AUG 7) - Iraq was continuing to amass troops at the Saudi Arabian border, NATO's general staff told the alliance's political committee here Tuesday, NATO sources said.

However diplomats said, for the moment, NATO did not have a military role in the crisis, dozens of other warships in the Gulf being adequate to ensure the effectiveness of a U.N. blockade.

On Monday another NATO source had said that Altantic Alliance solidarity would be brought into play in the event of Iraqi agression against Turkey, the only NATO member to border Iraq.

NATO's political committee was meanwhile deeply concerned about the fate of foreign nationals in Iraq and Kuwait, having received no information to confirm that Iraq had released them across the Jordanian border, the source said.

On the effects of a U.N. embargo against Iraq, an economic report before the committee said some 65 per cent of Iraq's oil exports went to NATO countries, while some 60 per cent of Iraqi imports were of NATO origin.

Diplomats said these figures gave an indication of the effectiveness of NATO's participation in the sanctions.

An informed source Tuesday said NATO would hold a ministerial level meeting on developments in the Gulf before the end of the week. Officials refused to give any details of the initiative.

French Foreign Minister Roland Dumas earlier Tuesday announced a European Economic Community meeting in Brussels Friday to formulate a common EEC

position on the crisis.

Observers said both meetings would address ways of implementing the international economic embargo.

#90219d6450 08/07/1990 ~French/German News Agency

PORT ARTHUR, TX (AUG. 7) - U.S. customs officials enforcing a ban on trade with Baghdad seized a shipload of Iraqi oil here Tuesday.

The officials said the Swedish-flagged tanker Thoraas would be held until customs authorities decide what to do with the 76 million liters (20 million gallons) of oil it was carrying.

President George Bush banned imports of Iraqi oil as part of economic sanctions he ordered in response to Iraq's invasion of Kuwait last Thursday.

The Thoraas takes on oil from larger vessels and brings it into port in a process called lightering.

A U.S. customs spokeswoman in Houston said the oil had been transferred from the ship Cartha Gonova, but that she did not know that vessel's whereabouts or registry.

-30- 917

#90219d6510 08/07/1990 ~French/German News Agency

BRUSSELS (AUG. 7) - The European Community imposed Tuesday a general trade embargo against Iraq and Kuwait in a decision which follows a similar resolution by the United Nations Security Council.

Under the embargo, which will take effect Wednesday, no goods may be imported from or exported to the two Gulf nations.

The embargo does not cover arms sales which do not come under the community's remit but is a matter for individual members.

E.C. foreign ministers are to meet here Friday to discuss the crisis in the Gulf, French Foreign Minister Roland Dumas said in a radio interview in Paris.

-30- 795

#90219d6610 08/07/1990 ~French/German News Agency

DUBAI (AUG. 7) - Nervous savers lined up Tuesday at banks and foreign exchange houses in the United Arab Emirates (UAE) as fears of a new Gulf

war undermined confidence in the local dirham and sent dollar sales soaring.

"I'm not going to wait for the dirham to fall further. I need to have my money in a currency I can change anywhere in the world," said an Indian expatriate after rushing to his bank to open a dollar account. "Look at the Kuwaiti dinar," he added. "Nobody wants to touch it now."

Thomas Cook exchange offices in the emirates of Dubai and Sharjah said the demand for dollars had almost wiped out their stocks of the currency while pushing the greenback up to 3.8 dirhams from the 3.74 Monday and the normal pegged rate of 3.68.

"People have seen what has happened to the Kuwaitis, whose cash has no value, and they are trying to be safe," said a manager of a leading exchange company here. "If the Americans attack Iraq or Kuwait, there will be a war that will have a financial effect on the region for some time," he added. "There's a sense of fear."

The Kuwaiti dinar and Kuwaiti credit cards are officially no longer accepted in the UAE, but unofficial trading in the currency has seen it lose two-thirds of its value against the dirham since the Iraqi invasion of Aug 2.

The exchange company manager said both UAE nationals and expatriates were buying dollars, aware that the greenback is linked to the dirham and could be recovered without great loss when the crisis passes.

A Thomas Cook teller in Sharjah said people refused to accept travellers cheques and would only take cash. Some banks were informing their clients that they could not supply them with dollars in cash, depositors said.

The rush began Monday amid reports of a troop build-up on the Saudi-Kuwaiti border and statements from Washington indicating that a military option was being considered in addition to the sanctions announced against Iraq.

Foreign exchange houses said they were being cautious in accepting large amounts of Saudi riyals and denied rumors that the currency was no longer being accepted.

Analysts here said that while the crisis would have a negative effect on confidence in the UAE and harm investment, the country would benefit from higher oil prices and increased trans-shipment activities due to the closing of the Kuwaiti ports.

#90219d6670 08/07/1990 ~French/German News Agency

KARACHI (AUG. 7) - Thousands of emotional, slogan-chanting party workers welcomed sacked Prime Minister Benazir Bhutto on her arrival at the airport here Tuesday.

Although her arrival was not formally announced, young activists swarmed the airport terminal building as several hundred policemen, paramilitary rangers and troops stood by, watching the defiant crowd.

Ms. Bhutto's husband, Asif Ali Zardari, had to climb over an iron gate to join his spouse. As they drove to their residence, Bilawal house, Pakistan People's Party (PPP) supporters formed a procession stretching a couple of miles.

Addressing a highly charged cadre of PPP workers at her residence, Ms. Bhutto accused President Ghulam Ishaq Khan of imposing anti-democratic forces on the people.

When the combined opposition failed to destabilize her government, the president "imposed these elements on the people of Pakistan through the back door," she said.

She said the president's charges against her government were unacceptable.

The imposition of interim government "is a conspiracy against the people of Pakistan and an insult to the electorate," she declared.

Flanked by her Sindh PPP leaders, she said despite all the difficulties, her government was able to finalize nuclear power plant deals with France and China and bring the Kashmir issue to the forefront of world politics.

"We are the product of the people's mandate and want to serve them," she said. "Right from the beginning, conspiracies have been hatched against my party to keep it out of the election process."

Ms. Bhutto urged her party workers "to remain disciplined and to work for defeating the terrorists in Sindh so that the biased interim administration does not get any opportunity for punitive action against the PPP."

#90219d6750 08/07/1990 ~French/German News Agency

WASHINGTON, (AUG 7) - The State Department has set up a task force that is working round-the-clock to answer calls from friends and family members of the estimated 3,500 Americans trapped in Iraq and Kuwait.

State Department spokeswoman Margaret Tutwiler, who spoke at length about U.S. concern for the situation, said the task force's 60 to 80 personnel had already received 10,000 calls.

U.S. spokesmen have refrained from describing the Americans as hostages, but the possibility that they could become so was a palpable undercurrent in press briefings here.

Tutwiler said the Americans' welfare had been raised in ''every meeting'' held over the past few days between Iraqi and American officials.

Assistant Secretary of State John Kelly summoned Iraqi Ambassador Mohammed al-Mashat for a meeting Monday that Tutwiler described as ''short and to the point''.

She said Kelly ''forcefully'' told Mashat that Washington held Iraq responsible for the safety of the Americans and expected information on their whereabouts in Kuwait.

Mashat replied that he would convey Kelly's message to Baghdad, but apparently indicated later that he had received no particular response from Iraqi authorities.

About 3,000 Americans were estimated to be in Kuwait and 500 in Iraq before Baghdad's invasion of the tiny Gulf nation last Thursday. Tutwiler said 39 Americans are being held in Baghdad's Hotel Rashid, most of them rounded up from Kuwaiti hotels Monday and bused to the Iraqi capital.

BUDAPEST (AUG. 7) - Father Laslo Tokes, the priest at the centre of events which led to the Romanian revolution in December, was seriously injured in a road accident in Hungary Tuesday, Hungarian television reported.

The Romanian priest, an ethnic Hungarian, suffered a concussion and fractures when the driver of the vehicle he was travelling in swerved to avoid a cyclist and crashed into a pylon between the northeastern towns of Sarospatak and Miskolc.

Doctors said he was recovering in hospital in Miskolc.

Father Tokes, whose dissidence became a rallying point for the uprising that overthrew Nicolae Ceausescu's Stalinist dictatorship, had been travelling with body guards supplied by the Hungarian Government.

#90219d6990 08/07/1990 ~French/German News Agency

JOHANNESBURG (AUG. 7) - The African National Congress (Anc) Tuesday

reaffirmed its commitment to suspending its armed struggle against South Africa's white rulers, but warned it would resume military activity if the government reneged on the agreements reached between the two parties Monday.

Joe Slovo, Communist Party (Sacp) chief and a member of the Anc delegation which met the government for the second round of preliminary peace talks Monday, said the Anc remained confident of the government's sincerity in the fast-developing negotiation process and of its commitment to a peaceful settlement.

He said that while the armed struggle had been suspended, other forms of pressure, including economic sanctions, would be maintained in order to force the pace of racial reform.

Mangosuthu Buthelezi, president of the powerful Inkatha Freedom Party, welcomed the Anc decision to cease hostilities, but said there was a need for joint action against the violence between supporters of the two organisations in the strife-torn Natal province.

''We are now in the golden moment of history which will soon pass if we do not put negotiations on track and make rapid progress in moving towards a South Africa in which apartheid is abolished and a multi-party democracy is introduced.

''Violence as a major stumbling block hindering this movement can now be addressed at the local and regional levels,'' he said.

-30- 1631

#90219d7020 08/07/1990 ~French/German News Agency

NEW DELHI (AUG. 7) - The Indian parliament's lower house rejected an opposition move Tuesday to censor the government of Prime Minister Vishwanath Pratap Singh.

The Lok Sabha, or people's assembly, voted 202 to 117 against the motion over price rises. It was made by former premier Rajiv Gandhi's opposition Congress (I) party.

Finance minister Madhu Dandawate admitted the prices of many of the consumer goods had increased, but the situation was "not as gloomy" as claimed by the Congress (I) MPs.

Mr. Dandawate said the rise in prices of a number of goods was less than in the corresponding period last year, before the present government took over.

Earlier, Mr. Gandhi said the new eight-month-old National Front alliance

government had failed to control price increases and lost credibility with the people.

He said the new government was wasting the nation's time in factional party quarrels, an apparent reference to differences in the Janata Dal (people's party) of Mr. V.P. Singh, which is the core constituent of the five-party alliance.

"People are realising that prices will never stop soaring so long as the ruling party is preoccupied with its internal bickerings," said Mr. Gandhi, whose Congress (I) party lost the November polls to the alliance.

Simmering differences in the Janata Dal culminated in Mr. V.P. Singh firing his deputy, Devi Lal, from the cabinet earlier this month.

Mr. Devi Lal accused a few of his cabinet colleagues of corruption and in comments to the press showered abuse on some of them. He described Mr. V.P. Singh as "weak" and "spineless" in a press interview.

-30- 1829

#90219d7050 08/07/1990 ~French/German News Agency

WASHINGTON (AUG. 7) - The United States welcomed political developments in South Africa Tuesday but said U.S. sanctions would remain in place until the state of emergency is lifted in Natal.

The U.S. administration "warmly welcomes" Pretoria's announcement that it would free political prisoners and allow the return to South Africa of members of the once banned African National Congress, a spokeswoman said.

State Department spokeswoman Margaret Tutwiler added that the developments constituted ''a major step'' towards the establishment of a non-racial democracy.

''We hope the same positive spirit can bring an end to violence in Natal,'' she said, the site of frequent violent outbreaks between rival black groups.

American law stipulates that congressionally-mandated economic sanctions must stay in place until all political prisoners are freed and the state of emergency is lifted throughout the country.

#90219d7160 08/07/1990 ~French/German News Agency

WASHINGTON (AUG. 7) - U.S. Secretary of State James Baker will be in Brussels Friday for a meeting with his counterparts in the 16-nation North Atlantic Treaty Organization (NATO) to discuss the Gulf crisis, the State

Department said Tuesday.

Department spokeswoman Margaret Tutwiler said Mr. Baker had also sent a message to Soviet Foreign Minister Eduard Shevardnadze about the crisis, but she refused to divulge any of the message's contents.

Mr. Baker and Mr. Shevardnadze met last Friday when they issued a joint statement calling for an international arms embargo against Iraq.

Announcing the planned NATO meeting, Miss Tutiler said: "The events in the Gulf impact all NATO nations."

Mr. Baker was already scheduled to leave Washington Wednesday to visit Turkey, which borders Iraq.

-30- 985

#90219d7170 08/07/1990 ~French/German News Agency

HONG KONG (AUG. 7) - Law enforcement agencies in Hong Kong and Canada smashed an international syndicate believed to be supplying forged travel documents to mainland Chinese, the government here said Tuesday.

Simultaneous raids carried out by police and immigration officials in Toronto and Hong Kong led to 15 arrests, an official statement quoted Tang Chiu Shing, head of the investigation division of the Hong Kong immigration department, as saying.

Hong Kong officials raided 35 locations, arrested nine people and seized forged seals and dies used to forge travel documents meant for mainland Chinese seeking residence in Canada, Mr. Tang said.

Law enforcement agents in Toronto arrested six people and seized a number of documents including forged Singaporean passports and records.

Between March and July, Hong Kong officials arrested 25 mainland Chinese for using forged documents, including Singaporean, Brazilian, Chinese and British (Hong Kong) passports and identity cards, the statement said.

The syndicate, which reportedly charged 130,000 Hong Kong dollars (16,700 U.S.) for each forged passport and passage to Canada, was a sophisticated one with bases in Hong Kong, Thailand and Canada, Mr. Tang said.

ATHENS (AUG. 7) - Some 116 British tourists were plucked to safety as a Greek pleasure boat sank just off the coast of the south-east Aegean island Rhodes Tuesday, the Greek merchant navy ministry said.

Nearby vessels also rescued the three crew members from the stricken 70 tonne Maria Astrapi, on its way between Rhodes and neighbouring Symi, to the north.

The ministry said it was not known why a fire had broken out in the vessel's engine room.

-30- 643

#90219d7310 08/07/1990 ~French/German News Agency

WASHINGTON (AUG. 7) - The White House Tuesday said invading Iraqi troops in Kuwait were posing an "imminent threat" to Saudi Arabia, and reports said U.S. air and ground forces were racing for Saudi Arabia.

Presidential spokesman Marlin Fitzwater withheld comment on a television report that a major deployment of U.S. troops and aircraft would soon begin to defend the oil-rich Saudi kingdom.

"The deployment of Iraqi troops poses an imminent threat to the Saudis," said Mr. Fitzwater.

"There have been changes of the sort that lead us to believe it's a growing threat...The U.S. Government is prepared for every eventuality and is doing and planning as appropriate," he said.

"We have reports that there are considerable (Iraqi) forces in an offensive posture massed at the Saudi border ...(Iraqi President) Saddam Hussein acted as an international oulaw," the spokesman said.

The ABC television network announced that Saudi Arabia had agreed to a request by U.S. Defense Secretary Dick Cheney to allow U.S. fighter-bombers and ground troops to be stationed on Saudi soil.

Mr. Cheney was on his way back to Washington Tuesday after holding talks with King Fahd and other Saudi leaders on the threat posed by Iraqi troops occupying neihgboring Kuwait.

The television reports said U.S. ground troops from the elite 82nd Airborne Division based in Fort Bragg, North Carolina would be used to protect bases in Saudi Arabia that will receive U.S. fighter bombers.

The USS Independence was reported to be 30 miles from the Strait of Hormuz at the entrance of the Gulf and in a position to provide air cover for U.S. forces when they land in Saudi Arabia.

Another battle group led by the aircraft carrier USS Saratoga left Mayport, Florida, bound for the Mediterranean and possible Middle East deployment.

The battleship Wisconsin left Norfolk, Virginia, to join this battle group.

Television reports said Egyptian President Hosni Mubarak had granted permission for the U.S. aircraft carrier USS Eisenhower to transit through the Suez canal from the Mediterranean en route to the Gulf.

#90219d7350 08/07/1990 ~French/German News Agency

WASHINGTON (AUG. 7) - A leading U.S. energy expert Tuesday said Moscow was deriving substantial financial benefits from the Iraqi invasion of Kuwait and warned the West against helping the Soviet Union develop its energy resources to bring more oil to the world market.

Roger Robinson, a former member of the National Security Council under the Ronald Reagan administration, was testifying before a congressional committee assessing the impact of the Iraqi invasion of oil-rich Kuwait.

Referring to Soviet cooperation in the U.S.-led drive to isolate and punish Iraq for the invasion, Mr. Robinson said: "Before the West celebrates this development, we should remain mindful of the litany of windfall benefits already accruing to the Soviet Union from the Iraqi thurst into Kuwait and possibly beyond."

Moscow agreed to cut off arms supplies to Baghdad and voted in favor of the U.N. Security Council imposing mandatory financial, trade and military sanctions against Iraq.

Mr. Robinson pointed out that due to the Gulf crisis and the resulting soaring oil prices, the Soviet Union pocketed roughly one billion dollars annually for every one dollar increase in the price of a barrel of oil. About two thirds of Soviet hard currency income is derived from oil and gas exports, he noted.

Spot oil market prices have jumped from 15.50 dollars a barrel in mid-June to around 28 dollars a barrel as of Monday.

Moscow has 6,000 to 7,000 advisers in Iraq and provided the bulk of Iraq's sophisticated military arsenal, Mr. Robinson said.

"Against this backdrop, we are now hearing calls from the Department of Energy and others in the Administration that one way to bring more oil to the market is through substantial U.S. and Western energy-related assistance to the Soviet Union.

"This would be an exceedingly ill-considered way to strengthen Western energy security. After all, the Soviet Union has amply demonstrated just this year its willingness to withhold oil and natural gas deliveries as an

instrument of repression against Lithuania.

"It is also cutting back desperately needed oil supplies to countries in Eastern Europe such as Czechoslovakia, Hungary, Poland, and Bulgaria by some 20-30 percent," Mr. Robinson said.

LIMA (AUG. 7) EFE - With just days to go before President Alberto Fujimori is to announce his economic reform plan, health workers have announced that at least 60 per cent of Peru's 20 million inhabitants suffer from malnutrition.

The director of the National Nutrition College, Lourdes Turriarte, said Monday that some seven million inhabitants lived on a +survival+ basis while five million more only ate one meal per day.

Increasingly widespread malnutrition in recent years has caused a drop in the average height of adult Peruvians from 1.72 m to 1.68 m, she added.

Turriarte said studies had shown that basic foodstuffs for a six-member family curently cost around dlrs 70 per month while the average wage was around of dlr 40.

The announcements came just two days before Fujimori is scheduled to unveil his long-awaited plan to boost the struggling Peruvian economy.

While few details have been released regarding the proposed package, Prime Minister Juan Carlos Hurtado Miller has indicated it will be drastic while acknowledging that measures to redress the country's dire poverty rate were urgent.

Throughout his election campaign Fujimori frequently mentioned proposals for a +social compensation plan+ for those likely to be hardest hit by the economic measures but analysts have expressed scepticism that the new president has the resources available to carry this through.

On his swearing July 28, Fujimori said, +Poverty in Peru has arrived at inhuman extremes. It highlights the insensitivity on behalf of society, of the government, of the country's leaders who did not know what solutions to apply to attack the problem at its roots.+

Unease over the forthcoming economic measures has seen food prices shoot up by over 200 per cent in the last two weeks, according to officials.

BERNE (AUG 7) EFE - In an unprecedented move, the Swiss government Tuesday announced it would impose economic sanctions against Iraq and Kuwait in retaliation for the Baghdad-ordered invasion last week, the

Swiss Foreign Ministry announced.

The decision came a day after the United Nations Security Council voted to ban all imports from the two countries, freeze all financial assets belonging to Kuwait and Iraq and suspend any contract to export sell or transport goods to the two Gulf states.

Because of its neutrality, Switzerland has traditionally refused to adopt economic boycotts against any country.

Foreign Minister Klaus Jacobi Monday called the Iraqi invasion of Kuwait last Thursday "brutal."

SEVILLE, SPAIN (AUG. 7) EFE - More than 130 kg of hashish and 6,000 doses of heroin have been seized in three separate anti-narcotics operations across Spain, police said Tuesday.

A police spokesman said two people were arrested on a road leading into the southern city of Seville after police officers found 52 kg of hashish hidden in their car.

The suspects' statements led to the arrests of another two people who were hiding 56 kg of hashish in a cache by a swimming pool at a house in the city, 400 km southwest of Madrid.

The spokesman did specify when the four arrests were made but said that the hashish was destined for sale in Europe.

In a separate operation, six people were arrested Monday in Madrid after police discovered 6,000 doses of heroin hidden in one of the walls of their home during a raid.

The police spokesman also told press that a man was arrested with 24 kg of hashish in the eastern Mediterranean port city of Valencia, 310 km southeast of Madrid, when he tried to board his car onto a ferry bound for the Spanish island of Majorca.

Police did not say when the arrest was made. They are still looking for another man who fled from the car.

A Spanish government report released last month said more drugs were seized in Spain last year than in any other European nation.

MADRID (AUG. 7) EFE - A collision Tuesday between a Cypriot oil tanker and a Norwegian ship carrying ammonia has caused a fuel spill of between 6,000 and 8,000 tonnes in the Straits of Gibraltar, officials said Tuesday.

The collision took place in El Estrecho, 13 km northwest of Cabo Spartel near Tangier, breaking one of the oil ship's tanks and emptying its contents into the sea.

The oil slick is 11 km from the Spanish coastal town of Tarifa in the southern province of Cadiz and 5 km from the Moroccan coast in the middle of the Straits of Gibraltar where currents could move it into the Mediterranean Sea and disperse it before it reaches either coast, Spanish merchant marine officials said.

They added that several helicopters were flying over the slick to monitor its movements and that merchant marine units and the Spanish Navy were both undertaking control operations.

The Cypriot boat was traveling from the United States to Cartagena in the southeastern province of Murcia.

The Norwegian boat which was sailing from Cagliari in Sardinia to Mohammedia in Morocco, 250 km northeast of Marrakech, continued its journey after the collision.

MEXICO CITY (AUG 7) EFE - Mexico will not be able to increase oil exports to countries whose supplies are affected by the Persian Gulf conflict, a spokesman for the Mexican oil company PEMEX said Tuesday.

An embargo on oil imports from Iraq and Iraqi-held Kuwait following Iraqi President Saddam Hussein's invasion of Kuwait last Thursday has left many countries looking towards Mexico for oil supplies.

Mexican experts said that their country cannot increase the 2.5 million barrels it produces daily without risking the deterioration of its oil layers.

Mexico exports about 1,230,000 barrels daily, of which some 700,000 go to the United States, some 150,000 to Spain and another 150,000 to Japan.

Spain would like to import 30,000 barrels more from Mexico, and Israel, which receives a million tons of crude oil annually from Mexico, would now like to buy another 500,000 tons annually.

The price of Mexican crude oil has risen about dlrs seven to more than dlrs 22 since the invasion.

CHICAGO (AUG. 7) UPI - Grain and soybean futures were narrowly mixed at the close Tuesday on the Chicago Board of Trade. The volume was relatively light and trading was choppy throughout the day.

Corn and soybeans had underlying support from the cool weather around the Midwest and the prospect it would slow development of the crops. Continued inflationary fears also were supportive, but corn and beans were pressured by the light buying interest.

The weekly crop report indicated a slight decline in the condition of the soybeans and a little improvement in the corn crop. Wheat futures were narrowly mixed with commercials on both sides of the trade.

Japan bought a small quantity of corn and Algeria was in the market for 150,000 tons of wheat, otherwise there was little news on the export front.

Much of the activity through Thursday is expected to be position-squaring ahead of the August crop report. Country movement was light except for moderate selling of wheat in the harvest areas.

At the close, corn was off 1/4 to up 3, soybeans up 1 to down 2 1/2, wheat off 1 to up 1/2 and oats up 1/2 to 3/4.

NAIROBI (AUG. 7) XINHUA -- AFRICAN COUNTRIES HAVE BEEN URGED TO PRODUCE MORE FOOD BY PROPERLY UTILISING THEIR LAND RESOURCES.

KENYAN MINISTER FOR ENVIRONMENT AND NATURAL RESOURCES DR. NJOROGE MUNGAI MADE THE APPEAL WHEN HE OPENED A REGIONAL TRAI- NING COURSE ON LAND USE MANAGEMENT HERE YESTERDAY.

THE MINISTER SAID THAT ONLY 30 PERCENT OF AFRICA'S LAND IS UTILIZED FOR CULTIVATION BECAUSE OF WIND AND SOIL EROSION, VE- GETATION DEGRADATION AND DESERTIFICATION.

HE SAID THE CURRENT FOOD CRISIS IN AFRICA WAS CAUSED BY LOW LEVEL OF AGRICULTURAL PRODUCTIVITY AGAINST THE RAPIDLY GROWING OF POPULATION, ADDING THAT AFRICAN COUNTRIES SHOULD NOT GENERALISE THE CAUSES OF AND REMEDIES FOR LAND DEGRADATION BUT TAKE UTMOST CAUTION TO FORMULATE SPECIFIC LAND MANAGEMENT STRA- TEGIES FOR SPECIFIC LAND USE PROBLEMS.

AFRICAN COUNTRIES, HE WENT ON, SHOULD DEFINE THE ROLE OF LAND IN RELATION TO ENVIRIONMENTAL FACTORS TO INCREASE FOOD PRODU- CTION SINCE AFRICA'S LAND RESOURCES ARE UNDER PRESSURE TO PRODUCE MORE GOODS AND SERVICES FOR ITS EXPANDING POPULATION LIVING IN EXTREME VARIATIONS OF BOTH LAND AND

AGRICULTURAL SYSTEMS.

NICOSIA (AUG. 7) XINHUA - THE MISSING OF FOUR PRICELESS ICONS HAS AROUSED GENERAL CONCERN OVER THE PROTECTION OF CULTURAL RELICS IN CYPRUS. THE FOUR PIECES OF SEVENTEENTH CENTURY ICONS WERE STOLEN FROM METAMORPHOSIS CATHEDRAL IN DRYMOU VILLAGE IN PAPHOS ON FRIDAY EVENING, THE LOCAL PRESS REPORTED TODAY.

THESE ICONS ARE PAINTINGS OF SAINT BASIL, APOSTLE LOUCAS, ST. PANTELEIMON AND ST. DEMETRIS.

THE PRESS QUOTED SENIOR CLERGYMAN ARCHIMANDRITE IOANNIS OF THE PAPHOS BISHOPRIC AS SAYING THAT THE ICONS "ARE VERY IMPORTANT AND INVALUABLE."

"WE HAD ASKED THE VILLAGERS TO PLACE THE ICONS IN THE BISHOPRIC'S BYZANTINE MUSEUM SO THAT THEY WERE SECURE FROM THEFT AND DECAY BUT THE VILLAGERS OBJECTED TO THE IDEA," IOANNIS WAS QUOTED AS SAYING.

A VARIETY OF ICONS DATING AS FAR BACK AS TO THE 12TH CENTURY WERE DISPLAYED IN THE BISHOPRIC'S MUSEUM.

THE PRESS REPORTED THAT THE ICONS WERE IN THEIR PLACE FRIDAY EVENING WHEN A WOMAN WAS AT THE CHURCH TO LIGHT THE CANDLES. BUT ON SATURDAY MORNING THEY HAD GONE, SHE SAID.

UP TO NOW NOBODY KNOWS WHETHER THE ROBBERS WERE LOCAL VILLAGERS, FOREIGNERS OR PERSONS FROM OTHER VILLAGES. POLICE INVESTINGATION IS UNDERWAY.

MANILA (AUG. 7) XINHUA - THE ASIAN DEVELOPMENT BANK (ADB) HAS APPROVED A 600,000 U.S. DOLLAR TECHNICAL ASSISTANCE GRANT FOR BANGLADESH TO PREPARE AN INTEGRATED FLOOD PROTECTION PROJECT FOR THE CAPITAL CITY OF DHAKA, THE BANK ANNOUNCED TODAY.

GREATER DHAKA IS SURROUNDED ON ALL SIDES BY RIVERS, WHICH RECEIVE HEAVY RAINS DURING THE MONSOON SEASON. WHILE THE CENTRAL PARTS OF THE CITY ARE HIGH ENOUGH TO GENERALLY ESCAPE FLOODING, FRINGE AREAS REMAIN EXTENSIVELY INUNDATED FOR SEVERAL MONTHS EACH YEAR BY OVERFLOWS FROM THESE RIVERS.

ONE OF THE OBJECTIVES OF THE ASSISTANCE IS TO PREPARE A BASIC PLAN FOR INTEGRATED FLOOD PROTECTION AND IDENTIFY A PLAN FOR IMMEDIATE ACTION. SPECIAL EMPHASIS WILL BE LAID ON PROGRAMS AND PROJECTS RELATED TO THE MANAGEMENT INVOLVING LAND USE, WATER QUALITY AND SOLID WASTE TREATMENT, SANITATION AND IMPROVEMENT OF SLUM AND SQUATTER AREAS.

SINCE ALL THESE CONCERNS ARE CLOSELY LINKED WITH DIRECT PROGRAMS FOR FLOOD PROTECTION AND DRAINAGE, THE NEED FOR INTEGRATION IS OBVIOUS, THE BANK SAID.

BEIJING (AUG. 7) XINHUA - TIAN JIYUN, VICE-PREMIER OF THE STATE COUNCIL, STRESSED HERE TODAY THAT IT IS NECESSARY TO MAKE EVERY EFFORT TO ACHIEVE A BUMPER HARVEST OF COTTON THIS YEAR AND TO IMPROVE COTTON PURCHASING.

ADDRESSING THE OPENING CEREMONY OF A NATIONAL CONFERENCE ON COTTON PURCHASING, TIAN NOTED THAT THE SITUATION OF COTTON PRODUCTION THIS YEAR

IS BETTER THAN LAST YEAR'S AND THE COTTON-GROWING AREA IS LARGER.

HE SAID THAT SINCE AUGUST AND SEPTEMBER ARE AN IMPORTANT PERIOD FOR COTTON GROWTH, GOVERNMENTS AT ALL LEVELS IN THE COTTON-GROWING AREAS SHOULD MAKE ALL EFFORTS TO ORGANIZE DEPARTMENTS OF AGRICULTURE, SCIENCE AND TECHNOLOGY AND SUPPLY AND MARKETING TO CARRY OUT THE WORK OF FIELD MANAGEMENT, AND CONTROL PLANT DISEASES AND INSECT PESTS TO ENSURE A GOOD HARVEST AND AN INCREASED OUTPUT OF COTTON.

HE ALSO CALLED FOR MORE ATTENTION TO BE PAID TO THE WORK OF PURCHASING COTTON TO AVOID A "COTTON WAR."

HE SAID THAT NEXT YEAR ONE OF THE FOREMOST TASKS WILL BE TO FURTHER EXPAND THE COTTON-GROWING AREA TO SIX MILLION HA.

MEANWHILE, HE SAID, EFFORTS SHOULD ALSO BE MADE TO PROMOTE ADVANCED COTTON-GROWING TECHNOLOGY TO RAISE PER-HA OUTPUT.

#90219h0083 08/07/1990 ~Chinese News Agency

ISTANBUL (AUGUST 7) XINHUA - TURKEY HAS IMPOSED A SWEEPING RISE IN PETROLEUM PRICES STARTING TODAY BECAUSE OF THE HIKE OF OIL PRICES IN THE WORLD MARKET DUE TO IRAQ'S INVASION OF KUWAIT, THE GOVERNMENT ANNOUNCED LATE MONDAY NIGHT.

THE PRICE OF SUPER PETROLEUM HAS RISEN FROM 1,410 TURKISH LIRA (ABOUT 0.53 U.S. DOLLAR) PER LITER TO 1,620 LIRA (ABOUT 0.60 DOLLAR), WHILE THAT OF ORDINARY PETROLEUM HAS GONE UP BY 15 PERCENT, SAID THE ANNOUNCEMENT.

OTHER PRICE HIKES INCLUDE A 5 PERCENT INCREASE OF DIESEL OIL AND FUEL OIL.

THE ANNOUNCEMENT CAME AS OIL PRICES IN WORLD OIL MARKET SHOT UP BETWEEN 8 TO 9 DOLLARS A BARREL SINCE THE GULF CRISIS BEGAN IN LATE JULY WHEN IRAQ TROOPS WAS MASSED ON THE BORDER WITH KUWAIT.

IRAQ'S MOVE TO CLOSE ONE OF ITS TWIN PIPELINES CARRYING VITAL CRUDE EXPORTS THROUGH TURKEY AND SLASH A 30 PERCENT OF ITS OIL FLOW THROUGH THE SECOND PIPELINE WAS ALSO A FACTOR CONTRIBUTING TO THE RISE OF OIL PRICES IN TURKEY, WHICH DEPEND ON IRAQI OIL FOR ABOUT 64 PERCENT OF ITS OIL CONSUMPTION.

MANILA (AUG. 7) XINHUA - THE PHILIPPINE NAVY TODAY TRANSFERRED 33 DRUMS OF ROCKET FUEL FROM SANGLEY NAVAL BASE IN CAVITE TO THE CABALLO ISLAND, SOME 30 MILES SOUTH OF MANILA.

NAVY COMMANDER ADMIRAL MARIANO DUMANCAS ORDERED THE TRANSFER OF THE POISONOUS ANHYDROUS HYDRAZINE CHEMICALS AS A PRECAUTIONARY MEASURE TO ALLAY APPREHENSIONS OF CAVITE RESIDENTS THAT THE TOXIC GAS MIGHT EXPLODE AND CAUSE DAMAGE IN NEARBY AREAS.

THE ANHYDROUS HYDRAZINE HAD BEEN STORED AT THE NAVAL SANGLEY DEPOT IN THE EARLY 1970S AS PART OF THE MILITARY'S SECRET PROJECT TO DEVELOP ITS OWN GUIDED MISSILES.

THE PROJECT WAS ABANDONED AFTER THE TESTING OF TWO TYPES OF ROCKETS MADE WAS DECLARED FAILURE.

A NAVY BARGE WAS USED TO MOVE THE 33 DRUMS OF PROCESSED AND UNPROCESSED HYDRAZINE CHEMICALS TO THE NAVAL ORDNANCE DEPOT IN CABALLO ISLAND FOR DISPOSAL.

DUMANCAS SAID THE NAVY IS NEGOTIATING WITH SOME GOVERNMENT AND PRIVATE COMPANIES WHICH NEED PART OF THE CHEMICALS FOR MAKING INDUSTRIAL PRODUCTS. THE REST IS EXPECTED TO BE DESTROYED.

WHILE THE PROCESSED ANHYDROUS HYDRAZINE WAS STORED AT A HEAVILY FORTIFIED BUNKER NEAR AN AIR FORCE AIRSTRIP, AT LEAST THREE DRUMS CONTAINING THE POISONOUS GAS SHOWED SOME DEGREE OF BULGING, THUS TRIGGERING FEARS THAT THEY MIGHT EXPLODE.

COLOMBO (AUG. 7) XINHUA - SRI LANKAN STATE MINISTER FOR DEFENSE RANJAN WIJERATNE PLEDGED TODAY THAT THE CRIMINALS OF THE LIBERATION TIGERS OF TAMIL EELAM (LTTE) RESPONSIBLE FOR THE MURDER OF INNOCENT PEOPLE IN THE EASTERN PROVINCE WOULD BE DESTROYED.

HE MADE THE PLEDGE WHEN ANSWERING QUESTIONS RAISED BY OPPOSITION LEADERS MRS. SIRIMAVO BANDARANAIKE IN PARLIAMENT.

PRESS REPORTS SAID THAT 67 MUSLIM FARMERS WERE KILLED BY THE LTTE IN AMPARA DISTRICT, EASTERN PROVINCE, ON MONDAY AND SUNDAY. THIS FOLLOWED THE MASSACRE BY THE LTTE OF OVER 140 MUSLIMS ON AUGUST 3 IN TWO MOSQUES IN KATHANKUDY, ALSO IN THE PROVINCE.

THE MINISTER SAID HE WOULD SEE TO IT THAT NO MORE INNOCENT MUSLIM BLOOD WOULD BE SHED BY LTTE REBELS.

"WE SHALL SHOW THEM NO MERCY. NO ONE SHOULD CALL FOR A CEASEFIRE. WE ARE GOING ALL OUT TO DESTROY THE LTTE CRIMINALS," HE SAID.

MRS. BANDARANAIKE SAID THAT THERE WAS NO DOUBT THAT THE ACTS OF BARBARISM AT KATHANKUDY OVER WHICH THE OPPOSITION AND OTHER POLITICAL PARTIES HAD EXPRESSED SHOCK, HORROR AND GRIEF WAS THE LTTE'S BARBARISM.

THE LTTE HAD NO RESPECT FOR TEMPLES, MOSQUES OR CHURCH, SHE SAID, ADDING THAT "THEIR RELIGION IS VIOLENCE."

MANILA (AUG. 7) XINHUA - THE MEMBER OF THE PHILIPPINE HOUSE OF REPRESENTATIVES EARLIER CONVICTED OF GUN SMUGGLING TODAY GAVE UP HIS

CONGRESSIONAL SEAT IN AN UNCONDITIONAL RESIGNATION.

IN A STIRRING PRIVILEGE SPEECH, REPRESENTATIVE NICANOR DE GUZMAN GAVE UP HIS HOUSE SEAT "TO SPARE THE HOUSE FROM FURTHER DIVISION."

A LOWER COURT HERE FOUND DE GUZMAN GUILTY OF SMUGGLING IN THE COUNTRY ABOUT 300 PIECES OF HAND GUNS FROM THE UNITED STATES.

DE GUZMAN HAS DENIED THE CHARGE AND HAS APPEALED HIS CONVICTION BEFORE THE COURT OF APPEALS.

SPEAKER OF THE HOUSE OF REPRESENTATIVES RAMON MITRA SAID GUZMAN'S RESIGNATION IS A STEP TO REGAIN THE REPUTATION OF THE HOUSE.

"BY CHOOSING TO RESIGN, DE GUZMAN AFFIRMS THE TIME-HONORED RULE THAT ALL MEMBERS OF THIS HOUSE MUST BEHAVE WITH UTMOST PROPRIETY," HE SAID.

ALERT MILITARY GUARDS OF THE MANILA INTERNATIONAL AIRPORT FOUND DE GUZMAN AND AN ASSOCIATE BUSINESSMAN WITH PIECES OF HANDGUNS IN HIS LUGGAGE LAST YEAR WHEN THEY ARRIVED BACK FROM A TRIP TO THE U.S.

THE GUN SMUGGLING SPARKED ANOTHER CONTROVERSY IN THE SCANDAL-RIDDEN HOUSE, PROMPTING HOUSE SPEAKER MITRA TO CALL OPENLY FOR HIS OUSTER.

LAST MONDAY, A HOUSE ETHICS COMMITTEE HAS RECOMMENDED FOR THE CONGRESSMAN'S OUSTER. A VOTING IS SCHEDULED TOMORROW, BUT THIS HAS BEEN PREEMPTED BY DE GUZMAN'S RESIGNATION OF HIS SEAT.

THERE HAVE BEEN PERCEPTIONS THAT HIS COLLEAGUES WOULD VOTE FOR HIS OUSTER. MITRA EVEN WARNED THAT HE WOULD GIVE UP HIS SPEAKERSHIP AND HIS SEAT IN THE HOUSE IF DE GUZMAN REFUSES TO RESIGN.

OTTAWA (AUG. 7) XINHUA - DRIVEN BY HIGH INTEREST RATES AND A SOARING CANADIAN DOLLAR, CANADA'S CORPORATE PROFITS DECLINED SHARPLY IN THE SECOND QUARTER OF THIS YEAR.

IN A DOW JONES SURVEY OF 190 EARLY-REPORTING CANADIAN COMPANIES, SECOND-QUARTER OPERATING EARNINGS WERE 2.36 BILLION CANADIAN DOLLARS (TWO BILLION U.S. DOLLARS), DOWN 29 PERCENT FROM A YEAR EARLIER, BUT UP 21 PERCENT FROM THE FIRST QUARTER.

IN ALL, SIX-MONTH EARNINGS DROPPED 34 PERCENT TO 4.31 BILLION CANADIAN DOLLARS (3.44 BILLION U.S. DOLLARS), ACCORDING TO THE SURVEY PUBLISHED TODAY IN THE MONTREAL-BASED DAILY "GAZETTE".

ANALYSTS HERE EXPECT PROFIT DECLINES TO CONTINUE THROUGH THE END OF THE YEAR.

THOSE SUFFERED THE BRUNT OF THE DOWNWARD TREND IN THE SECOND QUARTER WERE FORESTRY AND MANUFACTURING COMPANIES, WITH EARNINGS AMONG SURVEYED COMPANIES DOWN 76 PERCENT AND 39 PERCENT RESPECTIVELY, FROM THE PREVIOUS YEAR.

CANADA'S CENTRAL BANK HAS BEEN PURSUING A HIGH INTEREST RATE POLICY TO FIGHT THE INFLATION, WHICH STANDS AT ABOUT 4.3 PERCENT ANNUALLY. AS A RESULT, THE COUNTRY'S PRIME LENDING RATE HAS REMAINED AT AN EIGHT-YEAR

HIGH OF 14.75 PERCENT FOR MONTHS, AND THE CANADIAN DOLLAR HAS RECENTLY HIT 10 YEARS' HIGH, REACHING 87.10 U.S. CENTS MONDAY.

CANADIAN ANALYSTS SAY THE TIGHT MONETARY POLICY HAS ERODED CORPORATE EARNINGS BY QUASHING EXPORTS AND STIFLING CONSUMER SPENDING.

LIMA (AUG. 7) XINHUA - PERUVIAN POLICE HAVE BOLSTERED SECURITY AT VARIOUS CAPITAL COMMERCIAL CENTERS, FEARING THAT THE IMMINENT PUBLICATION OF THE GOVERNMENT'S ECONOMIC STABILIZATION PROGRAM MAY TRIGGER A RASH OF ASSAULTS ON SHOPS AND THEIR GOODS.

GOVERNMENT SOURCES SAID MONDAY THAT WITHIN THE WEEK THE NEWLY-INSTALLED ADMINISTRATION OF PRESIDENT ALBERTO FUJIMORI WILL REVEAL ITS ECONOMIC STABILIZATION PROGRAM, WHICH WILL INCLUDE SEVERE AUSTERITY MEASURES

DESIGNED TO RESTRUCTURE THE NATION'S RAVAGED ECONOMY.

OFFICIALS STRESSED THE SEVERITY OF THE ECONOMIC PLAN AND SAID IT WILL NOT INCLUDE THE TRADITIONAL ECONOMIC PACKAGE INTRODUCED IN EARLIER MONTHS IN ORDER TO HELP THE POPULATION'S PURCHASING POWER TO BOUNCE BACK AND BRING THE PRICE OF PUBLIC UTILITY UP TO REAL COSTS.

OFFICIALS SAID THE PLAN ALSO INCLUDES REAL WAGE INCREASES RIGGED TO A PROJECTED INFLATION RATE, BUT ALLAYED FEARS OF A SELF-PERPETUATING INFLATIONARY TREND HAPPENING AGAIN, AS IT DID DURING THE PREVIOUS ADMINISTRATION.

IN SPITE OF THE GOVERNMENT'S REASSURANCES, RESIDENTS ANXIOUS ABOUT THE INEVITABLE RISE IN PRICES ARE BUYING AND HOARDING ESSENTIAL GOODS.

IN MANY NEIGHBORHOOD SHOPS, RESIDENTS CANNOT FIND SUCH BASIC DIETARY STAPLES AS BREAD, RICE, COOKING OILS AND SUGAR. IN THE DISTRICT OF VICTORIA, DISGRUNTLED CONSUMERS HAVE MADE MASS RUNS ON STORE SHELVES.

TO PREVENT FURTHER ASSAULTS ON STORES AND POSSIBLE MASS LOOTING, METROPOLITAN POLICE HAVE STATIONED REINFORCEMENTS AT MAJOR SHOPPING CENTERS.

BOGOTA (AUGUST 7) XINHUA - COLOMBIA'S INCOMING PRESIDENT, CESAR GAVIRIA TRUJILLO, NAMED THE OTHER EIGHT MEMBERS OF HIS CABINET MONDAY, ONE DAY BEFORE THE TRANSITION OF POWER TAKES PLACE LATER TODAY.

OF THE EIGHT NEWLY-NAMED MINISTERS, FOUR ARE KNOWN TO BE CONSERVATIVES, THREE LIBERALS AND ONE IS A FORMER GUERRILLA REPRESENTING THE M-19 DEMOCRATIC ALLIANCE.

THE NEW CABINET MEMBERS ARE: 42-YEAR-OLD ANTONIO NAVARRO WOLF, AN EX-PRESIDENTIAL CANDIDATE OF THE M-19 DEMOCRATIC ALLIANCE AND THE NEW ADMINISTRATION'S MINISTER OF HEALTH COMMUNICATIONS MINISTER ALBERTO CASAS SANTAMARIA, A 46-YEAR-OLD CONSERVATIVE CONSERVATIVE JUSTICE MINISTER JAIME GIRALDO ANGEL, 60 CONSERVATIVE AGRICULTURE MINISTER MARIA DEL ROSARIO SUTES, 39 AND CONSERVATIVE LABOR MINISTER FRANCISCO POSADA DE LA PENA, 60.

THE REMAINING, LIBERAL CABINET MEMBERS ARE: PUBLIC WORKS AND TRANSPORTATION MINISTER JUAN FELIPE GAVIRIA, 50 NATIONAL EDUCATION MINISTER ALFONSO VALDIVIESO SARMIENTO AND MINISTER OF ENERGY AND MINERAL RESOURCES LUIS FERNANDO VERGARA, 44.

THE FIRST FOUR MEMBERS OF GAVIRIA'S NEW CABINET WERE NAMED JULY 23 AND ARE ALL CONSIDERED TO BE LIBERALS: INTERIOR MINISTER JULIO SANCHEZ, FOREIGN

RELATIONS MINISTER LUIS FERNANDO JARAMILLO, ECONOMIC DEVELOPMENT MINISTER ERNESTO SAMPER PIZANO AND MINISTER OF FINANCE RUDOLFO HOMMES.

GAVIRIA HAS FILLED HIS CABINET'S 12 CIVILIAN POSTS, BUT HAS YET TO DESIGNATE ANYONE TO THE FINAL AND REMAINING POST OF DEFENSE MINISTER TO HEAD THE COUNTRY'S MILITARY. OBSERVERS BELIEVE HE WILL ASK THE COUNTRY'S CURRENT CHIEF OF THE ARMED FORCES, OSCAR BOTERO RESTREPO, TO STAY ON AS DEFENSE MINISTER.

THE PRESIDENTIAL INAUGURATION IS SCHEDULED TO TAKE PLACE LATER TODAY, ALONG WITH THE SWEARING IN OF HIS CABINET.

#90219k0058 08/07/1990 ~Japanese News Agency

TOKYO (AUG. 7) KYODO - THE NATIONAL PERSONNEL AGENCY (NPA) ON TUESDAY RECOMMENDED AN AVERAGE 3.67 PERCENT OR 10,728 YEN MONTHLY WAGE INCREASE FOR CENTRAL GOVERNMENT EMPLOYEES DURING FISCAL 1990, NPA OFFICIALS SAID.

THE OFFICIALS SAID THE NPA MADE THE RECOMMENDATION TO THE GOVERNMENT AND THE DIET TO RAISE THE RATE RETROSPECTIVE TO APRIL 1.

THE 3.67 PERCENT INCREASE IS UP 0.56 PERCENTAGE POINT FROM THE PREVIOUS FISCAL YEAR'S WAGE INCREASE RATE, AND THE RISING RATE REFLECTS THE AVERAGE 5.95 PERCENT INCREASES IN MONTHLY WAGES IN THE PRIVATE SECTOR, THE OFFICIALS SAID.

WAGES OF GOVERNMENT EMPLOYEES WILL INCREASE FROM AN AVERAGE OF 291,949 YEN FOR FISCAL 1989 TO 302,677 YEN FOR FISCAL 1990 IF THE RECOMMENDATION OF THE NPA IS IMPLEMENTED, THE OFFICIALS SAID.

THE GOVERNMENT WILL DECIDE IN THE AUTUMN WHETHER OR NOT TO IMPLEMENT THE RECOMMENDATION AND IS EXPECTED TO ALLOCATE 550 BILLION YEN TO FINANCE THE WAGE INCREASE, THE OFFICIALS SAID.

IF THE GOVERNMENT IMPLEMENTS THE NPA'S RECOMMENDATIONS ON WAGE INCREASES WITHOUT ASKING FOR A REVISION, IT WILL BE THE FIFTH YEAR IN A ROW FOR IT TO DO SO, THE OFFICIALS SAID.

THE STARTING MONTHLY WAGES OF UNIVERSITY GRADUATES WHO ARE EXPECTED TO EVENTUALLY ASSUME HIGHER CAREER POSTS IN GOVERNMENT SERVICE HAVE BEEN SET AT 157,300 YEN, AN INCREASE OF 7.3 PERCENT OVER FISCAL 1989 THAT ENDED MARCH 31, 1990.

THE NPA RECOMMENDED THE HIGHER STARTING RATE FOR UNIVERSITY GRADUATES BECAUSE MORE AND MORE YOUNG PERSONS ARE TENDING TO STAY AWAY FROM GOVERNMENT JOBS, THE OFFICIALS SAID.

AS FOR YEAR-END BONUSES, THE AGENCY HAS RECOMMENDED THAT GOVERNMENT EMPLOYEES BE GIVEN BONUSES EQUIVALENT TO 5.35 MONTHS WAGES, THE OFFICIALS SAID.

THE NPA HAS ALSO URGED THE GOVERNMENT TO ADOPT A 40-HOUR WORKING WEEK SYSTEM FOR GOVERNMENT EMPLOYEES IN A BID TO IMPLEMENT A FIVE-DAY WEEK SYSTEM IN GOVERNMENT OFFICES.

IT HAS ALSO PROPOSED A THREE-DAY SUMMER VACATION FOR GOVERNMENT EMPLOYEES.

#90219k0060 08/07/1990 ~Japanese News Agency

TOKYO (AUG. 7) KYODO - RECOVERING CONFIDENCE IN THE DOMESTIC ECONOMY LED JAPANESE CONSUMERS TO FEEL THEIR LIVING STANDARD HAS PICKED UP IN THE SECOND QUARTER THIS YEAR, ACCORDING TO A GOVERNMENT SURVEY RELEASED TUESDAY.

THE ECONOMIC PLANNING AGENCY (EPA) SAID IN ITS QUARTERLY REPORT THAT ITS INDEX OF CONSUMER CONFIDENCE ROSE 0.9 PERCENT FROM THE PREVIOUS QUARTER TO A SEASONALLY-ADJUSTED 47.2 PERCENT IN THE APRIL-JUNE QUARTER.

THE FIGURE FOLLOWS A 1.8 PERCENT DROP IN THE JANUARY-MARCH PERIOD, THE FIRST DECLINE IN THREE STRAIGHT QUARTERS. THE DOWNTURN WAS CAUSED BY GROWING UNCERTAINTIES OVER THE JAPANESE ECONOMY DUE TO THE SLUMP IN FINANCIAL MARKETS EARLY THIS YEAR AND RISING INTEREST RATES, IT SAID.

THE EPA'S LATEST SURVEY IS THE RESULT OF A QUESTIONNAIRE CIRCULATED IN MID-JUNE TO 5,040 HOUSEHOLDS NATIONWIDE, TO WHICH VIRTUALLY ALL REPLIED.

THE SURVEY, CONDUCTED ON A QUARTELY BASIS SINCE 1982, IS AIMED AT GAUGING BASIC CONSUMER SENTIMENT IN 20 AREAS SUCH AS INCOME GROWTH, INTEREST BURDENS, EMPLOYMENT, AND PURCHASING BEHAVIOR, AS WELL AS TRACKING SPENDING ON DURABLE GOODS.

OUT OF THE 20 CATEGORIES, 16 FIELDS SHOWED IMPROVEMENT OVER THE PREVIOUS QUARTER IN THE APRIL-JUNE PERIOD, COMPARED WITH 10 IN THE JANUARY-MARCH PERIOD AND 16 IN THE OCTOBER-DECEMBER QUARTER LAST YEAR.

DESPITE A GENERAL SENSE THAT LIVING STANDARDS HAVE IMPROVED, JAPANESE CONSUMERS REMAINED DISSATISFIED WITH THE HEAVY BURDEN OF INTEREST RATE PAYMENTS ON LOANS AND THE LOW LEVEL OF DISPOSABLE INCOME, IT SAID.

BETWEEN APRIL AND JUNE PURCHASES OF 16 DURABLE GOODS SHOWED YEAR-ON-YEAR GAINS, INCLUDING AUTOS, MICROWAVE OVENS, AND GOLF SETS. HOWEVER, SALES OF 17 ITEMS LIKE VIDEO CASSETTE RECORDERS AND REFRIGERATORS DROPPED. PURCHASES OF FIVE OTHER ITEMS REMAINED UNCHANGED.

FOR THE JULY-SEPTEMBER QUARTER, JAPANESE HOUSEHOLDS SHOWED AN INCREASING APPETITE FOR CAMCORDERS, RUGS, AIRCONDITIONERS, BUT WERE LESS INTERESTED IN VACUUM CLEANERS, AUTOMOBILES, WASHING MACHINES AND VCRS, IT SAID.

-30- 2179

#90219k0064 08/07/1990 ~Japanese News Agency

LONDON (AUG. 7) KYODO - SOME 80 RUNNERS, INCLUDING 20 AMERICAN INDIANS AND 30 JAPANESE, STARTED AN 8,500-KILOMETER MARATHON FROM LONDON ON MONDAY TO PRAY FOR PEACE AND CALL FOR ENVIRONMENTAL PROTECTION.

THE RUNNERS ON MONDAY MARCHED THROUGH LONDON CITY AND PRAYED FOR THE VICTIMS OF THE ATOMIC-BOMBING OF HIROSHIMA 45 YEARS AGO, AND STARTED RUNNING THE MARATHON TUESDAY MORNING.

THE MARATHON, CALLED THE ''SACRED RUN,'' WAS ORGANIZED BY DENNIS BANKS, A FOUNDER OF THE AMERICAN INDIAN MOVEMENT IN THE UNITED STATES.

IT WILL TAKE THE RUNNERS THROUGH FRANCE, BELGIUM, EAST AND WEST GERMANY, POLAND, THREE SOVIET BALTIC REPUBLICS, SWEDEN, NORWAY, AND FINLAND, AND THEY ARE SCHEDULED TO REACH MOSCOW ON OCTOBER 10, THE ORGANIZERS SAID.

DURING THE RUN, MUSIC, DANCE, POETRY, SONGS, AND STORYTELLING FROM THE DIFFERENT CULTURAL TRADITIONS OF THE PARTICIPANTS WILL BE PRESENTED, THEY SAID.

MEMBERS OF THE AINU ETHNIC MINORITY OF HOKKAIDO, NORTHERN JAPAN ARE AMONG THE JAPANESE PARTICIPANTS. MAKOTO OKUNO, 37, FROM JAPAN, SAID, ''THE EARTH HAS REACHED THE LIMIT AS A RESULT OF ENVIRONMENTAL DESTRUCTION, POLLUTION, WAR AND VARIOUS FORMS OF DISCRIMINATION. I HOPE THIS JOURNEY WILL REMIND ME OF WHAT CIVILIZATION FORGOT.''

-30- 1413

#90219k0066 08/07/1990 ~Japanese News Agency

TOKYO (AUG. 7) KYODO - MINISTER OF INTERNATIONAL TRADE AND INDUSTRY KABUN MUTO SAID TUESDAY THAT THE GOVERNMENT IS READY TO EASE ITS RESTRICTIONS ON THE USE OF OIL STOCKPILES IN JAPAN TO MINIMIZE FEARS OF AN OIL CRISIS.

''IF THE SPIRAL IN OIL PRICES CONTINUES, WE ARE READY TO ALLOW A DRASTIC DECLINE IN THE REQUIRED OIL STOCK LEVEL IN ORDER TO COOL THE MARKET,'' MUTO TOLD A PRESS CONFERENCE.

JAPAN'S BAN ON OIL IMPORTS FROM IRAQ AND KUWAIT FOLLOWING IRAQ'S INVASION OF ITS OIL-RICH NEIGHBOR LAST WEEK KINDLED FEARS OF AN OIL CRISIS IN JAPAN AND BOOSTED OIL PRICES.

JAPAN DEPENDS ON IMPORTS FOR 99 PERCENT OF ITS OIL AND THE EMBARGO IN OIL IMPORTS FROM THE TWO COUNTRIES IS EXPECTED TO CUT THE NATION'S SUPPLY BY 12 PERCENT. IN TOKYO DEALINGS, TUESDAY, THE PRICE OF THE SPOT BENCHMARK DUBAI CRUDE SURGED NEARLY 4 DOLLARS TO AROUND 26 DOLLARS PER BARREL.

ASKED WHETHER THE USE OF OIL STOCKPILES WILL START IN THE PUBLIC OR PRIVATE SECTOR, MUTO SAID IT IS APPROPRIATE TO USE STOCKS IN THE PRIVATE SECTOR FIRST.

JAPANESE STOCKPILES OF OIL WERE SUFFICIENT FOR 142 DAYS OF CONSUMPTION AT THE END OF JUNE, OF WHICH 88 DAYS WORTH ARE RESERVED IN THE PRIVATE SECTOR.

UNDER GOVERNMENT REGULATIONS, OIL COMPANIES ARE REQUIRED TO STOCKPILE ENOUGH OIL TO LAST FOR AT LEAST 82 DAYS.

-30- 1462

#90219k0071 08/07/1990 ~Japanese News Agency

GENEVA, SWITZERLAND (AUG. 7) KYODO - TWO JAPANESE SCALING THE 4,807-METER MONT BLANC DIED SUNDAY WHEN THEY FELL FROM THE MOUNTAIN BECAUSE OF A ROCKSLIDE, THE JAPANESE CONSULATE GENERAL IN MILAN, ITALY, SAID TUESDAY.

THE TWO DEAD MOUNTAINEERS, TOSHIAKI UNE, 42, AND KAYOKO WADA, 37, WERE TRAVERSING TOWARD THE GRANDES JORASSES WITH A FRENCH GUIDE AND ANOTHER JAPANESE WHEN THEY MET WITH THE ACCIDENT.

THE GUIDE AND THE THIRD JAPANESE ESCAPED UNHURT. ROCKSLIDES ON MONT BLANC HAVE OCCURRED FREQUENTLY THIS SUMMER BECAUSE THE PERPETUAL SNOWFIELD THERE HAS BEEN RAPIDLY THAWING IN THE UNUSUALLY HOT WEATHER.

NINE PERSONS DIED BECAUSE OF ROCKSLIDES IN VARIOUS PARTS OF THE SWISS ALPS LAST WEEKEND.

WADA'S HUSBAND DIED SEVERAL YEARS AGO WHILE CLIMBING MT. ACONCAGUA IN CHILE.

#90219k0073 08/07/1990 ~Japanese News Agency

TOKYO (AUG. 7) KYODO - THE BANK OF JAPAN (BOJ) SAID TUESDAY IT WILL SELL 600 BILLION YEN WORTH OF FINANCING BILLS (FB) TO THE PRIVATE SECTOR WEDNESDAY UNDER REPURCHASE AGREEMENTS SET FOR AUGUST 16.

THE SELLING RATE IS SET AT 7.5299 PERCENT. THIS TYPE OF FUND-ABSORBING SELLING OPERATION IS USUALLY CONDUCTED WHEN THE MARKET HAS AN AMPLE FUND SURPLUS, AND THIS TIME IT IS RATHER UNUSUAL, ACCORDING TO FINANCIAL MARKET SOURCES.

THE CENTRAL BANK EXPECTS A NARROW FUND SHORTAGE WEDNESDAY AS IT HAS 1 TRILLION YEN WORTH OF MATURED DISCOUNT BILLS AGAINST AN EXPECTED FUND SURPLUS OF ONLY 200 BILLION YEN, THEY SAID.

OTHER SOURCES, HOWEVER, SAID THE OPERATION IS ''ADEQUATE.'' THE CENTRAL BANK'S REPURCHASE AUGUST 16, WHEN COMMERCIAL BANKS START TO RAISE FUNDS TO MEET THE MONTHLY DEADLINE FOR RESERVE REQUIREMENTS, WILL MEAN REINJECTION OF FUNDS TO THE MARKET TO CONTROL AN EXCESSIVE RISE OF INTEREST RATES DUE TO CONCERN OVER THE SITUATION IN THE MIDDLE EAST, THEY SAID.

-30- 1161

#90219k0080 08/07/1990 ~Japanese News Agency

TOKYO (AUG. 7) KYODO - NIKON CORP. WILL ESTABLISH A SUBSIDIARY IN THAILAND TO PRODUCE PHOTOGRAPHIC LENSES FOR SINGLE-LENS REFLEX CAMERAS FROM 1991, COMPANY OFFICIALS SAID TUESDAY.

THE NEW COMPANY, NIKON (THAILAND) CO., WITH A CAPITAL OF 160 MILLION BAHTS OR ABOUT 1 BILLION YEN, WILL PRODUCE 300,000 LENSES ANNUALLY, WHICH ACCOUNT FOR 25 PERCENT OF NIKON'S DOMESTIC PRODUCTION OF THESE LENSES, THE OFFICIALS SAID.

NIKON WILL INVEST SOME 5 BILLION YEN IN ITS FIRST OVERSEAS PRODUCTION BASE WHERE IT ALSO PLANS TO PRODUCE COMPACT CAMERAS IN THE FUTURE WITH THE AIM OF REDUCING THE COMPANY'S OPERATIONAL COSTS.

-30- 778

#90219k0081 08/07/1990 ~Japanese News Agency

OSAKA (AUG. 7) KYODO - THE HEAD OF INUI STEAMSHIP CO. SAID TUESDAY THE COMPANY HAS BEEN ORDERED TO PAY ABOUT 32.6 MILLION DOLLARS TO ITS PHILIPPINE CREW AS A RESULT OF A LAWSUIT IN THE UNITED STATES INVOLVING A DISPUTE OVER WAGES.

HIDEFUMI INUI, PRESIDENT OF THE MEDIUM-SIZED KOBE-BASED SHIPPING FIRM, TOLD A PRESS CONFERENCE THAT THE COMPANY HAS IMMEDIATELY APPEALED TO A U.S. HIGHER COURT AGAINST THE RULING BY THE FEDERAL DISTRICT COURT IN WASHINGTON STATE.

''THE JUDGMENT TOTALLY IGNORES OUR PLEA. WE WILL CONTINUE TO FIGHT,'' INUI SAID.

THE SUIT WAS FILED IN LATE JANUARY BY 20 PHILIPPINE CREWMEMBERS OF THE LUMBER CARRIER PINE FOREST AGAINST DELICA SHIPPING, INUI'S WHOLLY OWNED PANAMANIAN SUBSIDIARY, FOR UNDERPAYMENT OF WAGES.

THE FILIPINOS CLAIMED THE WAGES PAID TO THEM WERE LOWER THAN THE MINIMUM WAGES DECIDED BY THE LONDON-BASED INTERNATIONAL TRANSPORT FEDERATION (ITF). THE CREW WAS SEEKING COMPENSATION TOTALING ABOUT 43 MILLION DOLLARS.

INUI ALSO SAID THE SUIT HAS PLACED THE COMPANY IN A DIFFICULT FINANCIAL SITUATION AND THAT IT MAY BE DIFFICULT FOR IT TO REACH THE INCOME TARGET OF 100 MILLION YEN IN FISCAL 1990 ENDING MARCH 31, 1991.

THE COMPANY HAS ALREADY SPENT 100 MILLION YEN IN THE SUIT AND THE AMOUNT OF COMPENSATION IS EQUAL TO THE COMPANY'S ANNUAL SALES, HE ADDED.

INUI STEAMSHIP IS ALSO IN A SIMILAR SUIT AT AN OREGON FEDERAL DISTRICT COURT FILED BY 13 PHILIPPINE SEAMEN OF THE LUMBER CARRIER FIR BLOVE. THE SUIT IS EXPECTED TO CONCLUDE NEXT JANUARY.

-30- 1703

#90219k0083 08/07/1990 ~Japanese News Agency

NAGOYA (AUG. 7) KYODO - THE NAGOYA-BASED DAIDO STEEL CO. SAID TUESDAY IT HAS AGREED WITH GAUTSCHI, A SWISS ALUMINUM FURNACE MAKER, TO BE PROVIDED WITH GAUTSCHI'S KNOW-HOW ON ALUMINUM FURNACE PRODUCTION.

DAIDO PLANS TO INCREASE PRODUCTION OF ALUMINUM FURNACES TO SELL TO ALUMINUM PLATE MAKERS IN JAPAN AMID INCREASING DEMAND FOR ALUMINUM PLATE FOR SUCH PRODUCTS AS AUTO BODIES AND CANS FOR FOODS, COMPANY OFFICIALS SAID.

DAIDO HAS AGREED TO PAY GAUTSCHI 3.5 PERCENT OF ITS PROSPECTED ANNUAL SALES OF 3 BILLION TO 4 BILLION YEN IN RETURN FOR THE KNOW-HOW, THE OFFICIALS SAID.

-30- 752

#90219k0086 08/07/1990 ~Japanese News Agency

MANILA (AUG. 7) KYODO - PRESIDENT CORAZON AQUINO SIGNED INTO LAW TUESDAY A 10 BILLION PESO (50 MILLION U.S. DOLLARS) REHABILITATION ACT THAT WILL PROVIDE INITIAL FUNDING FOR AN EXTENSIVE RELIEF AND REBUILDING SCHEME FOR NORTHERN PHILIPPINE REGIONS DEVASTATED BY THE JULY 16 EARTHQUAKE.

DESCRIBING THE ACT AS ''THE FASTEST BILL EVER ENACTED,'' AQUINO TOLD LEGISLATORS PRESENT DURING THE SIGNING: ''THIS ACCOMPLISHMENT IS A MARK OF LEADERSHIP AND COMPASSION TO THE FILIPINO PEOPLE WHOM WE ALL VOWED TO SERVE.''

AQUINO SIGNED THE BILL 16 DAYS AFTER SHE APPEALED BEFORE CONGRESS, IN HER STATE-OF-THE NATION ADDRESS LAST JULY 23, TO HELP HER IN THE MASSIVE RECONSTRUCTION PROGRAM FOR QUAKE-DAMAGED AREAS, INCLUDING SIX NATIONAL BRIDGES AND FIVE NATIONAL ROADS.

''FROM THE RUINS, WE SHALL BUILD STRUCTURES THAT ARE MORE MODERN AND STRONGER,'' SHE SAID.

AT LEAST 1,648 PERSONS WERE KILLED, 3,513 OTHERS WERE INJURED, AND 1.5 MILLION FILIPINOS LOST THEIR JOBS OR HOMES BECAUSE OF THE QUAKE MEASURING 7.7 ON THE OPEN-ENDED RICHTER SCALE.

#90219k0091 08/07/1990 ~Japanese News Agency

TOKYO (AUG. 7) KYODO - MITSUBISHI MOTORS CORP. SAID TUESDAY IT WILL INSTALL SAFETY DEVICES SUCH AS AIR BAGS, REAR SEAT BELTS, AND FIRE RESISTANT MATERIALS IN ALL OF ITS PASSENGER CARS BY 1992.

MEANWHILE, OTHER AUTOMAKERS ALSO ARE TAKING STEPS TO IMPROVE THE SAFETY OF THEIR AUTOMOBILES.

MAZDA MOTOR CORP. ANNOUNCED EARLIER IN THE YEAR THAT SIDE DOOR BEAMS TO HELP ABSORB LATERAL SHOCKS WILL BE INCLUDED IN ITS CARS WITHIN THE NEXT THREE YEARS.

-30- 604
#90219k0092 08/07/1990 ~Japanese News Agency
MANILA (AUG. 7) KYODO - THE PHILIPPINES BALANCE OF PAYMENTS DEFICIT, INCLUDING EXTERNAL DEBT RESCHEDULING, FOR THE JANUARY-MAY PERIOD THIS YEAR NARROWED DOWN TO 58 MILLION U.S. DOLLARS FROM THE 200 MILLION DOLLARS POSTED DURING THE SAME PERIOD LAST YEAR, THE CENTRAL BANK REPORTED TUESDAY.

THE CENTRAL BANK SAID THAT WITHOUT THE FOREIGN DEBT RESCHEDULING, THE DEFICIT FOR THE FIVE-MONTH PERIOD COULD HAVE SWELLED TO 614 MILLION DOLLARS.

THE CENTRAL BANK ATTRIBUTED THE IMPROVEMENT IN THE BALANCE OF PAYMENTS POSITION TO STRONGER PERFORMANCE OF THE NONMONETARY CAPITAL AGAINST THE WEAKER CURRENT ACCOUNT POSITION.

THE CURRENT ACCOUNT DEFICIT WORSENED TO 1,045 MILLION DOLLARS DURING THE PERIOD FROM 585 MILLION DOLLARS IN THE SAME PERIOD LAST YEAR DUE TO A WIDER TRADE GAP.

IMPORTS CLIMBED TO 4,854 MILLION DOLLARS WHILE EXPORTS GREW TO 3,264 MILLION DOLLARS, THE BANK SAID. THE 20.1 PERCENT SURGE IN IMPORTS, HOWEVER, REFLECTED A SLOWDOWN IN DOMESTIC DEMAND IF COMPARED WITH THE 30.6 PERCENT INCREASE DURING THE SAME PERIOD LAST YEAR, IT SAID.

-30- 1227
#90219k0095 08/07/1990 ~Japanese News Agency
FUKUOKA (AUG. 7) KYODO - A U.S. ELECTRIC POWER COMPANY HAS BECOME A MEMBER OF THE KYUSHU-YAMAGUCHI ECONOMIC FEDERATION BASED IN FUKUOKA, THE FEDERATION SAID TUESDAY.

THE NEW MEMBER, MONTANA POWER CO., HAS NOT YET SET UP A BUSINESS BASE IN KYUSHU, BUT WAS ALLOWED TO JOIN THE FEDERATION FROM THE VIEWPOINT OF PROMOTING INTERNATIONAL COOPERATION, THE FEDERATION SAID.

THE POWER COMPANY, WHICH PROVIDES ELECTRIC POWER AND GAS TO 82 PERCENT OF THE POPULATION IN MONTANA, IS EXPECTED TO BUILD BUSINESS TIES WITH LOCAL JAPANESE COMPANIES, IT ADDED.

FALLS CHURCH, VA (AUG. 7) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The Nikkei closed dramatically down 946.46 ... After opening lower, U.S. stocks trading in London move higher. Around mid-afternoon, the FT 100 was up 34.0, and the DAX index had jumped 29.66. ... The LABOR DEPARTMENT says productivity improved in the second-quarter for the first time in 18 months, climbing at a 1.6% annual rate. ... GENERAL DYNAMICS announces a consolidation of two California defense divisions that will result in 1,500 to 2,000 layoffs. ... EASTERN AIRLINES and eight top managers plead innocent to charges of falsifying safety and maintenance records. ... RUBBERMAID has agreed to purchase ELDON INDUSTRIES.

WHAT'S AHEAD:

The FEDERAL RESERVE will release June Consumer Credit Data later on today. ... The HOUSE ENERGY AND COMMERCE COMMITTEE will hold hearings at 10 a.m. EDT on how a boycott of Iraqi and Kuwaiti oil would affect oil prices.

FROM THE BULLS:

"I think this inflation scare will be temporary and the crack in the stock market will be temporary," says MICHAEL METZ of OPPENHEIMER & CO. "I expect a better stock market from here, although it may take time to move out of the lower end of this trading range, which I would put at 2700 to 3000." Metz predicts that Monday will be the first strong day for the market, and says there is "more than a 50% chance" that the market has bottomed out. "It's my feeling the market will not have to go through the huge liquidation process because most investors ... are undercommitted to stocks," says Metz. "The real problem will be what will motivate the potential buyers to come back in the market." ("Investor's Daily", 8/7)

FROM THE BEARS:

CARMINE GRIGOLI, chief portfolio strategist at FIRST BOSTON, has a decidedly negative near-term view of the overall market. He predicts that the Dow will fall to 2500 because of rising oil prices and a weakening U.S. economy. In a full-blown recession, Mr. Grigoli expects the market would trade even lower. Given the stock market's current volatility, Grigoli believes a 50 or 100-point rally in the industrial average is a real possibility, especially if the U.S. launches a successful military strike at Iraq. In that case, Grigoli 1 says, "I would use it as an opportunity to sell." (WSJ, 8/7)

Newsletter writer JOE GRANVILLE is predicting a stock market crash within a few days. He thinks the Dow industrials will fall below 2200 by month's end and, before recovering in the spring of 1992, will drop below the October 1987 low of 1738. (WSJ, 8/7)

"The psychology of the [OTC] market has been badly bruised if not fractured," says BRADLEY TURNER of McDONALD & CO. SECURITIES. "Not even the bluest of the blue chips seem to offer enough value to avoid the decline. At this point, there's not a lot of buyers." ("Investor's Daily" 8/7)

STOCK MARKET:

A survey of investor hotlines this morning finds ANDREW ADDISON bullish on bonds, bearish on gold and neutral on stocks. "It looks like we might have had a selling climax," says Addison. "No new buying should be done for now." says CARLTON LUTZ of the "Cabot Market Letter," and he advises investors to sit tight with their present holdings. "Longer term we don't think the blood letting has ended," says JAMES STACK of "Investech" who thinks this smells like a bear market. GLENN CUTLER of "Market Mania" is more bullish: "Sentiment pieces are in place for a good market low ... [the market is] setting up for an important buying opportunity at some point this week." DON WOLANCHUK thinks it's too early to tell if the market has found its lows, but adds "Everybody is scared out of their wits now

"The markets are all reacting to the same bogeymen: higher oil prices, higher interest rates, higher inflation and lower growth," says international economist BILL STERLING of MERRILL LYNCH. ("USA Today", 8/7)

"We have been looking for a 10-15% correction," says PETER WASSERMAN of ALTMAN, BRENNER & WASSERMAN. "What we see here is basically no panic." He is somewhat encouraged that the market has not fallen further, given the negative factors it is facing, but is still very cautious. "I would doubt that there would be any meaningful rise in the market until a resolution in the Mid-East happens," says Wasserman. (CNBC "Market Wrap-Up", 8/6)

"I think people are totally overreacting here in terms of selling stocks at any price," says TOM GALLAGHER of OPPENHEIMER & CO. "If the public is thinking of doing any selling, I'd say to wait until later in the week. Things should settle down in a couple of days, and we'll have a better idea of what's going to happen [in the Middle East]." (UPI, 8/6)

"The market is awfully oversold. It really is compressed," says CHARLES CLOUGH of MERRILL LYNCH. But he feels this compression is not sustainable and while he claims to be a poor market timer, he says sometime in the near future the market is due "for a narrow reflex rally." (CNBC "Business View", 8/6)

"It looks like there's a lot of selling pressure still," says ED LAUX of KIDDER, PEABODY. "There's been a big change in psychology in the market. That won't go away tomorrow." ("Investor's Daily", 8/7)

"It is not like the panics of the two Octobers," says JEFFREY TABAK, a partner with MILLER TABAK HIRSCH & COMPANY, a New York investment banking firm. "This time, the circuit breakers worked much more effectively." (NYT, 8/7)

Circuit breakers have contributed to an orderly decline, says MARIA RAMIREZ of RAMIREZ CAPITAL CONSULTANTS. "You don't feel the pain and 2 the panic," says Ramirez who believes that the circuit breaker mechanisms don't remove selling pressure but act to spread it over several trading sessions. (CNN "Business Morning", 8/7)

"It absolutely didn't feel like Oct. 19 or 20, 1987. At no time was there panic selling," says DONALD STONE, vice chairman of the NEW YORK STOCK EXCHANGE and a senior partner at LASKER, STONE AND STERN. "But it felt like the market was under real pressure." (WSJ, 8/7)

"You haven't had a panic yet," says JEAN-MARIE EVEILLARD, president of SOGEN INTERNATIONAL FUND. "There is still the hope that somehow or other, things will settle down." ("USA Today", 8/7)

"I think investors are extremely worried that the Iraqis are not going to stop where they are now," says JEFF LANDLE of STOVALL/TWENTY-FIRST ADVISERS. "The uncertainty surrounding that has moved investors to move away from the market." (CNBC "Market Wrap- Up", 8/6)

"If it looks like it will be a long ordeal [in the Middle East], the market could be in trouble for quite a while," says JOHN BURNETT of DONALDSON, LUFKIN & JENRETTE. "But if it looks like we can make short work of it through diplomacy or military action, we could get a bounce in stocks and oil prices will come down. But we'll have to wait and see." (UPI, 8/6)

"I think there will be a lot of uncertainty and volatility, but I don't expect it to have ... a strong downward bias," says ROBERT HEISTERBERG of ALLIANCE CAPITAL. He thinks the U.N.'s sanctions against Iraq will be "stringent" enough to bring some stability back to the market. (FNN "Marketwrap", 8/6)

ANDREW ROJEK, international market strategist for MERRILL LYNCH, explains that world markets are being drawn together by the events in the Middle East. "I would still think that Tokyo is watching us rather than us watching Tokyo. This morning's selling in Europe was a reaction of our losses on Friday, but of course it was affected by news over the weekend." (CNBC "Business View", 8/6)

"Everything went wrong today," says BYRON WIEN, chief U.S. investment strategist for MORGAN STANLEY. "The prospect of some stabilization of the situation in the Middle East diminished. There's a feeling that [President] Bush will respond militarily. If [Saddam Hussein] were stopped in some way, using military force, it would be viewed as bullish for the market and a positive for Bush. If they don't stop him, he will hang as a cloud over the market. You can't have oil, the most vital material in American life, in the hands of an unpredictable leader." ("The Washington Post", 8/7)

"As long as there is a possibility of a wider war and a greater oil cutoff the prospects are bad everywhere," says ROBERT HORMATS of GOLDMAN SACHS INTERNATIONAL. ("USA Today", 8/7)

STOCK TIPS:

"Famous last words, but this is a very low risk entry point into the stock market right here," says MICHAEL METZ, chief market analyst at OPPENHEIMER. "I think we're in a [shallow] recession but ... the most economically sensitive sectors of the market have already assumed we're in a recession." Metz says cyclical stocks start to decline before a recession and then go up once a recession happens. He would buy INTERNATIONAL PAPER, REYNOLDS, DUPONT, JOHNSON & JOHNSON and BRISTOL MEYERS. "And, frankly, down here I think IBM is a buy." Metz also says, "People will still need medicine and buy food" and thus he recommends ALBERTSON'S, COCA-COLA, SCHERING-PLOUGH and 3 SYNTEX. ARCO is Metz's pick among the oils and he adss the TOSCO, an oil refiner, has probably been beaten down too far and might be attractive. Metz also likes the ten and three year bonds coming up at auction, but would avoid the thirty year issue. (CNN "Business Day" and WSJ, 8/7)

#90219m0002 08/07/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (AUG. 7) MCS - A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

"I don't think the dollar has any safe-haven attractiveness right now," says CLAUDE TYGIER, a foreign exchange specialist, partly because of the unattractiveness of the United States economy. NEAL SOSS, chief economist at the FIRST BOSTON CORPORATION, adds, "If you call this a flight to quality, you have to call it a flight to the Deutschemark." (NYT, 8/7)

The fall of the dollar "is all emotional trading," according to LILIANA NEALON of the UNION BANK OF SWITZERLAND in New York. She says traders are

afraid of lower interest rates because of the weak economy, but wary of missing an upward move caused by further military action in the Middle East. ("Investor's Daily", 8/7)

"The Fed's failure to cut interest rates contributed to a severe loss of confidence that spread through all markets," says DAVID JONES, chief economist at AUBREY G. LANSTON. "To be fair, however, the Fed has to contend with soaring interest rates in Japan and West Germany, and the prospect that a decline in domestic interest rates could further undermine the value of the dollar. Then there is this week's record Treasury refunding auctions." (NYT, 8/7)

"It was the worst day in the bond market since the 1987 debacle," says BRIAN FABBRI, chief economist at MIDLAND MONTAGU. "The impact of rising oil prices hit the long-term bond market harder than it did the overall stock market, mainly because bond investors fear inflation much more than they do the prospect of a recession." He continues, "Aside from the flight to quality that poured funds into the short end of the Treasury market, the persistent belief that the Federal Reserve will have to lower interest rates keeps the shorter Treasury maturities from going much lower." (NYT, 8/7)

"For the moment, the bond markets are being held hostage by oil prices," says JEFF TYLER, Treasury fund manager at BENHAM CAPITAL mutual fund group. "About the only thing you count now on is more of the same volatility." ("USA Today", 8/7)

"There is no doubt that the failure of the Fed to reduce interest rates hit the [bond] market almost as hard as the inflationary rise in oil prices and the prospect of our country being directly involved in a conflict with Iraq," says IRWIN KELLNER, chief economist at MANUFACTURERS HANOVER TRUST COMPANY. He says the fixed-income market actually expected the Fed to cut interest rates last Friday after the 1 sharp rise in unemployment. "Today's disappointment with the Fed was even more profound." (NYT, 8/7)

The yield on the long Japanese bond has moved above eight percent. This will take the edge off Japanese interest in the U.S. Treasury auction, says SIMON SMITHSON of KLEINWORT BENSON in Tokyo. "I don't think the bigger Japanese institutions will entirely desert the Treasury auction. But when there's an eight percent risk free yield at home with no currency risk at all, that's obviously going to be very attractive to a group of investors who are very nervous." (CNN "Business Morning", 8/7)

THE ECONOMY:

"I think we're certainly on the brink of [a recession] if not in one," says CHARLES CLOUGH of MERRILL LYNCH. "Middle East hostility and the

inflation fears that it has brought on has only exacerbated the recessionary pressures that were already there." (CNBC "Business View", 8/6)

"The inflation numbers for the rest of the year look horrible, especially with the shock of the Middle East oil crisis," says MICHAEL EVANS, who heads a Washington economic forecasting firm. (NYT, 8/7)

The 1.6% rise in productivity reported yesterday is "one tiny bright spot in the midst of a lot of negatives," says DAVID JONES, an economist with AUBREY G. LANSTON. (NYT, 8/7)

GORDON RICHARDS, staff economist for the NATIONAL ASSOCIATION OF MANUFACTURERS says he was "a little bit surprised how strong [the productivity figures] were, considering how slowly GNP grew." He continues, "I think if the productivity figures are correct, they suggest that GNP may be revised upwards." (WSJ, 8/7)

Commenting on the productivity report, PRISCILLA TRUMBULL, senior industrial economist at WEFA GROUP, says "It's a fairly bad report for the non-manufacturing side of things. It shows a weakness in a number of sectors, and yet labor costs are increasing." (WSJ, 8/7)

"We're looking at ... a situation that's going to give us higher inflation " says DAVID GERMANY of MORGAN STANLEY. He says the jump in oil prices will add a point to the rate of inflation and will "hit" growth. "I think stagflation is the order of the day," says Germany. (FNN "World Business Update", 8/7)

"Without Iraqi and Kuwaiti oil, prices could hit $32 [a barrel] in a month $37 in two months, at least," says WILLIAM BROWN, international oil analyst for KIDDER, PEABODY. ("USA Today", 8/7)

"It's certainly positive for the U.S. oil industry in the sense that in the short run we're going to see higher prices, possibly as high as $30 or $35 a barrel," says CYRUS TAHMASSEBI, chief economist at ASHLAND OIL. But when all is said and done, Tahmassebi thinks oil prices will actually be much lower. He says this mini-crisis "will set in motion new conservation measures and it will raise awareness of the vulnerability of the country's oil supply and its dependency on imported oil." He thinks those realizations will lead to lower consumption, and therefore lower prices. ("Investor's Daily", 8/7)

"The most dramatic impact, in toto, is the likelihood that these [oil] price increases would tip the U.S. economy into recession," says DENNIS EKLOF of CAMBRIDGE ENERGY RESEARCH ASSOCIATES. "If we begin to see an economic recession, then interest rates go up and it becomes more expensive to do business." ("Investor's Daily", 8/7)

2 "The big problem with oil is that it always moves further and faster than ... anybody gives it credit for being able to," says PETER BEUTEL, vice-president and oil trader at MERRILL LYNCH. "We know this will end, we just don't know when or where." A boycott of Iraqi oil will leave the U.S. with a 4 billion barrel per day shortfall, and Beutel says other OPEC producers are unlikely to be able or inclined to make up the difference. (CNBC "World Business", 8/7)

IN WASHINGTON:

Lawmakers in Washington are pushing PRESIDENT BUSH and the FTC to investigate cases of gasoline price fixing and gouging since the Middle East crisis. "It's pretty clear the big oil companies have gone on a feeding frenzy," says SENATOR RICHARD BRYAN (D. - NEV.). SENATOR DON RIEGLE (D. - MICH.) adds, "The public deserves answers and a price rollback." ("Nightly Business Report", 8/6)

#90219p2787 08/07/1990 ~PR Newswire

NEW YORK (AUG. 7) PR NEWSWIRE - British Airways today announced a 111 million pounds sterling ($194 million) net profit for the fiscal first quarter ended June 30, 1990. The figure reflected a 79 percent increase over 62 million pounds reported for the same period last year.

Group revenue for the period, April 1 through June 30, reached a record level, rising 13.6 percent to 1.3 billion pounds ($2.3 billion) from 1.2 billion pounds.

Earnings per American Depository Share (ADS) were 1.54 pounds ($2.70) compared to .86 pounds for the same period last year, an increase of 79 percent.

Group operating surplus was 123 million pounds ($215 million), down 1.0 million pounds against last year's first quarter.

Chairman Lord King, commenting in London on the results said: "The profit benefited from the gain on the sale of one Boeing 747 and the sale and leaseback of 10 Boeing 737s. However the recent unofficial engineers strike at London Heathrow Airport cost the airline 4 million pounds."

Passenger load factors rose from 70.4 percent to 72.2 percent. Scheduled passenger numbers increased 11.9 percent from 5.9 million to 6.6 million, revenue passenger miles increased by 13.2 percent and cargo ton miles rose marginally over last year. Scheduled passenger yields showed a modest improvement, 2.2 percent.

Shareholder equity, excluding the proceeds of the Convertible Capital Bonds, rose by almost 27 percent. The net debt to total capital ratio was 22.1 percent.

Lord King continued, "A number of productivity initiatives were launched at the end of last year and these are developing many ideas which should reduce costs and improve efficiency, the effect of which will not be felt until later in the fiscal year.

"Current events in the Middle East, and particularly their effect on fuel prices are a matter of concern. Nevertheless traffic remains buoyant. The increased value of the pound sterling is putting some pressure on yields but the revenue prospects remain good."

SAN DIEGO, CA (AUG. 7) PR NEWSWIRE - Wahlco Environmental Systems Inc. (NYSE: WAL) today reported results for the second quarter ended June 30, 1990.

Revenue for the quarter was $15,735,000 compared to $7,816,000 for the second quarter of 1989. Net income was $2,606,000 or 16 cents per share versus $2,195,000 or 15 cents per share for the comparable quarter. Average common shares outstanding were 16,431,000 versus 14,260,000.

For the six months ended June 30, 1990, revenue was $26,308,000 as compared with $13,986,000 for the initial six months of 1989. Net income was $4,581,000 or 30 cents per share versus $3,561,000 or 25 cents per share.

Second quarter and six month net income benefitted from a reduction in Puerto Rican tollgate taxes of approximately $240,000.

Huta continued, "Although we still anticipate a strong demand for flue gas conditioning equipment, we are experiencing delays in order placement and a decline in backlog because Congress has not, as yet, passed the clean air legislation. We expect a significant increase in flue gas conditioning backlog once the final legislation passes."

Wahlco Environmental Systems Inc. is a manufacturer of equipment used primarily by electric utilities to assist in the reduction and control of air pollution. In addition, the company designs, manufactures and installs products that enhance the efficiency of industrial and utility boilers, and also manufactures water pollution and control devices.

EL SEGUNDO, CA (AUG. 7) PR NEWSWIRE - Infonet today announced it has entered into an agreement with Siemens Communication Systems Inc., Boca Raton, Fla., to deploy and market Siemens' EWSP line of packet-switching systems.

Infonet will install Siemens equipment worldwide for use in its Public Data Network (PDN) and Virtual Private Data Network (VPDN). Recently announced, Infonet's VPDN offers managed, fixed cost solutions for multinational companies with heavy data traffic.

Siemens has also given Infonet the rights to resell its packet- switching equipment to multinational corporations as part of Infonet's Enterprise-Defined Network Services (EDNS) offering. Infonet's EDNS includes network consulting and design, acquisition and implementation, and facilities management for integrated voice and data private and hybrid networks.

"Our customers are once again the real winners," said Jose Collazo, Infonet's chairman. "With this alliance Infonet can now transition users beyond PDN services to our VPDN and EDNS network solutions without disruptions," he added.

According to Collazo, "Global networking capabilities face a formidable challenge in light of the diverse facilities and regulations around the world. We are pleased to be partners with a company like Siemens who brings a solid understanding of both international data communications and global business requirements."

Siemens Communication Systems Inc. is a division of German-based Siemens AG. Siemens provides complete end-to-end digital based public networks including central office switching systems, transmission systems, data networks, and fiber optic technology.

"This partnership expresses the confidence that large users worldwide place in the EWSP line and its future development," said Volker Jung, president and chief executive officer of Siemens Communications Systems. "At 40,000 packets per second, the recently released EWSP has the throughput, expandability, and multi-purpose networking function these users require," he explained.

Established in 1970, Infonet is the leading standards-based international value-added network services company. It provides communication and computer services and directly supports those services throughout the world. The company is jointly owned by MCI and 10 major telecommunications administrations in Europe and the Asia-Pacific.

LA JOLLA, CALIF. (AUG. 7) PR NEWSWIRE - Marrow-Tech Inc. (NASDAQ: MAROA) announced today that it has filed for an investigational Device Exemption (IDE) with the Food and Drug Administration (FDA) for the company's dermal replacement product. Approval of the IDE will allow Marrow-Tech to begin clinical trials in burn patients.

Marrow-Tech has developed a transplantable dermal replacement product intended for use in the treatment of burns and wounds. More than 70,000 patients with second- and third-degree burns are admitted to burn centers in the United States annually. The IDE filing is based on the recent completion of pre-clinical trials of the product in collaboration with researchers at a major U.S. burn center. The company plans to begin clinical trials in burn patients at selected burn centers in the United States after FDA approval is obtained.

Marrow-Tech is engaged in the growth of human tissue outside the body. The company recently announced that it had received a Notice of Allowance from the U.S. Patent Office on its core technology patent application. The technology has a number of potential therapeutic and laboratory applications. To date, the company has successfully grown bone marrow, skin and liver tissue.

VERO BEACH, FL (AUG. 7) PR NEWSWIRE - Dixon Ticonderoga Company (AMEX: DXT) will commence the second phase of its Restructuring Program, designed to improve profitability and reposition the company to best serve its markets, President Gino N. Pala announced today.

First, the company will relocate its Corporate Headquarters to Orlando, Fla., where it will consolidate offices with Marketing and Sales operations. "Our move from Vero Beach will allow us to be under one roof

thus stimulating effectiveness as a management team. Additionally, administrative cost savings will contribute to improved profitability," Pala said. In addition, the company's entire Customer Service Group will join Marketing and Sales in Orlando. "We believe our plan will result in improved customer ordering and delivery systems and make it possible to more quickly react to market changes," Pala added.

Also, the company will close an additional plant located in Shelbyville, Tenn., which presently manufactures advertising specialty products. These operations will be transferred to existing plants in the United States. The company previously announced the closing of its plant in Newmarket, Ontario.

Pala concluded, "These plans represent the continuation of an overall Restructuring Program that is but a part of our strategic business plan to reposition the company to best access and service our markets. Equally important, on a long-term basis, it ensures our future as one of the leading producers in the industries we serve."

Dixon Ticonderoga Company is a diversified manufacturer and marketer of the well-known Dixon Ticonderoga, Wearever and Prang writing and art products, a producer of graphite and lubricant products and an operator of refractories.

#90219p2815 08/07/1990 ~PR Newswire

BOSTON (AUG. 7) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) today announced NetVisualyzer(TM) Data Station software, designed to monitor network activity from remote sites. Communications between NetVisualyzer Data Stations(TM) and centrally located NetVisualyzer Display Stations(TM) are over the Internet Protocol (IP) through either local area network media or any wide area network links such as serial- line modems, X.25, T-1 or microwave and fiber optics.

NetVisualyzer is the industry's first set of visual network monitoring and diagnostic tools for distributed heterogeneous environments. Its simple-to-use interface enables network managers to monitor in pictures a distributed network's real-time configuration and traffic from a central vantage point on any Silicon Graphics IRIS(R) 4D workstation. Centralized visual monitoring speeds up network diagnostics, reduces network downtime, tightens network security and serves as a network control and planning tool.

"NetVisualyzer is an ideal tool for network managers providing centralized management of network activity and interoperability in multi-vendor, multi-protocol environments," said James M. Barton, vice president and general manager, Silicon Graphics' System Software Division. "By combining our networking expertise with the basic features of visual processing -- color, 3-D and motion -- Silicon Graphics creates images never before seen by the MIS community." Benefits of Central Network Monitoring

The ability to centrally monitor a geographically dispersed network with NetVisualyzer provides many advantages to MIS managers. Changes in network configuration, real-time traffic patterns, and security breaches can all be monitored and detected in their early stages. Direct benefits to organizations using NetVisualyzer are greater network control, more effective network planning, minimizing and identifying security breaches, and quick diagnosis of network problems. This powerful tool now allows network managers to address remote site failures immediately.

MOUNTAIN VIEW, CALIF. (AUG. 7) PR NEWSWIRE - Silicon Graphics Inc. (NYSE: SGI) today announced VideoFramer(TM), the first single frame video input and output solution for Silicon Graphics' entire family of IRIS 4D(TM) workstations. VideoFramer lets video and graphics professionals isolate or "grab" a single image from a live video source, process it using Silicon Graphics' advanced imaging and compositing features, and output the final image to video with individual frame accuracy.

"Silicon Graphics' workstations and video products have become the de facto standard in professional video and computer graphics production houses because of their superior visual processing capabilities," said Thomas Jermoluk, vice president, Advanced Systems Division. "In addition we've seen increased interest in our video products from users in a number of diverse markets such as animation, general science, and medical imaging."

VideoFramer features include broadcast quality encoding and decoding,

software controlled video setup and remote video device control. All of the product's features can be performed while video signals are transmitted, freeing the workstation for other tasks. The result is increased user productivity.

VideoFramer supports multiple formats and standards including built-in D1, D2, RGB, Betacam, NTSC, PAL, and S-Video formats. The product includes the V-LAN(TM) transmitter from Videomedia(TM) which enables frame accurate control and can direct over 30 remote video decks, singularly or independently.

VideoFramer sells for $7500 on the entire line of Silicon Graphics workstations; customer shipments will begin Sept. 1, 1990.

VideoFramer is the latest in the Silicon Graphics' video product family. The first two products are Live Video Digitizer(TM), which allows users to integrate live video images with computer-generated graphics, and VideoCreator(TM) which provides a complete video output solution. Together these products provide users with advanced video capabilities.

Silicon Graphics Inc. is the leading supplier of high performance workstations and computing systems for visual processing applications. These workstations are used by engineers, scientists, and creative professionals in the design, manufacture and simulation of three dimensional products. The company's common stock trades on the New York Stock Exchange under the symbol SGI.

#90219p2817 08/07/1990 ~PR Newswire

LAS VEGAS (AUG. 7) PR NEWSWIRE - Led by the continuing strength of its ammonium perchlorate operations, American Pacific Corp. (NASDAQ: APFC; Pacific: APFP) today reported sharply higher revenues, net income and net income per share for the third quarter and nine months ended June 30, 1990.

For the quarter, net income was $1,897,000, equal to 35 cents per share on 5,200,000 average shares outstanding. Third quarter revenues advanced to $13,564,000. Results for the prior year are not directly comparable since the company was operating in a startup mode for the first 10 months of fiscal 1989. In last year's third quarter, net income was $345,000, or 5 cents per share, on revenues of $396,000. For the nine months of fiscal 1990, net income climbed to $5,544,000, or $1.05 per share, on revenues of $44,192,000. Startup operations in fiscal 1989 generated net income of $13,000 on revenues of $2,974,000. After accrued dividends on cumulative preferred stock, the company reported a loss of 2 cents per share for the first nine months of fiscal 1989.

Fred D. Gibson Jr., chairman, president and chief executive officer, commented: "In the third quarter we continued to see excellent results from our ammonium perchlorate facility, operated by our Western Electrochemical Company (WECCO) subsidiary in Iron County, Utah. The plant opened last July and has since proven itself to be an efficient, high quality producer. Through the first nine months of fiscal 1990, this facility was operating at an annual rate of approximately 20.5 million pounds of ammonium perchlorate.

"The strength of our ammonium perchlorate business provides a solid foundation for the company's growth. We are also seeing positive signs for the company in all three of its business segments.

"In our real estate operation, we recently reached an agreement to sell 4.22 acres of development property in Gibson Business Park, located in the high growth southeast Las Vegas Valley, to an industrial user for $367,000 or $87,000 per acre. We anticipate closing the sale prior to the end of this fiscal year.

American Pacific's principal business activities consist of the production of ammonium perchlorate, the oxidizer utilized in composite solid rocket propellants employed by a large number of space and military systems. Through direct and indirect subsidiaries, the company is engaged in the manufacture of chlorate and perchlorate chemicals, the design and manufacture of electrolytic systems and electrodes, the design and manufacture of pollution control systems, and industrial real estate development.

#90219p2819 08/07/1990 ~PR Newswire

SAN DIEGO (AUG. 7) PR NEWSWIRE - The Titan Corp. (NYSE: TTN) today reported strong gains for the second fiscal quarter and six months ended June 30, 1990. Revenues in the quarter increased 18 percent to $27,497,000 from $23,373,000 reported in the prior year.

Net income for the second quarter before dividends on preferred stock doubled to $559,000 in 1990, from $281,000 in 1989, with earnings per share (after preferred dividend requirements) increasing to $.04, from $.01 a year ago.

For the six months, revenues rose 16 percent to $53,127,000, from $45,838,000 in the comparable year-earlier period, with net income (before preferred stock dividends) increasing 82 percent to $1,110,000 from

$611,000. Earnings per share (after dividend requirements) were $.08 vs. $.02 in the prior year six-month period.

Gene W. Ray, Titan president and chief executive officer, attributed the improved results to 1989 contract awards which have now entered the revenue stream. "We are extremely pleased with the results of our first six months," he said.

The company's acquisition on July 12 of M/A-COM Government Systems Inc., now Titan Linkabit Corp., a leading supplier of earth-based satellite communications equipment to the United States government, has added approximately $40 million per year to Titan revenues and in excess of $50 million in backlog, Ray said. The total backlog of the combined operations is approximately $183 million, excluding priced contract options of $145 million, he noted.

"Titan Linkabit's leadership in satellite communications, in combination with Titan's broad capabilities spanning the command, control, communications and intelligence (C3I) market, establishes a solid market base upon which we expect to build significantly," he said. "The acquisition last month of what is now Titan Linkabit will contribute to the achievement of the long-term strategic objectives which we have established."

The Titan Corp. specializes in providing turnkey hardware and software systems solutions to the high technology needs of the United States, state and local government agencies; and to commercial and industrial clients, both foreign and domestic. Specific areas of expertise include systems development and integration, advanced technology development and electronics manufacturing.

For further information, contact Stephen P. Meyer, chief financial officer The Titan Corp., 5910 Pacific Center Blvd., San Diego, CA 92121, 619-453-9500.

#90219p2820 08/07/1990 ~PR Newswire

FORT LEE, NJ (AUG. 7) PR NEWSWIRE - A. L. Laboratories, Inc. (NYSE: BMD) today reported that for the second quarter ended June 30, 1990 net income increased to $2,599,000 compared with $2,328,000 in the prior year. Fully diluted per share earnings increased to $0.23 versus $0.21 in the same quarter of 1989. Revenues for the second quarter were $64,846,000 compared with $66,948,000 in the 1989 period.

Net income for the six months ended June 30, 1990 increased by 18.7

percent, from $5,131,000 last year to $6,091,000 in the first half of 1990. Fully diluted per share earnings increased to $0.53 from $0.46 in the same 1989 period. Revenues for the six months 1990 were $134,154,000 compared with $137,001,000 in 1989.

Commenting on the results, I. Roy Cohen, president and chief executive officer said, "We are pleased by the continued profit improvement of our business. The second quarter, normally seasonally weaker, was nevertheless heartening in its results. The lower revenue is to a large extent a consequence of our de-emphasizing lower margin products. As a result of this and a concerted effort to lower manufacturing costs, gross profit percentage improved substantially. At the same time, our operating expenses are increasing due to greater effort on R&D (including our periodontitis project, albuterol and our Biomed fish bacterins), quality and regulatory compliance."

"Despite a more difficult economic, business and regulatory environment, our first half results are most encouraging.

In the second half we will remain alert to offset any industry weakness by emphasizing further gross profit improvement and efficiencies in our operating expenses. With the second half the stronger part of the year, we believe that we can maintain our planned, consistent growth record."

At June 30, 1990, shareholders' equity was $99.9 million, or $8.93 per share, strengthened by another profitable quarter.

CAMBRIDGE, MA (AUG. 7) - MarketPulse(tm), the leading supplier of data-driven marketing products and services, today announced it has signed a strategic marketing partnership agreement for reciprocal product and sales with Group 1 Software (NASDAQ: GSOF), the leading supplier of software to the marketing industry.

Under the terms of the agreement, the companies will leverage each other's sales forces and existing customer bases through joint sales of

complementary products.

MarketPulse provides a comprehensive marketing database software package supported by an extensive array of professional analysis, database planning, implementation and support, as well as direct marketing consulting services. The MarketPulse product set incorporates all available information about customers and prospects from either internal or external sources. It also provides fast online counts, profiling, and statistical analysis against the entire database, as well as automated mail planning.

MarketPulse not only puts direct control in marketers hands, it allows them to identify the highest potential prospects; generate lists, labels and tapes to execute new marketing programs; performs a complete range of response analyses, including statistical modeling; and also easily creates business graphics. MarketPulse currently runs on an IBM mainframe, with easy access provided to marketers and other non-technical professionals via their individual PCs.

"This agreement with an established organization like Group 1 validates our market strategy and the acceptance of the MarketPulse product by the direct marketing industry," said Francie Anhut, executive vice president of MarketPulse. "MarketPulse will now leverage Group 1's sales force to help reach our broad potential market. Conversely, MarketPulse's strong technological and consulting service capabilities offer Group 1 customers access to a more extensive collection of strategic resources."

Group 1 Software President Ron Friedman said, "Group 1's agreement with MarketPulse establishes an ideal marketing relationship. It marries two complementary product lines to offer complete marketing capabilities as a total solution to customers' needs."

Group 1 Software is the leading provider of mainframe, midrange and microcomputer software to the marketing and mail management industry. Group 1 offers a broad range of list management, postal discounts, mail personalization, demographic database software products and professional services. The company has offices throughout the U.S. and Canada, and is represented in the U.K., Australia and New Zealand.

MarketPulse is a division of Computer Corporation of America of Cambridge, Mass., and provides data-driven marketing solutions through a wide variety of services and software. Introduced in September 1989, MarketPulse has numerous customers, including Random House, LMC and College Marketing Group.

#90219p2823 08/07/1990 ~PR Newswire

HOUSTON (AUG. 7) PR NEWSWIRE - Houston Industries Incorporated ("HI") (NYSE: HOU) today reported consolidated earnings of $77.5 million or $.61 per share for the second quarter of 1990, compared to $56.7 million or $.45 per share for the second quarter of 1989.

The improvement in HI's second quarter earnings resulted primarily from increased earnings at Houston Lighting & Power Company (HL&P), the company's electric utility subsidiary, due to the recording of cost deferrals related to previous periods. HI's cable television subsidiary, KBLCOM Incorporated ("KBLCOM"), also reported improved results for the second quarter of 1990 compared to the same period last year.

Consolidated earnings for the first six months of this year fell to $68.7 million or $.54 per share from $141.9 million or $1.15 per share for the comparable period in 1989. For the 12 months ended June 30, 1990, HI reported consolidated net income of $340.2 million or $2.69 per share, compared to earnings of $369.4 million or $3.06 per share for the same period last year.

The decline in earnings for the six and 12 months ended June 30, 1990, resulted primarily from cost disallowances incurred by HL&P in connection with decisions related to its general rate case, and increased losses at KBLCOM related to cable systems acquired in March 1989. Last year's results also included gains from the sale of HI's oil and gas properties.

HL&P reported income after preferred dividends of $90.2 million for the second quarter of 1990 compared to $72.4 million for the second quarter in 1989.

HL&P's earnings for the first six months of 1990 fell to $96.6 million from $148.8 million for the same period in 1989. For the 12 months ended June 30, 1990, HL&P's earnings were $385.1 million, compared to $362.4 million a year earlier.

HL&P's earnings reflect a number of significant regulatory decisions made by the Public Utility Commission of Texas (PUC) earlier this year. In June 1990, the PUC issued final orders in connection with HL&P's general rate case and the inquiry into the prudence of the planning, management and construction of the South Texas Project (STP). As a result of these orders, HL&P incurred after-tax charges of approximately $29 million related to disallowed expenses and its investment in STP.

The PUC also authorized HL&P to use deferred accounting for STP Unit 2 retroactive to its commercial operation date of June 1989. HL&P's second quarter results include $56.4 million of cost deferrals related to prior periods. HL&P's earnings for the first six months of 1989 also reflected

$33.6 million of 1988 cost deferrals associated with STP Unit 1.

In addition to the effects of these regulatory decisions, HL&P's earnings for the 12 months ended June 30, 1990 were bolstered by the recording in December 1989 of $70.3 million related to the settlement of a 1982 rate order.

Houston Industries is headquartered in Houston. Other subsidiaries include Innovative Controls, Inc., a manufacturer of consumer lighting products; Houston Industries Finance, Inc., a receivables factoring company; and Development Ventures, Inc., a venture capital company.

TORRANCE, CA (AUG. 7) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) will introduce dBASE IV Run Time PLUS tomorrow, on the opening day of MacWorld Exposition in Boston. dBASE IV RunTime PLUS runs most dBASE IV and dBASE III PLUS DOS applications on the Apple Macintosh without modification.

dBASE IV RunTime PLUS also offers the dBASE IV language and Dot Prompt for manipulating and browsing data, and creating or modifying applications on the Macintosh. These applications can then be moved back to the PC, unchanged.

dBASE IV RunTime PLUS is based on dBASE IV version 1.1, which Ashton-Tate announced and began shipping last week. dBASE IV includes over 440 commands and functions that enable developers to build complete applications without programming in C.

"dBASE IV RunTime PLUS plays a vital role in Ashton-Tate's cross- platform strategy of delivering dBASE-compatible products for DOS, Macintosh, VAX VMS and UNIX systems," said Bill Lyons, Ashton-Tate's president and chief operating officer. "It offers the connectivity and flexibility our customers and developers need to run their DOS- based applications on the

Macintosh."

Added Dave Proctor, vice president and general manager of Ashton- Tate's Database Division, "dBASE RunTime PLUS gives our customers access to thousands of dBASE applications -- many of which are listed in Ashton-Tate's Developer Registry -- that were previously unavailable to Macintosh users. These applications are designed for virtually every vertical category, including office automation, accounting, manufacturing and inventory control."

Headquartered in Torrance, Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. The company's major product categories include database management systems word processing, integrated decision support, spreadsheets, graphics and software utilities. Ashton-Tate has operations worldwide, with products available in 20 languages in more than 50 countries. The company also offers a comprehensive line of training and support services for individuals, corporations and government agencies.

TORRANCE, CALIF. (AUG. 7) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) will introduce FullWrite Professional version 1.5, tomorrow, on the opening day of MacWorld Exposition in Boston. FullWrite Professional 1.5 is a new version of the company's full- featured word processing software for the Macintosh. The software begins shipping today at a suggested retail price of $395; it is available through Ashton-Tate authorized resellers.

As a major upgrade to FullWrite Professional 1.1, the new product expands usability with new page layout features, expanded file conversion capabilities and improved learning and help facilities. FullWrite meets the demands of serious writers and word processing professionals who require both WYSIWYG clarity and sophisticated document features. FullWrite's ease of learning and ease of use help novice users become productive quickly.

"FullWrite Professional 1.5 is another step in our commitment to the Macintosh market," said Bill Lyons, Ashton-Tate's president and chief operating officer. "It offers such Macintosh characteristics as superior graphics capabilities, adherence to the Apple interface and true WYSIWYG display."

Added Terry Smail, director of Word Processing Products, "FullWrite Professional 1.5 has been designed to meet customer requests for

additional file conversion formats, more intuitive page layout, increased file stability and improved documentation. And, the new click and drag sidebars maximize the product's page layout capabilities." Features and Benefits:

Instructive manuals guide users through the various aspects of learning and using FullWrite Professional 1.5. Titles include: Learning FullWrite Professional, Using FullWrite Professional, Using Tycho Table Maker, and FullWrite Toolbox.

Headquartered in Torrance, Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. The company's major product categories include database management systems word processing, integrated decision support, spreadsheets, graphics and software utilities. Ashton-Tate has operations worldwide, with products available in 20 languages in more than 50 countries. The company also offers a comprehensive line of training and support services for individuals, corporations and government agencies.

#90219p2829 08/07/1990 ~PR Newswire

MINNEAPOLIS (AUG. 7) PR NEWSWIRE - United HealthCare Corporation (NASDAQ: UNIH) today announced revenues and earnings for the second quarter and six months ended June 30, 1990.

Second Quarter Results Revenues for the second quarter were $150.2 million a 46 percent increase over the same period one year ago. Net earnings of $7.8 million represented a 168 percent increase over second quarter. Earnings per share were 32 cents on a primary basis and 29 cents fully diluted, compared with 14 cents for last year's second quarter.

Six Months Revenues for the six months ended June 30 were $280.1 million, up 41 percent from the same period in 1989. Net earnings totaled $14.5 million, an increase of 178 percent over net earnings for the first six months of last year. Earnings per share were 61 cents primary and 54 cents fully diluted, compared with per-share earnings of 26 cents for the first half of 1989.

"We're very pleased to report these revenues and earnings for the year's second quarter -- our seventh consecutive quarter of improved results, and the best quarter to date in our company's history," said UHC Chairman and Chief Executive Officer Kennett L. Simmons.

Simmons credited specialty company growth and continuing reductions in SG&A costs, as well as careful medical expense controls, as major factors

in the company's continuing earnings growth.

SG&A Costs Down SG&A costs as a percent of UHC revenues were 24.4 percent for the quarter, compared with 27.9 percent for the preceding quarter. Combined SG&A costs (total selling, general and administrative expenses for all of the company's owned and managed HMOs as a percent of their combined premium revenues) were 9.8 percent. President and Chief Operating Officer William W. McGuire, M.D., said the SG&A levels reflect improved operating efficiencies, ongoing systems improvements and the continuing impact of centralization of a number of administrative functions.

Revenue, Enrollment Growth Dr. McGuire attributed the second quarter's 16 percent revenue growth over the first quarter to several factors: the inclusion of three full months' revenues from PrimeCare Health Plan, Inc., the purchase of which became final March 1, 1990; commercial rate increases averaging 16 percent during the quarter in the company's HMOs; and sales growth, including significant gains for UHC's specialty operations.

The company's specialty businesses now serve over 5 million lives, reflecting 19.5 percent growth during the second quarter and significant sales activity during July. "We expect our specialty operations to show continued strong growth as we move forward," McGuire said.

Enrollment in UHC's HMOs stood at 1,159,100 at June 30. Membership growth for the year remains on target, with an increase of 8,000 during the second quarter, a period traditionally characterized by slow sales, McGuire said.

Also noted by McGuire: -- Following completion of the company's debenture conversion on July 12, 1990, UHC shareholders' equity now stands at over $128 million, compared with $60.3 million at Dec. 31, 1989. Shareholders' equity stood at $88.3 million on June 30, 1990, reflecting conversion of debentures valued at $12.7 million during that month.

-- The company's second quarter medical loss ratio (MLR) was 84.9 percent for its owned HMOs and related insurance company activities, and 85.5 percent for its managed HMOs, compared with 83.2 percent and 85.5 percent, respectively, for the first quarter of 1990. McGuire said the MLR for UHC's owned HMOs and insurance business reflected the addition of revenues contributed by PrimeCare in the second quarter and PrimeCare's relatively higher MLR. "We have stated that we expect our acquisition of PrimeCare to be non-dilutive during its first year as a UHC HMO and that we expect its medical loss ratio to show improvement by early 1991. These results are consistent with our previous expectations," McGuire said.

"We continued to make excellent progress during the second quarter, and we're extremely pleased to report these results to our shareholders," Simmons said.

United HealthCare Corporation is a national leader in health care cost management, serving both the providers and purchasers of health care since 1974. The company's services include HMOs and PPOs, combination plans, Medicare and managed care programs for the aged, administrative services, pharmaceutical cost management, mental health and chemical dependency services, health care evaluation services, and utilization review.

WILMINGTON, DEL. (AUG. 7) PR NEWSWIRE - Du Pont (NYSE: DD) has started up an industrial nylon fiber plant in Izmit, Turkey, the company announced today.

The plant is part of DUSA, a 50/50 joint venture with the Sabanci Group, a leading Turkish industrial company.

The facility has a capacity of 50 million pounds a year and employs more than 300 people. It will produce nylon 6,6, a high-strength fiber that will be used primarily for tire reinforcement and other industrial applications in Europe and the Middle East.

Commercial shipments are scheduled to begin in mid-August. The Izmit plant underscores Du Pont's globalization effort and business philosophy of getting closer to the customer, as well as the companys strong commitment to the European market, said Don R. Linsenmann, worldwide business manager for nylon and industrial specialties.

Du Pont also manufactures industrial nylon at Richmond, Va.; Chattanooga,

Tenn.; Kingston, Ontario; and Berazategui, Argentina.

The plant in Turkey is consistent with Du Pont's previously announced expansion plan to double its business in Europe by the mid-1990s.

#90219p2838 08/07/1990 ~PR Newswire

BINGHAMTON, NY (AUG. 7) PR NEWSWIRE - Resource Recycling Technologies, Inc. (AMEX: RRT), a diversified waste recycling concern posted revenues of $6.3 and $11.6 million for the three and six month periods ended June 30, 1990, respectively, a 72 percent and 63 percent improvement over the same period last year, reports Lawrence J. Schorr, president. Net income for the quarter and six months ended June 30, 1990 was $309,000 ($.12/share) and $119,000 ($.07/share) respectively versus $77,000 ($.02/share) and $23,000 (($.07)/share) for the comparable prior year periods. Schorr indicated that the second quarter net earnings reflect beginning seasonal improvements over the first quarter for RRT's Deposit Legislation Division contributions from RRT's new Plastics Division and RRT's 50 percent interest in Count Recycling Systems, Inc., an equipment manufacturer, and reduced losses in its Municipal Recycling Division. Start-up and expansion costs in the first and second quarter of 1990 were up significantly over 1989 as RRT brought the Cape May, N.J. MRF (Materials Recycling Facility) on line in April and the Syracuse, N.Y. MRF on line in July.

Schorr announced that RRT's significant revenue gains continue to track with expectations and that he remains generally optimistic about continued earnings improvement for RRT in 1990 and 1991. Two MRF design, build and operation contracts for Ocean County, N.J. and Palm Beach, Fla. representing $13.0 million in combined project construction, although slower to start than originally projected, have both broken ground and are fully under way. Both projects are scheduled for completion May 1991 and will contribute to revenue growth through the next several quarters. The Ocean County MRF will provide the company with a greater overall presence in the Southern New Jersey and Philadelphia area where the Cape May, N.J. and Bucks County, Pa. MRFs are currently operating.

Schorr further indicated that the second quarter marked the occurrence of a number of significant developments such as the securing of a $25.0 million bonding commitment from Reliance Surety Co., public sale of one million newly issued common shares, raising $8.0 million for the company, placement of a $7.5 million unsecured credit facility with State Street Bank and Trust Co. of Boston, successfully passing the nation's most extensive and rigorous acceptance test for an MRF to date in Cape May County, N.J., and the selection of RRT as a preferred vendor to design,

build and operate an $8.5 million MRF in Monroe County, N.Y.

Resource Recycling Technologies, Inc. is a vertically integrated organization dedicated to the advancement of recycling programs and technologies, and the development of new markets for secondary materials.

COLORADO SPRINGS, CO (AUG. 7) PR NEWSWIRE - Ramtron Holdings, Ltd. (formerly Ramtron Australia, Ltd.) (ADRs - NASDAQ: MEMRY) announced that its majority-owned microelectronics subsidiary based in Colorado Springs, Ramtron Corporation, today formally dedicated its new research and development and manufacturing facility for the further development and manufacture of ferroelectric random access memory (FRAM) technology and products. Ramtron began processing wafers in the facility in June 1990.

The new 69,000-square-foot facility, located on a 32-acre site north of Colorado Springs, is equipped for the pilot production of memory products of up to 4-Mbit (4 million bits), and has a capacity of approximately 6,500 wafers per month.

The manufacturing capacity of Ramtron's new facility, combined with capabilities of Ramtron's co-development and manufacturing partners -- NMB Semiconductor and Seiko-Epson Corporation, both of Japan, and ITT Semiconductors of West Germany -- will provide the capacity required to serve the global markets for Ramtron's memory products.

Richard Horton, president and chief operating officer of Ramtron Corporation, said, "The facility significantly expands the company's research and development capabilities for sub-micron products of 4-Mbit and higher density."

Ramtron Corporation develops, manufactures and markets leading-edge semiconductor memory products based on ferroelectric materials, advanced processing and design technologies. The company holds 22 international patents and has another 40 patents pending.

Ramtron's products include nonvolatile ferroelectronic random access memory products, as well as high performance dynamic random access memory (DRAM) products.

CONTACT: Richard Horton, president and COO of Ramtron, 719-481-7000; or Matt Haines or Mark Cohen of Cameron Associates, 212-683-4545, for Ramtron.

#90219p2845 08/07/1990 ~PR Newswire

IRVINE, CA (AUG. 7) PR NEWSWIRE - Gateway Communications Inc. (NASDAQ: GWAY) announced today the results of its operations for the three and six months ended June 30, 1990. For the three months ended June 30, 1990, the company reported net income of $101,000, or $.02 per share on total revenues of $6,017,000. In the comparable 1989 period, net income was $215,000 or $.05 per share on total revenues of $6,465,000. Total revenues increased $511,000 or 9 percent during the three month period ended June 30, 1990, as compared to the comparable period in 1989, excluding revenues from the company's Australian subsidiary which was substantially liquidated during April 1990.

For the six months ending June 30, 1990, the company reported a net loss of ($.04) per share, or ($198,000) on total revenues of $11,634,000. Net income for the comparable period in 1989 was $424,000, or $.09 per share on total revenues of $12,736,000.

"The second quarter marked a significant milestone for the company," said David S. McMaster, president and chief executive officer. "During the quarter we introduced ComSystem, the company's first integrated systems-level product. ComSystem has been well- received by the industry and represents the company's increasing emphasis on systems-level communications products."

Also during the second quarter, the company launched an aggressive marketing program for the recently introduced G/EtherTwist line of LAN products. As a result, shipments of G/EtherTwist products have been excellent.

The company has experienced a strong demand for its products from its European distributors whose second quarter sales comprised 30 percent of the company's worldwide revenues. Export trade restrictions on technology products have recently eased in the USSR and East Bloc countries. As a result, Gateway expects its new business partners in these countries to expand the range and volume of Gateway products offered.

Formed in 1981, Gateway Communications is a major supplier of award-winning networking and communications products for the IBM PC and compatible market. Gateway products are sold through nine sales offices and 107 distributors in more than 70 countries worldwide. The company's corporate and international headquarters are located at 2941 Alton Avenue, Irvine, Calif., 92714; telephone, 714-553-1555; fax 714-553-1616.

The table below compared results of operations for the three months and six months ended June 30, 1990 and 1989:

GATEWAY COMMUNICATIONS
Summary of Operations
(Unaudited)

Three months ended June 30:	1990	1989

LONG BEACH, CA (AUG. 7) PR NEWSWIRE - HQ Office Supplies Warehouse Inc. (NASDAQ: HQOSA), one of the leading office products and equipment superstore retailing chains in the Western United States, reported today that it has signed four new store leases for locations in Buena Park, Covina, Montclair and Torrance, Calif. These additional store leases will further consolidate the company's position in Southern California, the nation's largest market for office supplies and related products.

These newly-signed leases, along with additional store leases expected to be signed in the next 45 days, will give HQ Office Supplies Warehouse a total of six new locations anticipated to be opened in the Southern California market. The six new locations added to the 14 stores currently operating would give the company a total of 20 superstores in California and Nevada.

The company experienced a shortage of merchandise during the quarter ending June 30, 1990, which was the direct result of a delay in a public financing which was finally completed June 14, 1990. Immediately following the successful completion of this public offering, HQ Office Supplies Warehouse stores were once again well- stocked in all merchandise areas. During the past month, the company reported comparable stores sales increases of over 20 percent.

HQ Office Supplies Warehouse Inc. 14 current locations, utilize a

merchandising strategy offering a wide selection of quality, brand- name office products, including general office supplies, business machines, office furniture and other business-related products at discount prices primarily to small and medium-sized businesses. The stores averages at least 25,000 square feet of selling space with an inventory of approximately 8,000 stock keeping units.

OMAHA, NE (AUG. 7) PR NEWSWIRE - America First Participating/Preferred Equity Mortgage Fund (PREP Fund) announced today that the Deed of Trust loan that it owns on Casa Sandoval senior living center in Hayward, Calif. was assigned to the Secretary of Housing and Urban Development (HUD) on Friday, Aug. 3, 1990, as provided by the HUD mortgage insurance policy. HUD will pay 99 percent of the outstanding principal balance of $18,667,000 plus interest from the default date of Dec. 1, 1989, at a government debenture rate of 9 percent. HUD will withhold a 1 percent FHA assignment fee of $186,670 from the insurance proceeds. It is anticipated that the Fund will initially receive 90 percent of the insurance proceeds, equal to approximately $16,600,000 plus debenture interest from Dec. 1, 1989, at 9 percent, and that the balance of the insurance proceeds, approximately $1,880,000 plus debenture interest, will be received within six months of the assignment date.

The Casa Sandoval project is one of 12 complexes financed with government-insured mortgages and preferred equity investments by the PREP Fund. The default occured as a result of the real estate developer's inability to keep the mortgage current. All of the remaining government-insured mortgages in the Fund are guaranteed by GNMA, and investors in the Fund are protected up to the amount of their monies invested in the mortgages.

KALAMAZOO, MI (AUG. 7) PR NEWSWIRE - The Upjohn Company (NYSE: UPJ) and Syntro Corporation (NASDAQ-NMS: SYNT) jointly announced today resolution of their dispute regarding patent rights to a genetically engineered pseudorabies vaccine for swine.

The agreement will end litigation brought by Upjohn claiming that its patent is infringed by a pseudorabies vaccine sold by SyntroVet, Inc.,

Syntro's animal health subsidiary. The agreement, with Syntro taking a license under the Upjohn patent and paying royalty to Upjohn, also provides cross-licensing of worldwide rights in the field of pseudorabies under each company's patent rights in exchange for royalties. Both companies market pseudorabies vaccine products claimed in the Upjohn patent, Upjohn's TOLVID Vaccine and SyntroVet's PRV/Marker.

"We are pleased to have this matter behind us," stated Dr. J. Donald Todd, Syntro's president and CEO, "and have the dispute settled in a reasonable and equitable manner which recognizes the value of both parties' technology. Syntro will now focus our resources on additional applications of our technology."

According to Gerald A. Welch, Upjohn senior vice president and general manager for the Agricultural Division, "Upjohn's patent resulted from our pioneering research program in veterinary biotechnology. We are pleased that this settlement provides further recognition of our scientific efforts."

Syntro and Upjohn have been involved in litigation since March 1989, when Upjohn filed suit in Delaware charging Syntro with infringement of the Upjohn patent. A similar suit was filed by Upjohn in Kansas against SyntroVet in September 1989. Counterclaims had been filed by Syntro against Upjohn in the Delaware action.

Syntro Corporation, founded in 1981, is a Lenexa, Kan., and San Diego, Calif.-based biotechnology company engaged in the development and commercialization of technology in the health sector. SyntroVet, a wholly owned animal health subsidiary of Syntro, was established in 1985 to manufacture and market products resulting from Syntro's research program.

The Upjohn Company is a worldwide, research-based provider of human health care products and services, animal health products, agronomic and vegetable seeds and specialty chemicals. Headquartered in Kalamazoo, the company has been dedicated to improving health and nutrition for more than a century.

#90219p2852 08/07/1990 ~PR Newswire

ORLANDO, FL (AUG. 7) PR NEWSWIRE - Revenues for the quarter and six months ended June 30, 1990 reflect improved sales in both Publishing and Insurance when compared with the same periods in 1989.

Net losses for the second quarter were $22.97 million (39 cents per share) on revenues of $348.47 million as compared to losses of $42.56 million (84 cents per share) on revenues of $328.63 million for the same quarter in 1989.

The loss from continuing operations improved for both periods at a rate exceeding the increase in revenues primarily due to cost-reduction programs in Publishing, as well as lower interest expense due to the paydown of debt from the proceeds of the sale of Parks and Land in the fourth quarter of 1989.

More specifically, Publishing revenues increased $24 million, or seven percent, in the six months ended June 30, 1990 over the six-month period ended June 30, 1989 because of strong performance in medical books, international sales, test products, and other services.

Publishing income from operations for the 1990 six-month period improved significantly - $27 million - over the loss in the 1989 period owing to this stronger revenue performance, as well as cost savings associated with the marketing redirection of the School group.

Insurance revenues were $31 million, or 14 percent, ahead for the 1990 six-month period because of increased premiums in most lines of business and higher investment income. Operating income was down slightly in the six months ended June 30, 1990 as compared with the six months ended June 30, 1989 owing to increased loss ratios in accident and health lines, especially group, and lower realized capital gains.

Interest expense was significantly lower in the 1990 six-month period as compared with 1989 owing mainly to the retirement of bank debt with proceeds from the sale of Parks.

The 12-month period ended June 30, 1990 includes the following write-offs recorded in the third quarter of 1989: $95 million in Publishing, including a writedown of inventory, plate, and development costs for some elementary and secondary school publications (both published and unpublished), as well as certain school publication rights; $17 million for Insurance acquisition costs and a general increase in insurance reserves; $12 million for the write-off of certain corporate assets, as well as other reserves; and $3 million of interest expense as a writedown of deferred interest costs.

Also in the second half of 1989, HBJ (NYSE: HBJ) recorded an extraordinary loss of $32 million (net of taxes of $17 million) for the write-off of debt acquisition costs associated with long-term bank borrowings which were retired in 1989.

Cellular service revenue increased from $17,536,000 to $26,462,000 in the second quarter primarily because of subscriber growth that increased the current revenue stream. The gross profit from telephone equipment in 1990

is due to telephone servicing and warranty revenues from the company's sales and service centers and revenue from the company's cellular phone rental programs.

Operating expenses increased from $3,629,000 to $5,330,000 in the second quarter, representing 21 percent and 20 percent of service revenues, respectively. The increase in absolute terms reflected the increasing level of subscriber activity.

Selling, general and administrative expenses rose from $11,031,000 to $13,593,000 in the second quarter. The increase was attributable to the increase in the costs of servicing and maintaining the larger subscriber base and increases in corporate expenses.

In March 1990, CCI closed a transaction with McCaw Cellular Communications Inc. ("McCaw"), by which CCI exchanged the former CCI subsidiary that owns a 5.56 percent interest in the Dallas non-wireline cellular partnership for 1,601,036 shares of CCI common stock that were owned by McCaw. The stock was valued at $50,633,000 and a gain of $48,118,000 was recognized. As a result of this gain, a provision for income taxes of $939,000 was recorded.

In June 1989, the company recorded a loss of $9,921,000 on the sale of $21,296,000 of switch and radio equipment which was sold for $11,375,000. CCI purchased and installed new switch and radio equipment for $12,786,000 that replaced the equipment sold.

CCI owns cellular systems in Ohio and Puerto Rico. CCI's ownership interests in these systems represent 9,400,000 "pops" (the population of a market multiplied by CCI's ownership interest in the system).

#90219p2855 08/07/1990 ~PR Newswire

MINNEAPOLIS (AUG. 7) PR NEWSWIRE - Country Lake Foods Inc. (NASDAQ: CLFI) today reported net earnings of $926,000, equal to 21 cents per share, for the three months ended June 30, 1990, compared with $1,220,000, or 27 cents per share, in the second quarter last year. Net sales increased to $44,303,000 from the previous year's $38,049,000.

The company said the sales gains resulted from the acquisition of Superior-Dairy Fresh Milk Co., sales of which were included as of June 1, 1990, and higher selling prices for products.

"Despite continued high prices for raw milk, our margins have recovered

from the effects of last year's steep price increases," President Thomas N. Packard said. "The planned costs of the Superior-Dairy Fresh acquisition reduced earnings, as expected, and the expenses of assimilating the acquisition will continue to have a negative impact in the short term. The new operation is performing better than expected, and the long-term efficiencies will more than offset the short-term cost."

Packard said the company's Tasty Light & Creamy (TM) line of low-fat products continued to show gains over the previous year. TLC (TM) refrigerated non-fat yogurt, introduced early in the year, has done particularly well, and TLC non-fat milk has established a solid market position, Packard said.

For the six months, Country Lake reported net earnings of $1,410,000, equal to 32 cents per share, compared with last year's $1,434,000, also 32 cents per share. Net sales for the six months were $85,677,000 compared with $74,990,000 last year.

Headquartered in Minneapolis, Country Lake produces and distributes fresh packaged milk, ice cream, other dairy products and fruit juices in a six-state Midwest region.

WOBURN, MA (AUG. 7) PR NEWSWIRE - Thermo Cardiosystems Inc. (AMEX: TCA) today reported revenues of $798,000 for the second quarter of 1990, compared with $593,000 for the same period in 1989. Net loss for the quarter was $34,000, compared with a net income of $105,000 for the same period in 1989.

"Our record second quarter revenues have resulted from the increase in clinical sites that are now using our HeartMate(tm) ventricular- assist devices (VADs)," said Victor L. Poirier, president of Thermo

Cardiosystems. "We have eight sites approved as implant centers by the U.S. Food and Drug Administration and nine additional sites awaiting approval. At the same time, we've increased spending to further our development and marketing efforts."

Thermo Cardiosystems Inc. is a leader in research and development of implantable ventricular-assist devices. These devices are designed to perform substantially all or part of the pumping function of the ventricle of the natural heart for patients suffering from cardiovascular disease. Thermo Cardiosystems is a public subsidiary of Thermedics Inc. (AMEX: TMD) and Thermo Electron Corporation (NYSE: TMO).

NEW YORK (AUG. 7) PR NEWSWIRE - Apple Bancorp, Inc. (NYSE: APK) announced today that the Delaware Chancery Court denied Stanley Stahl's motion in which Stahl sought to compel the holding of the company's 1990 annual meeting of shareholders on or before Sept. 14, 1990. In the course of the hearing the court indicated its present view that the annual meeting should be held no later than Oct. 1, 1990, and that any claim by Stahl pursuant to Section 211 of the Delaware General Corporation law to compel the holding of an annual meeting could not be brought prior to Sept. 15, 1990. The company also announced that the court reserved judgment on Stahl's motion for partial summary judgment seeking to invalidate a portion of the definition of beneficial ownership set forth in the company's shareholder rights plan.

STAMFORD, CT (AUG. 7) PR NEWSWIRE - Cognitronics Corporation (AMEX: CGN) announced today that it has been awarded a significant contract by Phoenix-based AG Communication Systems Corporation (AGCS) to supply 200 additional units of Cognitronics' Multi-channel Intelligent Announcement System, McIAS(TM) 2100, for use as an integral part of AGCS' GTD-5(R) EAX telephone network switching system. The contract, including options, is valued at approximately $5,000,000 and requires the systems to be equipped with Cognitronics' new digital T1 interface. It is anticipated that delivery of the additional systems will begin in the fourth quarter of this year and continue through 1991. Completion of deliveries under contract with AGCS will bring to 500 the number of McIAS 2100 systems supplied for use in the GTD-5 switching systems.

The McIAS 2100 is an advanced, high-capacity announcement system which AGCS is marketing to implement Custom Local Area Signaling Services (CLASS) and pay phone variable rate message services being offered by telephone operating companies to subscribers, who use the interactive announcement capability of McIAS to control incoming calls through such CLASS features as Call Blocking, Selective Call Forwarding and Call Alerting. The system also provides automatic variable rate voice prompts to pay phone users for toll deposits. The availability of the McIAS 2100 enables AGCS to lead the switching system market in implementing such services.

The McIAS 2100, which was developed especially for AGCS, is part of Cognitronics' McIAS 2000 series of large capacity voice processing systems used by telephone operating companies and telephone switch manufacturers for providing the entire range of announcements required on the public switched network.

Cognitronics is a leading manufacturer and supplier of voice processing equipment, including telephone network announcement products and interactive voice response (IVR) systems, to telephone operating companies OEMs and commercial users. Cognitronics also manufactures optical scanning and image processing systems and precision machined parts.

#90219p2866 08/07/1990 ~PR Newswire

IRVINE, CA (AUG. 7) PR NEWSWIRE - A vivid blue 1991 Mazda Navajo sport utility vehicle rolled off the end of the assembly line today at Ford Motor Company's Louisville Assembly Plant, marking not only Mazda's first entry into this rapidly growing segment of the automotive market, but also the first time that a vehicle produced in the United States by a domestic manufacturer would be sold by an import manufacturer through its own dealer network.

The Navajo, which goes on sale this fall, was designed and engineered by the Ford Motor Company, renowned for its leadership in truck engineering and quality, with developmental input from Mazda in the areas of vehicle standards, development and testing. Mazda also was responsible for designing the areas of differentiation and for developing option packages to satisfy its customers. The Mazda Navajo is based on the 1991 Ford Explorer which was introduced earlier this year.

Clark J. Vitulli, chief operating officer for Mazda Motor of America Inc., stated, "The Navajo rounds out our four-wheel drive line-up. Mazda is one of the few manufacturers to offer such a wide range of four-wheel drive vehicles, namely the B-series 4X4 pickup truck, the five-passenger

Protege 4WD sedan, the seven-passenger MPV 4WD multi-use vehicle, and now the Navajo."

The Mazda Navajo will be offered as a two-door, and features standard four-wheel drive, a 155-horsepower V-6 engine, power steering, power windows and door locks and a rear-wheel Anti-Lock Brake System (ABS). The Navajo is well equipped in standard form, and offers a choice of two preferred equipment packages, including one which features the luxury of leather seating surfaces. Four exterior colors will be available, including one -- Newport Blue Metallic -- which is exclusive to the Navajo.

The Navajo, like all Mazda vehicles, is covered by one of the most comprehensive warranties available. This three-year, 50,000- mile zero-deductible bumper-to-bumper warranty covers every part of the vehicle except those subject to normal wear. Tires are covered by a separate warranty.

WOBURN, MA (AUG. 7) PR NEWSWIRE - Thermedics Inc. (AMEX: TMD) today reported record revenues of $6,887,000 for the second quarter of 1990, compared with $5,674,000 for the same quarter in 1989. Net income was $776,000, compared with $379,000 for last year's second quarter.

"Second quarter revenues were at a record high, due largely to contributions from our first full quarter of operations that included Universal Voltronics Corp. (AMEX: UVL)," said John W. Wood, Jr., president of Thermedics.

"Universal Voltronics, a company in which Thermedics now owns a controlling interest, enjoyed a significant increase in its sales of high voltage power supplies to various industrial markets in the past quarter."

Thermedics develops, manufactures, and markets biomaterials, biomedical products, analytical instruments, and explosives- and drug-detection devices, and provides analytical laboratory services. Thermedics is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

LONDON (AUG. 7) PR NEWSWIRE - Reuters this week opened its first reporting bureau in Hanoi to meet an increasing demand for news of Vietnam as the country adjusts to the dramatic changes in the communist world.

The first resident Reuter correspondent, Kathleen Callo, a 31-year-old U.S. national, took up her post yesterday. She has had previous reporting assignments for Reuters in London, Brussels, Manila, and Hong Kong.

Reuters maintained a bureau in Saigon (now Ho Chi Minh City) until the capital of the former South Vietnam was taken over by communist forces in 1975.

Editor in Chief Mark Wood said: "Opening a bureau in Hanoi underlines our commitment to extend our worldwide news coverage and we are convinced Vietnam will be an increasingly important news story in the years ahead." The opening of the Hanoi bureau brings the number of Reuters reporting bureaus to 119 in 78 countries.

Reuters Holdings PLC supplies the global business community and news media with a wide range of facilities including real-time financial data and transaction services, access to numeric and textual historical databases, news, and news pictures. Reuters has a controlling interest in Visnews, the international television news agency, and Reuter Group companies design and install Trading Room Systems.

Reuters obtains information from around 160 exchanges and over-the-counter markets and from a network of some 1,310 journalists, photographers, and cameramen.

Reuters distributes information through approximately 200,000 video terminals and teleprinters. This includes information directly transmitted to clients' computers.

STAMFORD, CT (AUG. 7) PR NEWSWIRE - General Re Corporation (NYSE: GRN) reports net income excluding realized capital gains or losses for the quarter ended June 30, 1990 of $1.60 per share, an increase of 3.2 percent from the comparable results in the second quarter of 1989 of $1.55 per share. After-tax realized capital gains were $.17 per share in the second quarter of 1990, compared with $.02 per share in the second quarter of 1989. Net income for 1990's second quarter was $1.77 per share compared with $1.57 per share in the second quarter of 1989, an increase of 12.7 percent. Net income includes "fresh start" benefits of $.03 and $.08 per share in the second quarters of 1990 and 1989, respectively.

The combined underwriting/expense ratio for the domestic property/casualty companies for the second quarter of 1990 was 99.1 percent compared with 99.1 percent for the same quarter in 1989, 99.0 percent for the first quarter of 1990, and 99.6 percent for the year 1989. In the first half of 1990, the combined ratio was 99.0 percent, the same as in the first half of 1989.

Net income excluding realized capital gains or losses for the six months ended June 30, 1990 was $3.10 per share, an increase of 4.0 percent from the comparable results in the first half of 1989 of $2.98 per share. After-tax realized capital gains were $.30 per share and "fresh start" benefits were $.06 per share in the first half of 1990 which compares with $.28 per share and $.12 per share, respectively, in the first half of 1989. Net income for 1990's first half was $3.40 per share compared with $3.26 per share in the first half of 1989.

Shareholders' equity at June 30, 1990, amounted to $3,153.9 million. As of June 30, 1990, the Corporation had 88,050,119 shares of common stock outstanding compared to 89,950,364 at Dec. 31, 1989 and 91,326,762 shares at June 30, 1989. As of today, August 7, the Corporation has repurchased 1,978,800 shares of its common stock during 1990.

HOUSTON (AUG. 7) PR NEWSWIRE - Chiles Offshore Corporation (AMEX: CHC), the Houston-based offshore drilling contractor, achieved increased revenues though experiencing a net loss for the second quarter of 1990. This announcement was made today by William E. Chiles, president and chief executive officer of the company.

Drilling revenues for the three months ended on June 30, 1990, totaled $11,979,000, an increase of 36 percent from the preceding quarter. However, increased depreciation and interest expenses associated with three mobile jackup units purchased by the company late in the first quarter resulted in a net loss of $475,000, or $.04 per share, for the second quarter.

On a year-to-date basis, the recent quarter's performance brought the company's drilling revenues to $20,778,000, while the company's net loss totaled $214,000, or $.02 per share.

Utilization of the company's expanding fleet averaged 92.7 percent for the second quarter and 91.9 percent for the first six months of the year, Chiles reported.

"It was a gratifying quarter in light of our initial public offering and the enlargement of our fleet by more than 40 percent," said Chiles in making the announcement.

Chiles said that the company's initial public offering in May produced net proceeds to the company of $64.6 million. That capital is being held in short-term interest-bearing securities while the company considers investment opportunities that fit into its long-term growth strategy.

"As part of our strategic plan, we are also now earnestly looking beyond the Gulf of Mexico, where our rigs are currently deployed, and exploring opportunities in other markets around the world," he said.

On July 10, the company announced that it had entered into three- year bareboat charter agreements to operate three additional mobile offshore jackup drilling units. Under the charters, the company has the option to purchase the rigs at an agreed-upon price on or before Nov. 30, 1990.

Chiles Offshore Corporation, with offices in Houston and in Lafayette, La.

is engaged in the drilling and workover of offshore oil and gas wells. The company works on a contract basis for major and independent oil and gas companies. In addition to operating its own fleet of 10 mobile offshore jackup units and the three bareboat charters mentioned above, the company manages a self-contained platform rig owned by Conoco Inc.

NEW YORK (AUG. 7) PR NEWSWIRE - The Horn & Hardart Company (AMEX: HOR) today announced the sale to Arby's Inc. of Horn & Hardart's 22 franchised units in South Florida for total consideration of $5 million. Horn & Hardart has been a dominant Arby's franchisee in Dade, Broward, and Palm Beach counties.

The sale of Horn & Hardart's Arby's units represents the termination of Horn & Hardart's restaurant operations in Florida.

"Today's announcement is part of Horn & Hardart's previously announced restructure program," said Donald Schupak, chairman and chief executive officer. "The company is currently in negotiation with several parties concerning the sale of its other restaurant concepts and real estate assets."

HERNDON, VA (AUG. 7) PR NEWSWIRE - EDS has signed a dual award contract with the U.S. Army Information Systems Selection and Acquisition Agency for technical support services to the Army's Information Systems Software Center (ISSC) at Fort Belvoir, Va. Maximum life cycle value is approximately $116 million.

The contract will run for five years in one-year increments and will provide life cycle management services of Standard Army Management Information Systems (STAMIS). The indefinite delivery/indefinite quantity contract will include cost plus fixed fee, cost plus award fee and firm fixed price task orders for a wide range of software engineering services.

Under the contract, EDS will support ISSC by providing system development, conversion and maintenance for various STAMIS. Assigned systems under the contract include financial, payroll, personnel and force development among others.

Work will be performed at Fort Belvoir, Fort Benjamin Harrison, Ind., the Army MELPAR building in Falls Church, Va. and EDS' Eastern Regional Headquarters in Herndon.

"This is EDS' first major systems engineering services contract with the Army," said Robert McCashin, group executive for EDS' Federal Government business. "It is in keeping with our strategy of expanding our professional services work with the government."

"This contract will enable EDS to assist the Army during a critical period of transition and consolidation," said George Sibley, president of EDS' Military Systems Division. "The contract will improve the ability of the existing STAMIS to respond to functional user need and provide more timely and accurate information to all levels of the Army."

EDS has operations in 27 countries and is the leader in providing information technology services to customers around the world. Stock reflecting EDS' performance is traded on the New York Stock Exchange under the symbol GME. EDS reported revenues of $5.5 billion in 1989.

DALLAS (AUG. 7) PR NEWSWIRE - An agreement to form a new company, Siam Occidental Electrochemical Ltd. (S.O.E.C.), has been reached between Dallas, Texas-based Occidental Chemical Corporation and Bangkok- based United Srichai Chemicals Co. Ltd. The establishment of S.O.E.C. marks the first chlor-alkali investment for OxyChem in the Far East.

Under the agreement, the new company would purchase United Srichai's chlor-alkali facility near Bangkok. An expansion that would more than double the capacity of that facility would be undertaken to meet the increasing demand for chlorine and caustic soda in Thailand. The plant's current annual capacity stands at 20,000 metric tons of chlorine and 23,000 metric tons of caustic soda. The transaction is expected to be completed by October 1990, with completion of the expansion planned for fourth quarter 1992.

OxyChem is a major worldwide producer of electrochemicals and specialty products, petrochemicals, plastics and resins and agricultural products. It is the largest U.S. merchant producer of chlorine and caustic soda and also has a strong presence in those businesses in Latin America.

United Srichai is one of two major producers of caustic soda in Thailand. It presently operates advanced membrane cell technology supplied by

Occidental Chemical's affiliated company OxyTech Systems, Inc.

WICHITA, KN (AUG. 7) PR NEWSWIRE - Brite Voice Systems Inc. (NASDAQ: BVSI) entered into a three-year agreement granting Infovox AB of Solna, Sweden the rights to manufacture and sell Brite's equipment in Sweden and Norway.

"Infovox is typical of the type of company we are seeking to enter into partnerships with to represent our interests abroad," said Stan Brannan, president and CEO of Brite. "Its reputation as a high technology company and a leading provider of "text-to-speech" systems is important to us. Both of us work hard to provide superior after-the-sale support. This service philosophy is a key to winning new customers."

Infovox AB is a wholly-owned subsidiary of the Swedish Telecom Administration and is responsible for speech technology-based systems and applications within the Administration. Infovox AB is one of the leading providers of text-to-speech technology in the world. Its technology converts text into spoken English (American and British), German, French, Spanish, Italian and Scandinavian languages using synthetic speech. Infovox's products are sold in over 20 countries including the United States. The company also provides turnkey interactive voice response (IVR) solutions for banking, travel information, road information, order entry, game results, etc. "The use of Brite's equipment will enhance our ability to provide turn-key IVR products," said Lars Magnusson, president of Infovox AB. "In addition, we see opportunities to use Brite's systems with our text-to-speech products."

Known as a leading provider of audiotex and interactive voice response equipment in the United States, Brite has other manufacturing license agreements in Australia, Canada, New Zealand and the United Kingdom (including Great Britain and Northern Ireland). "Our equipment is in operation in nine countries and we are looking for additional representatives in other countries," states Bill Daugherty, director for international sales at Brite. In addition to manufacturing license agreements, the company also sells its products through a combination of distributorships and direct sales. Brite has the largest installed base of voice response equipment of all of the U.S. vendors marketing in Europe according to Probe Research, an independent research company.

ST. LOUIS (AUG. 7) PR NEWSWIRE - Emerson Electric Co. (NYSE: EMR) announced today that it is proceeding with the development of a plan that, if implemented, would spin off to Emerson shareholders all of the equity interest in a new company that would own Emerson's defense business. It is intended that the plan will be finalized in sufficient time to allow completion of the spin-off, if undertaken, by the close of Emerson's fiscal year on Sept. 30, 1990.

Primary issues to be addressed by the plan include obtaining financing for the new company's working capital requirements and for the payment of a cash dividend by the new company to Emerson, developing satisfactory arrangements to protect Emerson with respect to its existing guarantees of certain defense contract obligations, and approval of the listing of the new company's securities on a national securities exchange or other quotation system.

The new company would own all the outstanding shares of five Emerson operating subsidiaries: Electronics & Space Corp., based in St. Louis; Hazeltine Corporation, based in Greenlawn (Long Island), N.Y.; Rantec Microwave and Electronics, Inc., based in Calabasas, Calif.; Southwest Mobile Systems Corporation, based in St. Louis; and Vacco Industries, based in South El Monte, Calif.

Equity ownership interest in the new company would be distributed on a pro rata basis to Emerson shareholders.

Charles F. Knight, chairman and chief executive officer of Emerson, stated "This action would create a new company tightly focused on the defense industry. We believe a spin-off would be a positive step for Emerson, its shareholders, these subsidiaries and their employees."

Fiscal 1989 aggregate net sales for the five defense units totaled approximately $600 million, representing approximately 8 percent of Emerson's overall net sales of $7.1 billion. Fiscal 1989 pre-tax earnings for the five units totaled approximately $15 million, or approximately 1.5 percent of total pre-tax earnings. The five operating subsidiaries employ approximately 6,000 employees.

Emerson Electric Co. manufactures a broad range of electronic, electrical and other products for commercial, consumer, industrial and government and defense markets.

NEW YORK (AUG. 7) PR NEWSWIRE - Fuji Capital Markets Corporation, a subsidiary of the Fuji Bank, Limited, announced today the formation of a Derivative Products Group and that Steven A. Schwimmer has joined Fuji from First Boston Corporation to head the New York-based operation.

Schwimmer, whose title will be managing director-Fuji Capital Markets Derivative Products Group, was most recently a director of First Boston in its Interest Rate Swaps Department.

Financial derivative products, which include interest rate and currency swaps and options, have become increasingly important tools for corporations and financial institutions seeking to manage their balance sheets, minimize funding risk and cost or maximize portfolio returns and flexibility.

The Derivative Products Group, which is expected to be fully operational by the year-end, will be responsible for integrating derivative products into Fuji's worldwide activities. Through this extension of its capabilities, Fuji intends to establish a significant market making-presence in dollar-denominated and other financial derivative products.

On July 30, Fuji Capital Markets received approval from the Federal Reserve Board to act as principal, broker and advisor with respect to interest rate and currency swaps and related transactions.

Commenting on the announcement, Shiro Yanagihara, president and chief executive officer of Fuji Capital Markets Corporation, said: "We have studied the market for interest rate and currency swaps and options very thoroughly and are convinced that with the right people and commitment, Fuji can achieve a significant presence in this area. Our success in recruiting Steve Schwimmer puts us well on our way to achieving that goal."

Schwimmer said: "While the derivative products market has become well established within the financial markets, product innovation and new customer applications continue to broaden the market. I am convinced that the combination of Fuji Bank's capital strength and global presence will make us a formidable competitor in the field."

Schwimmer, 36, received a bachelor's degree in accounting and business administration from SUNY Albany and an M.B.A. with a concentration in finance from New York University. Prior to joining First Boston in 1985, he was director and co-head of the Transactional Finance/Swaps Department at Marine Midland Bank. Schwimmer is a Certified Public Accountant. He resides in Fair Lawn, N.J., with his wife and two children.

NEW YORK (AUG. 7) PR NEWSWIRE - Grace Specialty Chemicals Co., the specialty chemicals unit of W. R. Grace & Co. (NYSE: GRA), today announced that it will spend US$2.5 million to further reduce emissions at its manufacturing plant in Worms, West Germany, by installing two cooling towers to further lower the wastewater temperature to below 30 degrees Celsius. The company will also install a second membrane press to treat sludge resulting from the manufacturing process.

The Worms site is the European manufacturing and research development center for Grace Specialty Chemicals' catalysts, silica products and molecular sieves.

Jacques Theumann, president of the European Darex division, spoke of the company's environmental gains, saying, "In order to maintain our high environmental standards as manufacturing capacity expands, we will enhance our effluent treatment facility." He continued, "We want to be on the cutting edge of progressive corporate environmental policy."

Last year GSC spent more than $10 million in order to expand silica production at this site. The company recently announced the spending of $7 million to strengthen its environmental and safety standards at its facility in Heidelberg. In 1989 Grace Specialty Chemicals spent $65 million on environmental matters, and this year that figure is expected to surpass $80 million.

Headquartered in Lausanne, Switzerland, the European Darex division's product lines include flexible packaging materials and equipment; separators used by the industrial and automotive battery industry; container sealants used to protect food and beverages; and catalysts used for emission control and petroleum refining.

Grace Specialty Chemicals is the world's largest specialty chemicals company, with sales of $3.3 billion. Grace is an international specialty chemicals company with interests in energy, manufacturing and service businesses. Its sales exceed $6 billion.

#90219p2905 08/07/1990 ~PR Newswire

ROCHESTER, N.Y. (AUG. 7) PR NEWSWIRE - Transmation, Inc. (NASDAQ: TRNS), a manufacturer and distributor of electronic instrumentation, today

reported sales of $5,971,000 and net income of $131,466, or 6 cents per share for the first quarter ended June 30, 1990. This figure compares to sales of $5,752,200 and net income of $271,251 or 9 cents per share for the same quarter in 1989.

William J. Berk, president, said, "During the first quarter, gross margins were reduced compared to last year, primarily as a result of change in the mix of products sold in 1990 vs. 1989. Additionally, company spending on development engineering increased by 20 percent compared to last year." Berk pointed out several new products are expected to be introduced in the market late in the current year.

"Shipments of products to the international market were down in the first quarter of 1990 compared to the same three months in 1989," Berk stated. "We received an order for more than $650,000 of analog instrumentation in early 1990 which has not yet shipped," Berk continued. He said he expected this order to be shipped during the second quarter which ends Sept. 30

Berk pointed out that business continues to be strong for the company's Transcat subsidiary and also that international interest for the company's products was high. Berk said that he believed new sales and marketing initiatives, together with new product introductions, will spur demand for the company's products in the United States later in the current fiscal year.

For the year ended March 31, 1990, the company had announced record sales of $23,734,395, and earnings of $1,068,550, or 45 cents per share.

Transmation develops, manufactures and distributes instrumentation used in monitoring industrial processes. Its products include analog instrumentation, portable test and calibration equipment, and computerized systems for supervisory control and data acquisition. Transcat, Transmation's distribution subsidiary, sells both Transmation products and those of approximately 200 additional manufacturers through catalogs produced by the company.

Transmation's annual meeting will be held at noon on Tuesday, Aug. 21, at the Holiday Inn-Airport, 911 Brooks Ave., Rochester.

#90219p2906 08/07/1990 ~PR Newswire

CINCINNATI (AUG. 7) PR NEWSWIRE - Gibson Greetings, Inc. (NASDAQ: GIBG) today announced record revenues for the second quarter and first half of 1990.

Revenues for the second quarter ended June 30, 1990 were $79.6 million, up 20.4 percent from the comparable period in 1989. Income before taxes was $3.2 million, down 15.4 percent from the second quarter of 1989. Net income of $2.0 million was 24.8 percent below the like period of 1989, with net income per share of $.13 versus $.16, down 18.8 percent. The effective tax rate was 39.1 percent compared to 31.4 percent in the second quarter of 1989.

Income before taxes for the second quarter of 1990 reflected an increase of $2.4 million in the bad debt provision resulting from the Ames Department Store bankruptcy and additional provisions considered appropriate in view of the weakened financial condition of certain other retailers. In addition, interest expense, net, increased $1.5 million, relating to earlier production at Cleo Inc in anticipation of increased shipments in the last half, increased asset additions and decreased short-term investment income.

For the six months ended June 30, 1990, revenues were $160.4 million, up 18.8 percent, while income before taxes was $13.3 million compared to $13.1 million for the first half of 1989. Net income was $8.2 million, down 5.9 percent from the like period in 1989, with net income per share of $.52 versus $.55, down 5.5 percent. The effective tax rate was 38.2 percent compared to 33.7 percent for the first half of 1989.

Income before taxes for the second quarter and first half benefited from increases in revenues and decreases in operating expense ratios. However, these benefits were offset by higher cost of products sold ratios due to changes in product mix and substantially higher interest expense resulting from increased borrowings.

The effective tax rates for the second quarter and first half were above the like periods of 1989 due to the impact of the reversal of a tax penalty on last year's rates.

Benjamin J. Sottile, chairman, president and chief executive officer, stated that the strong gains in revenues for the second quarter and first half of 1990 were principally attributable to increased shipments, primarily to existing accounts, of everyday card and non-card products, as well as increases for Cleo brand seasonal gift wrap products. Improvement in the return and allowance rates of certain products also contributed to the gains. The basic seasonality of the business typically results in revenues and net income for the last two quarters substantially exceeding first half revenues and net income.

Sottile emphasized that stockholders' equity at June 30 increased 20.0 percent to $231.8 million compared to $193.1 million on the year ago date. In addition, the company's long-term debt increased to $30.1 million reflecting the $16.5 million financing in late 1989 for a manufacturing/distribution facility in Memphis, Tenn., partially offset by a $4.7 million reduction in other long-term debt obligations. This new facility is expected to be completed in early 1991. Concerning the acquisition of New Peck late last year, Sottile added that operations had been successfully integrated with Cleo operations.

Sales of products featuring such licensed properties as Walt Disney and Sesame Street characters, Dick Tracy, Mother Goose & Grimm, The Jungle Book, Lynn Hollyn, as well as Neat Stuff alternative cards, continue to be encouraging. In addition, a new greeting card fixture system called Concept 2000 is scheduled for initial introduction in the fall. This modular design is expected to increase the sales productivity of retail chain accounts.

#90219p2914 08/07/1990 ~PR Newswire

LOUISVILLE, KY. (AUG. 7) PR NEWSWIRE - Ford Motor Co.'s Louisville Assembly Plant (LAP) today built the first 1991 Mazda Navajo, a sport utility vehicle which will be sold by Mazda's U.S. dealers.

When the vivid blue Mazda Navajo rolled from the assembly line, it marked the first time a U.S. auto company built a vehicle for a Japanese auto company and its dealers.

The Mazda Navajo was designed and engineered by Ford, with developmental input from Mazda. Mazda specified and Ford designed the areas of product differentiation. Mazda developed option packages unique to its vehicle.

The Mazda Navajo, a two-door model with four-wheel drive, will be introduced at Mazda dealerships this fall. It will feature a 155-horsepower, multi-port fuel-injected Ford 4.0-liter V-6 engine and will be available with either Mazda's five-speed manual or Ford's four-speed automatic transmission.

The Mazda Navajo is based on the 1991 Ford Explorer utility vehicle, also built only at LAP. The Explorer has been one of the auto industry's strong-selling new models since its introduction at Ford dealerships last March 15.

Product differentiation between the Ford Explorer and the Mazda Navajo will include a unique Mazda Navajo paint color, and designs for bumpers, grilles, headlights and side marker lights, wheels, tail lights, steering wheel, seat cloth and door panel and armrest design.

Phong Vu, truck program manager for Ford, said: "When another company signs up to buy our vehicles, it's an endorsement which our outstanding work force rightfully enjoys. We are pleased to be building the Navajo for Mazda."

The development of that vehicle is the latest in a series of cooperative ventures between Ford and Mazda.

Clark J. Vitulli, chief operating officer for Mazda Motor of America Inc., said: "The development of the Navajo was a textbook study in teamwork. The Navajos produced in Louisville represent another high point in the mutually beneficial relationship which Mazda and Ford began some 20 years ago."

Ford said it expects to build about 18,000 of these vehicles during the first year of production.

Ford invested $260 million to expand LAP to build the Ford Explorer and Mazda Navajo. Plant Manager Les Tischler said: "The 162,000-square-foot expansion, increasing the plant to 2.6-million square feet, included a new area for frame and chassis assembly and a new pre-trim facility.

"Every plant employee went through a comprehensive training program before production of the Explorer and Mazda Navajo began," Tischler said. "This extensive program taught subjects ranging from statistical process control for continued quality improvements, to 1990s philosophies of the auto industry."

LAP produced its first Ford Explorer last Feb. 14. The Explorer and Mazda Navajo assignments meant about 1,200 jobs at the plant. The number relates to added employment and to other employment which would have been eliminated if Ford had not selected LAP to build the vehicles. The plant employs 3,800.

NEW CASTLE, PA. (AUG. 7) PR NEWSWIRE - First Western Bancorp Inc., (NASDAQ-NMS: FWBI) parent of First National Bank of Western Pennsylvania, honored Thomas V. Mansell at a dinner held in his honor Saturday, Aug. 4.

In charge of the proceedings were John W. Sant, chairman and chief executive officer of First Western and Thomas J. O'Shane, president and chief operating officer of First Western and president and chief executive officer of First National. The highlight of the evening was the announcement by O'Shane that the former N.C. Professional Building, located at 113 E. Washington St., had been renamed One Mansell Place in recognition of Mansell's contributions to First National since 1952, when Mansell joined the Union Trust Co., then the parent of First National.

Mansell graduated from Westminster College in 1929, from Harvard Law School in 1933, and was admitted to the practice of law in 1934. During the second World War, service as an officer in the U.S. Navy in the Pacific theater interrupted his law practice, to which he returned shortly after the end of the war.

In 1952, Mansell joined the Union Trust Co. and in 1956 became a director of both Union Trust Co. and First National Bank. In 1972, Mansell became president of First National and, in 1976, he became president and chief executive officer, which office he held until his retirement in 1984. Subsequent to his retirement, he was retained as chairman of First National and vice chairman of First Western. Mansell retired as a director of First Western and First National in 1990 and was named chairman emeritus and senior advisory director of First National at that time. He still comes to work at his office in First Western every day.

In summing up the essence of Mansell's service to First National, Sant said that First National acts in a responsible manner because Mansell is a gentleman; that First National treats its employees with care and concern because Mansell was concerned about human welfare; and that First National treats its customers and associates fairly because Mansell is honest. Therefore, both First National and First Western reflect his influence and his example of how to conduct oneself both in business and in private life.

CARSON, CALIF. (AUG. 7) PR NEWSWIRE - Infiniti, the new luxury car division of Nissan Motor Corp. in USA, today was recognized as a leader in customer service on J.D. Power & Associates' "1990 Sales Satisfaction Index" (SSI), ranking second among all manufacturers.

Less than a year after entering the marketplace, Infiniti challenged the leader in the Index, Mercedes-Benz, scoring only two points fewer than the German automaker -- 143 to 145. The survey evaluates salesperson measure delivery activities and initial product quality.

"The ranking validates the effectiveness of what we call the 'Total Ownership Experience,' (TOE) which mandates excellence in product quality, sales environment and ongoing service," said William R. Bruce, vice president, general manager of Infiniti. "Our philosophy -- action not just words -- is to treat each customer as an honored guest and make customer service our highest priority."

Bruce added that to insure the support of the division philosophy, no dealership opens until its staff has graduated from the Infiniti National Training Center in Phoenix, Ariz., where the training focus is on pleasing the Infiniti customer.

Infiniti earned high ratings in all three components of sales satisfaction placing first on how the salesperson treats the customer and ranking among top industry leaders in initial product quality and how a product is delivered to the customer.

"The survey leaves no doubt that the program works," he said. "And, we take pride in the fact that Infiniti and its products, the Q45 sedan and M30 sport coupe, rank at the top with the acknowledged leader in the field Mercedes Benz."

VALHALLA, NY (AUG. 7) PR NEWSWIRE - ComponentGuard, Inc. (NASDAQ: PLUG; warrants: PLUGW), a provider of name brand service plans on a wide range of electronics products, today announced third quarter and nine months results in light of a change in the company's method of recognizing revenue and expensing costs.

In its financial reporting prior to the third quarter, ComponentGuard has recognized revenues and expenses in full in the period they were received or incurred, and accrued an estimate for future claims. Under the newly adopted method of accounting, which will be retroactively applied to prior periods, net revenues and direct selling expenses are not recognized for the first 180 days after the sale of a warranty contract and are thereafter recognized during the subsequent 36 months using the straight line method. The period of recognition approximates the period that an extended warranty contract becomes and remains effective.

Under the new method of accounting, net revenues increased to $217,963 for the three months ended April 30, 1990 from $17,195 for the three months ended April 30, 1989, and to $412,723 for the nine months ended April 30, 1990 from $25,825 for the comparable year ago period. In addition, under this new method, all $1,730,816 of revenues from the sales of extended service contracts during the three months ended April 30, 1990 and substantially all of the $4,668,247 of such revenues for the nine months ended April 30, 1990, were deferred to future periods. At April 30, 1990, the company's financial statements included $5,687,712 of deferred revenues associated with extended service contracts and $740,987 of deferred costs associated with such contracts. These amounts will be recognized in future periods, along with the non- deferred expenses incurred in those periods.

In view of the costs associated with the expanded level of activities of the company, under the revised accounting method, the company reported a third quarter loss of $1,061,900 or $.05 per share, compared with a loss of $400,946, or $.02 per share, in the third quarter of 1989. For the nine months ended April 30, 1990, the company reported a net loss of $2,006,143, or $.10 per share, as compared with a loss of $1,173,546, or $.06 per share, in the corresponding prior year period.

"The change in accounting method was prompted by comments from the Securities Exchange Commission when it reviewed the registration for the company's publicly traded stock purchase warrants earlier this year," said Robert P. Minnick, ComponentGuard president and chief executive officer. "The new method of revenue recognition was determined after discussion with the SEC as to the current status of generally accepted accounting principles applicable to the company's revenue generation. Similar restatements have also been announced by several of our competitors, suggesting an industry-wide move toward greater conservatism in treating revenue and profit recognition. This should, of course, result in diminished operating results in the near-term. Future periods will, however, be favorably affected by the company's current significant sales increases."

Minnick attributed the company's record nine-month growth in sales of extended warranty contracts to advertising efforts that have promoted ComponentGuard to both the consumer and the consumer electronics retailer as the only brand name extended service contract, and to the success of the Guardman program introduced at the end of fiscal 1989. Guardman has distinguished itself as the country's first packaged "off- the-shelf" extended service plan.

The company also announced that subsequent to the end of the reported quarter, the company sold to a Switzerland based investment fund, for an aggregate purchase price of $1,500,000, a $1,500,000 principal amount convertible subordinated note and a five-year warrant to purchase 3,000,000 shares of common stock of the company at an exercise price of $1.25 per share. The note is repayable on Dec. 31, 1990, without interest subject to automatic conversion into 3,000,000 shares of common stock of the company upon the amendment of the certificate of incorporation of the company to provide for sufficient authorized but unissued shares therefor.

#90219p2924 08/07/1990 ~PR Newswire

ROCHESTER, NY (AUG. 7) PR NEWSWIRE - Curtice Burns Foods (AMEX: CBI), a major food processor, today reported record sales of $926,879,000 for the fiscal year ending June 29, 1990, up 8.3 percent from the prior year. Net earnings of $11,601,000 or $1.37 per share including the cumulative effect of an accounting change declined 22 percent while net operating earnings of $7,351,000 or $.87 per share were off 50.6 percent from the prior year's record earnings of $14,873,000 or $1.78 per share.

"The abrupt drop in earnings at operating level after four consecutive years of sales and three years of earnings growth," said President David J. McDonald, "is a result of unusual growing conditions during the 1989 pack year in the Northeast where crops are produced for the company's largest product lines, frozen and canned vegetables. This caused a shortage of raw product that had a major impact on both sales and margins of these important product lines. This particularly impacted the last quarter of fiscal 1990.

"This situation, coupled with record raw material costs for the company's meat snack and aseptic businesses, added to the one-time expense entailed in a number of cost reduction and development programs, account for most of the earnings decline."

McDonald added, "These development activities include consolidations in

five plants and four administrative operations directed toward cost reductions and the costs of the introduction if several new products including, in the West, a line of microwaveable single serve entrees."

In the fourth quarter of fiscal 1990, Curtice Burns declared a net loss of $910,000, or ($.11) per share, on sales of $224,762,000. This compared with prior year fourth quarter net income of $3,855,000 or $.46 per share, on sales of $236,024,000. The 1989 fourth quarter was comprised of 14 weeks compared with 13 weeks in 1990. On a 13-week basis, sales increased 2.6 percent for the period.

The year-to-year earnings decline was partially offset by a credit addition to net earnings of $4,250,000 or $.50 per share as a result of the company electing to comply with Financial Accounting Standard No. 96 "Accounting for Income Taxes." The principle effect of this accounting change adjusts deferred taxes to the current corporate tax rate. This adjustment is retroactively reflected in the first quarter of the fiscal year.

Rochester-based Curtice Burns Foods consists of 10 autonomously managed divisions, 60 plants and warehouses, and 6,000 employees located throughout the United States and Western Canada. The company is unique in the food industry with its strategic focus on regional brands and development and processing of custom packed foods for the retail grocery and food service industry.

#90219p2928 08/07/1990 ~PR Newswire

NEW YORK (AUG. 7) PR NEWSWIRE - Shiley Inc. announced today that it will launch a program to attempt to identify recipients of the Bjork- Shiley 60 degree Convexo-Concave (60 degree C/C) heart valve in an effort to establish a patient registry to facilitate the flow of medical information to these patients.

Shiley, a subsidiary of Pfizer Inc (NYSE: PFE), said it is in the process of developing this innovative, far-reaching program so that recipients of the valve, once identified, can more easily be provided with information about their prosthetic heart valves. The program will help promote patient awareness of the signs and symptoms of the serious or life-threatening complications associated with all mechanical valves, and the steps to be taken in the event emergency medical treatment is required. Wherever possible, the information will be provided through the patient's personal physician, although the program will also be

designed to provide information directly to patients if necessary.

Roger Sachs, M.D., vice president and medical director of Shiley Inc., said: "Shiley has frequently provided physicians with information about our heart valves, and did so again this March to a very large number of doctors and other health professionals. This enables physicians to provide their patients with appropriate information in a sensitive and timely way. We firmly believe this is the proper way to provide such information to patients.

"Recently, the Food and Drug Administration began to reevaluate ways to assure that important medical information is being obtained by patients. The agency is concerned that physicians may not always have transmitted the information they have or may not have done so in an effective manner. Shiley has closely followed FDA hearings on this issue. We are constantly seeking better ways to help patients using our products and have advocated the concept of patient registries for critical, implanted medical devices. We strongly prefer to enhance the flow of information between physician and patient, if this can be done, but in light of FDA's new concerns Shiley will utilize other ways of getting critical information directly to patients.

"Our intent with this program is to identify as many Shiley heart valve patients as we can and also identify their physicians. We will then encourage and, by providing helpful materials, facilitate an effective dialogue between patient and doctor. We will also explore alternative means to provide patients medically appropriate information, without the presence of a physician. In the latter case, any communication prepared by Shiley will be reviewed by FDA before being sent."

Sachs said today, "The FDA's concern and reevaluation as well as HRG's interest in enhanced patient communications were among the several important factors in our decision to attempt to develop a patient registry which could assist Shiley in our ongoing medical communication program and perhaps serve as a model for other critical devices. We expect the program will make it unnecessary for HRG to pursue further its petition with FDA."

Shiley said it would develop the details of the program over the next several weeks in coordination with FDA and expects to have the program fully operating in the United States in the fall.

MELBOURNE, FL (AUG. 7) PR NEWSWIRE - Harris Corporation (NYSE: HRS) reported that net income for the fiscal year ended June 30 increased 13 percent to $130.7 million, compared with income from continuing operations of $116.2 million the previous year. Earnings per share were $3.30 on 39.6 million shares outstanding, compared with $3.00 per share on 38.7 million shares in fiscal 1989. Sales were $3.1 billion, compared with sales from continuing operations of $2.2 billion the year before. Both net income and sales established new records.

Fiscal 1990 included the first full year's operating results of Lanier Worldwide (formerly Harris/3M), which became a wholly owned Harris subsidiary effective April 28, 1989. It also included twelve-months operation of GE Solid State (GESS), compared with seven months the previous year. GESS was acquired on Nov. 30, 1988 and is now part of the Harris Semiconductor Sector.

Fourth-quarter net income increased 14 percent to $39.5 million or 99 cents per share, compared with income from continuing operations of $34.8 million or 90 cents the previous year. Sales were $807.6 million, compared with sales from continuing operations of $768.3 million in the previous fourth quarter.

Total orders from continuing operations were up for the year as a whole, although lower in the fourth quarter. While Semiconductor Sector orders increased substantially for the quarter, Communications Sector orders were down sharply, and Electronic Systems Sector orders also were down significantly compared with last year's strong fourth quarter. Backlog at year end was $1.1 billion, compared with $1.3 billion at the end of fiscal 1989.

MOUNT VERNON, NY (AUG. 7) PR NEWSWIRE - Micro Bio-Medics, Inc. (NASDAQ: MBMI) today announced that it has completed the acquisition of certain assets of Eastern Medical Supply, Inc. of Stamford, Conn., with sales in excess of $3 million for the last 12 months.

"The acquisition of Eastern Medical provides our Caligor Physician Supply Division with entry into the state of Connecticut, a new territory for the division. It is also in keeping with our strategy of moving away from lower margin hospital sales toward the higher margin physician supply market. With the integration of Eastern's 800 customers and four sales representatives into our Caligor Physician Supply Division, operated out of our Mount Vernon facility, we continue to expand our market share as the largest physician supply company in the New York Metropolitan area," commented Bruce J. Haber, president of Micro Bio-Medics.

Micro Bio-Medics, Inc., is a leading supplier of thousands of medical and pharmaceutical products to doctors in their offices, nursing homes, hospitals and government agencies. In addition, the company is the nation's largest distributor of sports medicine supplies to professional sports teams, schools and colleges.

HIGHLAND CITY, FL (AUG. 7) PR NEWSWIRE - Robert H. Gagne, president of Caribbean Select, Inc. (NASDAQ: CSEL, CSELU, CSELW) announced today that he has reached an agreement with a financial institution to provide the company with a $7 million secured revolving line of credit.

Commenting on this development, Gagne stated, "We are extremely pleased to announced this credit line, which demonstrates the lender's confidence in

the company's continued prospects for growth as well as the continued demand for Caribbean Select product."

Commenting on the company's business, Gagne stated, "We are very excited about the company's strong growth over the past year. During the first half of fiscal 1990, we successfully increased brand awareness and our network of bottlers and distributors. As we enter the second half of Fiscal 1990 our corporate strategy is to continue to expand into niche markets for our products, domestically and internationally, thereby resulting in increased revenues and profitability for Caribbean Select.

The company continues to feel confident with analysis projections of $50 million in sales and earnings of $.18 - $.22 per share.

Caribbean Select, Inc. produces and markets "Caribbean Select," a line of 100 percent fruit and vegetable juices. In November of 1989, Caribbean Select acquired "Allsun Pure Juice," a citrus processing and packaging plant located in Highland City, Fla.

NEW YORK (AUG. 7) PR NEWSWIRE - Corroon & Black Corporation (NYSE: CBL) announced today the appointment of Gary Sindler to the position of senior vice president, administration.

In his new post, Sindler will be responsible for a wide range of corporate administration, including professional development, facilities planning, real estate, corporate office administration, compensation, benefits, employee relations, and corporate communications.

His appointment was announced by Richard M. Miller, chairman and chief executive officer of Corroon & Black Corporation. In making the announcement, Miller commented: "As Corroon & Black has grown, we have needed additional expertise in the area of administration, and Gary's background has covered a broad range of duties. He comes to us well qualified for this important new role."

Sindler has 20 years of experience with another insurance brokerage firm, where he has served as controller, director of administrative operations, assistant to the president, and as an automation consultant.

Corroon & Black Corporation, headquartered in New York, is one of the world's largest full-service insurance intermediaries, providing insurance

brokerage, risk management services, reinsurance brokerage, and employee benefits, compensation, and actuarial consulting to individuals, local governments, professions, business and industry.

It has subsidiaries across the United States and affiliated offices throughout the world. The corporation was founded in 1905 in New York City.

CONTACT: Mary E. Florey of Corroon & Black, (212) 363-4100, or Ramya Thambuswamy of Hill and Knowlton, (212) 697-5600, for Corroon & Black.

NEWTON, MASS. (AUG. 7) PR NEWSWIRE - Health and Rehabilitation Properties Trust (NYSE: HRP) today announced its results of operations for the quarter and six month period ended June 30, 1990.

Gross revenues for the June 30, 1990 quarter were $8,452,000. Net income and net income per share in this period were $3,525,000 and 22 cents per share, respectively. For the quarter ended June 30, 1989, gross revenues were $5,659,000 and net income was $1,859,000 or 19 cents per share.

Gross revenues for the six month period ended June 30, 1990 were $16,217,000. Net income and net income per share for the period were $7 million and 44 cents per share, respectively.

David J. Hegarty, treasurer of HRP, pointed out that management bases its dividend calculation on cash available from operations, defined as net income plus depreciation and amortization of prepaid interest costs, rather than net income. In the quarter ended June 30, 1990, HRP's cash

available from operations was $4,816,000 (30 cents per share). Cash available from operations for the quarter ended June 30, 1989 was $3,017,000 (30 cents per share). Average shares of beneficial interest outstanding for the quarters ended June 30, 1990 and 1989 were 15,997,500 and 9,997,500, respectively.

For the six months ended June 30, 1990, cash available from operations was $9,557,000 (60 cents per share) as compared to $6,011,000 (60 cents per share) for the six months ended June 30, 1989. Average shares of beneficial interest outstanding for the six months ended June 30, 1990 and 1989 were 15,997,500 and 9,997,500, respectively.

On July 17, 1990, HRP declared a dividend of 29 cents per share to shareholders of record at the close of business on July 30, 1990.

Health and Rehabilitation Properties Trust is a real estate investment trust headquartered in Newton, Mass. HRP has investments in 22 health care related real estate properties located in 12 states and operated by five separate operating companies.

ST. LOUIS (AUG. 7) PR NEWSWIRE - Trans World Airlines announced today that its July international load factor of 81.4 percent was the highest ever posted for a single month.

International load factor climbed 10 percent over the same period in 1989 and has risen 4.1 percent for the year. 503,700 passengers flew TWA's international routes in July compared to 473,000 last year.

The airline's domestic traffic also increased in June. Domestic load factor in July was 65.7 percent compared to 63.9 percent for the same period last year. TWA carried 1.904 million passengers last month compared to 1.898 million in 1989. Systemwide, TWA has carried .2 percent more revenue passenger miles on 1.5 percent fewer available seat miles for all of 1990.

TWA and its commuter affiliates serve more than 125 cities throughout North America, the Middle East and Africa.

MOSCOW (AUG. 7) PR NEWSWIRE - As Moscow-McDonald's celebrated its first six months of operation on August 1, Soviets continue to line up for a taste of McDonald's food, bringing the total customers served past the 7 million mark, more than two-thirds the size of Moscow's population.

Besides being McDonald's busiest restaurant in the world, Moscow-McDonald's has become a place where many Muscovites and visitors come to socialize, enjoy themselves and even fall in love. It was love at first bite for newlyweds and Moscow-McDonald's employees Konstantin and Elena Voronin who became the first couple to get married after meeting at the restaurant, said Vladimir Malyshkov, chairman of Moscow-McDonald's.

Even a visiting American student from Vermont met his fiancee there, said George A. Cohon, vice chairman of Moscow-McDonald's. "I received a letter from this young man who said he and his fellow students had fun introducing their new Soviet friends to McDonald's food. He wrote that he and his Soviet fiancee will be married in two years after she finishes her degree in physics," said Cohon.

Moscow-McDonald's has taken on a unique life of its own, said Malyshkov. "More than providing food and service, our customers have come to view the restaurant as a special place where they can meet their old friends and make new ones."

A major reason for Moscow-McDonald's success is the hardworking and motivated crew, said Malyshkov. The restaurant has hired more Muscovites to help meet its incredible popularity. When the restaurant opened, Moscow-McDonald's employed 630 crew making it the largest McDonald's crew in the world. The restaurant now employs 1,150 crew members.

"We are delighted by Moscow-McDonald's success," said Cohon. "One of our greatest challenges here has been to produce the large volume of food to satisfy each one of our Soviet customers while continuing to meet the quality standards that our customers have come to expect from us worldwide. With the hard work of our Soviet crew, we have met this challenge. It's gratifying to see so many smiling Soviets enjoying their restaurant."

Moscow-McDonald's is a joint venture partnership between McDonald's Restaurants of Canada Limited and Mosrestaurantservice, the Food Service Administration of the Moscow City Council. The largest joint venture agreement ever made between a Canadian food company and the Soviet Union, the Moscow-McDonald's agreement calls for an initial 20 McDonald's restaurants as well as a 10,000-square-meter food production and distribution center which is now in operation.

TROY, MI (AUG. 7) PR NEWSWIRE - Standard Federal Bank (NYSE: SFB) continued its lead among residential mortgage lenders in southeastern Michigan for the month of May 1990.

According to Lawyer's Title Insurance Corporation, in the four-county area of Wayne, Oakland, Macomb and Washtenaw, Standard Federal recorded 1,602 residential mortgage loans of $250,000 or less, for a total of $81,816,919.

"Our extensive network of branch offices and loan originators, combined with our on-line computer systems, helps us to maintain our competitive edge," stated Thomas R. Ricketts, chairman and president of Standard Federal. "As a result, Standard Federal continues to be one of the Midwest's leading home mortgage lenders."

Standard Federal Bank operates 113 branch offices throughout Michigan and Indiana and has been the leading home mortgage lender in Michigan for 13 of the last 16 years.

SAN FRANCISCO (AUG. 7) PR NEWSWIRE - Continuing to expand staff to accommodate annual card transaction growth of nearly 30 percent, Visa International today announced the appointment of Jeremy Danks as senior vice president and head of its Product Development Division.

In his new position, Danks, 49, will be responsible for the development and enhancement of Visa International products and services on a global basis.

The veteran marketing executive joins Visa following 14 years with American Express where most recently he headed product marketing and sales in Germany. He also has extensive experience in Japan and Italy.

Danks, a native of Sussex, England, who speaks five languages, becomes the fourth senior executive to join Visa International in recent months. He reports directly to Jean-Jacques Desbons, executive vice president and head of the International Consumer Products Group. Desbons, a leading French financier, joined Visa International in 1989 along with Executive Vice President H. Robert Heller, former governor of the Federal Reserve

Board, who is responsible for worldwide economic forecasting, government affairs and country and financial institution risk analysis.

"Mr. Danks' depth of experience in international marketing and product development will serve Visa well in its mission to become the predominant consumer payments system in the world," said Charles T. Russell, Visa International chief executive officer.

Visa, the world's largest card program, expects its transaction volume to increase from $259 billion to $1 trillion in the next several years as a result of strong international growth and penetration of new markets.

CHICAGO (AUG. 7) PR NEWSWIRE - Dow Chemical U.S. Area today recognized MCI Telecommunications Corporation (NASDAQ-NMS: MCIC) as a qualified supplier in conjunction with Dow's Supplier Partnership Process.

Dow made the announcement at an award presentation held at MCI's Midwest Division Chicago headquarters.

Only one other company of Dow's computer and telecommunications suppliers has achieved this status to date. The announcement marks MCI's first time participating and earning recognition from a major corporate customer through a supplier partnership program.

"We look for a supplier's passion for quality and their willingness to continually improve," said Linn Brady, quality productivity manager for Dow's Computer Operations department.

"MCI's flexibility and commitment to quality enhance our own goals of setting the standard for quality within our industry," added Brady.

Dow is a diversified, worldwide manufacturer and supplier of more than 2,000 products, including chemicals and performance products, plastics, hydrocarbons and energy, and consumer specialities -- which include agricultural products, consumer products and pharmaceuticals. Headquartered in Midland, Mich., Dow operates 179 manufacturing sites in 31 countries, and employs 62,000 men and women around the world. In the 1989 Fortune 500 listing of America's largest companies, Dow ranked 21st in sales and sixth in profits.

MCI, with 1989 revenues of $6.5 billion, is the world's second-largest long distance company. Headquartered in Washington, it provides a full range of global telecommunications services, including voice, data, telex

and electronic messaging services to businesses, consumers and government agencies.

MCI Midwest is an operating division of MCI Telecommunications Corporation serving Illinois, Indiana, Michigan, Ohio and Wisconsin.

#90219p2963 08/07/1990 ~PR Newswire

PALM COAST, FL (AUG. 7) PR NEWSWIRE - Cardiac Control Systems, Inc. (NASDAQ: CCSC) ("CCS") announced today that it has executed a license agreement with Intermedics, Inc. ("ITM") granting ITM a worldwide license covering technology relating to CCS' Maestros (R) SAVVI (TM) single-pass atrial rate-response ventricular pacing ("VDD") system, and an agreement providing for CCS to supply its single-pass A-Track (TM) leads to ITM at a specified price for a period of three years.

Pursuant to the agreements, CCS will receive upfront payments from ITM aggregating up to $1.5 million. In addition, future royalties could be $7 million under certain circumstances.

The Maestro SAVVI is a truly rate-responsive pacing system that uses a single lead to achieve the hemodynamic benefits of atrio-ventricular synchrony in patients who have conduction block and a healthy sino-atrial ("S-A") node. The S-A node is the heart's natural pacemaker, located in the right atrium (upper chamber) of the heart. Normally, the impulses generated by the S-A node are carried by the heart's specialized conduction pathways to the ventricles (lower, pumping chambers). In patients whose conduction pathways are blocked, the heart's pumping rate may be too slow to sustain normal activity. The SAVVI system uses a unique single A-Track lead, which acts like a conventional ventricular pacing lead but also incorporates sophisticated sensors that float freely in the blood pool of the right atrium. The SAVVI pacemaker uses these floating atrial sensors to track the natural rhythm of the healthy S-A node, and paces the right ventricle in response. This provides changes in heart rate required to meet the patient's varying needs. Previously, this could only be accomplished by implanting two leads in the heart wall. The dual-lead approach necessitates longer surgical time and exposes the patient to potentially greater risk.

After three years of clinical evaluation, the Maestro SAVVI model 305 VDD pacing system received a unanimous recommendation for commercial release at a recent meeting of the Circulatory System Devices Advisory Panel to the United States Food and Drug Administration ("FDA"). Final FDA approval for open marketing of the system is expected shortly. At that

time, the SAVVI system will be the only commercially available system in the U.S. to employ this advanced single-lead sensing technology.

Intermedics, Inc., located in Angleton, Texas, is the third largest pacemaker manufacturer in the world. In addition to its pacemaker operations, Intermedics also designs, develops and manufactures mechanical heart valves, orthopedic prostheses, and dental implants. Acquired by Sulzer Brothers Limited in 1988, Intermedics is now part of the Swiss firm's medical devices group, SULZERmedica.

Cardiac Control Systems, Inc. headquartered in Palm Coast, Fla., develops, manufactures and markets implantable cardiac pacing systems.

#90219p2964 08/07/1990 ~PR Newswire

ST. PETERSBURG, FL (AUG. 7) PR NEWSWIRE - Geonex Corporation (NASDAQ: GEOX) reported today revenues for the three months ended June 30, 1990 increased 62 percent to $11,575,000 from $7,152,000 for the second fiscal quarter of the previous year. Year-to-date revenue for the nine month period ending June 30, 1990 rose 53 perent to $30,032,000 from $19,621,000 during the corresponding period of the previous year. Revenue from its existing client base was up 22 percent coupled with strong new sales from recent acquisitions and international operations.

Net income in the third quarter of fiscal 1990 was $505,000 or $.15 per share compared to net income of $413,000 or $.12 per share as reported for the third quarter of fiscal 1989.

Net income for the nine months ended June 30, 1990 was $1,191,000 or $.35 per share as compared to $995,000 or $.29 per share for the same period last year.

Gross profit and operating profit percentages to revenue, have remained relatively stable as compared to prior year. This was attributable to expenditures in acquisition integration, national marketing effort and international start-up activity.

On May 1, Geonex acquired the Story Group of companies located in London, England. The Story Group is a 50 year old firm with 90 employees specializing in land surveying, aerial surveying, architectural surveying, detection and surveying of underground services, cartography and reprographics. This acquisition is in line with the Geonex goal of pursuing complementary opportunities in the international market.

Geonex continues to maintain a strong position with respect to cash and

short term investments and shareholders equity; $4.9 million and $13.5 million respectively at the end of the third quarter.

Long term debt, exclusive of real estate loans, has increased by $4.8 million, while the total asset base has increased by $16.4 million. The increase in long term debt since September 1990 resulted from loans for acquisition and capital expenditure activity this year.

Based on assignments of $55,000,000 at the end of the third quarter, Geonex believes it can maintain planned growth in revenues and profits for the remainder of fiscal 1990, and beyond.

Geonex Corporation, based in St. Petersburg, Fla. is the nation's largest geo-information company. Using the most advanced technology, Geonex provides mapping, and resource interpretation services to telephone, electric and gas utilities, local, state and federal government agencies and a variety of commercial industries. Geonex has overall competence in mapping for agriculture and forestry as well as oil, gas, and mineral exploration. In the environmental and waste area, Geonex provides analysis and testing services and hazardous waste investigation services.

NEW YORK (AUG. 7) PR NEWSWIRE - Rockefeller Center Properties, Inc. (RCPI) (NYSE: RCP) announced today net income for the second quarter of 1990 of $8,818,000, or 23 cents per share, on revenues of $30,269,000. For the same period in 1989, the company reported net income of $10,648,000,

or 28 cents per share, on revenues of $31,489,000. The results for the second quarter of 1990 include an extraordinary loss of $461,000, or 1 cent per share, resulting from the repurchase of convertible debentures at a premium.

Income before extraordinary item for the second quarter of 1990 was $9,279,000, or 24 cents per share, compared to 28 cents per share for the same period in 1989. RCPI stated that the difference of $1,369,000, or 4 cents per share, includes a charge of $828,000, or 2 cents per share, in connection with an unanticipated early redemption of a AAA- rated bond, collateralized by government-guaranteed securities. This non-cash charge did not result in any loss of principal, and will not impact RCPI's cash position. RCPI further stated that the balance of the decrease in earnings before extraordinary item was anticipated and is reflective of its capital structure.

SACRAMENTO, CA (AUG. 7) PR NEWSWIRE - Occupational-Urgent care Health Systems Inc. (NASDAQ: OUCH) today announced second quarter 1990 results. Revenue was $5,392,000 up 19 percent from the second quarter of last year. Net income was $783,000 or 8 cents per share, compared to $977,000 (10 cents per share) in the same period of 1989.

"Revenue was about in line with our expectations. The record revenue was achieved in part from the addition of several small customers during the quarter," stated W. Robert Keen, OUCH president. "System training and operating expense has been higher than expected and is reflected in this quarter's results. Other conversion costs have been generally within budget. The system is now demonstrating the efficiency and flexibility we promised. We are fully operational in our Sacramento, Los Angeles, and Texas sites and expect to process directly in a customer's office this quarter.

Current sales efforts have continued to add small and medium size customers during the third quarter. The OUCH and EDS marketing teams have now begun presenting new capabilities to all exisiting and prospective customers. The investments we have made in systems, marketing and customer service enable us to add substantial new business and improve customer response during the second half of 1990 and beyond."

OUCH offers medical and administrative cost containment services to insurance carriers, third party administrators and employers. The company is headquartered in Sacramento.

Below is a summary of OUCH's unaudited results:

	Three Months Ended June 30,		Six Months Ended June 30,

FORT WORTH, TX (AUG. 7) PR NEWSWIRE - Clifton H. Morris Jr., chairman and CEO of URCARCO, Inc. (NASDAQ-NMS: CARS) today announced net income for the year ended June 30, 1990, of $15.8 million or 68 cents per share as compared to $2.9 million or 20 cents per share for the year ended June 30, 1989. Earnings per share increased 240 percent. Sales for the year increased 292 percent from $38.4 million to $150.4 million.

For the fourth quarter ended June 30, 1990, sales were $51.0 million versus $20.3 million, an increase of 151 percent over the same period in 1989. Net income for the quarter was $5.7 million, as compared with $2.1 million for the fourth quarter last year, up 180 percent. Earnings per share for the quarter were 21 cents, as compared with 12 cents for the same period last year, a 75 percent increase.

Morris also noted that results for the fourth quarter ended June 30, 1990 increased as compared to the third quarter 1990. Sales were up 16 percent over the third quarter figure of $43.9 million. Net income increased 19 percent over the previous quarter's $4.8 million and earnings per share were up 17 percent from the third quarter's 18 cents.

URCARCO sold 18,692 cars during the year, as compared with 6,500 units the previous year, Morris added, and the company is now operating 17 retail facilities.

URCARCO, Inc. operates a chain of "we finance" used car retail lots in Fort Worth, Dallas, Houston and Austin, Texas, selling quality used cars and light trucks and typically financing customer purchases.

#90219p2984 08/07/1990 ~PR Newswire

DENVER (AUG. 7) PR NEWSWIRE - Continental Express, the third largest

carrier from Stapleton Airport, announced today record breaking boardings of 100,000 passengers for the month of July. This represents the largest number of customers carried in a single month for the airline and a 32 percent increase over July, 1990. Throughout the summer season, the airline's traffic has steadily increased by an average of 18 percent each month.

Don Smith, president of the Western Region of Continental Express, said, "We are pleased to see the increased demand for travel to our destinations during the summer season. This record breaking month surpasses previous winter months, our typical peak season. It is gratifying to us that the improvements we have made, both in the introduction of new equipment and increased frequency, have resulted in market share gains and traffic growth. Clearly, Continental Express is the dominant regional airline serving Denver."

Continental Express, in 1990, expects to board nearly one million passengers in its Denver hub system, representing a 25 percent gain over 1989. The airline has experienced this strong growth with the successful introduction of service to four new cities, and additional seat capacity in response to significantly greater customer demand. The new cities include Gillette and Sheridan, Wyoming; Farmington, N.M., and Lubbock, Texas. The airline plans to begin serving Ft. Collins/Loveland, Colo. this fall.

In October, the airline's Denver operation will celebrate its fourth anniversary as a Continental Express carrier. The airline's route system has grown from 12 cities in three states in 1986, to its present route system of 26 cities in six states. Between 1986 and 1989, passenger traffic increased nearly 180 percent. Continental Express currently operates more than 100 daily departures from Denver's Stapleton Airport and connects approximately 65 percent of its customers to Continental Airlines.

KANSAS CITY, MO (AUG. 7) PR NEWSWIRE - Today, Kansas City Power & Light Co. (NYSE: KLT) announced that it's board of directors has increased the indicated annual level of dividends from $2.56 to $2.68 by declaring a quarterly dividend of 67 cents per share on its common stock, payable Sept. 20, 1990, to stockholders of record on Aug. 29, 1990. In addition, the board of directors declared regular dividends on the preferred stock, payable Dec. 1, 1990, to shareholders of record on Nov. 9, 1990.

Kansas City Power & Light's second quarter earnings per average common

share were 66 cents, the company reported. Last year's second quarter earnings were 65 cents per share. Earnings per average common share for the 12 months ended June 30, 1990, increased to $3.19 from $2.86 for the like period a year ago. "The earnings for the most recent three month period reflect a surge of warmer weather near the end of the period but were offset by a portion of the costs associated with the Wolf Creek refueling outage which was completed May 16, 1990," explained Bernard J. Beaudoin, KCPL's vice president-finance and chief financial officer.

Second quarter operating revenues were $189.8 million, compared to $176.8 million for the like period a year ago. For the 12 months ended June 30, 1990, revenues were up 2.4 percent to $744.8 million from $727.6 million a year earlier.

KWH sales increased 5.5 percent for the quarter. KWH sales increased 1.8 percent for the 12 month period.

Second quarter 1990 net income was $21.9 million compared to $21.6 million for the like period a year ago. Net income for 12 months totaled $105.1 million, compared to $95.1 million during the previous 12 month period.

Kansas City Power & Light provides electric service to about 408,000 customers in a 4,700 square mile area in eastern Kansas and western Missouri, including metropolitan Kansas City.

NEW YORK (AUG. 7) PR NEWSWIRE - Rand V. Araskog, chairman and chief executive of ITT Corporation (NYSE: ITT), announced today that Dale Comey, executive vice president, has been assigned responsibility for two additional major business areas of the corporation. In addition to his present responsibilities, Comey will now also direct ITT Electronic Components and ITT Fluid Technology, each billion-dollar engineering, manufacturing and sales organizations with plants in the United States, Europe and Asia.

Comey will continue to be responsible for ITT Rayonier, a major forest products operation; and ITT Communications Operations and Information Services Group (COINS), the largest yellow pages directory producer outside the United States and the operator of nearly 40 technical schools in this country. He is a member of the ITT management policy committee and a director of ITT Hartford, the ninth largest property and casualty insurance company in the United States.

As a result of the change, reporting to Comey will be Heinz F. Roessle, ITT senior vice president and president, ITT Electronic Components; Raymond J. Gill, ITT senior vice president and president, ITT Fluid Technology; and L. Wayne Oliver, ITT vice president and group general manager -- Electromechanical Components worldwide. All previously reported to DeRoy C. Thomas, ITT president and chief operating officer. Continuing to report to Comey are Ronald M. Gross, president, ITT Rayonier and Daniel P. Weadock, ITT executive vice president and president, ITT COINS. Comey reports to Thomas.

"Dale has an impressive record of managerial and professional achievements. His performance since joining the ITT headquarters management team has indicated to us that he is now in a position to absorb the additional responsibility for more of our key worldwide businesses," Araskog said.

"This confidence in Dale is shared by Pete Thomas and the board of directors," Araskog added.

ITT Electronic Components operations are major manufacturers of integrated circuits, electronic interconnect systems and switches. Its products can be found in a vast array of electronic applications -- from aerospace and defense to automotive, consumer and commercial products.

Operating in more than 80 countries, ITT Fluid Technology is a world-class supplier of pumps and accessories for heating and cooling systems, valves, heat exchangers and instruments.

NORTH WILKESBORO, NC (AUG. 7) PR NEWSWIRE - Lowe's Companies, Inc. (NYSE: LOW) announced its July sales totaled $299.5 million, a 6 percent increase from July of 1989. Sales to retail customers increased 9 percent and sales to contractors increased 1 percent.

The table below presents sales comparisons and trends:

5 Weeks Ended:		August 3, 1990		August 4, 1989	
	Pct Change	Total Sales (000,000)	Pct of Total	Total Sales (000,000)	Pct of Total
Retail Sales	+ 9	$194.6	65	$178.2	63
Contractor Sales	+ 1	$104.9	35	$103.8	37
Total Sales	+ 6	$299.5	100	$282.0	100
Comparable Stores(a) (277)	-	$265.5	89	$265.1	94

New Projects(b) (30) +125	$ 34.0	11	$ 15.1	5
Closed Stores(c)			$ 1.8	1
Total Stores (307)	$299.5	100	$282.0	100

(a) Stores open more than one year on July 1 with comparable square footage.
(b) Stores open less than one year and stores which have been retrofitted or relocated within the past twelve months. (c) 4 stores closed through July 1990.

A new contractor yard opened in Durham, North Carolina during the month. Relocated stores in Summersville, West Virginia, Athens, Georgia, and Sumter, South Carolina opened in July. Remerchandising projects in six stores were completed.

Lowe's now operates 307 stores in 20 states, in the South Atlantic and South Central regions of the United States. Lowe's is a specialty retailer pursuing three businesses in our stores: the home center do-it-yourself business, the consumer durables business, and the building contractor business.

Lowe's monthly sales results are based on four-week, four-week, and five-week reporting periods. Lowe's quarterly news release on sales and earnings will continue to reflect precise totals.

NEWARK (N.J. AUG. 7) PR NEWSWIRE - Continental Airlines announced today it will begin daily service to Atlanta from Newark International Airport beginning Sept. 5.

"Our research indicated a growing business link between corporations in the New York metropolitan area and the Atlanta market," said Continental City vice president Richard Lisser, who oversees Newark operations for the carrier. "As part of our continuing goal to meet the needs of the business traveler in this region, we determined an Atlanta link was a key element in this program."

Continental will operate four daily round-trip flights which will depart Newark each day at 7:50 a.m., 11:25 a.m., 3 p.m. and 5:10 p.m. Northbound flights will depart Atlanta at 7:05 a.m., noon, 2:15 p.m. and 5:55 p.m. The airline has chosen Boeing 737 and 727 aircraft to service the route.

With the announcement of service to Atlanta, Continental and Continental Express now service 65 destinations from Newark.

The new service announcement comes on the heels of the airline's recent filing of several additional route applications with the U.S. Department of Transportation for expand international service from Newark. Continental, over the past few weeks, has sought permission to fly non-stop from Newark to Moscow, Berlin, Rome, Milan and Madrid.

Continental Airlines is Newark International Airport's largest carrier, moving more than 10 million passengers through its Terminal C on 303 daily jet and commuter flights. The company employs more than 6,000 workers in New Jersey and 37,000 systemswide.

CHICAGO (AUG. 7) PR NEWSWIRE - The Quaker Oats Co. (NYSE: OAT) today reported that earnings per share for its fiscal year ended June 30, 1990 were $2.15 compared to $2.56 last year. Net income for fiscal 1990 was $169 million compared to $203 million last year. Earnings per share from continuing operations (excluding Fisher-Price) were $2.93 versus $1.88 a year ago. Fisher-Price was classified as a discontinued operation following the company's April 24, 1990 announcement that it plans a tax-free distribution of Fisher-Price to Quaker shareholders.

William D. Smithburg, chairman and chief executive officer, said, "Fiscal 1990 results were below expectations after several years of outstanding performance. Excluding restructuring charges and credits taken in both fiscal 1990 and 1989, earnings per share for our ongoing businesses would have been $2.75 compared to $2.88 a year ago. The company's operational

streamlining over the last year, combined with our renewed focus as a pure food company, will help us regain the earnings momentum established during the 1980s."

Sales from continuing operations were $5.03 billion, or 3 percent higher than last year's $4.88 billion. Operating income from continuing operations was $544.2 million compared to $349.6 million last year. Excluding restructuring charges and credits in both years, operating income from continuing operations would have been $526.7 million in fiscal 1990, or 11 percent higher than the $473.9 million of a year ago.

Smithburg added, "In our U.S. grocery products business, intense competition in cereals and pet foods, along with unfavorably cool weather conditions for Gatorade early in the fiscal year, and the sudden decline in demand for oat bran products, all combined to produce results below expectations even though operating income was up for the year.

"International grocery products achieved record sales and operating income even before a credit of $17.5 million (18 cents per share) for the reversal of most of a $20.7 million (20 cents per share) restructuring charge taken in fiscal 1989 for a then-planned pet food manufacturing consolidation. International's substantial operating income improvement, excluding restructuring charges and credits in both years, was offset by higher financing costs, especially in Brazil.

"We expect fiscal 1991 to be a good year," said Smithburg. "However, earnings from continuing operations for the first fiscal quarter, which ends Sept. 30, 1990, are expected to be lower than the 49 cents per share earned in the first quarter of fiscal 1990. This is primarily due to planned increases in marketing support of key products, especially the expansion of Gatorade in Europe."

Fourth-Quarter Results For the fourth quarter of fiscal 1990, earnings per share from continuing operations were $1.31 compared to 52 cents a year ago. Excluding the effect of significant restructuring charges and credits for both years, earnings per share would have been $1.13, or 14 percent below the $1.32 last year. Sales of $1.41 billion were 4 percent above a year ago, due to gains in international grocery products. Operating income from continuing operations in fiscal 1990 was $200.5 million compared to $92.1 million last year. Excluding restructuring charges and credits in both years, operating income would have been $183 million in fiscal 1990, or 6 percent below the $195.7 million of a year ago, as lower results from U.S. and Canadian grocery products more than offset improved performance from international grocery products.

Quaker is an international marketer of foods and pet foods.

LOS ANGELES (AUG. 7) PR NEWSWIRE - California Federal Bank, FSB, announced today that it will acquire approximately $265 million in deposits from Empire Federal Savings Bank of America, Buffalo, N.Y., effective Sept. 7, 1990. The transaction, which is subject to regulatory approval, involves Empire's 13 California branches.

Three Empire offices, located in Santa Monica, Monterey Park and Woodland Hills, will be purchased and operated by California Federal. Deposits at the other 10 Empire offices will be consolidated into nearby California Federal offices. Terms of the transaction were not disclosed.

"This transaction presents Cal Fed with an excellent low cost opportunity to expand its customer base in the bank's largest market, Southern California," said William L. Callender, California Federal president and chief executive officer.

The branch offices to be acquired by California Federal are located at 1811 Wilshire Blvd., Santa Monica, 126 S. Atlantic Blvd., Monterey Park, and 21945 Erwin St., Woodland Hills.

The other 10 Southern California Empire branches whose deposits are included in the transaction are located in Westlake Village, Encino, Hacienda Heights, Bellflower, Seal Beach, Fountain Valley, Costa Mesa, Irvine, Upland and Laguna Hills.

Upon completion of the purchase, California Federal will have 141 branches in California with 107 in Southern California.

Empire customers will have access to California Federal's full line of consumer banking services, including checking accounts, certificates of deposits, individual retirement accounts, annuities and California Federal's newest service, its Automatic Saving and Planning (ASAP) Account.

California Federal Bank, with more than $23 billion in assets, is the nation's fourth largest savings institution and the principal subsidiary of Los Angeles-based CalFed Inc. (NYSE: CAL). California Federal Bank has 200 offices in California, Florida, Nevada, Georgia and Arizona and provides customers 24-hour access to their funds through over 40,000 ATMs nationwide as a member of the CIRRUS, Star and Plus ATM networks.

#90219p3003 08/07/1990 ~PR Newswire

WASHINGTON (AUG. 7) PR NEWSWIRE - Noting that crude oil prices have increased more than 50 percent since early July while average retail gasoline prices have risen less than 20 percent, the president of Texaco Refining and Marketing Inc. told a congressional committee today that refiners are not yet recovering in the marketplace a significant portion of the crude oil cost increases they have incurred since tensions between Iraq and Kuwait began.

"Prior unrecovered cost increases have been in the system since early July when crude prices, then at $17 per barrel, started to increase in anticipation of the OPEC price meeting," said Glenn F. Tilton of Texaco, testifying before the House Subcommittee on Energy and Power. "The average retail price of regular unleaded gasoline across the United States in early July was about $1.05 per gallon. Since Iraq's invasion of Kuwait on Aug. 1, the price per barrel of crude had risen to $28.05 by Monday, Aug. 6, an increase of about $11 per barrel over the early July price. Meanwhile, Texaco's delivered price for gasoline to resellers has increased on an average of only about 8 cents per gallon during the same period."

Recognizing widespread public confusion about the reasons for mounting gasoline prices at the pump, Tilton stated, "crude oil and petroleum products are commodities whose wholesale prices are determined by commodity markets.

"The rising price of oil and product has an instantaneous effect on the market because the purchase price is, in a substantial number of cases, set on the day of delivery," added Tilton.

"So the load of oil or product shipped from the Persian Gulf several weeks ago and arriving at a U.S. port today is most often paid for at today's market price, not the price in force 45 days ago or more. Also, much of the inventory reported to have been available was on ships at sea and, as yet, unpriced."

Focusing on the reasons behind recent increases in prices of oil and refined products, Tilton noted that supply and demand in the commodity markets is heavily influenced by anticipation.

"Iraqi pressures on OPEC pricing meetings, followed by the invasion of Kuwait by Iraq and the embargo of Iraqi and Kuwaiti crude oil threaten to reduce oil supplies," he said. "These events have led to increased crude oil and product prices on world commodity markets. These increases, of course, are passed along through the various channels of distribution to the retail level in the competitive marketplace."

Since more than 50 percent of U.S. crude oil needs, as well as a significant portion of its refined product supplies, must currently be imported, any refiner or marketer committed to keeping its customers fully supplied with product must be willing to pay prevailing world prices for raw materials and refined products, according to Tilton.

The Texaco executive noted that his company produces about 830,000 barrels a day of crude oil and liquids, while it refines 1.44 million barrels a day and sells 2.12 million barrels of product a day. "In other words, 60

percent of what Texaco sells is purchased on the open market at prevailing prices," he added.

More than 90 percent of Texaco's roughly 16,000 branded retail outlets are owned by independent businessmen, according to Tilton. "Independent businessmen who operate at the retail level set their own prices and may increase the price of product sold now in order to generate sufficient resources to cover the higher cost of replacement product."

Tilton, pointing to the same competitive market forces that were at work during last winter's dramatic increase in the cost of home-heating oil, noted that industry critics contended at the time that oil companies were "price-gouging and taking advantage of the situation," despite the fact that market forces were "indeed at work, causing prices to rise." A recently released report by the U.S. Energy Information Agency, which was congressionally requested, confirmed the competitive market force explanation and analysis provided by the industry: that the market, in December 1989, was driven by natural forces in response to extraordinarily cold weather, and not by any sort of collusion or gouging.

Tilton said that Texaco, in line with its "Guiding Principles," strives for the delivery to consumers of products of "proven high quality at fair prices" and to serve customers in such a manner as to earn their continuing respect, confidence and loyalty -- both before and after the sale."

Following these long-established, fundamental principles, Tilton said, Texaco will use its best efforts to keep its customers supplied with petroleum products in those difficult circumstances. He vowed that Texaco would price its products fairly, noting that "prices must include the increased cost of crude oil and product purchased from third parties to provide the funds necessary to obtain replacement supplies of crude oil and product to run our business on an ongoing basis."

As a fully integrated international oil and gas company, "Texaco's exploration, producing, refinery, marketing and transportation efforts are dedicated to finding, producing, acquiring and supplying crude oil and refined products throughout the world to supply our customers," Tilton stressed. He added, "Experience has shown that competitive market forces provide the best and most effective system of supplying energy markets." He warned that government intervention in the form of price controls and allocation systems, such as those which existed during the 1970s, created costly supply disruptions and shortages.

"With government and industry working together in a free-market setting," Tilton concluded, "we will have the best prospects for meeting our country's energy needs during this period of supply disruption."

HERSHEY, Pa. (AUG. 7) PR NEWSWIRE - The board of directors of Hershey Foods Corp. (NYSE: HSY) today declared a regular quarterly dividend of $.225 on the common stock, an increase of 15.4 percent, or $.03 per share.

In addition, the board declared a regular quarterly dividend of $.2025 on the Class B common stock, an increase of 15.7 percent or $.0275 per share. The dividends are payable Sept. 14, 1990, to stockholders of record Aug. 24. It is the 243rd consecutive regular dividend and 16th consecutive annual increase on the corporation's common stock and the 24th consecutive regular dividend and sixth consecutive annual increase on the Class B common stock.

In addition, the board today declared a one-time special dividend of $.15 per share on the common stock and $.135 on the Class B common stock. The special dividends are a result of the one-time gain realized on the corporation's previously announced sale of its investment in AB Marabou. The special dividends are also payable on Sept. 14, 1990, to stockholders of record Aug. 24.

LOS ANGELES (AUG. 7) PR NEWSWIRE - Angeles Corp. (AMEX: ANG) announced that Brian E. Petersen has joined the company as executive vice president of property management. He is responsible for management and leasing of the $1.7 billion real estate portfolio controlled by Angeles which includes approximately 10.8 million square feet of commercial and industrial space and more than 16,000 residential units.

Petersen has 12 years of property management experience. He was previously vice president and director of properties for RREEF Funds, an institutional real estate investment management firm. In that position, he was responsible for the management and leasing of approximately 10

million square feet of commercial space in the Southwest United States. Earlier he was a vice president of property management for Coldwell Banker in Los Angeles. He received a bachelor of science degree from California State University, Los Angeles.

Petersen will also serve as a member of the Senior Review Committee -- the company's major real estate policy setting group. Angeles Corp. President Joseph Cattivera stated, "We are especially pleased to add someone of Petersen's quality to the organization. It is another example of our continuing commitment to real estate and to our institutional clients."

Angeles also develops and manages senior housing facilities, factory merchant malls and manufactured home communities. Angeles owns or manages properties in 30 states throughout the country and in Canada.

Angeles Corp. is a diversified investment management company which manages in excess of $4 billion of real estate, securities, mutual funds and leased equipment assets for institutions and corporation, and for more than 130,000 individual investors.

OAK BROOK, IL (AUG. 7) PR NEWSWIRE - Waste Management, Inc. (NYSE: WMX) today announced the appointment of Joan Z. Bernstein to the new position of vice president of environmental policy and ethical standards.

Bernstein, vice president and general counsel of Chemical Waste Management Inc. since 1985, will assume her new position Sept. 1. She will remain a vice president of Chemical Waste Management.

"The appointment of Ms. Bernstein to this new position reflects our determination and commitment to making certain that Waste Management not only conforms to the highest standards of environmental compliance and ethical conduct, but that we are a leader in these critical areas," said Dean L. Buntrock, chairman and chief executive officer of Waste Management Inc. "I am extremely pleased to have a person of her caliber, credentials and integrity assume this very important role."

As the company's chief environmental officer, Bernstein will direct development of the company's strategy as it relates to environmental issues and counsel the company's operating groups on environmental and ethics programs. She will interpret external environmental policies and developments as they influence Waste Management business. It will also be her role to direct the expanding environmental audit program.

In addition, she will communicate the company's ethics standards, direct ethics training programs throughout the organization and work to improve and oversee internal support systems designed to ensure ethical and environmental compliance.

Prior to joining Chemical Waste Management as general counsel in 1985, Bernstein was a partner in the Washington, D.C. law firm of Wald, Harkrader & Ross. Between 1977 and 1981, she served as general counsel of the United States Environmental Protection Agency, the Department of Health and Human Services and vice chair, Administrative Conference of the United States.

Bernstein graduated from the University of Wisconsin with a bachelor of arts degree in economics and earned a law degree from Yale University. She is a member of the boards of directors of the Environmental Law Institute and the Environmental and Energy Study Institute and is on the board of visitors of the School of Public and Environmental Affairs of Indiana University.

MIAMI (AUG. 7) PR NEWSWIRE - Selected by and reporting directly to Eastern Airlines' CEO Martin R. Shugrue Jr., Jack E. Robinson III has been named vice president of corporate develoment for the airline.

Robinson's new responsiblity comes in addition to his recent appointemnt as president and CEO of Eastern's commuter airline division, Eastern Express, which services Florida's business travelers with more than 80 intrastate flights daily.

Overseeing corporate strategic development for Eastern's future is Robinson's primary responsibility. "We will use every resource available to exploit growth opportunities for this airline," Robinson said.

With credentials that include an undergraduate degree in applied mathematics and economics from Brown University and both and M.B.A. and Juris Doctor from Harvard, the 30-year-old Robinson is no stranger to the airline industry. He was part of team overseeing marketing and planning at Texas Air Corporation before an assignment assistant to the president of MasterCard International. Robinson spent a brief period of time consulting to the airline industry before arriving at Eastern in May of 1990.

Robinson operates out of Eastern Airlines' headquarters in Miami and commutes back to his home in Manhattan when time allows.

NEW YORK, (AUG. 7) PR NEWSWIRE - The Centaur Partners Group announced today that a preliminary count by the independent inspector of elections of proxies cast by stockholders of National Intergroup, Inc. (NYSE: NII), had given Centaur Partners a landslide victory in its proxy contest to elect three members of National Intergroup's board. Three corporate governance initiatives proposed by Centaur also won by decisive margins, Centaur said.

Melvyn J. Estrin and Abbey J. Butler, principals of Centaur, said: "We are gratified at the overwhelming support our fellow stockholders gave us in our fight to maximize stockholder value. We believe this landslide victory is a clear mandate from stockholders in favor of our plan to sell all the assets of National Intergroup in a timely manner and distribute the proceeds to stockholders."

Centaur's slate of nominees consisted of Estrin, Robert J. Slater, the former vice chairman of Crane Co., and William G. Tull, the former president of American Security Bank. Centaur said each member of the slate received the votes of more than 11 million shares of National Intergroup common stock, representing approximately two-thirds of the shares voted at National Intergroup's annual meeting last July 25.

Centaur's corporate governance resolutions provide for confidential voting by stockholders, prevent the National Intergroup board from lowering the trigger of the company's "poison pill" below 20 percent, and require approval of a majority of stockholders of any "golden parachute" plans for management. The proposals received between 65 percent and 70 percent of the votes cast, not counting abstentions, Centaur reported.

In light of the overwhelming rejection by stockholders of the company's January amendment lowering the "poison pill" trigger from 20 percent to 10 percent, Centaur called on the National Intergroup board to rescind its amendment and to withdraw its appeal of a Delaware Chancery Court decision which struck down the amendment.

The resolution proposed by the National Intergroup board to change the name of the company to FoxMeyer Corp. failed to obtain the necessary two-thirds vote, Centaur said.

MINNEAPOLIS (AUG. 7) PR NEWSWIRE - Life USA Holding, Inc. today reported increased income for the second quarter of 1990 and record growth for the six-month period ended June 30, 1990.

Due to an increase in life insurance and annuity business written by the company's wholly owned subsidiary, LifeUSA Insurance Company, consolidated net income for the second quarter was $3,843,771, compared with $828,013 for the same period one year ago.

Total consolidated revenues of the company increased by 97 percent to $24,764,777 for the second quarter of 1990, compared with total consolidated revenues of $12,557,391 for the second quarter of 1989. Total six-month consolidated revenues were $38,833,283, compared with $48,319,372 of revenues for all of 1989.

Due to the retention through a retrocession agreement with its reinsurer, of 25 percent of the business written by its subsidiary, the company's assets and capital surplus have shown significant growth. The company's total consolidated assets were $122,337,395 at the end of the second quarter of 1990, compared with total consolidated assets of $23,072,089 at the end of 1989. During the last four consecutive quarters, capital surplus has increased from $(227,234) to $15,193,374.

Robert W. MacDonald, chairman of Life USA, said: "During the first six months of 1990, in most major categories, Life USA has either equalled or exceeded the results achieved during all of 1989. These remarkable results are due to a number of factors: broadened acceptance of the ownership concept resulting in increased recruiting activity, increased marketing efforts, and ongoing control of total expenses. We believe that production will continue to accelerate as the marketplace becomes familiar with our revolutionary new life insurance policy, Universal Annuity Life(SM)."

LifeUSA Insurance Company reported total second quarter collected life and annuity premiums of $195,918,401, representing a 164 percent increase in premiums over the same quarter in 1989. Total life and annuity premiums for the first six months of 1990 were $276,609,002, compared with $283,181,634 for all of 1989.

The number of agents representing LifeUSA is currently more than 14,000 agents nationwide.

Life USA's stock is not publicly traded. The company currently has more than $1.3 billion of life insurance in force.

#90219p3017 08/07/1990 ~PR Newswire

HOUSTON (AUG. 7) PR NEWSWIRE - Wainoco Oil Corp. (NYSE: WOL) today reported revenues for the three months ended June 30, 1990 of $9.2 million six percent below those of $9.8 million in the prior year's second quarter. A net loss of $843,000, or 4 cents per share, resulted from reduced revenues, increased expenses and lower income tax benefits. Reserves and production capacities are increasing as a result of successful exploration and acquisition programs.

Revenues from natural gas declined along with production as sales from certain wells were withheld when gas prices fell below established company minimums. Oil revenues decreased because of depressed prices even though production volumes were higher than in the second three months of 1989.

Natural gas production of 4.5 billion cubic feet, or 49 million cubic feet per day, was eight percent under that in last year's period while the average price of $1.35/mcf received for it rose three percent through selective marketing. Oil production of 166,000 barrels, or 1,824 barrels per day, increased four percent but its average price dropped 12 percent or $1.95 to $14.92/bbl.

For the six months ended June 30, 1990, revenues of $20.5 million were six percent above those of the prior year's first half. A loss of $7.2 million, or 36 cents per share, as against net income of $2.4 million, or 12 cents per share in the 1989 period was primarily due to the first quarter's $7.2 million noncash write-down of U.S. properties, amplified by the second quarter results.

Natural gas production of 9.9 billion cubic feet for the first half year was slightly below that of the 1989 period, but the average price of $1.35/mcf received for it was four percent higher. Oil production of 335,000 barrels rose seven percent and its average price of $16.69/bbl was up six percent.

"Recent exploratory success and the acquisition of producing properties have had a beneficial effect on reserves and producing rates," said Wainoco's president, James R. Gibbs. Stating that the effect will begin to be felt in the next quarter, he also said that the company's operations would remain at high levels throughout the year's remainder.

Wainoco Oil Corp. is an oil and gas exploration and production company with operations throughout North America. Wainoco's common shares are listed on the New York and Alberta Stock Exchanges.

#90219p3018 08/07/1990 ~PR Newswire

LONG BEACH, CA (AUG. 7) PR NEWSWIRE - A McDonnell Douglas (NYSE: MD) MD-11 has completed the longest flight ever made by a commercial tri-jet, covering 9,080 miles (14,615 km) in 16 hours and 35 minutes.

The flight was part of a three-day mission to test the big aircraft's cruise endurance, navigation equipment near and over the North Pole and to evaluate pilot workload during takeoffs, landings and cruise. MD-11 ship 4 was used for the test, which was conducted as part of the MD-11's Federal Aviation Administration (FAA) certification flight test program.

Forty people, including operations planners, maintenance personnel, Douglas Aircraft Co. and FAA flight crews and test engineers, and representatives of Honeywell, manufacturer of the navigation computers and displays, were on board for the historic flight.

The mission included four flight legs beginning and ending at the McDonnell Douglas flight test facility at Yuma, Ariz. Takeoff from Yuma was at 11:20 a.m. (MST) on July 30. The MD-11 landed at Denver one hour and 40 minutes later, taxied to the end of the runway and then took off for Seattle, Wash., where it landed following a two hour and 30 minute flight.

From Seattle the MD-11 then headed for Anchorage, Alaska, arriving there two hours and 55 minutes after takeoff. The aircraft and crew remained there for the night and then began the historic polar flight the next morning at 11:20 MST. It ended at 3:55 a.m. MST the following day.

"The flight plan called for us to make four passes directly over the geographic North Pole and one off to one side," according to Joe Ornelas, business unit manager for ship 4. "We wanted to see if the displays would reverse from north to south as the aircraft passed over the pole.

"This is a particularly difficult test because three computers from the inertial reference system and two from the flight management system are independently computing the aircraft's position and must signal displays on both sides of the instrument panel to reverse at exactly the same time " Ornelas said.

"On two of the passes we intentionally failed the flight management computers, and reverted to back-up navigation. The equipment did just what it was supposed to do on all five passes. This is the first time this test has been successfully completed on the first try. We're very

pleased," Ornelas said.

"Another objective of the segment was to use the flight management system (FMS) to calculate optimum altitudes for fuel conservation and long range " according to Ornelas. "We flew as high as 43,000 feet (13,106 m) and still landed with well over an hour's worth of fuel, more than enough to reach our alternate airport if we had to," Ornelas said.

MD-11s are equipped with advanced digital flight deck systems and are capable of carrying up to 410 passengers over inter- continental ranges nonstop. As of Aug. 1, McDonnell Douglas had received orders and other commitments for 378 MD-11s.

PHILADELPHIA (AUG. 7) PR NEWSWIRE - The O'Brien Fuel Inc. division of O'Brien Energy Systems (AMEX: OBS), a leading energy project developer, today announced a joint venture agreement with COSAP, Inc., a Dallas engineering firm, to develop traditional and alternative fuel reserves for O'Brien's existing and new cogeneration projects. COSAP is a leading natural gas and coalbed methane evaluation, exploration and production company.

The joint venture will first develop the recently announced 15,000- acre coalbed methane reserves in southwestern Pennsylvania. The joint venture program at this site calls for a $1.1 million initial expenditure for evaluation and test bores, followed by a drilling program of approximately $6.7 million.

This acreage, according to geological estimates, contains up to 40 billion cubic feet of pipeline quality gas, according to Bruce Levy, O'Brien vice president.

"We expect that the Middle East situation and its escalating effect on fuel prices will increase demand for the fuels to be developed in our new joint venture and for our company's coal gas operations," Levy said.

"In addition to our coalbed methane activities, we are firmly positioned in other important niche markets. They include approximately $100 million landfill gas reserves, the American Hydrotherm division's patented process to develop energy requiring no fossil fuels, and the British subsidiary, Enercol Energy, which specializes in compressed natural gas for vehicle fuel," he added.

DENVER (AUG. 7) PR NEWSWIRE - Western Gas Resources Inc. (NYSE: WGR) (the "company") announced today that the first six months of 1990 were very successful as revenues reached an all-time high for the six months ended June 30 of $106,604,000 (compared to $86,707,000 for the like period in 1989).

Revenues were $43,080,000 for the second quarter ended June 30, 1990 (compared to $43,806,000 for the like period in 1989). Net income was $933,000, or 9 cents per common share, for the second quarter ended June 30, 1990 (compared to $601,000, or 8 cents per common share, for the like period in 1989, net of an unusual item) and $3,119,000, or 29 cents per common share, for the six months ended June 30, 1990 (compared to $1,204,000, or 16 cents per common share, for the like period in 1989, net of unusual items). The weighted average number of common shares outstanding increased from 7,380,617 for the 1989 periods to 10,908,117 for the 1990 periods. Working capital provided by operations was $4,667,000 for the second quarter ended June 30, 1990 (compared to $5,122,000 for the like period in 1989, net of an unusual item) and $12,752,000 for the six months ended June 30, 1990 (compared to $9,907,000 for the like period in 1989, net of unusual items). The unusual items excluded for the quarter and six months ended June 30, 1989 from net income were $1,285,000 and $2,273,000 respectively, and from working capital provided by operations were $4,000,000 and a net $6,900,000, respectively, related to certan commitment fees and interest received and

a related settlement paid by Western.

On July 26, 1990, the company purchased substantially all of the assets of Parker Gas Cos. Inc. ("Parker"), except for Parker's subsidiary Parker Gas Treating Co., for approximately $21 million. The assets acquired consist of gas gathering assets located in Louisiana, Arkansas and Texas. The most significant asset acquired was Parker's approximate 75 percent interest in a gas gathering system located near Giddings, Texas (the "Giddings System"), processing gas from the Austin Chalk formation. The Giddings System includes approximately 475 miles of gathering lines connected to approximately 400 wells with current throughput of approximately 35 MMcf per day and a capacity of 65 MMcf per day. The effective date of the acquisition was July 1, 1990 and the company assumed operation of the acquired assets at closing.

Additionally, on May 24, 1990, the company entered into a definitive agreement to purchase substantially all of the assets of Parker Gas Treating for approximately $4 million. The assets being acquired consist primarily of gas treating plants located in Texas, Louisiana, New Mexico and Mississippi, the releated gas treating contracts and equipment rental contracts. The expected closing for the acquisition is late August 1990 with an effective date of Aug. 1, 1990.

The company continues to actively seek opportunities for expansion of its operations and believes that it has well positioned itself to take advantage of improvements in both gas and liquid prices.

TROY, MI (AUG. 7) PR NEWSWIRE - MLX Corp. (NASDAQ: MLXX) today announced operating results for the second quarter and the six months ended June 30, 1990.

MLX reported net earnings of $519,000 or 2 cents per share for the second quarter of 1990 compared to net earnings of $2.6 million or 15 cents per share for the second quarter of 1989. Net sales for the second quarter of 1990 were $132.1 million compared to $134.9 million for the second quarter of 1989.

For the first six months of 1990, MLX reported net sales of $216.5 million and a net loss of $4.7 million, or $.24 per share, compared to net sales of $221.1 million and a net loss of $385,000 or $.02 per share in the first half of 1989.

With the adverse impact of restructuring now behind the company, Panny

indicated he expected earnings for the second half of the year to improve significantly.

MLX Corp. is the largest independent nationwide distributor of commercial refrigeration and air conditioning equipment, parts and supplies and is a leading global manufacturer of high-energy friction products and components used in aircraft brakes and in clutches, brakes and transmissions for heavy duty trucks and off-highway equipment.

#90219p3048 08/07/1990 ~PR Newswire

RAPID CITY, SD (AUG. 7) PR NEWSWIRE - Harley-Davidson Inc. (NYSE: HDI) announced today that its board of directors had adopted a revised stock purchase rights plan in which preferred share purchase rights will be distributed as a dividend at the rate of one right for each outstanding common share. In addition, the board authorized the redemption of the existing rights which were created in May 1988.

"While the board is not aware of any effort to acquire control of the company, we believe the revised stock purchase rights plan represents a sound and reasonable means of safeguarding the interests of stockholders," said Richard F. Teerlink, president and chief executive officer, in explaining the rights issuance. "The plan addresses the responsibility of the board to provide protection against abusive and coercive takeover tactics, such as creeping accumulations, market sweeps and squeeze-outs. Also, the plan seeks to ensure that shareholders realize the long-term values of their investments. The plan does not prevent a takeover, but

should encourage anyone seeking to acquire the company to treat all shareholders equally and to negotiate with the board prior to a takeover attempt."

When exercisable, each new right will entitle stockholders to buy one-hundredth of a newly issued share of the company's preferred stock at an exercise price of $100. Each one one-hundredth of a share of the preferred stock has terms designed to make it substantially the economic equivalent of one share of common stock. The rights will be exercisable only if a person acquires 15 percent or more of the common stock or announces a tender offer, the consummation of which would result in ownership by a person or group of 25 percent or more of the common stock.

If the company is acquired in a merger or other business combination transaction, each right then exercisable will entitle its holder to purchase that number of shares of the acquiring company's common stock that has a market value equal to twice the right's exercise price.

In addition, if a person or group acquires 15 percent or more of the company's common stock, each holder of a right, other than the 15 percent stockholder, will also have the right to receive, upon payment of the exercise price, that number of shares of the company's preferred stock having a market value equal to two times the exercise price. The former rights plan provided that a person or group must acquire 25 percent of the common stock before triggering this discount purchase feature. If insufficient shares of the company's preferred stock are available for the exercise of the rights to purchase the company's preferred stock, holders of rights will receive upon exercise shares of the company's preferred stock to the extent available and then cash, property or other securities, including common stock, of the company in proportion determined by the company, so that the aggregate value received is equal to twice the exercise price.

The board may redeem the rights for $0.01 per right at any time until the 10th day after a person or group acquires 15 percent or more of the outstanding common stock of the company (subject to adjustment by the board).

Until such date that the rights become unredeemable, the company may, except with respect to the redemption price or date of expiration of the rights, amend the rights in any manner. The new rights plan permits the company to amend the exercise price in cash of better than anticipated stock performance.

Shareholders of record as of the close of business on Aug. 20, 1990, will receive the redemption payment for each existing right which is attached to each outstanding common share of the company, payable on Sept. 3, 1990. This distribution will be included in the taxable income reported to

shareholders on Form 1099 for calendar year 1990 as dividend income.

The new rights will be available to stockholders of record as of Aug. 20, 1990 and are not taxable to the company or its shareholders. The new rights will expire on Aug. 20, 2000.

Harley-Davidson Inc., the only American motorcycle manufacturer, produces heavyweight motorcycles and a complete line of motorcycle parts and accessories. Its Holiday Rambler subsidiary is a leading manufacturer of premium recreational vehicles, specialized commercial vehicles and a diverse range of related products. Harley-Davidson Inc. is also a manufacturing contractor for a variety of industries, including the U.S. Department of Defense.

SPRINGFIELD, VA. (AUG. 7) PR NEWSWIRE - Erol's Inc., the nations largest independently-owned video rental chain, today announced plans for a nationwide franchise operation.

Details of the initiative were announced by Erol's Vice President of Sales and New Business Development Troy Cooper.

Erol's, which currently operates more than 200 video rental stores in six states with a major concentration in selected East Coast and Midwest cities, plans to expand its business by franchising new stores in some markets where the company currently has a presence and opening new markets with franchise outlets. Franchise offerings will initially be made in Philadelphia, Cleveland, Richmond and Norfolk, Va. and Chicago. Plans also call for Erol's franchise offerings in Atlanta, Rochester and Buffalo N.Y. and Pittsburgh. Additional cities will be announced by the end of the year. Franchises will not be available in the Baltimore/Washington region, where Erol's already has a dominant market position.

Cooper said: "We are using franchising as a means to expand nationally. Erol's is the top video chain in the Washington market and has strong penetration in the majority of the cities where we operate. We see franchising as a means to become even stronger. We plan to grow market share in new cities by offering the Erol's identity and the benefits of being affiliated with a winner to franchisees capable of financing and managing a multi-store operation."

Erol's looks to individuals, investor partnerships and corporations as potential individual and multi-unit operators. Potential franchisees can expect an initial investment ranging from $400,000 to $600,000 which

includes a $30,000 initial franchise fee, plus inventory, leasehold improvement, equipment, advertising and related expenses. The franchise agreement includes a 5 percent Monthly Royalty Fee and a 3 percent Advertising and Marketing Fee, both based on gross revenues.

Cooper sees the move to franchising as a strategically aggressive one for the company. "In the past two years we have maintained a leadership position as the marketplace changed from one of primarily small video stores to one dominated by large video chains. Franchising will allow us to expand rapidly, stay on top, and offer franchisees a business opportunity unlike that of other video chains," he said.

WALL, NJ (AUG. 7) PR NEWSWIRE - New Jersey Natural Gas Company (NJNG) today filed a petition with the New Jersey Board of Public Utilities (BPU) for a $14.8 million increase in base rates to reflect higher operating, financing, and capital construction costs.

The proposed increase would raise the annual bill of a typical residential heat customer who uses 1,263 therms of gas per year, the average annual use, by about $41, or 4.5 percent.

At the same time, the utility said it would issue a one-time credit to customers totaling about $14.5 million, or $40 per residential heat household, sometime during the last calendar quarter of 1990 because of an expected refund from its primary natural gas supplier, the Texas Eastern Transmission Corporation.

"We've planned adequately for growth, but there is no escaping the fact that new customers require new facilities and services," said Philip H. Reardon, NJNG president and chief executive officer.

"As a result, we must continually upgrade our distribution system, extend mains and service lines, maintain equipment and facilities, and add appropriate personnel to continue our excellent record of service.

"We've grown exceptionally fast, and regulatory lag - the delay between the time we incur new operating and capital costs and the time we can include them in our rates - is a real problem for us," Reardon said.

He pointed out that NJNG is spending about $50 million and increasing its net utility plant in service by about ten percent every year. In addition, greater manpower requirements to serve the needs of NJNG's strong customer

growth and higher costs related to employee benefits, particularly health care, all contribute to the need for further rate relief, he said.

"Existing base rates do not cover our costs sufficiently to allow the company to earn a reasonable return on its plant investment," Reardon said. "Therefore, timely and adequate base rate increases are needed to reflect the incremental operating and capital costs not covered in current rates in order to maintain a sound capital structure."

NJNG said its base rate filing represents an increase of about 4.4 percent in firm revenues. About 43 percent of the increase, or $6.3 million, is for federal income and state gross receipts and franchise taxes.

The filing, which is based on a six-month actual and six-month projected test year ending Dec. 31, 1990, reflects the addition of about 7,000 customers, 22 employees and $50 million in construction of new and renewal utility plant since the conclusion of NJNG's last base rate case.

OKLAHOMA CITY (AUG. 7) PR NEWSWIRE - The Tierco Group Inc. (NASDAQ: TIER) incurred a net loss of $2,995,572 ($1.32 per share) on revenues of $7,563,057 for the six months ended June 30, 1990 compared to a loss of $6,067,374 ($2.85 per share) on revenues of $10,664,424 for the six months ended June 30, 1989.

For the second quarter the company incurred a net loss of $2,085,055 ($.92 per share) on revenues of $3,227,161 in 1990 compared to a loss of $3,543,294 ($1.67 per share) on revenues of $5,307,733 in 1989.

The improved results reflect lower interest and administrative expenses as a result of the debt restructuring in October, 1989, and increased operating income from the company's hotel and marina complex.

#90219p3058 08/07/1990 ~PR Newswire

FORKED RIVER, N.J. (AUG. 7) PR NEWSWIRE - An ongoing evaluation of yesterday's unusual event includes a report that off-site radiation monitoring equipment detected a small release of radioactivity from Oyster Creek Nuclear Generating Station.

The N.J. Department of Environmental Protection, bureau of Nuclear Engineering, notified the plant that the release was detected by its extremely sensitive off-site monitoring equipment.

For about 15 minutes, the state-run equipment reportedly showed radiation levels that rose from a normal background of about 0.005 millirems per hour to an average of 0.022 millirems per hour, with a brief peak at 0.128 millirems per hour, well within federal limits. The average Ocean county resident receives about 220 millirems of exposure per year from naturally occurring sources of radiation.

A valve malfunction yesterday allowed about 300 gallons of water to flow through a sprinkler system in the drywell, which encloses the reactor and associated equipment including sections of steam piping. As a result, an unusual event -- the lowest level of emergency -- was in effect from 3:15 p.m. to 5:50 p.m.

Some of the water turned to steam, causing a slight pressure increase -- less than a half-pound per square inch -- inside the drywell. Pressure was relieved by venting the drywell to the plant vent stack. Other plant safety systems were tested overnight and found to be fully functional.

Oyster Creek is operated by GPU Nuclear Corp. and is owned by Jersey Central Power & Light Co.

ST. PAUL, MN (AUG. 7) PR NEWSWIRE - The directors of The St. Paul Companies (NASDAQ-NMS: STPL) today elected Ian A. Martin and Lawrence E. Honig as members of the corporation's board of directors.

They fill vacancies created by recent director retirements and bring the current number of directors to 15.

Martin is a director of Grand Metropolitan PLC, one of Great Britain's largest international companies, and chairman of Grand Metropolitan's U.S. operations. He is also chairman, chief executive officer (CEO) and president of the Pillsbury Company, Minneapolis, and chairman of Burger King, Miami. Honig is vice chairman of The May Department Stores Company (NYSE: MA), a prominent U.S. retailer based in St. Louis, and a member of its board of directors.

Martin joined Grand Metropolitan in 1979 in the company's Watney Mann & Trumans Brewers becoming chairman and CEO in 1982. He was also chairman and CEO of Grand Met's brewing and retailing divisions before coming to the United States in 1987. Grand Met's leading international brands include Pillsbury, Smirnoff Vodka, J&B Scotch, Burger King and Pearle Vision stores.

Martin began his career with Timex Corporation and has worked for several international corporations in eight countries. A chartered accountant, he is a graduate of St. Andrews University, Scotland.

Honig joined May in 1982 and was named vice chairman in 1986. May's principal stores include Lord & Taylor, Foley's, May Company, Hecht's, Robinson's, Kaufmann's, Famous-Barr, Filene's, May Ohio, May D&F, G. Fox, L.S. Ayres and Meier & Frank.

Prior to joining May, Honig was a principal at McKinsey & Company, Inc. and an investment banker at Shearson Loeb Rhoads. He has a master of business administration degree from the Harvard Business School, a master of arts degree from the University of Texas and bachelor's degrees from Washington & Lee University.

Headquartered in St. Paul, The St. Paul Companies is a worldwide insurance organization whose members provide insurance underwriting, insurance brokerage and investment banking services. Founded in 1853, The St. Paul is Minnesota's oldest business corporation.

HOUSTON (AUG. 7) PR NEWSWIRE - Howell Corp. (NYSE: HWL) announced today that Charles B. (Chuck) Hauf has joined its exploration and production unit as vice president, exploration. The company expects to direct a significant portion of its annual budget in the coming years to exploration activities. Hauf will be responsible for directing and managing the exploration, as well as development activities of the company with special emphasis on the geology and geophysics of the company's oil and gas prospects.

Hauf has 25 years of diversified domestic and international experience. He has held similar responsibilities with other independents, most recently with Thermal Exploration Inc. Hauf has worked for many other successful oil and gas companies over the years, including Amerada Petroleum, Natomas International, Wainoco, American Exploration and Kerr-McGee.

Hauf is married and has two children. He holds B.S. (with honors) and M.S. degrees in geology from the University of Wyoming. Hauf is a member of AAPG and the Houston Geological Society.

Howell Corp. (NYSE: HWL) is an energy industry holding company. Through wholly-owned operating units, it is engaged in oil and gas exploration and production, crude oil marketing, technical fuels refining and marketing, custom chemical processing, product terminalling and common carrier bulk liquids transportation of hydrocarbons and chemicals.

#90219p3066 08/07/1990 ~PR Newswire

FORT WORTH, TEXAS (AUG. 7) PR NEWSWIRE - The board of directors of TNP Enterprises Inc. (TNPE) (NYSE: TNP), announced today quarterly dividends of 40-3/4 cents per share of common stock.

Quarterly dividends will be paid on Sept. 15, 1990, to shareholders of record on Aug. 24, 1990. This will be the 219th consecutive dividend

paid by TNPE or its predecessor companies.

TNP Enterprises is the Fort Worth-based holding company of Texas-New Mexico Power Co., an electric utility.

The company also announced 5.1 and 3.2 percent increases in operating revenues for the quarter and 12-month periods ended June 30, 1990.

The increase in operating revenues was the result of higher rates and increases in electricity sales of the utility.

Although consolidated revenues increased, consolidated net earnings decreased for both the quarter add 12 months ended June 30, 1990. These decreases were partly due to decreases in the contribution to earnings by nonutility operations. During the 12 month period in 1989, the final affairs of the sale of cogeneration facility helped produce earnings.

Consolidated net earnings during the quarter ended June 30, 1989, decreased from $3,480,322 in 1989 to $3,352,988 in 1990. During the 12-month period just ended, consolidated net earnings decreased from $22,404,568 in 1989 to $16,404,776.

Texas-New Mexico Power Co. currently has a request for a rate increase pending before the Public Utility Commission of Texas. This increase would include the first unit of a new lignite-fueled power plant into the utility's rate base.

A summary of consolidated earnings for the quarter and 12 months ended June 30, 1990, and for the same periods in 1989 is shown below.

#90219p3067 08/07/1990 ~PR Newswire

NEW YORK (AUG. 7) PR NEWSWIRE - Orion Capital Corporation (NYSE: OC) announced today that, for the quarter ended June 30, 1990, earnings from insurance operations (before realized investment gains (losses)) increased to a record level of $9,346,000, or $1.15 per share (after preferred dividends) based upon 6,481,000 weighted average primary common shares outstanding, from $8,894,000 for the second quarter of 1989, or $1.07 per share (after preferred dividends) based upon 6,503,000 weighted average primary common shares outstanding. For the six months ended June 30, 1990 and 1989, earnings from insurance operations were $17,456,000, or $2.11 per share, and $15,799,000, or $1.81 per share, based upon 6,495,000 and 6,493,000 weighted average primary common shares outstanding, respectively.

Realized investment gains for the second quarter of 1990 and 1989 amounted to $291,000 and $2,688,000 on a pre-tax basis, respectively. The non-deductibility for federal income tax purposes of certain investment losses caused the net realized gain during the 1990 quarter to result, on an after-tax basis, in a net realized loss of $197,000, or $.03 per share. This compares with after-tax realized investment gains of $1,888,000, or $.29 per share, in the second quarter of 1989. Year- to-date after-tax realized investment gains (losses) were $(1,163,000), or $(.18) per share, and $3,108,000 , or $.48 per share, in the first half of 1990 and 1989, respectively.

For the three months ended June 30, 1990, net earnings were $9,149,000, or $1.12 per share, compared with $10,782,000, or $1.36 per share, for the second quarter of 1989. Year-to-date net earnings amounted to $16,293,000 or $1.93 per share, and $18,907,000, or $2.29 per share, respectively.

On a fully diluted basis, earnings from insurance operations amounted to $.97 per share and $.91 per share, on 9,109,000 and 9,129,000 fully diluted shares, for the quarter ended June 30, 1990 and 1989, respectively. After-tax realized investment gains (losses) per fully-diluted share amounted to $(.02) and $.21 in the second quarter of each year, respectively. Fully-diluted net earnings amounted to $.95 per share and $1.12 per share for the three months ended June 30, 1990 and 1989, respectively.

Orion Capital is engaged in the specialty property and casualty insurance business through various wholly owned insurance subsidiaries.

HOUSTON (AUG. 7) PR NEWSWIRE - Energy Service Co. Inc. (ENSCO) (AMEX: ESV) and R.D. Smith and Co. Inc. (R.D. Smith) announced today an agreement to sell two third generation semi-submersible rigs from Penrod Drilling Corp.'s fleet of 79 rigs. The two rigs, the Penrod 73 and 78, will be sold by Penrod for $90 million. This transaction is in addition to the previously announced agreement for the sale by Penrod of the Penrod 76 and 77 for $95 million. The rigs are all currently located in the Gulf of Mexico.

The sale of the rigs is conditional upon approval by the U.S. maritime administration and completion of the acquisition of the remaining 31.3 percent of Penrod's senior debt and equity securities that are not already owned by ENSCO and its affiliated group of investors, and by affiliates

of R.D. Smith. The ENSCO Group and affiliates of R.D. Smith expect to complete the acquisition of the remaining Penrod interest on or before Oct. 31, 1990.

The buyer of the Penrod 73 and 78 will be A/S HAV (HAV), an affiliate of Helmer Staubo & Co. HAV is a publicly traded Norwegian corporation based in Oslo, Norway.

The ENSCO Group of investors, which currently owns 40.2 percent of Penrod's senior debt and equity, consists of ENSCO; Natural Gas Partners L.P.; Rainwater Inc.; PMJ Investment Corp.; Goldman, Sachs and Co.; and a subsidiary of Bankers Trust New York Corp. A group led by R.D. Smith, a New York based investment firm which specializes in securities of troubled companies, currently owns 28.5 percent of the senior debt and equity.

ENSCO, headquartered in Houston, is engaged in providing contract drilling and related energy services to the international petroleum industry. ENSCO's common stock and preferred stock trade on the American Stock Exchange (ESV).

DALLAS (AUG. 7) PR NEWSWIRE - Metro Airlines Inc. (NASDAQ: MAIRC) today announced that July 1990 traffic set an all-time monthly record for the company. Metro flew 59.9 million revenue passenger miles during the month a 37.2 percent increase from 43.6 million in July 1989. A revenue passenger mile is the equivalent of flying one paying passenger one mile.

Passenger boardings for the month totaled 311,342, up 38.9 percent from 224,134 in July 1989. Metro had 99.4 million available seat miles in July 1990, compared to 78.4 million in 1989, for a 26.8 percent increase. Load

factor, or percentage of seats filled by paying passengers, increased to 60.3 percent, up 4.6 percentage points from 55.7 percent in July 1989.

For the first seven months of 1990, Metro flew 362.7 million revenue passenger miles, a 42.0 percent increase from 255.4 million a year ago. The airline had 659.7 million available seat miles for the first seven months of 1990, compared to 495.6 million a year ago, an increase of 33.1 percent. Load factor for the first six months of 1990 increased 3.5 percentage points to 55.0 percent from 51.5 percent last year. Passenger boardings for the period were 1,923,437, a 42.6 percent increase from 1,349,144 a year ago.

Metro Airlines, Inc., one of the nation's largest regional airlines, operates over 100 aircraft serving 73 cities in the southwestern and eastern United States and the caribbean. Metro operates as American Eagle from its Dallas/Fort Worth hub, as Eastern Metro Express at the Atlanta and San Juan hubs, and as Trans World Express in the northeast.

	Month Ended July 31,		
	1990	1989	Percent Change
Passengers	311,342	224,134	38.9
Revenue passenger miles	59,871,519	43,647,078	37.2
Available seat miles	99,362,017	78,382,236	26.8

WASHINGTON (AUG. 7) PR NEWSWIRE - The Federal National Mortgage Association (Fannie Mae) (NYSE: FNM) issued the following debenture pricing:

Date of Offering: Aug. 8, 1990

Price:	Par	98.875%
Issue Date:	August 10, 1990	
Term:	4 years	30 years
Callable on or after:	8/10/92	8/10/95
Interest Rate:	8.55%	9.65%
Yield:	8.55%	9.767%
Amount (millions):	$500	$450
Maturity Date:	8/10/94	8/10/20
Date of First Interest Payment (then semi-annually):	2/10/91	2/10/91

The debentures of Aug. 10, 1994, and the debentures of Aug. 10, 2020, are redeemable on or after Aug. 10, 1992, and Aug. 10, 1995, respectively, in whole or in part at the option of the corporation at any time (and from time to time). The redemption price of the debentures of Aug. 10, 1994, will be 100 percent of the principal amount redeemed plus accrued interest thereon to the date of redemption. The redemption price of the debentures of Aug. 10, 2020, initially will be 106.820 percent of the principal amount redeemed plus accrued interest on the principal amount redeemed. The redemption price of the debentures of Aug. 10, 2020, will decrease annually on each Aug. 10, commencing Aug. 10, 1996, through Aug. 10, 2015, as will be set forth in the Supplement to the Guide to Debt Securities information statement relating to those debentures. The amount payable for any redemptions on or after Aug. 10, 2015, and at maturity will be equal to 100 percent of the then outstanding principal balance, plus accrued interest.

The net proceeds of this offering will be added to the working capital of the Federal National Mortgage Association and used for general corporate purposes.

Debentures will be issued in book-entry form only. The minimum purchase is $10,000 and multiples of $5,000 thereafter. The offering is being made through Fannie Mae's Senior Vice President - Finance and Treasurer Gary L. Perlin, and Vice President and Assistant Treasurer Linda K. Knight, 3900 Wisconsin Avenue, N.W., Washington, D.C. 20016, assisted by a nationwide selling group of recognized securities dealers.

The issues that are offered on Aug. 8, 1990, will be free to trade at 8:20 a.m. Eastern Daylight Time.

#90219p3083 08/07/1990 ~PR Newswire

ST. PAUL, MN (AUG. 7) PR NEWSWIRE - Northwest Airlines passenger traffic

grew 10.4 percent last month compared with July 1989, NWA Inc., Northwest's parent, said today.

Northwest flew 5.02 billion revenue passenger miles in July, up 10.4 percent from the 4.55 billion revenue passenger miles flown in July 1989. Capacity was up 6.7 percent to 6.9 billion available seat miles in July from 6.47 billion a year earlier. Load factor increased 2.4 points to 72.7 percent. The airline's cargo ton miles decreased 9.3 percent to 146.4 million from 161.4 million a year earlier.

"Our load factor increase was the result of strong performance on both domestic and international routes," said A.B. Magary, Northwest executive vice president of marketing.

For the first seven months of 1990, Northwest flew 29.66 billion revenue passenger miles, an increase of 15.1 percent over the 25.78 billion flown in the first seven months of 1989.

Available seat miles were up 13.4 percent to 44.64 billion from 39.35 billion in 1989. Load factor for the seven-month period increased one point to 66.5 percent from 65.5 percent. Cargo ton miles were down 1.2 percent to 1.03 billion from 1.05 billion.

NORTHWEST AIRLINES TRAFFIC SUMMARY SYSTEM SCHEDULED SERVICE (000 omitted)

	July 1990	July 1989	Percent Change

EAST HARTFORD, CT (AUG. 7) PR NEWSWIRE - The most popular jet engine in aviation history reached a major program milestone recently when American Airlines took delivery of its 1,000th Pratt & Whitney JT8D turbofan.

The JT8D, legendary in the industry for its excellent reliability record,

powers more than half of the world's commercial transports. More than 13,500 JT8Ds are in service with some 350 operators around the globe.

The milestone engine is a JT8D-200 series model, the newest and most advanced version of the JT8D family and exclusive powerplant for McDonnell Douglas' MD-80 twinjets.

Since the first JT8D went into service in 1964, these workhorse engines have flown nearly 400 million hours, and continue to log more than 25 million hours each year, carrying an estimated 1.7 million passengers each day to their destinations.

American has the world's largest fleet of JT8D engines powering Boeing 727s and 737s, and McDonnell Douglas MD-80 series aircraft. The airline operates the largest MD-80 fleet with some 190 of the JT8D-200 powered twinjets in service and an additional 70 of the aircraft on order.

Pratt & Whitney is an operating unit of United Technologies Corporation (NYSE: UTX) in Hartford, Conn.

MINNEAPOLIS (AUG. 7) PR NEWSWIRE - First Bank System, Inc. (NYSE: FBS) today announced that Edward R. Landes has been named senior vice president of corporate banking for First Bank N.A. Landes has most recently served as senior vice president of credit administration for FBS with responsibility for special industries. Landes succeeds James R. Rice, who resigned.

John D. Banker, who has been senior vice president of credit administration for corporate banking since 1989, will assume Landes' duties for special industries.

Landes has been associated with First Bank since 1966 when he joined First Bank Minneapolis. Since that time, he has held positions as a credit analyst, in human resources and in national, regional and metropolitan area commercial lending.

Banker, who has more than 18 years experience in commercial banking, joined FBS in 1983 as an executive vice president of First Bank La Crosse. He held a variety of positions in the credit and commercial lending areas of First Bank Minneapolis and First Bank St. Paul prior to assuming his current duties in 1989.

NEW YORK (AUG. 7) PR NEWSWIRE - GTE Chairman and Chief Executive Officer James L. "Rocky" Johnson and Contel Chairman Charles Wohlstetter today signed a definitive agreement that will result in the largest merger in the history of the telecommunications industry.

The definitive agreement to merge GTE Corp. (NYSE: GTE) and Contel Corp. (NYSE: CTC), which was approved earlier today by each company's board of directors, "will create a new company with a market value of $25 billion," said Johnson.

A preliminary agreement was announced on July 12. The merger is subject to approval by both companies' stockholders as well as various regulatory agencies. As previously announced, GTE will issue 1.27 shares of its common stock in a tax-free exchange for each Contel common share, or about 200 million GTE shares. Both companies will hold special shareholder meetings in the fall, and expect to close the merger around year end.

"We have undertaken a comprehensive review of this merger, and have unanimously agreed with our counterparts at GTE that it is clearly in the best interests of both companies," said Wohlstetter. "I am absolutely certain that the new company resulting from this merger will be even greater than the sum of its parts."

Contel is a major local-telephone and cellular-service provider. Its telephone operations serve 2.6 million access lines in 30 states and it operates cellular systems through a 90 percent-owned subsidiary, Contel

Cellular, Inc. (NASDAQ: CCXLA), in 36 metropolitan areas and is a limited partner in 31 additional metropolitan areas. Contel's 1989 revenues were $3.1 billion, with net income of $287 million. It employs 22,000.

GTE subsidiaries operate in 46 states and 41 countries, with combined revenues and sales of $17.4 billion and net income of $1.4 billion in 1989. GTE is a leader in its three core businesses -- telecommunications lighting and precision materials -- providing products and services worldwide.

#90219p3097 08/07/1990 ~PR Newswire

PHILADELPHIA, (AUG. 7) PR NEWSWIRE - Philadelphia Electric Co. (NYSE: PE) today said that with its transition over the past two decades from a fossil fuel based generation mix to a nuclear based mix the company and its customers are well positioned to withstand significant increases in the price of oil resulting from the Mideast crisis.

PE now ranks third of the 206 investor-owned electric utilities in the United States in terms of nuclear power capacity and therefore southeastern Pennsylvania will be one of the least affected regions of the country as a result of the recent dramatic rise in oil prices.

In the first half of 1990, PE generated 73 percent of its total output to customers from nuclear power compared to only 4 percent from oil. In comparison, in 1972 just prior to the Arab Oil Embargo, PE had no electric

output from nuclear while 46 percent was generated by oil.

During the first half of 1990, PE estimates the fuel cost to generate by nuclear power was $350 million less than the cost would have been to produce the same amount of electricity with oil.

Although only 4 percent of PE's output this year has been generated by oil the company has seen higher oil prices over the past several days. For example, between Wednesday, Aug. 1, and Tuesday, Aug. 7, No. 6 oil increased about $3 per barrel and No. 2 oil has jumped about $5 per barrel.

Based on PE's projected generating budget, if the average price of oil increases by about $3 per barrel it would increase the typical customer's bill (500 kilowatt hours per month) by less than 1 cent per day.

Joseph F. Paquette, Jr., PE chairman and chief executive officer, said, "That while the last two decades have been a challenge to complete our nuclear construction program, we now are in a position of energy independence unlike many regions of this country. While customers of other electric utilities, unfortunately, will feel the effects of the latest Mideast crisis, our customers should see their rates remain virtually stable."

The company's nuclear generation is comprised of 6 units: two at the Peach Bottom Atomic Power Station in York County, Pa., two units at the Limerick Generating Station in Montgomery County, Pa., and two units at the Salem Generating Station in Salem County, N.J.

WILMINGTON, DE (AUG. 7) PR NEWSWIRE - The Columbia Gas System Inc. (NYSE: CG) announced today that it has elected to call for a mandatory sinking fund redemption on Oct. 1, 1990, $595,000 principal amount of its 9 percent debentures, series due Oct. 1, 1994.

The 9 percent debentures were issued in 1969 under the indenture of the corporation to Morgan Guaranty Trust Co., trustee, dated as of June 1, 1961, as amended and supplemented by 37 supplemental indentures, including the Thirteenth Supplemental Indenture dated as of Oct. 1, 1969, which provides for the issuance of the 9 percent debentures.

The 9 percent debentures will be redeemed at the office of Morgan Guaranty Trust Co., Corporate Trust Administration, 30 W. Broadway, New York, N.Y., 10015. The redemption is being made in accordance with the provisions of the indenture as amended and supplemented.

The debentures to be redeemed will be selected by lot from the holders of record on Aug. 17, 1990. Upon surrender of the debentures to the trustee, there will be paid in cash a redemption price equal to 100.20 percent of the principal amount of the debentures, plus accrued interest to the redemption date. On the redemption date, the debentures selected for redemption will cease to bear interest. Following the sinking fund redemption on Oct. 1, 1990, $20,250,000 of the 9 percent debentures will be outstanding.

MIAMI (AUG. 7) PR NEWSWIRE - At a hearing on Aug. 7, 1990, the United States District Court for the Southern District of Florida set the case of United States v. General Development Corporation for trial commencing Jan. 7, 1991. That case involves a 16-count indictment charging General Development Corporation (NYSE: GDV) ("GDC"), its mortgage banking subsidiary, GDV Financial Corporation, and GDC's former president, Robert Ehrling and former chairman, David Brown, with mail fraud, conspiracy and certain related offenses.

The setting of the trial date resulted from a breakdown in settlement negotiations between GDC and the government. GDC announced that it regretted that the government had chosen not to proceed with an earlier agreement pursuant to which this dispute would have been resolved and substantial payments made to thousands of GDC house purchasers. GDC is now engaged in preparing its defense which it will pursue vigorously at trial.

DETROIT (AUG. 7) PR NEWSWIRE - General Motors will broaden its public relations function to enhance two-way communications with all its employees and increase the focus on the corporate goal of continuous improvement in customer satisfaction, it was announced today by Alan Smith executive vice president.

"GM is committed to putting the customer first," Smith said. "And our staffs must be organized to promote even greater teamwork and effectiveness in supporting the operating organization in achieving this objective." Smith said current public relations activities will be aligned

with GM's marketing function in a new staff, Communications and Marketing.

He said the new staff will integrate public relations and marketing expertise to achieve its communication goals, and that the renaming of the Public Relations Staff more accurately describes the overall function it has been performing -- communications.

"Communications is the heart of all corporate staff activity," Smith said. "We are depending on the communications experts to find ways to more effectively listen and communicate with all of our employees."

Smith also announced a realignment of product planning and economics activities in a new Product Planning and Economics Staff.

Effective immediately will be a realignment of the responsibilities of the group executives reporting to Smith, Dr. Marina v.N. Whitman and Charles Katko.

Dr. Whitman's new title will be vice president and group executive, Public Affairs and Marketing. Katko continues as vice president and group executive, Operating Staffs. Both executives will have additional responsibilities.

Reporting to Dr. Whitman, who was vice president and group executive, Public Affairs Staffs, will be the new Communications and Marketing Staff, headed by Vice President James B. Fitzpatrick, formerly vice president of the Marketing and Product Planning Staff. The existing Environmental Activities and Industry-Government Relations staffs will continue to report to Dr. Whitman.

Reporting to Katko, will be the newly aligned Product Planning and Economics Staff, headed by Vice President George C. Eads, formerly vice president of the Economics Staff. The current Customer Sales and Service Industrial Relations and Personnel Administration and Development staffs will continue to report to Katko.

Smith said the creation of the Product Planning and Economics Staff "will better integrate and enhance the corporation's product planning and vehicle forecasting capabilities while enabling its present economic forecasting and analysis activities to better serve operating units, here and overseas."

#90219p3108 08/07/1990 ~PR Newswire

SOMERVILLE, NJ (AUG. 7) PR NEWSWIRE - Hoechst Celanese Corporation today announced second-quarter net earnings of $67 million on net sales of $1.5 billion.

Key Hoechst Celanese Corporation business activities completed in the second quarter include the acquisition of Union Carbide's primary alcohol ethoxylates business.

In the Hoechst Celanese Fibers and Film Group, year-to-year sales reflected the weak domestic economy in housing, furniture and apparel markets. This weakness was partially offset by strong demand for filter and cellulose acetate-flake products. Year-to-year earnings held constant due to reduced operating costs and strong demand for acetate products. In film and fiber intermediates, results from majority-owned Cape Industries were affected by weakened export pricing and lower demand.

In the Chemical Group, favorable acetic acid, vinyl acetate and acetic anhydride prices and volumes partially offset unfavorable pricing shortfalls in ethyelene glycol and ethylene oxide.

In Specialty Chemicals, earnings for the quarter were aided by strong performance in colorants and surfactants with improvements over the prior quarter in both dyes and pigments.

The Advanced Materials Group performance was unfavorably affected by the continued U.S. auto-industry slump and slowdown in the electronic market due to weak consumer demand.

In specialty products, earnings improved in the quarter, reflecting margin improvements in high-density polyethylene (HDPE) sales and changes in product mix.

The Hoechst Celanese Advanced Technology Group in the quarter filed a liquid use (soft drinks) petition with the Federal Food and Drug Administration for its Sunette(R) sweetener.

The Life Sciences Group net sales for the second quarter reached $156 million, due to continued strong sales of Claforan(R) antibiotic, aided by the newly developed market in outpatient therapy, Trental(R) hemorrheologic, and the animal-health fenbendazole product line.

Hoechst Celanese is a wholly owned subsidiary of Hoechst AG of West Germany, with leading positions in chemicals, fibers, advanced materials and technologies, and life sciences. Its 1989 sales were $6 billion, placing Hoechst Celanese 77th on the Fortune 100 list.

CRYSTAL LAKE, IL (AUG. 7) PR NEWSWIRE - Sun Electric Corp. (NYSE: SE) announced today that sales for its second quarter ended June 30, 1990, were $71,212,000 compared to $45,744,000 for the quarter ended June 30, 1989. For the quarter ended June 30, 1990, the company reported net earnings of $4,786,000, or $.55 per share, compared to a net loss of $335,000, or a $.04 per share loss, for the comparable 1989 period.

For the six months ended June 30, 1990, the company reported sales of $128,074,000 compared to $94,513,000 for the comparable period in 1989. For the six months ended June 30, 1990, the company reported net earnings of $6,641,000, or $.78 per share, compared to a net loss of $2,151,000, or a $.30 per share loss, for the comparable 1989 period.

Included in net earnings for the three and six months ended June 30, 1990, is an extraordinary credit of $1,120,000, or $.13 per share, representing utilization of the company's net operating loss carryforward in the United States.

Gerald A. Kien, chairman, president and chief executive officer, stated, "There was a significant improvement in sales and operating results achieved by the company's North American automotive operations, principally in the United States, as a result of the sale of emission analyzers for use in California and other state-mandated vehicle emission testing programs. The company's international operations also reported improved sales and operating results, principally due to increased sales of automotive diagnostic and test equipment in Europe."

Sun Electric Corp. is primarily engaged in the design, manufacture, marketing and service of diagnostic, test and service equipment for the motor vehicle industry and motor vehicle manufacturers in more than 100 countries. The company also markets point-of-sale management systems for retail petroleum and convenience store operations.

ST. PETERSBURG, FL (AUG. 7) PR NEWSWIRE - Trust America Service Corp. announced today that Sidney A. Lewis has resigned as chairman of the board and president of Trust America Service Corp. and that W. Michael Daughtry has resigned as executive vice president and secretary of Trust America Service Corp.

In addition, Lewis and Daughtry have resigned from all of their positions as directors and executive officers of Resource America Mortgage, Inc., The Florida Group, Inc., TARI Inc., SW Mortgage, Inc. and Trust America Acquisition Corp., which are subsidiaries of Trust America Service Corp.

All of such resignations were effective as of Aug. 2, 1990. Sidney A. Lewis and W. Michael Daughtry have informed the board of directors of Trust America Service Corp. that they will remain as two of the five members of the board of directors of Trust America Service Corp.

Trust America Service Corp. also announced that its board of directors has appointed Harold Erwin, who is currently chief operating officer of Trust America Service Corp., as president of Trust America Service Corp. In addition, Erwin has been appointed president and sole director of all of the subsidiaries of Trust America Service Corp.

Erwin has over 35 years of experience in the mortgage banking industry. The board of directors of Trust America Service Corp. also appointed Jorge Ojeda as secretary of Trust America Service Corp.

In addition, on Aug. 2, 1990, United States Bankruptcy Judge Thomas E. Baynes Jr. gave Bankruptcy Court approval for one Trust America Service Corp. subsidiary, SW Mortgage, Inc., to resume its business operations of originating, purchasing, packaging, and reselling FHA-insured and

VA-guaranteed mortgage loans.

Trust America Service Corp. and its subsidiaries are currently debtors-in-possesion under Chapter 11 of the United States Bankruptcy Code. Headquartered in St. Petersburg, Fla., Trust America Service Corp. is a mortgage banking company which, prior to its filing for protection under Chapter 11 of the Bankruptcy Code, was principally engaged in the business of purchasing, packaging, and reselling one to four family residential mortgage loans which were FHA-insured VA-guaranteed or FNMA and FHLMC eligible.

ALBUQUERQUE, NM (AUG. 8) PR NEWSWIRE - Gas Co. of New Mexico (GCNM) reported today that the New Mexico Public Service Commission approved both

a Cost of Service and gas Transportation stipulation which will result in a $7 million, or 3.1 percent rate increase. The new rates are scheduled to be in effect on Aug. 15, 1990.

The rate case originated from GCNM's Jan. 2, 1990, request for a $19 million, 8 percent rate increase based upon a 14 percent return on equity. The Cost of Service stipulation, which was filed on June 20, 1990, was reached solely through negotiation and does not include a determination of rate base, capital costs, or expenses. Prior to this case, GCNM's rates were set on an allowed ROE of 12.7 percent.

CALGARY, Alberta (AUG. 7) PR NEWSWIRE - Earnings for Ranger Oil Ltd. (Toronto: RGO) for the first half of 1990 increased to U.S. dollars 19.4 million (dollars 0.22 per share) compared to U.S. dollars 7.9 million (dollars 0.10 per share) for the same period in 1989. Final earnings in 1989 including extraordinary items of U.S. dollars 25.8 million (dollars 0.34 per share) were U.S. dollars 33.7 million (dollars 0.44 per share).

Funds generated from operations for the first six months of 1990 rose 59 percent to U.S. dollars 45.5 million from U.S. dollars 28.6 million for the same period in 1989.

Revenues increased 19 percent to U.S. dollars 71.2 million in the first six months of 1990 from U.S. dollars 60.0 million as a result of increased Canadian production.

Production averaged 17,853 barrels of oil and 43,489 thousand cubic feet of gas per day for the first half of 1990 (1989 - 16,118 barrels per day and 26,314 thousand cubic feet per day).

The company's working capital at June 30, 1990 was U.S. dollars 143.9 million.

VAN NUYS, CA (AUG. 7) PR NEWSWIRE - Pinkerton Security and Investigation Services (NASDAQ: PKTN) today announced the promotion of Daniel C. Weaver to chief financial officer.

Weaver, 44, previously served as vice president of finance. He had been undertaking many of the duties of chief financial officer during the past year following the departure in 1989 of former chief financial officer Roy Little.

Weaver joined Pinkerton as controller in November 1988 and assumed responsibilities for general accounting, accounts payable, accounts receivable, management information systems and payroll.

Upon Little's 1989 departure, Weaver became vice president of finance and took on additional duties involving financial analysis, cash management and various banking relationships.

Prior to joining Pinkerton, Weaver worked for two years at Beverly Enterprises, the national healthcare organization, and, prior to that, was involved in a small entrepreneurial venture capital funded healthcare organization as chief financial officer and later as president.

Weaver also worked at Six Flags Corp. from 1982-84 where he was involved in acquisitions and financings.

A 1967 graduate of Oregon State University with a bachelor's of science degree in business administration, Weaver joined Arthur Young and Co. that

same year. A certified public accountant, he spent the next 15 years at Arthur Young, serving in audit and consulting capacities at various staff and management levels for clients in Portland, Ore., Los Angeles, New York and Beverly Hills. Clients ranged from very simple small businesses to complex billion dollar companies involved in filing with the Securities and Exchange Commission.

As Pinkerton's chief financial officer, Weaver will report directly to Vice Chairman and Chief Operating Officer Albert Berger, and will oversee some 100 employees and the finances of a corporate operation that took in $600 million in gross revenues last year.

Pinkerton is one of the largest security and investigation companies in the United States with 208 offices in 40 states and two foreign countries and more than 40,000 employees. The company is based in Van Nuys.

ROCKFORD, Ill. (AUG. 7) PR NEWSWIRE - Sundstrand Corp. (NYSE: SNS) today announced that its board of directors has authorized the repurchase of up to five percent of its common stock in the open market, from time to time, at prevailing prices.

Sundstrand will hold the repurchased shares as treasury stock. The board authorized the action in the belief that Sundstrand's shares are undervalued at current prices.

Sundstrand has approximately 37.1 million shares of common stock outstanding. Today's closing price for Sundstrand common stock was $28.25 per share.

Sundstrand's board of directors also declared a quarterly cash dividend of $.275 per common share payable on Sept. 20, 1990, to shareholders of record at the close of business on Sept. 6, 1990. It will be the 185th consecutive quarter that the company has paid a dividend.

Sundstrand Corp., with 1989 sales of $1,595.4 million, is a market leader in the design, manufacture, and sale of a variety of proprietary, technology-based components and subsystems for aerospace (67 percent of 1989 sales) and industrial (33 percent of 1989 sales) markets. CHICAGO (AUG. 7) PR NEWSWIRE - Chicago Milwaukee Corp. (NYSE: CHG), a closed-end, non-diversified, management investment company, today reported results for the first six months ended June 30, 1990.

Net increase in net assets resulting from operations for the six months ended June 30, 1990, were approximately $9.6 million. Net investment income totalled approximately $9.1 million for the first six months of 1990. This compared to $9.2 million for the first six months of 1989.

Net realized gain on sale of investments for the first six months ended June 30, 1990, totalled $1.7 million. This compared to $1.4 million in 1989, after excluding the net gain of $22.7 million from then sale of timberland.

Unrealized appreciation on investments for the six months ended June 30, 1990, declined $1.1 million during the first six months of the year. At June 30, 1990, unrealized gains in the securities portfolio were $92,000, while the unrealized change in real estate properties declined $1.2 million, primarily because of real estate sales during the first six months of the year.

On June 27, 1990, substantially all of the real estate properties, together with certain other assets and certain liabilities, totalling approximately $80 million, were transferred to CMC Heartland Partners. Heartland Partners, L.P. was formed to receive the real estate assets and business of Chicago Milwaukee Corp. in a spin-off as a dividend distribution to Chicago Milwaukee Corp. shareholders on June 30, 1990. Each shareholder received one partnership unit for each share of the Chicago Milwaukee Corp. common stock held as of June 18, 1990.

Following the spin-off, net assets at June 30, 1990, totalled $322.1 million. Net asset value per common share was $135.53 at June 30, 1990, based on 2,142,438 shares outstanding.

On July 23, 1990, the company announced that its board of directors authorized the expenditure of up to $30 million for repurchases of its outstanding shares of common stock and up to $15 million for repurchases of its preferred stock. Purchases will be made from time to time, in the open market, subject to availability of shares at prices deemed appropriate by Chicago Milwaukee Corp.

CEDAR RAPIDS, IOWA (AUG. 7) PR NEWSWIRE - At its regularly scheduled meeting, Aug. 7, 1990, the IE Industries Inc. (NYSE: IEL) Board of Directors declared a quarterly dividend of 51.5 cents per share on the common stock, for an indicated annual dividend of $2.06. The dividend is payable Oct. 1, 1990 for shareholders of record Sept. 14, 1990.

The Board of Directors also had preliminary discussions on strategies for the use of proceeds that will be generated by the merger of Telecom USA and MCI Communications Corp. The merger, announced in April, is expected to be complete in the third quarter. IE Industries holds a 9 percent interest in Telecom USA.

Under the agreement, MCI will acquire all outstanding shares of Telecom USA's common stock at a price of $42. For IE Industries, which holds 2.46 million shares, the sale will generate proceeds of $103 million.

The IE Industries Board is reviewing diversification alternatives and utility-related business opportunities for the use of these proceeds. Mr. Lee Liu, chairman of the board and president said the Board will be examining financial and strategic alternatives to use these proceeds wisely to create a positive impact on long-term shareholder value.

#90219u0195 08/07/1990 ~United Press International

(AUG. 7) UPI - The United States Monday scored a significant victory in its quest to isolate Iraq. The U-S ambassador to the United Nations swayed his peers in the U-N Security Council to adopt tough sanctions against Baghdad. President Bush referred to the U-N action as an indication that many members of the world community would NOT tolerate Iraqi leader Saddam Hussein's aggression.

Actions against Iraq on the economic and diplomatic fronts co-incided with a dramatic build-up of American military might in the Persian Gulf region. Five U-S warships left Norfolk, Virginia, Monday for the tense region. 34 U-S vessels are currently in Middle East waters, and it's reported that Fplanes have been re-located to Turkey from Britain.

The American Bar Association's Business Assembly Monday recommended that the A-B-A's House of Delegates vote to adopt a neutral stance on the abortion issue. In February, the House of Delgates decided to take a pro-choice stance on abortion. Advocates of a neutral stance say the pro-choice position has cost organization many members. The House of Delegates will consider the Assembly's endorsement Wednesday.

Security is reported tight preceding Tuesday's inauguration of Colombian President-elect Cesar Gaviria. The 43-year-old economist will take office amid extraordinary protective measures that include soldiers on nearly every block in Bogota . On Monday, traffic was suspended surrounding the specially built inauguration site. Security forces also searched vehicles for arms and explosives.

#90219u0200 08/07/1990 ~United Press International

(AUG. 7) UPI - A doctor who performed blood-alcohol analysis on three Northwest Airlines pilots accused of flying while intoxicated says he stands by the accuracy of the tests. Dr. Harry McCoy testified Monday at the pilots' Minneapolis trial and said all three tested positively for alcohol. Despite the testimony, prosecutors still must prove the pilots' ability to fly was impaired.

Martha's Vineyard Community Services had some 63-thousand dollars added to its coffers Monday following the 12th annual Possible Dreams Auction. Among the items bid on by vactioners and residents at the island off the Massachussetts coast were a song by Carly Simon and a saliboat ride for two with former T-V news anchorman Walter Cronkite. The song by Simon netted the high bid, raking in 85-hundred dollars.

#90219u0229 08/07/1990 ~United Press International

PRETORIA, SOUTH AFRICA (AUG. 7) UPI - The African National Congress's immediate suspension Tuesday of its nearly 30-year guerrilla war against minority white rule came in a deal with the government for phased release of political prisoners and the return of exiles.

ANC leader Nelson Mandela and reformist President Frederik de Klerk appeared together at a news conference after nearly 15 hours of talks in the capital, declaring in a joint statement the deal ''can become a

milestone on the road to true peace and prosperity.''

The historic agreement has opened the way ''to proceed toward negotiations on a new constitution'' to abolish apartheid and end the country's protracted racial conflict, they said, and exploratory talks on the framework for such negotiations will begin soon.

Mandela, 72, said, ''There will be no infiltration of men and arms into South Africa and any related activity to military action will be suspended '' referring to the limited guerrilla war waged since December 1961 but which has been at a virtual standstill for many months.

''We hope we will be able to communicate with our people and inform them of what we have decided,'' he said.

The nation's two most powerful men appeared tired, but entered the conference hall smiling after leading their delegations through the talks at The Presidency - an 85-year-old mansion that once served as the official residence of governors general under British rule and later of South African presidents.

In Cape Town, Anglican Archbishop Desmond Tutu welcomed the announcement as ''tremendous news'' and commended the ANC ''very warmly for its actions.''

But the 1984 Nobel Peace laureate warned the government ''very sharply that if it does not act very firmly indeed to bring the police under control, then it will wreck the prospects of a negotiated settlement.''

In Washington, White House spokesman Marlin Fitzwater said, ''We welcome the report of a cease-fire in South Africa. We are very encouraged and congratulate both parties for having made this important step forward.''

The two sides accepted recommendations of a working group on how to handle the sensitive issue of releasing an estimated 1,500 political prisoners that also will allow for the safe return of some 20,000 political exiles.

What constitutes a political offense is broadly defined, and laws under which pardons or indemnity may be granted are stated. A timetable calls for releases to begin as a result of presidential pardons on Sept. 1, mass indemnity grants by Oct. 1 and sets a final completion date of April 30, 1991.

''We think what has happened today forms an important turning point, which in all probability, will result in a much more peaceful situation in South Africa,'' said de Klerk, who has forged ahead with his racial reform plans in spite of a right-wing backlash.

Asked about tradeoffs, the president said, ''We're not dealing with fixing the price of a house. We're dealing with the future of the country.''

Mandela described the suspension of the ANC's armed struggle as a ''significant concession'' in the negotiations but noted the government had still ''not succeeded'' in curbing police abuses. The limited guerrilla war began after the government in 1960 outlawed the ANC.

The two leaders engaged in a brief but sharp debate over ANC allegations of police excesses.

Mandela said, ''We're dissatisfied with the government in this regard.''

De Klerk said, ''It's the viewpoint of the government that the police must at all times deal with all problems in an even-handed manner.''

The government did not meet ANC demands for the repeal of sweeping security legislation but pledged ''an ongoing review'' and the scrapping of some of the most contentious elements of the Internal Security Act.

The government also agreed to ''consider'' lifting a state of emergency in Natal province ''as early as possible in the light of positive consequences that should result from this accord.''

It was the second formal session between the government and the ANC since de Klerk lifted a 30-year ban on the anti-apartheid alliance in February. They first met May 2-4 in Cape Town in a ground-breaking session to establish a climate of trust and set an agenda of specific issues for working groups.

The talks followed several weeks of public exchanges over an alleged plot by the ANC's ally, the South African Communist Party, to rise up if the power-sharing talks fail. Using its sweeping powers under the Internal Security Act, the government detained without charge several senior ANC and SACP leaders.

This issue too was expected to be raised Monday, but both parties appeared to have brushed it aside. De Klerk said his government remained ''as firmly opposed to communism as ever.'' The latest agreement was ''no declaration to the effect that we've gone soft on communism.''

#90219u0308 08/07/1990 ~United Press International

(AUG. 7) UPI - After a season of spectacular losses, a ''boring game'' was all Andy Hawkins needed to snap his slump.

Hawkins won for the first time at Yankee Stadium since Sept. 30, 1989 by scattering seven hits over eight innings Monday to lead New York to a 2-1 victory over the Cleveland Indians.

Hawkins, who has been characterized as a hard-luck loser this year, had been 0-7 in 10 home starts this season.

''It's really strange, I've pitched well enough to win here on a number of occasions,'' Hawkins said. ''I knew I'd win a game here this year. This is my home park, you can't dread pitching at home.''

Hawkins, 3-9, also walked two and struck out three. Dave Righetti pitched the ninth for his 22nd save.

Some of Hawkins recent games have been anything but boring.

The right-hander had been 1-5 over his last 11 starts. Among those losses were a no-hitter he tossed in Chicago, an outing in which he pitched 11 shutout innings and another when Chicago's Melido Perez pitched a six-inning rain-shortened no-hitter at Yankee Stadium.

Kevin Maas, who has filled in for the injured Don Mattingly at first, blasted a solo homer into the upper deck to provide half of the offense. Roberto Kelly provided the other half with a first-inning home run, his second in two at-bats. Kelly belted a two-run homer in the ninth Sunday to give New York a 5-3 victory.

Maas snapped a 1-1 tie in the sixth inning off loser Greg Swindell, 7-7, with his 11th homer in 92 at-bats this season. The homer was Maas' seventh at Yankee Stadium, where the left-handed hitter takes advantage of the short right-field wall.

Maas went 2-for-4 to bolster his claim that he can handle left-handed pitching.

The Indians tied it 1-1 in the fourth on Brook Jacoby's RBI single.

--- AROUND THE AL ---

Elsewhere in the American League, Milwaukee blanked Minnesota 6-0, Kansas City downed Chicago 5-4 and Texas edged Toronto 4-3.

Brewers 6, Twins 0

At Minneapolis, Ron Robinson fired a six-hitter to record the first shutout of his career and help Milwaukee snap an eight-game losing streak. Darryl Hamilton and Jim Gantner drove in two runs apiece. Robinson, improved to 5-3 and Roy Smith, 5-10, gave up 11 hits in 7 1-3 innings to take the loss.

Royals 5, White Sox 4

At Kansas City, Gerald Perry doubled home two runs and scored another in Kansas City's five-run third inning to boost Kansas City out of the AL West Cellar. Storm Davis, improved to 5-7 and Jeff Montgomery, worked the ninth for his 16th save. Melido Perez, 10-9, allowed all five runs to absorb the loss.

Rangers 4, Blue Jays 3

At Arlington, Texas, Julio Franco's two-run double highlighted a three-run third inning to lead Texas to its eighth victory in their last 10 games. Charlie Hough, 9-7, scattered seven hits and two runs over seven innings for the win. Kenny Rogers earned his 11th save. Dave Stieb, 14-4, took the loss.

#90219u0312 08/07/1990 ~United Press International

WASHINGTON (AUG. 7) UPI - With international diplomatic, economic and military pressure answering Iraqi aggression in the Middle East, the United States sought information Tuesday on 28 Americans believed to be among 300 Westerners seized in Kuwait and transported by bus to Baghdad.

A State Department official said the U.S. Embassy in Baghdad was checking on a ''sketchy report'' that 12 of the 28 Americans had arrived in Iraqi capital. There was no word on their location and U.S. officials restated that there was not enough information available to classify them as hostages.

Bush scheduled a cabinet meeting Tuesday morning and also planned to meet with CIA officials in the afternoon.

Meanwhile, Bush called for ''full and total implementation'' of Monday's United Nations Security Council decision to impose an economic and military embargo on Iraq as punishment for its invasion of oil-rich Kuwait last Thursday. The embargo could include a military blockade.

Approved by the U.N. Security Council by a 13-0 vote, Bush said the embargo ''gives an awful lot of muscle to countries and we want to see them use it. ... Certainly petroleum is considered under that definition, subject to being cut off.''

The world developments occurred as tensions continued to mount over the stand-off that began with the massive military invasion directed by Iraqi President Saddam Hussein.

Pentagon and administration officials reported that Iraqi troops remained massed dangerously near Saudi Arabia border, despite earlier assurances

from Saddam that the 100,000-strong invasion force would be withdrawn.

White House press secretary Marlin Fitzwater described the situation as ''extremely serious'' because of the ''large and threatening'' force along the border and noted with concern the hike in gasolines costs and threat to U.S. strategic interests in gulf-state oil reserves.

Bush said he was ''ruling out nothing at all'' in considering his next moves.

On Monday, five warships left Norfolk, Va., to join U.S. forces in the Persian Gulf region where a total of 49 warships - some with aircraft capabilities - are expected to position themselves within striking distance of Iraq by next week.

The military buildup also included ships from France, Great Britain and the Soviet Union. Those efforts coincided with intensified diplomatic efforts in the region.

Defense Secretary Dick Cheney arrived in Saudi Arabia to persuade leaders to shut off the Iraqi oil pipeline through their nation and to seek permision to use Saudi Arabia as a staging site for possible military action against Iraq.

In addition, Bush ordered Secretary of State James Baker to Turkey to confer with President Turgut Ozal. Much of Iraq's oil production flows to European markets through pipelines that cross Turkey, a NATO member that is home to several U.S. Air Force bases.

Canadian Prime Minister Brian Mulroney, British Prime Minister Margaret Thatcher and NATO Secretary General Manfred Woerner all praised the U.N. Security Council decision.

Asked if he thought a blockade would be necessary, Mulroney said, ''If you look at the geography, it certainly wouldn't hurt at all.''

Thatcher added that if the sanctions were not effective, a blockade would be considered. ''If not, we shall ... have to jointly consider collective action of the kind of thing such as a blockade.''

On the homefront, the White House urged pricing restraint following cries that U.S. oil companies are capitalizing on Middle East turmoil by inflating gasoline prices when market factors do not justify such action.

Accusations of unjustified increases, or price gouging, touched off an avalanche of angry reaction from consumers and lawmakers. The complaints prompted the Justice Department to say that it would look into the matter.

Sen. Joseph Lieberman, D-Conn., estimated that American consumers are paying between $12 million and $42 million extra each day for gasoline because of oil company ''profiteering.''

Self-serve unleaded gasoline was averaging about $1.15 a gallon Monday, spokesman George Petrie of AAA said.

The United States gets less than 5 percent of its crude oil from Iraq and Kuwait - and now has a three-to-four month oil reserve.

#90219u0313 08/07/1990 ~United Press International

(AUG. 7) UPI - Thousands of residents who were forced to flee from a 3,300-acre wildfire in a central Oregon resort area were allowed to return to their homes, while weary firefighters struggled to surround the blaze that destroyed 20 homes.

Temperatures climbed toward 100 degrees Monday, hampering efforts to combat the fire, which was about half-contained. Fire bosses said they did not expect to completely contain the blaze until Tuesday and hoped to have it under control by late Thursday.

More than 2,000 homes were evacuated, and an estimated 5,000 residents and visitors were forced to flee during the weekend as the fire raced over 6 square miles in a residential and resort area southwest of Bend, state Department of Forestry spokesman Doug Decker said.

Twenty homes, some worth up to $300,000, burned down in three subdivisions scattered among scenic lodgepole pines in central Oregon's high desert country, about 120 miles southeast of Portland. Authorities had believed 28 homes were lost but determined the other eight were sheds or barns.

''The folks that owned the destroyed homes were allowed back in with some professional escorts, such as the Red Cross, so they can deal with their loss,'' said Don Ferguson, another state forestry spokesman.

Roadblocks were posted to keep out sightseers and the general public, Ferguson said. There were no injuries, but damage was estimated at more than $5 million.

About 1,100 firefighters were working the fire with 65 fire engines, 14 bulldozers, six helicopters and six air tankers.

Millworker Ron Beckingham and his wife, Pat, were among the first to return to their home.

''It looked like kind of a ghost town,'' Beckingham said. ''It did look a

little spooky, but we're just happy to be back in here.''

Pat Beckingham said they were forced to leave the house in a mess and with dishes in the sink when they fled Saturday night, but considering what others lost, she said, ''It was absolutely wonderful to think that we had a home to come to.''

In terms of residential losses, it was the state's most destructive wildfire since 1936, when a blaze roared through Bandon on the southern Oregon coast, killing 11 people and destroying 750 homes and businesses.

Myra Lee, administrator of the state Emergency Management Division, said the fire could be ''sort of a forerunner of problems to come'' in Oregon, as housing subdivisions push farther and farther into forested areas.

''As people continue to build in those areas, these problems are going to increase,'' Lee said. ''I hope we don't get into the kind of thing California has experienced.'' Hundreds of homes in Santa Barbara, Calif., were destroyed by a wildfire earlier this year.

Terry Marsha of the National Weather Service predicted more lightning strikes - a common cause of forest fires - in much of central Oregon late in the week.

''It's going to be a pretty hairy week,'' he said. ''I'd be awfully surprised if we get out of this week without a major lightning outbreak.''

Four other fires were also burning in Oregon, the biggest covering 1,250 acres by late Monday. That fire was 60 percent contained, and the others were all surrounded by fire lines late Monday.

In central California's Sequoia National Forest, residents of about 150 houses in the mountain community of Wofford Heights were ordered to evacuate Monday in the face of a 950-acre fire fanned by erratic winds.

And nearly two dozen lightning-caused fires raged out of control in remote hard-to-reach areas of the Sierra National Forest east of Fresno.

The fires were started by dry lightning storms Sunday, said Sue Exline, a spokeswoman for the U.S. Forest Service.

''We have confirmed 23 fires and there could a number of smaller ones that we haven't spotted yet,'' Exline said. She said the largest of the fires had burned 75 acres.

Most of the blazes were located in the John Muir and Ansel Adams wilderness areas, where there are no structures, and about 50 smokejumpers were being flown in from as far away as Montana.

Two 500,000-volt power lines from the Pacific Northwest were knocked out Monday night by soot from the northern California fires, causing a blackout that left several thousand residents of Sacramento without power for about three hours. The soot caused arcing on the lines, and they automatically shut-down.

Firefighters used helicopters Monday to dump water on a 5,300-acre blaze burning on northeastern Utah's Uinta-Ouray Indian Reservation.

Officials said the fire was started last week by lightning and created an ''eceptionally hazardous situation for the firefighters,'' 530 of whom were on the lines.

The fire about 150 miles southeast of Salt Lake City was burning in Douglas fir, pinion pine, juniper and scrub oak - prime deer, elk and mountain sheep habitat.

-30- 5124

#90219u0314 08/07/1990 ~United Press International

(AUG. 7) UPI - Willie McGee threw his glove into the stands and Rex Hudler threw his body all over the field.

Hudler did it all for the St. Louis Cardinals Monday night, singling, doubling, tripling, running the bases with abandon and making several fine defensive plays in left field to power the Cardinals to a 5-1 victory over the New York Mets.

''It's great to have a job that thousands of other Americans and people around the world would love to have,'' Hudler, a utility infielder by trade, said. ''Those are the people I play for.

''But one game doesn't make it all. You don't get too high or too low.''

McGee looked pretty low after dropping Ron Darling's fly ball in the second inning that gave New York its only run. It was McGee's 16th error of the season in center field, and he commemorated the occasion by turning his glove into a souvenir when he returned to the dugout.

''It's not like he loafed after it,'' said Cardinals Manager Joe Torre. ''I can never criticize anybody for trying hard. And he's trying as hard as he can.''

So is Hudler, and that fact isn't escaping Torre either.

''It's the way he goes about it,'' Torre said. ''He busts his tail. He's not leaving anything in the bag, that's for sure.''

Mets Manager Bud Harrelson, whose club dropped one and one-half games behind the Pittsburgh Pirates in the NL East, agreed.

He didn't look bad in the field, either, making a diving grab on the warning track to rob Gregg Jefferies of extra bases in the third.

Even the turf burns from his less-than-graceful landing didn't bother Hudler.

Then, after committing a two-base error on a sinking Dave Magadan line-drive in the fifth, Hudler redeemed himself by throwing out Magadan at the plate as he tried to score on Kevin McReynolds' single.

Hudler, with little respect for his body, also did a fair impersonation of Pete Rose on the base paths, as he belly flopped hard into third on his triple.

''Sometimes I get too excited out there,'' Hudler admitted. ''It's great to entertain these people. They're the best fans in the world.''

Hudler's entusiasm might just be contagious. The Cardinals won the final three games of the four-game series from the Mets and are 4-1 under Torre.

Cardinal starter Joe Magrane, 7-12, walked four and struck out three. Lee Smith pitched 1 1-3 innings for his 19th save.

Mets starter Ron Darling, 4-6, took the loss.

--- AROUND THE NL ---

Elsewhere in the National League: Pittsburgh crushed Philadelphia 10-1 in the first game of a double-header, and won the nightcap 4-3 in 10 innings, and Houston topped San Francisco 4-1.

Pirates 10, Phillies 1, 1st game
Pirates 4, Phillies 3, 10 innings, 2nd game

At Philadelphia, Barry Bonds homered and knocked in five runs and Bobby Bonilla stroked a career-high five hits in the first game of Pittsburgh's double-header sweep. Randy Tomlin pitched a five-hitter in his major-league debut. Terry Mulholland dropped to 6-5.

In the nightcap, Sid Bream doubled home Bonilla in the tenth inning to make a loser of Roger McDowell, 3-6. Mike LaValliere hit a three-run home run in the sixth inning to tie the score at 3-3. The Pirates' two wins gave them a one and one-half game lead over the New York Mets in the NL East.

Astros 4, Giants 1

At Houston, Bill Doran hit a two-run homer and scored twice and Bill Gullickson scattered eight hits to lead the Astros to their fifth straight victory. Gullickson, 8-8, hurled his first complete game since Sept. 14, 1987. The right-hander spent the last two seasons in Japan. Don Robinson fell to 8-2.

#90219u0318 08/07/1990 ~United Press International

(AUG. 7) UPI - Around the world... around the clock... U-P-I brings you the news, next:

Saudi and U-S military officials are bracing for a possible Iraqi attack against Saudi Arabia despite assurances from Iraqi President Saddam Hussein that he has NO intention of doing so. Saddam has rounded up 28 Americans and hundreds of other foreigners in occupied Kuwait.

The U-N Security Council yesterday voted to impose an economic and military embargo against Iraq... compelling all 159 member states to abide immediately by the resolution. It's one of the stiffest penalties ever handed down by the international body. President Bush praised the action.

In Washington, the Justice Department is examining allegations that U-S oil companies are taking advantage of the Middle East turmoil by inflating gasoline prices. There are charges that market factors do NOT justify such increases. A Senate panel will hold a hearing today.

The State Department says one of two Liberian rebel factions is holding a number of foreign hostages, including one American. U-S Marines landed in the capital of Monrovia on Sunday and evacuated 62 Americans, two Italians a Canadian and eight Liberians from the West African country. About 300 Americans remain.

Forecasters issued a hurricane warning last night for parts of Mexico as Tropical Storm Diana heads west toward the coast. Diana was centered about 200 miles east of Tuxpan, Mexico. Officials in Miami say Diana is expected to strengthen before making landfall this afternoon.

-30- 1697

#90219u0332 08/07/1990 ~United Press International

(AUG. 7) UPI - The South African goverment and the African National Congress have reached a major milestone on the way to dismantling apartheid . The A-N-C announced the suspension of its nearly 30-year guerrilla war against the Pretoria government, which in turn pledged to

release political prisoners.

Voters in Georgia today select a Democratic gubernatorial candidate... either former Atlanta Mayor Andrew Young or Lieutenant Governor Zell Miller. Young is trailing badly in the polls against Miller... and made a final plea to voters yesterday in his bid to become Georgia's first black governor.

Thousands of residents in central Oregon are returning to their homes after being forced to flee from a 33-hundred-acre wildfire. The blaze so far has destroyed 20 homes. Temperatures climbed toward 100 degrees yesterday, hampering efforts to combat the fire, which was about half-contained.

In Chicago, the American Bar Association approved a NON-binding resolution to rescind its pro-choice policy on abortion and instead adopt a neutral stance. The vote came after Attorney General Thornburgh suggested the Bush administration might pay less heed to A-B-A ratings of judicial nominees if the policy was kept.

In Bogota, Colombia's youngest president will be sworn in this afternoon under heavy security to guard against feared attacks by the drug lords he has vowed to crush. Bulletproof glass has been put in place to protect Cesar Gaviria, his family, outgoing President Virgilio Barco and other officials.

-30- 1696

#90219u0344 08/07/1990 ~United Press International

MOSCOW (AUG. 7) UPI - Lithuania's old capital of Kaunas has dismantled its monument to Vladimir Lenin, and citizens in a major Ukrainian city signed a petition to haul down their Lenin statue n a growing repudiation of the Soviet state's founder.

The official Tass news agency said the conservative faction of the divided Lithuanian Communist Party protested Monday's dismantling of the Lenin statue in Kaunas, an 11th-century city that was Lithuania's capital when the Baltic nation was independent between the two world wars.

In Lvov, an industrial city of 742,000 people in the rebellious western Ukraine, anti-Communists are collecting signatures on a petition to pull down its statue to Lenin, who instituted Communist rule in Russia in November 1917, the independent Interfax news service said.

Two smaller western Ukrainian towns, Chervonograd and Sosnovka, took Lenin off the pedestals in their main squares last week. Another city in the Ukraine, Ternopol, has decided to dismantle its Lenin monument.

The mounting assault on Lenin got the go-ahead when the Soviet Communist Party's 28th Congress said in its platform last month that he was just one many great socialist thinkers such as Karl Marx and Friedrich Engels.

The dethroning of Leninism-Marxism as the ruling ideology in the vast country set off demands for Lenin memorials to be pulled down.

At the two sessions of the Congress of People's Deputies last year and a third in March, some deputies suggested Lenin be taken out of the mausoleum in Red Square and buried.

Lenin, who died Jan. 21, 1924, was embalmed and placed in the mausoleum on the orders of his successor, Josef Stalin.

#90219u0384 08/07/1990 ~United Press International

MIAMI (AUG. 7) UPI - Newly christened Hurricane Diana took aim at the Mexico's Caribbean coast Tuesday with high winds and heavy rains as coastal regions prepared for up to 8 inches of rain.

Diana was upgraded from a tropical storm at 5:30 a.m. EDT as winds reached 78 mph and the hurricane continued on its westward path toward Mexico, where storm warnings extended almost the entire Gulf Coast.

At 5 a.m. EDT, the center of Diana was located about 115 miles east northeast of Nautla, Mexico, near latitude 20.5 north, longitude 95.7 west and was moving due west at 14 mph.

Forecasters at the National Hurricane Center in Miami said Diana was expected to make landfall on Mexico's Gulf Coast Tuesday afternoon.

The Mexican government issued a hurricane warning from Lerdo de Tejada north to La Pesca and a tropical storm warning from La Pesca north to Boca Jesus Maria, about 100 miles south of Brownsville, Texas.

Small boats were advised to remain in port from Baffin Bay, Texas, southward.

Tides between 2 feet and 4 feet above normal were expected at the center and to the north of where the storm makes landfall.

Diana is the second hurricane of the Atlantic-Caribbean hurricane season, which runs from May 1 to Nov. 30.

The storm emerged early Monday over the gulf after lashing the Yucatan with 45 mph winds and moderately heavy rain during a day-long trek across the peninsula. The storm swept ashore Sunday on the Yucatan's east coast

north of Chetumal.

In the Atlantic, Tropical Storm Cesar continued to weaken, as expected, and was downgraded to a tropical depression.

Forecasters reported the formation of another depression just northeast of Cesar. It was centered near latitude 37.5 north and longitude 33.5 west.

#90219u0497 08/07/1990 ~United Press International

GALLMAN, MI (AUG. 7) UPI - A spring wild turkey hunting trip has landed impeached former U.S. District Judge Walter L. Nixon Jr. back in jail on a charge of violating parole by carrying a gun.

Nixon, paroled in November on two 1986 perjury convictions, was arrested at his Ocean Springs home Monday and taken to the Copiah County Detention Center near Jackson.

A preliminary hearing is set for Thursday to determine whether Nixon's parole should be revoked for violating a federal statute that prohibits convicted felons from carrying firearms. It will also be determined whether he should be released on bail.

Tom Kowalski, regional administrator for the Parole Commission in Atlanta, said the closed-door hearing will be held at the detention center.

Nixon, 61, was convicted in federa court in Hattiesburg in 1986 of lying to a federal grand jury about his involvement in a state drug case. He was sentenced to five years in prison.

The Senate impeached Nixon last Nov. 3, stripping him of his judgeship and $89,500 annual salary. The action came 18 days before he was paroled after serving nearly two years of the perjury sentence.

Nixon and a long-time friend were convicted July 6 of violating state game laws by hunting wild turkey last April over a baited field, a misdemeanor, in rural Jackson County. He is appealing a $200 fine.

When arrested on the hunting trip, investigators testified Nixon had a 12-gauge shotgun and a rifle with a telescope attached. They acknowledged, however, that both guns were in cases.

Whether Nixon was carrying a gun ''is really the purpose of the hearing,'' said Kowalski.

If the examiner rules Nixon's case should go foward, a final hearing would be held to and the examiner would recommended whether to revoke Nixon's

parole and whether he should serve some or all of the three years remaining on his perjury sentence, he said.

Kowalski said the seven-member commission has the authority to give Nixon as little as a reprimand and as much as the remaining three years of his sentence.

#90219u0597 08/07/1990 ~United Press International

(AUG. 7) UPI - Pakistan state-run television reports President Ghulam Khan has imposed a state of emergency one day after stripping Benazir Bhutto of her job as prime minister. Sources say leading members of Bhutto's Pakistan People's Party have gone into hiding out of fear of reprisals. Khan removed Bhutto from office yesterday, charging her 20-month-old administration with nepotism and corruption.

Forecasters say Tropical Storm Diana has reached hurricane strength. This morning, Diana was packing 75-mile-an-hour winds and was centered 65 miles east northeast of Nautla, Mexico, moving west at about 15 miles-an-hour. The Mexican government has issued a hurricane warning from Lerdo de Tejada northward to La Pesca.

The United States is trying to determine the fate of 28 Americans believed to be among 300 Westerners seized in Kuwait and taken to Baghdad. A State Department official says the U-S Embassy in Baghdad is checking a ''sketchy report'' that 12 of the Americans had arrived in the Iraqi capital. U-S officials say there is NOT enough information to classify the Americans as hostages.

The Persian Gulf crisis caused crude oil prices to soar and stock prices to plummet this morning in Tokyo. The key Nikkei average fell nearly 950 points to close at 27-thousand-653, the year's lowest closing. One Tokyo broker says people are realizing the situation probably woN'T be resolved quickly. In New York yesterday, blue-ship stocks suffered their worst loss since the October 1987 mini-crash.

(AUG. 7) UPI - The State Department says one American is among 14 or 15 foreigners taken hostage by Liberian rebels. Spokeswoman Margaret Tutwiler says the foreigners were taken from the Africa Hotel in downtown Monrovia yesterday. She says there is NO indication the hostages have been harmed. U-S Marines have evacuated 73 people from the West African nation since landing Sunday.

The controversial abortion issue has turned out to be the focus of this

year's American Bar Association convention in Chicago. The A-B-A's Assembly held a preliminary vote yesterday to rescind the organization's pro-choice stance on abortion. The A-B-A is considering adopting a neutral stance on the issue. Abortion rights advocates say they'll work to defeat the neutrality proposal.

Senators blasted a savings and loan owner yesterday for NOT informing federal regulators about legal problems involving a company he controlled before he bought 15 failed Texas thrifts in 1988. During the Senate Judiciary subcommittee hearing, Arizona businessman James Fail admitted he mentioned only the fraud charge leveled against him personally, but omitted the fraud conviction against his company.

Thousands of central Oregon residents who were evacuated this weekend because of a 33-hundred-acre wildfire are back in their homes. Firefighters continue to battle the blaze that has consumed 20 homes near the town of Bend. Officials originally thought the fire had consumed 28 homes, but eight structures were sheds or barns. Fire bosses hope to have the fire contained today.

#90219u0673 08/07/1990 ~United Press International

CARSON, CA (AUG. 7) UPI - Union negotiators for Southern California supermarket clerks and butchers Tuesday reported significant progress in overnight talks with management and pushed back their strike deadline indefinitely.

''There is no strike right now. It has been postponed,'' union spokesman Bob Bleiweiss said as the talks ended shortly before 5 a.m. PDT so the union could study a ''partial contract'' proposed by six major supermarket chains. The talks, he said, were to resume at 1 p.m.

Bleiweiss declined to discuss details of the proposal, but described it as ''significant progress.''

The union workers had set a 12.01 a.m. Tuesday strike deadline, but that was ''frozen'' as the talks continued through the night.

Bleiweiss, spokesman for the United Food and Commercial Workers Union that represents more than 80,000 retail clerks and meat cutters, said negotiators accepted a mediator's suggestion that if significant progress was made, ''we would freeze the clock and keep talking.''

David Willauer, a spokesman for the Food Employers Council, which represents six major supermarket chains - Albertson's, Alpha Beta, Lucky, Ralphs, Stater Bros. and Vons - said a breakthrough came in the talks about 7 p.m. Monday.

''We were able to put one major issue behind us and there has been progress on other issues,'' Willauer said. ''Those two factors are encouraging.''

The union announced Monday that should it go on strike, it would picket only Lucky stores and members would show up for work at the other five chains.

But Willauer said a strike against one chain would be considered a strike against all, and the other chains would lock out union workers.

The union said it had obtained the support of the International Brotherhood of Teamsters, which promised not to cross picket lines.

Willauer said management had been preparing for a strike for more than a month by hiring and training replacement workers. He said any disruption in operations would be fairly minimal if a strike occurs, with the most likely effect to be in some reductions in operating hours at 24-hour supermarkets.

The negotiators, who are meeting at the Food Employers Council headquarters in Carson, were trying to hammer out a pact after the workers' previous three-year contract expired July 29.

Union members last week overwhelmingly rejected a management offer after the leaders of their locals recommended they turn down the package.

Union officials said that offer had contained unacceptable cuts in health benefits and contained problems with job security, since it allowed lower-paid workers to do jobs currently performed by higher-paid employees.

The supermarket clerks currently earn between $4 and $13.05 per hour, while the meat cutters earn between $9.31 and $14.33 per hour.

#90219u0798 08/07/1990 ~United Press International

BONN, WEST GERMANY (AUG. 7) UPI - Chancellor Helmut Kohl began talks Tuesday with West German political rivals who oppose his bid to advance the date of all-German elections from December to October.

If the opposition rejects the proposal, Kohl would be unable to obtain the two-thirds majority needed to advance the elections planned for Dec. 2.

Kohl invited his main Social Democratic challenger in the elections, Oskar Lafontaine, to talks that were also attended by Hans-Jochen Vogel, who heads the opposition party, and Otto Graf Lambsdorff of the Free Democratic Party and Theo Waigel of the Christian Social Union.

The proposal for early elections was made last week by East German Prime Minister Lothar de Maiziere and promptly backed by Kohl, who called on the opposition Social Democratic Party to support the necessary constitutional changes in Parliament.

Before the negotiations started, Lambsdorff said he doubted the Social

Democrats would change their mind on the election date and indicated his party would back an eventual proposal to hold elections Nov. 18, the earliest date possible without a change in the constitution.

Kohl interrupted his vacation in Austria to discuss the issue with Lafontaine.

Hours before the talks started, Vogel reiterated his objections to the early election date, but said his party favors early unification and wants the two states to merge by Sept. 15.

At a meeting of the Social Democratic Party and its East German sister party Monday night in Bonn, the parties agreed to oppose early elections. But the East German party leaders stressed that they would not pull their party out of de Maiziere's broad-based government coalition.

Although they rejected early elections as unconstitutional, the two parties agreed that unification should be achieved as soon as possible.

The two Germanys, in place since Germany was divided after World War II, have been moving toward unification since last year when East Germany's Communist government fell and the Berlin Wall was torn down.

Officials in Bonn and East Berlin, meanwhile, indicated there was a strong chance East Germany may formally request unification this week.

Klaus Reichenbach, a cabinet minister and top aide to de Maiziere, said Tuesday it was ''very likely'' the East German parliament will decide Wednesday to immediately issue the request.

The two German governments agreed earlier that East Germany would join the West German federal republic, as provided for under the West German constitution.

Reichenbach told the West German daily Bild that ''elections and unification should take place at the same time - preferably on Oct. 14.''

Kohl and de Maiziere said the simultaneous developments are possible now that Moscow has indicated full support of unification and the rapid economic decline of East Germany is also a persuasive factor.

Sunday, Kohl said in a television interview that unification is ''financially and economically manageable.'' But he remained vague about the possibility that taxes could be increased in West Germany to support the cost of unification.

Several West German papers claimed Kohl is preparing the ground to break his earlier promise not to raise taxes.

#90219u0825 08/07/1990 ~United Press International
DALLAS (AUG. 7) UPI - Six Americans, including a Texas couple, hid from Iraqi troops and later escaped from Kuwait when the invaders began rounding up foreigners, a son of the Texans said Monday.

Kevin Calvin said relatives received a telephone call from his parents, Jim and Phyllis Calvin of San Antonio, after they fled across the Kuwaiti desert early Monday and made their way through Iraqi lines to Saudi Arabia.

''My dad just decided, 'I'm not going to be held hostage. I'm not goint to let them take me to Baghdad, live there for three years and then end up with a bullet in my head,''' the younger Calvin said.

''They've been in contact with the (U.S.) Embassey (in Saudi Arabia) and they expect to be sent to a European country'' sometime Tuesday, Calvin said.

The six Americans hid for about four days in the basement of their bombed apartment building and were nearly out of food when a Kuwaiti friend told them the Iraqis had begun taking foreigners into custody, Calvin said.

Calvin said his parents described the efforts of some Iraqi troops to stop them as they headed to Saudi Arabia. He said his parents' vehicle at one point had to swerve around an Iraqi tank that was blocking the road.

Calvin said his father had been in Kuwait for about a year coaching the country's national basketball team.

Several other Texans managed to leave Kuwait before the invasion was complete, but Texas relatives of five U.S. oil workers captured by the Iraqis indicated Monday they have not heard from their kin.

''We think that my stepfather is a hostage,'' said Tommy Ogle, stepson of Rainard L. Walterscheid of Jacksboro. ''We want to be told the truth and I don't think we are hearing what's really going on.

I feel that they're (the U.S. government) is not saying he's a hostage because that would be bad politically right now.

#90219u0835 08/07/1990 ~United Press International

LONDON (AUG. 7) UPI - Stock prices were broadly higher in brisk trading at midday Tuesday on the London International stock exchange as investors went on a strong buying spree following several days of large losses.

The blue-chip Financial Times 100-stock index which measures the value of Britain's largest 100 companies in terms of market capitalization, was ahead 33.5 points to 2,253.7. The index plunged 64.4 points Monday.

The narrower top 30 industrial average, which fell 61.5 points Monday, was up 30.7 points to 1,762.6.

Volume amounted to around 295 million shares compared with 377 million shares traded during the same period Monday.

Market watchers said prices moved higher amid selective buying from institions taking advantage of sharply lower stock prices, despite expecations of continued volatility brough about by the Iraqi invasion of Kuwait.

Stocks also benefited from program trades against the September Financial Times 100 stock index contract, taking advantage of price fluctuations between the two, analysts said.

Among the most widely traded stocks, British Airways PLC added 2 cents to $3.28 after the airline reported its latest pretax profits surged 62 percent. The carrier warned however, it was concerned over the rapidly increasing price of fuel oil.

WPP, the advertising company, gained 32 cents to $10.51 after reprting its latest pretax profits surged 77 percent.

In the continuing active oil patch, Shell gained 4 cents to $8.93, British Petroleum was unchanged at $6.60 and London & Scottish Marine Oil fell 16 cents to $8.42.

Among some of the international issues, Imperial Chemical Industries climbed 31 cents to $17.55, Barclays Bank PLC gained 14 cents to $6.75, Rothmans International surged 65 cents to $13.73 and Glaxo gained 38 cents to $14.10.

Elsewhere, stock prices on the Frankfurt Stock Exchange were broadly higher at midday in active trading.

The closely watched German Stock Index, which tumbled 100.01 points Monday rebounded 20.37 points to 1,761.30.

Traders said stocks moved higher following reports that Iraq was considering allowing foreigners to leave Iraq and Kuwait.

#90219u0856 08/07/1990 ~United Press International

MONROVIA, LIBERIA (AUG. 7) UPI - A Liberian rebel leader holding an American and at least seven other foreigners said he would attack Marines protecting the U.S. Embassy unless a U.S. or West African peace-keeping force intervenes to end the country's civil war.

Prince Johnson, who leads a breakaway rebel faction, made the threat Monday as heavy fighting was reported in the area near the U.S. Embassy.

The rebel also indicated he would keep the foreigners hostage until peace-keeping forces arrive. The hostages, all taken by rebels loyal to Johnson, included three Britons, two West Germans, a Dutchman, an Argentinian and a U.S. mining contractor identified as Chris Mendes, 27, of Sacramento, Calif.

Sources within the Lebanese community said some of their nationals also were taken hostage and the total number of hostages in the West African country was believed to be as high as 16.

The rebel leader, whose forces control about half of Monrovia, Saturday declared his intention of taking hostages. He said at the time he was giving international organizations two days to agree to send a peace-keeping force into Liberia, which was founded in 1822 by former U.S. black slaves.

Johnson said he told his men to single out American, British, Lebanese and Indian civilians for detention first. The hostages were taken from the Luxory Hotel Africa on the city's outskirts and U.S. State Department spokeswoman Margaret Tutwiler said they were held in the town of Calweld, near Monrovia.

Johnson told reporters who visited him on Monday he had rounded up the foreigners the previous night. But the hostages themselves said they had only been arrested an hour before they were allowed to talk to the news media.

Johnson, speaking Monday to a crowd of 3,000 in rebel-held Bushrod Island, said: ''What this country really needs is the peaceful intervention of the United States or ECOWAS (Economic Community of West African States).''

''If they don't intervene, I will attack the American Marines,'' said Johnson, whose group is a breakaway faction of the original rebel force headed by Charles Taylor fighting to oust President Samuel Doe from power over the country, which became a republic on July 26, 1847.

Sunday, U.S. Marines were airlifted into the war-torn country and evacuated 62 U.S. government employees, relatives and civilians, two Italians, one Canadian and eight Liberians.

The State Department said the ''drawdown'' of embassy staff was successful and that 41 embassy personnel, including the U.S. ambassador, would remain in Monrovia. A total of about 300 Americans remained in Liberia,

Monday, more than 200 Marines who stayed after the evacuation to protect the embassy and its staff abandoned three roadblocks they had set up near the embassy in the Mamba Point District of the capital. The Marines moved to set up defensive positions inside the walled compound, an embassy spokesman said.

''There is no need to expose people,'' the embassy spokesman said. ''Initially we didn't know what people's reaction was going to be.''

The embassy has insisted the Marines will not intervene in the civil war, despite repeated calls from many Liberians for them to do so.

Soon after the Marines withdrew from the street, heavy fighting broke out Monday in the embassy district within a few hundred yards of the Marine positions. The fighting continued throughout Monday afternoon, although control of the area remained in doubt.

Tutwiler said all major stores remain closed. There was no public water, electricity or phone service, and food shortages were worsening.

Five West African presidents met Monday in the Gambian capital of Banjul to discuss an ECOWAS peace plan for Liberia. A peace-keeping force made up largely of Nigerian troops already was preparing to land in the country.

Johnson said Sunday night he ordered the execution of the former Liberian minister for youth and sports, Senator Fred J. Blay. He claimed Blay had been sent by Doe to spy on his headquarters and ordered that he be shot by firing squad.

A Liberian congressman, William T. Jasvan, was paraded before reporters Monday and led away with his hands bound. Johnson said he also would be

executed for spying.

#90219u0903 08/07/1990 ~United Press International
NEW YORK (AUG. 7) UPI - The New York Stock Exchange reported Tuesday these odd lot transactions by principal dealers through NYSE facilities for August 6: Purchases of 519,036 shares and sales of 917,346 shares including 110,385 shares sold short.

-30- 396
#90219u0905 08/07/1990 ~United Press International
WASHINGTON (AUG. 7) UPI - President Bush summoned Cabinet members to the White House Tuesday for an update on the Persian Gulf crisis and White House press secretary Marlin Fitzwater said reports of a possible naval blockade of Iraq are ''premature.''

''We have the sanctions in place,'' Fitzwater told reporters, referring to

the overwhelming vote Monday by the U.N. Security Council for a tough economic boycott against Iraq for its invasion of neighboring oil-rich Kuwait. ''We expect that to happen,'' Fitzwater added, saying, ''This blockade talk is premature.''

However, if the embargo fails to be effective, Western leaders, including British Prime Minister Margaret Thatcher and Canadian Prime Minister Brian Mulroney said they expected continued intransigence by Iraq could lead to a military blockade.

Bush called for ''full and total implementation'' of Monday's U.N. Security Council decision to impose an economic and military embargo on Iraq.

Bush said the U.N. embargo, adopted by a 13-0 vote, ''gives an awful lot of muscle to countries and we want to see them use it. ... Certainly petroleum is considered under that definition, subject to being cut off.''

On Monday, following a meeting with Bush, Mulroney, Thatcher and NATO Secretary General Manfred Woerner all praised the U.N. Security Council decision.

Asked if he thought a blockade would be necessary, Mulroney said, ''If you look at the geography, it certainly wouldn't hurt at all.''

Thatcher added that if the sanctions were not effective, a blockade would be considered. ''If not, we shall ... have to jointly consider collective action of the kind of thing such as a blockade.''

Bush said Monday he was ''ruling out nothing at all'' in considering his next moves.

Bush has received a full report on a meeting U.S. Charge d'Affairs Joseph Wilson had with Iraqi President Saddam Hussein in Baghdad Monday.

Fitzwater declined to reveal any details of Saddam's message to Bush. The Washington Post reported Tuesday that Saddam told the U.S. diplomat that Kuwait now belongs to Iraq and there was no going back. The Post quoted a U.S. official as characterizing Saddam's message as: ''It's a done deal.''

Defense Secretary Dick Cheney visited Monday with Saudi officials with a key goal of persuading King Fahd to allow U.S. personnel on Saudi soil in light of Iraq's invasion of oil-rich Kuwait. The outcome of the meeting remained unclear.

On Tuesday, Cheney flew to Egypt to meet with President Hosni Mubarak in the seaport city of Alexandria. Mubarak's government is allied with Iraq but has denounced the invasion through the 21-nation Arab League.

There were reports that Egyptian and Moroccan forces were being sent to Saudi Arabia to bolster its defense against a massive buildup of Iraqi troops close to the Saudi border.

In other developments, Prince Saud, the Saudi foreign minister, was expected to arrive in Washington for consultations with Bush and other administration officials.

Fitzwater said that Secretary of State James Baker was still expected to travel Wednesday to Turkey where he will meet with Turkish President Turgut Ozal on the gulf crisis. Ozal is reported to have shut down the two Iraqi pipelines that pass through his country to the Mediterranean, in accordance with the U.N. sanctions.

A State Department official said Monday the U.S. Embassy in Baghdad was checking on a ''sketchy report'' that 12 of 28 Americans had arrived in the Iraqi capital. The Americans were part of several hundred Westerners reportedly taken from hotels in Kuwait following the Iraqi invasion. There was no word on their location and U.S. officials restated that there was not enough information available to classify them as hostages.

Pentagon and administration officials reported that Iraqi troops remained massed dangerously near the Saudi Arabia border, despite earlier assurances from Saddam that the 100,000-strong invasion force would be withdrawn.

On Monday, five warships left Norfolk, Va., to join U.S. forces in the Persian Gulf region where a total of 49 warships - some with aircraft capabilities - are expected to position themselves within striking distance of Iraq by next week.

The military buildup also included ships from France, Great Britain and the Soviet Union.

#90219u0907 08/07/1990 ~United Press International

WASHINGTON (AUG. 7) UPI - Mayor Marion Barry's lawyer says the jury should be nearly done sifting through piles of evidence in the cocaine and perjury case after four days of deliberations.

The jury, which has been sequestered for eight weeks, deliberated for nearly eight hours Monday without reaching a verdict and returned to the jury room Tuesday morning for its fifth day in deliberations.

Barry's lawyer, R. Kenneth Mundy, said Monday the jury will need until Wednesday to reach any conclusion in the 14 count indictment, adding that by then ''they will have had a chance to go over all the counts and the

evidence.''

The jury, which received the case late Thursday and deliberated 6 1/2 hours Friday, also met for four hours Saturday in a rare weekend session, asking for and receiving more than 100 documents from testimony during the trial.

The panel of 10 blacks and two whites, which has been sequestered since June 18, is considering Barry's guilt or innocence on three felony counts of perjury, 10 misdemeanor counts of cocaine possession and a single misdemeanor count of conspiracy to possess cocaine.

If convicted of all counts, Barry could be sentenced to a maximum of 26 years in prison and fined $1.85 million.

Ten prosecution witnesses took the stand during 6 1/2 weeks of testimony to say that Barry used cocaine or obtained the drug dating back to 1983.

The government also showed a videotape of Barry taking two long puffs from a crack pipe during the Jan. 18 FBI sting operation during which he was arrested.

Mundy acknowledged during his closing arguments that Barry had been an ''occasional'' cocaine user, but argued prosecutors never proved Barry used the drug at most of the times alleged in the indictment.

#90219u0922 08/07/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (AUG. 7) UPI - Church leaders and human rights groups endorsed the African National Congress's suspension of its guerrilla war against white rule and warned the government Tuesday to reign in its security force or risk derailing peace talks.

ANC leader Nelson Mandela told President Frederik De Klerk in a nationally televised news conference early Tuesday that the ANC decision was a ''significant concession'' offered despite the government's failure to bring ''state violence'' under control.

Mandela, playing perhaps his most important trump card, announced Monday an immediate suspension of the limited guerrilla war, which had been waged since 1961, following nearly 15 hours of talks with the government.

In return, the government agreed to the phased release of an estimated 1,500 political prisoners that also will allow for the return of some 20,000 exiles without fear of arrest in a process expected to be completed by no later than April 30, 1991.

Within hours of the ANC announcement, religious leaders in the anti-apartheid movement stepped in to caution the international community that other forms of pressure must continue against Pretoria to maintain the seemingly unstoppable reform process.

The historic agreement has opened the way ''to proceed towards negotiations on a new constitution'' to abolish apartheid and end the country's protracted racial conflict, De Klerk and Mandela said in a joint communique. Exploratory talks on the framework for such negotiations will begin soon, they said.

Since the release of Mandela from 27 years imprisonment in February, the ANC has been under mounting pressure to suspend its armed struggle to demonstrate its commitment to a peaceful end to the country's racial conflict. At the same time, the suspension is expected to give De Klerk ammunition against his right-wing critics.

The demand has dogged Mandela on his foreign tours, most recently in the United States, where President Bush urged an end to the armed struggle. One of the strongest appeals calls came earlier this year from Anglican Archbishop Desmond Tutu, who early Tuesday welcomed in announcement as "tremendous news."

But Tutu added, ''We must warn the South African government very sharply that if it does not act very firmly indeed to bring the police under control, then it will wreck the prospects of a negotiated settlement.

''On the issue of violence, the ball is now squarely in the court of the government,'' Tutu said.

The South African police and defense forces stand accused of lagging behind De Klerk in accepting the moves for a peaceful settlement with the country's black majority. Charges range from using excessive force on anti-government protests to openly backing the ANC's rival Zulu movement Inkatha in bloody clashes.

''A grave responsibility lies on the De Klerk government now to stop all forms of state violence, particularly that of the police and the army,'' South African Council of Churches General Secretary Frank Chikane said in a statement Tuesday.

''A negotiated settlement is going to be the most difficult phase of the process of change in the country and we call on all Christians worldwide to continue praying and mobilizing the world to ensure that apartheid is totally dismantled and eliminated,'' Chikane said.

Chikane urged the world community to continue to apply pressure on the South African government.

''It is therefore of vital importance to maintain the international pressures on the apartheid regime until the dismantling of apartheid is irreversible,'' he said.

The Pretoria-based Lawyers for Human Rights Tuesday applauded the ANC's decision and declared state-inspired violence as the ''gravest threat to the prospects of a peaceful and negotiated settlement in South Africa.''

''We continue to view with grave concern... the armed actions and intimidatory tactions of the South African Police,'' it said.

A brief but rather intense public exchange on the issue between Mandela and De Klerk during the news conference underscored the difficulties that lie ahead for the nation's two most powerful men.

Mandela described police tactics as a ''totally unsatisfactory sitution'' and dismissed De Klerk's reiteration that complaints and allegations against police were thoroughly investigated and strong measures taken if necessary.

''I am not happy and can't agree with the president,'' Mandela said. ''The actions of the police indicate to us the government has not succeeded in restraining this activity.''

BEIRUT, LEBANON (AUG. 7) UPI - Kuwaiti soldiers and civilians fighting to oust Iraqi invasion forces said Tuesday they had launched three successful strikes in conquered Kuwait, killing or wounding 11 soldiers.

The Kuwaiti News Agency, Kuna, monitored in Beirut said Kuwait radio resumed broadcasting Tuesday after a four-day interruption. It said the radio broadcast patriotic songs and anti-Iraqi programs from a region inside Kuwait near the Saudi border.

The news agency noted the presence of Kuwaiti ministers and high-ranking officials in the border region, which remains under Kuwaiti control.

Iraq invaded its tiny southern neighbor Kuwait Thursday after talks to settle a dispute on the borders and oil production collapsed.

In a statement released in Beirut, Kuna said Kuwaiti resistance forces attacked Iraqi troops in the areas of Ahmadi and Salmiyah using machine guns, hand grenades and rocket-propelled grenades.

Seven Iraqi soldiers were killed or wounded in Ahmadi and three others were killed or wounded in Salmiyah, the statement said, and two Iraqi military vehicles were destroyed in the attacks.

In addition, an Iraqi captain was stabbed to death inside a hotel in Kuwait city, the statement said.

The Kuwaiti fighters pledged to continue ''military operations against the invading troops until we expel the last Iraqi soldier from Kuwaiti territories.''

#90219u1010 08/07/1990 ~United Press International

(AUG. 7) UPI - One day after the U-N endorsed international trade sanctions against Iraq for the invasion of Kuwait, Baghdad said it may

free about 400 foreigners seized in the invasion. An Iraqi embassy official in Jordan says Baghdad is considering a U-S request asking for the release of foreign nationals. Defense Secretary Cheney headed from Saudi Arabia to Egypt today for talks with President Mubarak apparently aimed at mustering U-S economic and military pressure against Iraq.

Cabinet members huddled with President Bush at the White House this morning to discuss the Persian Gulf crisis. But Presidential spokesman Marlin Fitzwter says talk of a naval blockade of Iraq is ''premature.'' Fitzwater says the economic sanctions called for by the U-N Security Council against Iraq are the first step. Western leaders, including British Prime Minister Thatcher, say if the embargo fails to be effective, Iraq could face a military blockade.

A Liberian rebel leader holding an American and several other foreign hostages says he'll attack Marines at the U-S embassy in Monrovia unless the United States helps end Liberia's civil war. The threat was made by Prince Johnson, breakaway rebel faction leader. He vows to keep the foreigners hostage until peace-keeping forces arrive. The hostages include U-S mining contractor Chris Mendes of Sacramento, California. Forces loyal to Prince Johnson control about half of Monrovia, Liberia's capital city.

DETROIT (AUG. 7) UPI - Toyota Motor Co. could assume control of the New United Motor Manufacturing Inc. (NUMMI) plant in Fremont, Calif., when its joint venture with General Motors Corp. expires in 1996, it was reported Tuesday.

Gary L. Convis, vice president for engineering and manufacturing at NUMMI, said during the University of Michigan's annual automotive seminar in Traverse City that Toyota is interested in the plant, partly because of its good workforce and high quality.

''Our estimation is that we might become a Toyota factory here in America '' Convis told the Detroit News, adding he did not feel that labor representation by the United Auto Workers union at NUMMI would be a negative factor in Toyota's decision to assume control of the former GM facility.

Like most Japanese ''transplant'' operations in the United States, workers at Toyota's car assembly plant in Georgetown, Ky., are not UAW-represented.

Toyota announced last year a $300-million project to begin building pickup trucks by the spring of 1991 at NUMMI, which now makes Geo Prizm and Toyota Corolla subcompact cars.

The joint venture was established in 1982, but car production started two years later. It was limited by U.S. anti-trust laws to a 12-year run, meaning the arrangement expires in 1996.

Toyota Motor Sales U.S.A. has said it must expand its U.S. production capacity dramatically if it is to meet its goal of domestically producing half of its projected 1.5 million U.S. vehicle sales by 1995.

Bob McCurry, executive vice president of sales and operations for Toyota's U.S. subsidiary, said late last year another U.S. plant appears unlikely by 1995, and a company spokesman said that is still the case.

But McCurry did not rule out an expansion of its Georgetown plant or the NUMMI joint venture.

''We have to expand a plant or put another line in a plant,'' McCurry said. ''All I know is that it has to happen.''

(AUG. 7) UPI - Voters in Georgia go to the polls today to choose between former Atlanta Mayor Andrew Young and Lieutenant Governor Zell Miller in a Democratic gubernatorial primary runoff. Young is trying to become Georgia's first black governor... but Miller was leading Young by about 20 points in the latest opinion polls. In November, the winner of today's vote will face Republican state Representative Johnny Isakson. He's trying to become Georgia's first G-O-P governor in 122 years.

In Moscow, the Communist Party newspaper Pravda has praise for both Soviet President Gorbachev and Russian Federation President Boris Yeltsin. Pravda says the two showed ''a high sense of responsibility and political flexibility'' in setting aside their political differences last week. They decided to form a joint working group of their two governments to develop a program that might deliver the Soviet Union from economic disaster.

Diana now is a hurricane... aiming its 75-mile-an-hour winds at Mexico's Gulf Coast. Forecasters say the coastal regions should prepare for up to eight inches of rain which could trigger flash floods and mudslides as Diana moves ashore. The center of the hurricane is expected to make landfall around mid-afternoon between Veracruz and Tuxpan , east of Mexico City. In the Atlantic Ocean, Tropical Storm Cesar continued to weaken and was downgraded to a tropical depression.

PHILADELPHIA (AUG. 7) UPI - Police Tuesday questioned an Asian grocer who shot and killed a black man he said attempted to rob his store in the same neighborhood where a similar incident sparked racially charged protests.

Cortez DeVore, 27, was shot once in the chest and once in the leg Monday night and pronounced dead at the Hospital of the University of Pennsylvania, police Sgt. Theresa Young said.

Keith Vong, 25, a Vietnamese, told police he shot the man after he attempted to rob his store. DeVore ran out of the store and collapsed a few blocks away.

Vong said he thought DeVore had a gun because he kept his hand in a paper bag as if concealing a weapon, police said. No gun was found.

The incident marked the second time in the past two months that an Asian

storekeeper gunned down a black man who attempted to rob his shop.

On June 13, five blocks from Monday's shooting, a Korean storekeeper at the Wild Wild West sandwich shop shot and killed Gregory Dorn, 25, who police said attempted to rob and shoot him.

Dorn's death sparked community protests and calls for a boycott of the store.

District Attorney Ronald Castille ruled in that case that Yung Soo, son of store owner Yong Chang, justifiably shot Dorn in self-defense.

Mayor Wilson Goode, in response to community pressure, asked Castille and Police Commissioner Willie Williams to take another look at the case.

The protests continued Tuesday morning when about 15 members of a militant black activist group, Uhuru, and its white support group, Uhuru Solidarity Committee, demonstrated outside of City Hall to pressure Castille to reopen the Dorn case.

The protestors made no mention of Monday night's shooting but called for a boycott of Korean-owned businesses and demanded Asian and white merchants leave black neighborhoods.

Meanwhile, the neighborhood where Monday's shooting occurred was quiet as police maintained a presence. Young said police would ''continue to monitor the area and evaluate it'' to determine if more security was needed.

Officer William Kern said it was ''anybody's guess'' as to how neighbors would react to the latest shooting.

#90219u1038 08/07/1990 ~United Press International

SAN DIEGO (AUG. 7) UPI - Retired Gen. Lemuel C. Shepherd Jr., veteran of two world wars and commandant of the Marine Corps during the Korean War, died of bone cancer late Monday. He was 94.

A service will be held Friday in Shepherd's adopted home town of La Jolla, Calif. He will be buried at Arlington National Cemetery.

''Our corps and nation have lost a great leader and valiant warrior, one that will be sorely missed,'' said Gen. Alfred M. Gray, the current Marine Corps commandant.

Shepherd, a native of Norfolk, Va., enlisted in 1917 when the United States entred the World War and served for 42 years.

He was awarded 60 decorations, including the Navy Cross, the French Croix de Guerre and the Distinguished Service Cross.

He was wounded twice during the bloody battle of Belleau Wood in 1918. He went on to command troops as a general during World War II invasions of Cape Gloucester, Guam and Okinawa.

Shepherd commanded the 6th Marine Division during the fierce fighting on Okinawa and seized two-thirds of the island.

Retired Lt. Gen. V.H. Krulak served with Shepherd on Okinawa and said he and other Marines admired his leadership capabilities.

''They believed in him professionaly, admired him personally, and followed him in combat with great devotion,'' Krulak told The San Diego Union.

During the Korean War, Shepherd was the commander of the Marines in the Pacific and advised Gen. Douglas MacArthur during the Inchon landing.

Shepherd was appointed commandant of the Corps in 1952 by President Harry Truman and served in the post until 1955. After a brief retirement in 1956 he was recalled to active duty to serve as chairman of the Inter-American Defense Board.

Shepherd retired for the final time in 1959 and lived in Warrenton, Va., before moving to La Jolla in 1968.

#90219u1045 08/07/1990 ~United Press International

ISLAMABAD, PAKISTAN (AUG. 7) UPI - Officials of Benazir Bhutto's Pakistan People's Party went into hiding Tuesday to evade arrest after her government's dismissal and authorities ordered airports to stop some former legislators from leaving the country, sources said.

Bhutto, meanwhile, met with aides to discuss President Ghulam Ishaq Khan's actions Monday in dismissing her 20-month-old government, dissolving the National Assembly and declaring a state of emergency.

A spokesman said Bhutto was likely to fly to the family home in the southern port of Karachi, contradicting reports she had been placed under house arrest.

There was no indication that a curfew had been imposed anywhere in the South Asian nation. Islamabad was calm Tuesday.

Ishaq Khan said he had fired the government because of its ''corruption and

nepotism'' and its failure to control escalating ethnic violence.

In a further sign of upheaval, the legislative assemblies of all four provinces have been dissolved, the official television reported Tuesday.

The 37-year-old Bhutto, in a statement after she met with her aides, said the president had made ''old and hackneyed charges, which have only one object - to undermine the will of the people.

''The PPP is not afraid to face these charges,'' she said. ''It is confident that if elections are held as promised, on schedule, it shall be vindicated in the court of the people.''

Security sources said authorities had issued airports with the names of a number of prominent people, including some PPP legislators, who have been barred from leaving the country.

Army contingents moved into the capital and took control of the Pakistan television headquarters, Radio Pakistan, the Information Ministry and several other government offices.

Bhutto charged that ''anti-democratic elements'' had taken up a caretaker status in the government.

''The partisan and blatant nature of these steps clearly betray the game plan - which is to deny the PPP any role in the future,'' she said.

The PPP central committee is to meet in Karachi during the next few days to decide whether to petition the Supreme Court to declare Ishaq Khan's decree unconstitutional.

Ishaq Khan Monday appointed opposition leader Ghulam Mustafa Jatoi to head an interim government until elections scheduled for Oct. 24. The assemblies of all four provinces were also dissolved.

A PPP spokesman said the state of emergency was imposed because ''a grave emergency exists in which the security of Pakistan is threatened by external aggression.'' The emergency gives authorities wide powers of detention.

PPP sources said a number of the party's leaders had gone into hiding, fearing arrest.

Reaction to the president's announcement was muted in most of the country Tuesday. But in Karachi, supporters of the Mohajir Qaumi Movement, a major opposition party representing Mohajir migrants from India, danced and shouted ''Down with Benazir'' outside Bhutto's family home in the southern port.

The opposition party has alleged the Bhutto government failed to protect the interests of its supporters, and Mohajir youths have clashed frequently in southern Sind Province in recent months with members of the PPP youth wing.

Bhutto took office in November 1988 following the first democratic elections in 11 years in Pakistan, which has been under military rule for almost two-thirds of its 43-year existence.

As the first woman leader of a mainly Islamic country, she had come under fire for failing to control growing ethnic violence in Sind and alleged corruption by members of her administration and family, charges which have increased tensions with the army.

Bhutto's PPP has also failed to pass any significant legislation and there have been persistent and acrimonious disputes with the opposition.

Ishaq Khan was formerly chairman of the Senate and took office on the death in a mysterious August 1988 plane crash of President Mohammad Zia ul-Haq, who had ruled the country since overthrowing Bhutto's father, Prime Minister Zulfikar Ali Bhutto, in a 1977 coup.

The elder Bhutto was hanged two years later on charges of plotting to murder a political opponent.

#90219u1049 08/07/1990 ~United Press International

ROSSFORD, Ohio (AUG. 7) UPI - The Aluminum, Brick, and Glass Workers union and the Libbey-Owens-Ford Co. have agreed to a contract extension that entails the loss of more than half of the 1,000 hourly jobs at the Rossford float and automotive glass plant.

LOF said Monday it will reduce the size of its Rossford workforce to 425 and move the majority of its automotive glass production to a newer plant in Shelbyville, Ind., by the end of 1991.

Gerald Biggs, director of employee relations for LOF, said the rest of its automotive glass work would be moved to other plants that could include facilities in Lathrup, Calif., Ottawa, Ill., Sherman, Texas, and a joint venture with Nippon Glass in Versailles, Ky.

About 475 workers will be given an early retirement package or laid off. The company said a limited number of people would be offered transfers.

''The whole idea from from the union standpoint for the negotiations in St. Louis and the extension of the contract was to address the downsizing

that we knew was going to occur and its effect on our members and their families,'' said Roy Ocheske, president of Local 9.

The Rossford plant will continue its float glass operation and will receive a $15 million product development center for the automotive industry.

Negotiations that ended Saturday in St. Louis led to a 3 1/2-year extension to the current labor agreement.

The contract runs from October 1991 to through April 1995 and covers only the Rossford plant.

The company said the cost of operating the Rossford plant was a primary reason for moving production to Indiana.

''Mainly because of cost disadvantages here, such as an old facility we have in Rossford, that's a major reason,'' Biggs said.

The severance agreement calls for a $3 million fund for workers with less than 30 years of service, or $1,300 a year for each employee who agrees to leave.

There is a separate $1 million fund for employees who are already laid off.

In January LOF laid off 150 employees, which led to negotiations between the union and LOF to reduce the effects on the Rossford plant.

Biggs said obtaining a five-year contract was a factor to keeping the float operations in Rossford.

Ocheske said union rules precluded a ratification vote by the membership.

#90219u1057 08/07/1990 ~United Press International

NEWPORT, OR (AUG. 7) UPI - A snapped cable is being blamed for the loss of a $250,000 camera system that scientists were using to map the ocean floor 200 miles off the northern Oregon coast.

Scientists from Oregon State University's Hatfield Marine Science Center said Monday they know exactly where to find the camera they lost last week but that it might be difficult, if not impossible, to retrieve.

Steve Hammond of the National Oceanic and Atmospheric Administration said he hopes the Alvin, a three-man submersible unit, will be able to retrieve the camera when it dives in the same area later this month.

But Hammond said if the camera tangled in the broken cable, it may be impossible for the Alvin to get close enough to pick it up.

Scientists aboard the 303-foot NOAA vessel Discoverer were using the camera to help map the ocean floor, searcing for signs of hot water vents. The camera was lost when the 3/4-inch cable holding it broke, leaving it more than a mile under water.

The camera is a mapping system with a low-light video camera as well as a 35-millimeter still camera and various temperature, conductivity and depth sensors, along with an altimeter.

A special mooring buoy was launched to mark the camera's location and send out an electronic signal that will guide other ships to the location. The Alvin's mother ship, Atlantis II, will leave Astoria Aug. 15 to make 20 dives in the area where the camera was lost.

#90219u1110 08/07/1990 ~United Press International

(AUG. 7) UPI - With the threat of U-N-endorsed trade sanctions and an oil embargo facing Iraq, the Middle Eastern nation says it's considering releasing about 400 foreigners. The hostages were taken from Iraqi-occupied Kuwait. Iraq decided to ponder a release after U-S officials made the request through Jordan.

The son of a San Antonio, Texas, couple says his parents and four other Americans already have made their escape from Iraqi forces. Kevin Calvin says the group hid in the basement of their bombed apartment building in Kuwait for about four days. He says the group then fled across the Kuwaiti desert to Saudi Arabia.

In Washington, President Bush called Cabinet members to the White House this morning for an update on the Persian Gulf crisis. A White House spokesman says reports of a possible naval blockade of Iraq are ''premature.'' But Western leaders who met with Bush yesterday say if a U-N embargo fails, it could lead to a military blockade.

Pakistan is under a state of emergency one day after Benazir Bhutto was fired as prime minister amid charges her government was marred by corruption and nepotism. The state of emergency gives the provisional government wide powers of arrest. Sources in Bhutto's party report some party leaders have gone into hiding, fearing arrest.

#90219u1115 08/07/1990 ~United Press International

BOSTON (AUG. 7) UPI - A newly dedicated statue of President John F.

Kennedy on the Statehouse lawn will be returned to its foundry to clean graffiti painted by a man apparently obsessed with Marilyn Monroe.

Workers using a mild acid were able to hose the paint off the base of the statue but did not attempt to treat the statue itself.

The man who claimed responsibility for spray-painting white splotches of paint and the word ''murderer'' on the 8-foot bronze statue during the weekend.

''They're going to take it back to the foundry and try to put additional protection on it,'' said Greg Arnold, superintendent of state office buildings.

Arnold said the cleansers used on the base of the memorial were not suitable for the statue. ''It's a stone wash and you can't do that to the bronze and the patina of the statue.''

No estimate for the amount of damage to the statue was immediately available. The statue was to be removed Wednesday, Arnold said.

The defacement took place on the 28th anniversary of Monroe's suicide. The blond sexpot has been linked romantically to Kennedy in published reports in recent years.

The statue, which depicts a striding Kennedy, was dedicated May 29 on what would have been Kennedy's 73rd birthday.

NEW YORK (AUG. 7) UPI - Latest metal market prices as quoted Tuesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 73.00-74.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 141.40 c-lb.

Lead, common, U.S. primary producers 50.00-52.00 c-lb.; U.S. non-primary (secondary) producers 54.00-58.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $260.00-$265.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $4.50-4.75 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $114.50-$118.50 per troy ounce.

Platinum, soft, 99.5 fine, producer - $492.00-$494.00; dealer-approx., $488.00-$496.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $118.00-$119.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $105.67 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 297.25 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $7.80-9.59 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.00-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 77.50-87.75 c-lb.

KEY WEST, FL (AUG. 7) UPI - The U.S. Navy said Tuesday it was deploying a fleet of wood chunks and oranges to test whether endangered turtle hatchlings would drift into a weapons test site in the Gulf of Mexico.

The Navy planned to detonate 1,200-pound underwater explosives to test components for a new submarine, said Dan Probert, head of the Navy's ordnance-testing program in Key West.

But environmentalists asked them to halt the tests, cautioning that endangered turtle hatchlings from the Dry Tortugas, a chain of coral islands in the Gulf, could drift into the blast area.

The Navy decided to test the hatchlings' probable path by releasing ping-pong balls from the nesting side and monitoring their course. But that idea was promptly nixed, Probost said.

''Ping-Pong balls are not biodegradable. Our ecological friends were worried that the pelicans would swoop down and eat one up,'' Probost said.

''So we're using little pieces of balsa wood. We made 'em round, a quarter-inch thick and 1 1-8 inches in diameter. We're also using oranges.

Turns out they float just about right,'' he said.

The Navy began releasing the wood chunks Monday and was still considering whether to use oranges or some other fruit in the test, Probert said.

He said navel oranges would be ''most appropriate.''

''But we may use key limes. They're about the size of a turtle or a half-dollar,'' he said.

If the wood or fruit drift into the explosive testing area, the Navy will have to find a new test site, Probert said.

The Dry Tortugas comprise a chain of seven coral islands about 70 miles west of Key West. The Spanish explorer Juan Ponce de Leon named them for their lack of fresh water and abundance of sea turtles. ''Tortuga'' is Spanish for ''turtle.''

The endangered hawksbille turtle and the threatened loggerhead species frequent the area.

Michael Eng, the National Park Service's superintendent for the Fort Jefferson National Monument on the biggest island, said his staff has counted 40 turtle nests, containing 100 to 120 eggs each, on the islands.

Probost said the Navy was unaware they were there until environmentalists raised the issue.

Richie Moretti, who runs the Hidden Harbor Environmental Project in Marathon, asked the Navy Monday to haly the tests until the end of the August-to-October hatching season so the baby turtles could swim ''without need of a pith helmet.''

''Mother Nature provided them with a shell but not one that can withstand a blast,'' he said.

Instead, the drift-testing plan was devised. Moretti was not sure when test results would be available. He said the Navy had planned to monitor the test site to avoid endangering adult turtles and dolphins, but its aerial surveillance and sonar could not detect the quarter-sized hatchlings.

''The little guys are hard to see,'' he said. ''What happens is, the little guys crawl out of the shell and if the birds don't eat them, they get in the ocean and drift with the current.''

#90219u1157 08/07/1990 ~United Press International
INDIANAPOLIS (AUG. 7) UPI - Federal investigators cited Eli Lilly & Co. for violations at three of its drug factories in Puerto Rico last year, a published report said Tuesday, citing Food and Drug Administration documents.

The FDA informed Lilly Chairman Richard D. Wood that Lilly drug products were adulterated, The Indianapolis Star reported. The Star said it got its information through a Freedom of Information Act request.

FDA district director Edward R. Esparza of San Juan, Puerto Rico wrote Wood April 20 about inspections conducted last June through October about three Lilly plants at Carolina, Puerto Rico. Esparza said Lilly responded with a satisfactory schedule for making corrections.

The problems included an uncovered section of a conveyor line in which bottles were filled with Ilosone liquid, an antibiotic. The federal report said black plastic used to make bottle caps ended up in at least three of the bottles.

MOSCOW (AUG. 7) UPI - A Foreign Ministry official confirmed Tuesday that two Soviet warships were heading for the Persian Gulf, but said Moscow did not ''want to flex any muscles'' in the conflict over Iraq's invasion of Kuwait.

Soviet commentators said Iraq's ''plundering'' of its neighbor Kuwait forced Moscow to stop arms exports to its longtime ally and speak out against Baghdad.

Foreign Ministry spokesman Yuri Grimitskikh confirmed reports from Washington that Soviet troops were on their way to the Persian Gulf aboard two ships steaming toward the site of conflict.

Grimitskikh said political means should be used instead of force to persuade Iraq to end its Kuwaiti incursion.

''We don't want to flex any muscles,'' he said.

Deputy Foreign Minister Alexander Belonogov said the Soviet Union would scrupulously observe the U.N. Security Council's decision Monday to impose full trade and economic sanctions against Iraq.

''Appropriate conclusions will be drawn from this, and I do not doubt that the Soviet agencies through which cooperation (with Iraq) was maintained will take the necessary measures,'' he said.

Soviet Foreign Minister Eduard Shevardnadze and Secretary of State James Baker condemned the invasion in an unprecedented joint statement last Friday, a day after Iraqi troops poured into Kuwait. Moscow also cut off all shipments of weapons to Iraq, its largest buyer.

Political analyst Yuri Glukhov, writing in the Communist Party newspaper, Pravda, said it was difficult for Moscow to act against a friend.

''Considering the good-neighborly relations of long standing with this country, the decision to take such sanctions did not come easy for us,'' he said. ''In the most difficult times for Iraq, we took its side. But it is one thing to participate in defending, another - in plundering.''

The Leninskoye Znamya newspaper said: ''The present conflict is all the more unpleasant for us as it involves two states with which we have maintained friendly relations. As for Iraq, those relations went so deep that a treaty on friendship and cooperation was concluded between our two countries.''

Glukhov said that the Iraqi government of President Saddam Hussein badly miscalculated in going into Kuwait because of disputes over territory and oil prices.

''I don't know how carefully Baghdad considered its huge losses in this essentially adventurist step,'' Glukhov said. ''Illusory ideas of an easy and almost bloodless victory over a weak neighbor prevailed. As to their military aspect, these ideas were not groundless.

''But in its political aspects this may prove to be a Pyrrhic victory.''

The Pravda analyst said that with the invasion of Kuwait, Iraq added another border crisis to its already-strained ties with neighboring Syria and Iran, with whom it fought an eight-year war that formally ended in 1988.

SEOUL, SOUTH KOREA (AUG. 7) UPI - North Korea said Tuesday it planned to send a delegation next week to console South Korean dissidents jailed for unauthorized trips to the North, but the idea was promptly rejected by Seoul.

North Korean Prime Minister Yon Hyong-muk, in a telephone message to his Southern counterpart Kang Young-hoon, said the delegation would take advantage of South Korean President Roh Tae-woo's promise to open the border to free travel during the period Aug. 13-17.

But Yon's proposal, made despite North Korea's refusal to reciprocate for Roh's offer by allowing visitors to the North, was rejected by officials in Seoul as a violation of South Korean law governing visits with prisoners.

''Our proposal for free visits supposes that visitors from the North will respect our system and order,'' a government official said. ''It does not mean that trips to sensitive military installations and meetings with convicts will be allowed.''

Yon said the delegation from the North planned to cross into the South on Tuesday at the truce village of Panmunjom, 35 miles north of Seoul, North Korean officials said.

CAPE CANAVERAL, FL (AUG. 7) UPI - NASA managers have canceled a planned fueling test for the shuttle Columbia, allowing the repaired spaceship's launch to move up four or five days to around the first of September, officials said Tuesday.

Sources who requested anonymity said several top agency officials argued against the decision, but apparently were overruled. William Lenoir, NASA's associate administrator for spaceflight, planned to discuss the agency's launch plans at an afternoon news conference in Washington.

In the meantime, engineers at the Kennedy Space Center are gearing up to haul Columbia to launch pad 39A early Friday for final preparations before liftoff around the first of the month on a long-delayed astronomy mission.

Equipped with a new fuel line fitting to replace one that leaked explosive hydrogen in May, Columbia had been scheduled for a fueling test Aug. 23 to make sure the leak has been eliminated once and for all.

But officials said Tuesday NASA managers had decided to eliminate the test to save time. Instead, sensors will be used to search for any leaking hydrogen as the shuttle is fueled for launch.

''We're actually going to do a tanking test,'' said one agency official who asked not to be identified. ''It just happens to be the day (before) launch. We're still going to have sensors there and if they pick up anything and we go out of specification, we'll stop.''

Engineers said the National Aeronautics and Space Administration had little to gain from another fueling test because regardless of when another leak might be detected - during a fueling test or the night before launch - Columbia would have to be hauled back to its hangar for repairs.

And that would prevent any chance of launching the ship before the shuttle Discovery's high-priority flight Oct. 5 to carry the European-built Ulysses solar probe into orbit.

Given that Columbia is equipped with a new fuel line fitting and that engineers have no reason to suspect additional problems, many NASA managers believe the agency has nothing to gain by conducting another fueling test.

A launch around Sept. 1 would be scheduled for around 1:17 a.m.

At the controls will be commander Vance Brand, 59, and co-pilot Guy Gardner, 42. Their crewmates are John ''Mike'' Lounge, 43, Robert Parker, 53, Jeffrey Hoffman, 45, and civilian astronomers Ronald Parise, 39, and Samuel Durrance, 46.

The goal of the 10-day mission is to study the high-energy ultraviolet light emitted by stars, galaxies and other deep space objects, radiation that cannot penetrate Earth's atmosphere.

The astronauts originally were set for launch May 30, but during fuel

loading the night before, hydrogen gas was detected spewing into Columbia's engine compartment.

Subsequent tests traced the potentially dangerous leak to seals inside the ship's 17-inch-wide hydrogen ''disconnect'' fitting where fuel lines from the external tank enter the belly of the orbiter. The disconnect assembly allows the external tank to be jettisoned in space.

Columbia's disconnect fitting was replaced by one built for the new shuttle, Endeavour, presumably fixing the problem.

While that work was going on, NASA proceeded with plans to launch Atlantis on a four-day military mission, but the mid-July flight was put on hold when a leak showed up in a joint where the ship's 17-inch-wide hydrogen line bolts to its disconnect assembly.

The problem, unrelated to the leak that grounded Columbia, could not be fixed at the launch pad, and Atlantis will be hauled back to the Vehicle Assembly Building Thursday to make room for Columbia on pad 39A.

Discovery is scheduled to follow Columbia into space, with liftoff from pad 39B planned for Oct. 5. If all goes well, Atlantis will finally get off on its secret military mission in early November.ASA's launch schedule is built around the Discovery mission. In order to fly over the poles of the sun, Ulysses must first be fired to Jupiter so it can use the giant planet's gravity for a slingshot boost down and out of the plane of the solar system, back toward the sun.

Because of the positions of Earth and Jupiter, Ulysses must be launched during October or the flight will be delayed 13 months to allow the planets to return to a good launch position.

HOUSTON (AUG. 7) UPI - The FBI is questioning tanker crew members about discrepancies in accounts of a collision that triggered a 700,000-gallon oil spill in Galveston Bay, the Houston Chronicle reported Tuesday.

The tanker collided July 28 with three oil-laden barges, forcing the Houston Ship Channel to be closed for five days and prompting a ban on shellfishing as crews work to protect sensitive marshlands.

A person close to the case told the newspaper that the FBI query focused primarily on possible violations of the Clean Water Act, which outlaws the negligent or intentional discharge of oil into open water.

FBI special agent Del Mitchell of Galveston declined to confirm or deny whether an investigation is under way. He referred all calls to the Houston FBI office, where a spokesman also declined to comment.

Assistant U.S. Attorney Leslie Banks of Houston, the prosecutor assigned to the case, said her knowledge of the FBI's investigation covered only the potential Clean Water Act violations.

''It is not a foregone conclusion that there's a criminal case here. It's a terrible thing that's happened, but I don't know if anybody can be prosecuted for it,'' Banks said.

Cleanup efforts Tuesday moved from the water to the shore, Coast Guard spokesman Rich Muller said.

''What we are mainly looking for now are small pockets that are trapped along the shoreline that have already been boomed off,'' Muller said, adding a meeting is planned to consider the continued use of oil-eating microbes.

On Monday Capt. Thomas Greene rolled back his estimate of the total cleanup cost from $5 million to somewhere between $1 million and $3 million.

''We still have two or three days out there making sure we've got everything, but we're approaching the end,'' Greene said.

Texas General Land Commissioner Garry Mauro and Texas Water Commission Chairman B.J. ''Buck'' Wynne coordinated the use of the microbes, or bioremediation, with the Coast Guard and the Environmental Protection Agency.

Mauro said the state needs a standing oil spill response plan so that booms, skimmers and bioremediation crews can be deployed sooner next time.

Mauro's concerns echoed those of Galveston Bay environmentalists who

criticized the response efforts because the first boom was not put in place until more than 24 hours after the accident.

The governor's oil spill response committee is expected to meet in Austin Thursday to consult with Florida state officials about their spill response plans, an aide to Mauro said.

#90219u1281 08/07/1990 ~United Press International

NEW YORK (AUG. 7) UPI - A lawyer for one of three youths charged with beating and raping a Central Park jogger last year Tuesday urged the jury to ignore the teenager's confession because it was the result of ''threats and lies'' by detectives under pressure to quickly solve the case.

''There is not one piece of scientific evidence linking him to the crime '' attorney Michael Joseph said of Antron McCray, 16, in his final argument.

The jury of 10 men and two women was expected to begin deliberating as early as Wednesday.

Joseph said the prosecution's case ''rests almost exclusely on the statements'' of defendants. ''But those statements should be rejected because they were obtained improperly,'' he said.

Joseph said the videotaped confession by his client that was shown to the jury was ''the result of lies and threats by police under pressure to quickly solve a high-publicity case.''

McCray, Yusef Salaam, 16, and Raymond Santana, 15 are on trial for the ''wilding'' rampage by a gang of youths through Central Park that left the woman jogger battered and near death.

Salaam was only 15 at the time but prosecutors testified he produced a bus pass after his arrest that showed he was 16. He later told police he had altered the pass to make himself older to ''impress girls.''

Salaam's age is a key point in his case. His mother testified earlier that she told police when she arrived at the police station he was only 15 but that detectives kept on questioning him.

Under state law, youths under l6 are not to be questioned without a parent present.

BOSTON (AUG. 7) UPI - A bacteria-killing drug taken after sexual intercourse appears highly effective in preventing recurring urinary tract infections in women, researchers said Tuesday.

Women who took a combination antibiotic drug after sex were far less likely to develop an infection of the bladder or urethra than those given a worthless placebo, said Dr. Ann Stapleton of the University of Washington in Seattle.

The study results indicate that for most infection-prone women, taking the drug only after intercourse is as effective a prevention measure as taking the drug daily, Stapleton and co-researchers reported in the Journal of the American Medical Association.

An estimated one woman in five develops an infection of the urinary tract sometime in her life, and four out of five who seek medical treatment have another infection within 18 months. The infections can usually be treated effectively with antibiotics. But if left untreated, a urinary infection can lead to serious kidney damage or blood poisoning.

Women are far more likely than men to develop urinary infections, partly because their urethras - the tube leading to the bladder - are much shorter than a man's, so that bacteria can more easily reach the bladder. If bacteria are allowed to multiply, the resulting infection can cause symptoms ranging from abdominal pain to a burning sensation during urination and blood-tinged urine.

Sexual intercourse is thought to increase the risk of infection by allowing bacteria to move more easily from the vaginal and bowel areas, where they can live harmlessly, into the urethra.

In the new study, 16 women who had experienced at least two urinary tract infections within the previous year took a drug combining 40 milligrams of trimethoprim and 200 milligrams of sulfamethoxazole each time they had sex.

The treatment is sold as Bactrim by Hoffmann LaRoche & Co. in Nutley, N.J. and Septra by Burroughs Wellcome Co. of Research Triangle Park, N.C.

Eleven other women who were included for comparison took the placebo after each intercourse. The women in each group had an average age of 23. Sixty-nine percent of women in the drug group and 91 percent in the comparison group used diaphragms, which have been linked to higher risks for urinary infection.

After six months, nine of the women in the placebo group, but only two who had taken the drug had developed urinary infections, Stapleton said. Both women in the drug group who experienced infections were found to harbor strains of bacteria resistant to antibiotics.

Researchers said that among women who took the placebo - but not those who took the drug - a higher frequency of intercourse was associated with a higher rate of urinary infection. The finding supports prior studies indicating that sex increases the infection risk, they said.

Until now, the standard practice for treating women with frequent urinary infections was to have them take antibiotics daily or three times a week, Stapleton said. But the study indicates taking the drug within two hours of sex can be equally effective in preventing infections, she added.

Stapleton said that for women such as those involved in the study, who were largely unmarried college students, there are obvious advantages in not having to take a drug every day.

''For a young woman who may have a steady partner for several months and then, perhaps no one for six months, it doesn't make sense to take a drug continuously,'' she said.

In addition, she said decreasing the frequency with which any antibiotic is taken lessens the chances that strains of bacteria will develop that are resistant to the drug, rendering it ineffective.

(AUG. 7) UPI - Resistance forces in Kuwait say they're keeping up the fight against Iraqi troops. Kuwaiti soldiers and civilians fighting to oust the Iraqi invasion sources say they launched three successful strikes that killed or wounded 11 Iraqi soldiers. The Kuwaitis pledge to continue their military operations until they- quote- ''expel the last Iraqi soldier from Kuwaiti territories.''

Sources in Pakistan say authorities have ordered airports to halt some former legislators from leaving the country. The move is part of a crackdown against officials of ousted Prime Minister Benazir Bhutto's Pakistan People's Party. Authorities today declared a state of emergency prompting many officials to go into hiding to evade arrest. Bhutto says she's sure her administration will be vindicated of charges of corruption when free elections are held.

West German Chancellor Kohl has begun a push to convince his political rivals to agree to an earlier date for all-German elections. Opposition parties are opposed to moving the elections from December to October. Kohl must have their support to obtain the two-thirds majority needed to advance the early election proposal. The opposition parties today reiterated their objections to early voting but say they support early unification.

A lawyer for Washington, D-C, Mayor Marion Barry says the jury should be nearly done going through the evidence in the cocaine and perjury case. The jury today began a fifth day of deliberations. Barry's lawyer, Kenneth Mundy, estimates it will take until tomorrow for jurors to reach any conclusion in the 14-count indictment. If convicted on all counts, Barry could get a maximum sentence of 26 years in prison and be fined one-point-eight-Million dollars.

#90219u1314 08/07/1990 ~United Press International

MOREHEAD CITY, NC (AUG. 7) UPI - Some 2,500 Marines set sail for the Mediterranean Tuesday wearing khaki fatigues and long faces, but one told his young daughter not to fret over strife in the region because the Marines plan to ''kick butt.''

Staff Sgt. Gene DeForest, 36, said his goodbys to wife Susan and children Melissa, 10, Nicole, 5, and Ryan, 4. Melissa had heard about the Iraqi invasion of Kuwait on television, so DeForest wanted to be sure she did not worry.

''Daddy and all his friends are going to take care of it,'' he whispered, cupping her face in his hands. ''Daddy is going to go over and kick butt.''

The Marines from Camp LeJeune are part of 15,000 sailors and soldiers who were scheduled for a routine, six-month training exercise in the Mediterranean when Iraqi President Saddam Hussein's forces invaded oil-rich Kuwait last Thursday.

Tensions in the region escalated sharply. President Bush warned Hussein to get out of Kuwait or face the consequences. The U.N. Security Council voted unanimously in favor of an economic boycott of Iraq.

Thirty-four battleships are already in the region, led by the aircraft carriers USS Independence and USS Eisenhower. The 15,000 additional men aboard 15 ships that left East Coast ports Tuesday are led by the Mayport, Fla.-based carrier USS Saratoga.

The Pentagon said the contingent will replace Eisenhower forces due to return home, but in previous Gulf crises the United States has doubled up its naval units, holding ships beyond their normal rotation.

''This is honestly a planned, routine deployment,'' said Col. William Fite the Marine commander. ''Whether it is routine in conduct later on, we don't know. Right now we are headed either for the Mediterranean or Liberia, but there are no plans now to go to the Persian Gulf.

''President Bush and the fleet commanders, in short, have the opportunity to add us to their options,'' he said.

The Marines arrived in Morehead City before dawn aboard buses, wearing camouflage fatigues and carrying helmets, duffel bags, bedrolls, canteens and rifles, to board three ships - the dock landing ship USS Whidbey Island, the amphibious transport USS Nashville and the USS Inchon. By early afternoon, the last of the troops had boarded the vessels.

The troops had known for four months that they would be deployed, but their goodbys were especially poignant because families feared war could erupt by the time they reach the region two weeks from now.

First Lt. Chris Maxmin, 26, of Wilmington, Del., said he wasn't afraid of the escalating hostilities because ''that's my job.''

But it bothered him that his mother cried.

''She said, 'I know you're trained for this, but just keep your head down ''' said Maxmin, who plans to marry his fiancee, Gina Reed, shortly after he returns. Reed flew to Camp LeJeune to see him before the he set sail.

''She's scared to death,'' Maxmin said. ''I'm a little apprehensive too. I'd be stupid if I wasn't.''

Maxmin called his mother and sisters to say goodby Monday night, but his mother called him again before he left Camp LeJeune Tuesday.

Tori Maxmin, 22, said her brother became the man of the family when their father died. He was 8 years old at the time.

"I was 5 and my sister was 7 and Chris was only 8," she said. ''When he joined the Marines, I hated them because they took my brother away when I was growing up. He couldn't come to my high school graduation because of the Marine Corps.''

She said her mother cried after talking to Maxmin Tuesday morning.

''He said he was scared,'' Tori Maxmin said. ''But this is something he decided on his own. It's something he wants to do. His unit didn't get called to Panama last year and he felt rejected in some ways.''

She said her brother has a cool head and she believes he will fight valiantly if he is sent into battle.

''He's a good guy. I'd rather have my brother fighting for this country than someone who doesn't have his heart in it,'' she said.

Tori Maxmin said she intends to pray every day for the next six months that her brother comes home safely.

''When I talked to him I said, 'I'll pray for you,''' she said.

''He said, 'I'm not really religious.'

''I said, 'Yeah, but it doesn't hurt to have a lot of people on your side.'''

#90219u1317 08/07/1990 ~United Press International

SRINAGAR, INDIA (AUG. 7) UPI - About 20 Indian border police went on a rampage in the old city overnight, setting houses ablaze, dragging residents outside and shooting dead at least 12 men, women and children, police and witnesses said Tuesday.

Jammu and Kashmir state Governor Girish Saxena confirmed at least 10 people were killed in Srinagar's old city and said murder charges were filed against the director general of the Border Security Force in connection with the incident.

The lodging of the murder charge was the most serious action taken so far in a case of alleged wrongdoing by the Indian security forces in Kashmir.

Kashmiris, most of whom are Moslems, have been fighting for autonomy from India, charging the Hindu-dominated government has been insensitive to their needs.

Residents have repeatedly accused the Indian security forces of using excessive violence in their bid to put down the secessionist movement by Kashmiri militants.

The 12 people slain in Srinagar's old city were among 21 people killed in secessionist violence in the Kashmir Valley since Monday night, police and witnesses said. The other nine people were killed in separate incidents in the region.

Witnesses said the violence in the old city erupted when about 20 members of a border police patrol, apparently angered by earlier attacks on security forces, entered the neighborhood about 10 p.m. Monday.

They set fire to three houses near Islamia College and shot out the windows of at least a dozen houses, witnesses said. One of the houses burned to the ground while the other two fires were later extinguished by the local fire brigade, the witnesses said.

The patrol shouted ''Pakistani dogs,'' dragged people from their houses and then shot them, said Nazir Ahmad Baba, a lawyer who lives in the area.

India has accused Pakistan, a Moslem country, of aiding the Kashmir separatists.

Police confirmed that 12 people were killed in the incident.

The behavior of the security forces may have been prompted by two earlier attacks against them by militants in the same neighborhood.

#90219u1341 08/07/1990 ~United Press International

SPRINGFIELD, IL (AUG. 7) UPI - Wham! Bang! Jim Wham is in the race for the House of Representatives, at the head of his own party.

The Republican attorney from Centralia wants to run for Congress and he took the first step Monday by filing petitions with the Illinois State Board of Elections to form his own party, named the Jim Wham Party.

Wham, 71, turned in petitions containing what he said were more than 12,000 signatures to oppose Democratic Rep. Glenn Poshard of Carterville, who had been unopposed.

Wham's platform is based on his disapproval of Poshard's vote against a proposed constitutional amendment to ban flag burning. Wham said Poshard's vote on the issue took place after the deadline to run as an established candidate so the only way he could get on the ballot was to form his own party.

''He's not going to get a free ride with a vote like that,'' Wham said.

Wham, who has been a delegate to four Republican national conventions, needs at least 11,385 valid signatures to get his name and party on the ballot. Opponents have until the end of the week to file objections and try to have some of Wham's signatures disqualified.

#90219u1359 08/07/1990 ~United Press International

WASHINGTON (AUG. 7) UPI - As oil prices continue their steep ascent, Marathon Oil is struggling to resume its oil operations in Libya, company officials said Tuesday.

But the effort is meeting stiff resistance from the Libyan National Oil Co., a state-owned company that oversees Libya's oil operations.

Marathon, a Houston-based subsidiary of USX Corp., reported Monday in a filing with the Securities and Exchange Commission that company officials have told the Libyans the company is ready to resume production there.

But Libya has been unwilling to allow Marathon back in, and the SEC document says the company ''is uncertain when or if those arrangements can be completed.''

Marathon is one of three U.S. companies that formed the Oasis Oil Co., which holds rights to approximately 49 percent of an estimated 2-billion barrel oil reserve in northeastern Libya's Sirte Basin. Its partners are Conoco Inc., owned by the Du Pont Co. of Delaware, and Amerada Hess Corp., which is based in New York.

Libya's NOC owns the other 51 percent of the concession, according to Michael O'Connor, a Conoco spokesman.

Oasis produced at the concession about 400,000 barrels of crude oil daily until 1986, when the U.S. government imposed trade sanctions on Libya and ordered U.S. companies to leave the country.

The U.S. Department of Treasury in June 1989 gave Marathon and its partners permission to resume Libyan production, provided the companies employed only non-Americans there and did not ship in any technology or spare parts.

The Libyan government however, has told Marathon it cannot return until the U.S. government lifts its trade sanctions, said Richard Chamblin, Marathon's vice president of international production.

The Libyans maintain that a standstill agreement they concluded with Oasis which permits Libya to continue pumping oil and keep all revenues, is still in effect.

Marathon claims that the standstill agreement has expired and that Oasis should be able to resume operations. Libya is also supposed to split revenues from the concession when the standstill agreement expires, but is not doing so, Chamblin said.

The SEC filing reported that Marathon is ''evaluating its legal remedies '' and Chamblin mentioned arbitration as an alternative.

Meanwhile, there is little hope the U.S. government will lift the Libyan sanctions anytime soon.

''We have had discussions with (the) State (Department) and Treasury and there is no indication that they will be lifted,'' said Chamblin.

#90219u1367 08/07/1990 ~United Press International

LOUISVILLE, Ky. (AUG. 7) UPI - Representatives of Navistar International Transportation Corp. and the United Auto Workers agreed Tuesday the federal government should take responsibility for providing health insurance.

''We have a good health program. We can make it better. But we're going to insist the company join with us to lobby for national health insurance, whose time has come,'' said Bill Casstevens, UAW serectary-treasurer and director of its Navistar department.

''It is a nagging problem. They (Navistar officers) are going to have to join with us to handle that legislatively,'' the union negotiator said. ''It's time for national health insurance in this country.''

John Sheahin, senior vice president of employee relations and administration, agreed a national health program could help solve the health insurance problem.

''We agree from a philosophy standpoint that whatever the number is of people that have no health insurance at all, we need to find a way to take care of that problem as a nation,'' Sheahin said.

''But whether that means national health care or some other way, we're still taking a look at it. We see an awful lot of waste in the system and what we're really working at is how to get rid of the waste in the health care system.''

The company employes 14,000 people in the United States and Canada. The UAW represents about 8,000 Navistar production, maintenance and clerical employees at manufacturing plants in Springfield, Ohio, Indianapolis, and Melrose Park, Ill.; parts distribution centers in Atlanta, Baltimore and Dallas; and at Navistar's Technical Center in Fort Wayne, Ind.

The hour-long ''ceremonial'' meeting Tuesday opened negotiations towards new labor agreements to replace those expiring Oct. 1.

''This is the first session where the union normally opens up with a short speech and gives us a list of their demands, what they expect to get out of the contract talks,'' said Sheahin, the lead company negotiator.

''The main issue from our side is we need to find ways to improve health care quality. I think, obviously from the union's side, they've made no bones about telling us their No. 1 job is to improve job security.''

Sheahin said there was no question that the UAW was very concerned about layoffs with the auto companies.

''There is less concern with us because we have a different job security program than the auto companies do, and the workers have received more protection through our job security program,'' he said.

''We do have job security, but it needs to be shored up somewhat,'' Casstevens countered. ''We are going to have some money too. It's been

quite a while.''

The union leader said a week-long shutdown was scheduled for some Navistar manufacturing plants beginning Aug. 13, ''but other than that I know of no other layoffs pending.''

Sheahin said there were few grievances from the union at this stage of the 1990 negotiations compared with the number of grievances in previous negotiations.

''I think that's an indication of the improvement in the relationship between the company and the union,'' Sheahin said.

''The negotiators will return to Louisville the last week in August and then, typically, we will get back together in the middle of September, when we will start the serious negotiations.

''That will follow the UAW negotiations with Ford, Chrysler and General Motors.''

#90219u1373 08/07/1990 ~United Press International

DETROIT (AUG. 7) UPI - The first Mazda sport utility vehicle rolled off the line Tuesday at Ford Motor Co.'s Louisville, Ky., plant, marking the first time a vehicle built in this country by a domestic automaker will be sold by an import manufacturer through its own dealer network.

Slated to go on sale this fall as a 1991 model, the Mazda Navajo is essentially a re-badged version of the new Ford Explorer sport utility vehicle, which hit showrooms in March and has been selling strongly.

But the Navajo will be offered in a two-door version only, while the Explorer is also sold in a four-door model - the latter expected to account for 70 percent of total sales because of a boom in the truck ''sedan'' market.

That market last year was dominated by the Chevrolet S-10 Blazer made by General Motors Corp. and the Jeep Cherokee, made by Chrysler Corp.

''We considered a four-door version, but it was determined that our MPV is a better way to serve customers,'' Mazda spokesman Fred Aikins said. The MPV is Mazda's rear-drive minivan that is also offered with all-wheel-drive.

A Ford spokesman said there were discussions between the No. 2 automaker and 25 percent-owned Mazda, which has been an affiliate for about 20 years about the Japanese automaker marketing a four-door version. But he

conceded Ford never formally offered Mazda such a deal.

''But that does not infer that Ford tried to snooker Mazda,'' he said. ''Given their sales volumes, they just decided not to complicate their lives with two versions.''

Mazda hopes to sell between 15,000 and 18,000 Navajos a year, each one equipped with Ford's V-6 engine, four-wheel-drive, 5-speed manual transmission, power windows and door locks, and rear anti-lock brakes as standard.

Ford, however, is intent on becoming the segment leader in the sport utility vehicle market, meaning it must sell 180,000 or more Explorers a year to do so to outstrip the Blazer, also offered in a four-door version for the first time this year.

No prices have yet been announced on the Mazda Navajo. But a similarly equipped two-door Explorer starts at over $16,200, and typically equipped versions have been selling for about $18,000, a company spokesman said.

The four-door Explorer ranges from about $16,500 for the four-wheel-drive model to over $24,000 for the top-line ''Eddie Bauer'' edition.

#90219u1395 08/07/1990 ~United Press International

SANTA MONICA, CA (AUG. 7) UPI - Christin Brando, the eldest son of actor Marlon Brando, pleaded innocent Tuesday to murdering his pregnant half-sister's boyfriend at the actor's estate.

Brando, 32, also pleaded innocent at his Superior Court arraignment to a charge of possessing a machine gun.

Judge David Perez ordered Brando held in lieu of $10 million bail - believed to be the highest ever set in Los Angeles County - and to return to court for a pre-trial hearing Sept. 14.

Defense attorney Robert Shapiro said he would ask the judge during a hearing Thursday to reduce Brando's bail, which he said would normally be set at $50,000 to $100,000.

''We are going to ask that Christian not be singled out and be treated like any onther person,'' Shapiro said.

The court, which also demanded Brando's passport, should not be concerned about his fleeing the United States, Shapiro said.

''We are going to present a very structured plan that will satisfy the

most skeptical person that Christian will make all his court appearances '' Shapiro said.

Marlon Brando did not attend Tuesday's arraignment, the first court appearance he has missed since his son's arrest.

Brando was ordered last month to stand trial in the case following a two-day preliminary hearing in Municipal Court.

If convicted of first-degree murder, he could be sentenced to 25 years to life in state prison. Prosecutors are not seeking the death penalty.

Brando was charged with shooting to death Dag Drollett, 26, the boyfriend of his half-sister, Cheyenne Brando, 20, in their father's 12-room estate in the Santa Monica Mountains on May 16.

Prosecutors said the shooting was pre-meditated. They claim Christian Brando accused Drollet, the son of an influential political figure in Tahiti, of beating his half-sister.

Prosecutors said Drollet was shot in the head at point-blank range while watching television. They said his body was found with a television remote control in one hand and a cigarette lighter in the other hand.

Christian Brando told police that he accidentally shot Drollet while he and the victim were wrestling for the weapon, a .45-caliber handgun.

''I shot him, man, but not on purpose,'' Los Angeles police quoted Brando as telling them after the incident. ''Please believe me. I wouldn't do it my father's house.''

However, prosecutors say that Cheyenne Brando in mid June gave a statement to police in which she indicated that Christian had pre-meditated the slaying. Shortly after giving that statement, Cheyenne returned to Tahati, where she is a citizen, in an apparent move to avoid testifying against her half brother.

She has since given birth to Drollet's child.

Marlon Brando was home at the time of the shooting, but was in a different room. He telephoned police after hearing the gunshot.

#90219u1412 08/07/1990 ~United Press International

JERUSALEM (AUG. 7) UPI - Police increased patrols in Jerusalem Tuesday to prevent revenge attacks on Arabs during the funerals of two Jewish teenagers found stabbed to death near an Arab neighborhood.

Palestinian cars were stoned and Arab workers beaten Tuesday morning, but the number of incidents was much lower than on Monday evening when hundreds of Jews joined the anti-Arab violence. In Israel, the slayings have overshadowed the developing crisis in the Persian Gulf.

Police were investigating whether the shooting death of a Palestinian woman from the West Bank city of Hebron was related to killings of the two Jewish teenagers.

Jewish settlers said the killing might have been related to Arab collaborator activity, but warned that Arabs should realize that attacks on Jews cause attacks on Arabs, Israel Radio reported.

Widespread disturbances erupted in Jerusalem Monday after police found the bodies of two Jewish teenagers missing since Saturday.

Lior Tubul, 17, and Ronen Karamani, 18, had been bound and stabbed in the back. Police said they believed the killings were political and not criminal and had been committed by Arab nationalists.

Despite calls for restraint, more than 20 Arab-owned cars were damaged by rocks and several vehicles set on fire in the anti-Arab violence that lasted until nearly midnight Monday. Police said most of those participating in the rock-throwing were teenagers or members of the extremist anti-Arab Kach movement.

Palestinian sources said Azizeh Salem Jaber, 25, was shot in the head as she road in a car with her brother-in-law after leaving his pregnant wife at a hospital Monday evening. The driver of the car, Najeh Omar Jaber, 24, who was wounded by bullet fragments in the back, said as many as 15 shots were fired at his car as it passed near the Jewish settlement of Kiryat Arba.

Large numbers of police patrolled Jerusalem to prevent violence during the youths' funerals Tuesday.

Prominent Palestinians issued a statement expressing sorrow about the deaths and denounced the killing of innocent people on both sides of the Israeli-Palestinian conflict.

The statement said the deaths were ''the fruit of the evil'' planted by the Israeli occupation and blamed them on Israel's ''refusal ... to deal seriously with the peace process.''

In the wake of the killings, right-wing Israeli politicians called for the arrest and deportation of prominent Palestinians, charging they were the leaders of the Palestinian uprising.

#90219u1429 08/07/1990 ~United Press International

NEW YORK (AUG. 7) UPI - Television viewers boarded the rerun express in a big way last week with repeat programs, ranging from sitcoms to movies, all ranking in the top 10, it was reported Tuesday.

Competition was neck-and-neck among the networks in the weekly Nielsen ratings race. NBC had three shows, including the top-rated ''Cheers,'' in the top 10. CBS had three shows as well, while ABC and Fox had two shows each.

It was a five-show pileup in third place, with NBC's ''Empty Nest'' and ''Unsolved Mysteries'' garnering a 13 rating and a 26 share, ABC's ''America's Funniest Home Videos'' and ''Roseanne'' with a 13 rating and a 24 and 22 share respectively, and Fox's ''Married...With Children'' with a 13 rating and 22 share.

The share for ''Roseanne'' was one of the lowest ever in its regular time period.

The July 31 broadcast of part 2 of the CBS movie ''Murder Ordained'' fared well in 10th place. In the previous ratings period, part 1 of the movie tied for the No. 3 spot.

In addition to ''Married...With Children,'' Fox scored high with ''The Simpsons'' in ninth place. Missing from the top 10 was NBC's ''The Cosby Show,'' which dropped to 11th place. ''The Simpsons'' is slated to go head to head with the Cosby juggernaut in the coming fall season.

In the weekly network competition, NBC edged into first place with a 9.0 rating and a 17 share, followed by ABC with an 8.9 rating and a 17 share. CBS posted an 8.5 rating and a 16 share and Fox earned a 5.2 rating and a 10 share.

On a night-by-night basis, CBS won Sunday, Monday and Tuesday, NBC won Wednesday, Thursday and Saturday and ABC took Friday.

''Peak freaks'' held sway in the Sunday night movie race, with ABC's rebroadcast of the two-hour pilot of ''Twin Peaks'' scoring an 11.6 rating and a 20 share, tying for 14th place with CBS's ''Murder, She Wrote.''

NBC's Sunday night movie entry, ''Parker Kane,'' one of the few original broadcasts for the week, landed in 31st place with a 9.9 rating and a 17 share, and CBS's repeat of the TV movie ''Leap of Faith'' was grounded in 46th place, tied with ABC's ''Growing Pains'' and ''Head of the Class.''

For news, once again more Americans watched ABC's ''World News Tonight'' with Peter Jennings, in first place with a commanding 8.8 rating and a 20 share.

However, ''NBC Nightly News'' with Tom Brokaw, which had been moving up on the outside, broke through to second place with a 7.8 rating and an 18 share, narrowly edging ''The CBS Evening News'' with Dan Rather, which had a 7.7 rating and an 18 share.

It was the first time since the week of April 2 that the NBC news broadcast was No. 2 in the rankings.

In the 46-week season-to-date competition, NBC has a 13.2 rating and a 23 share, followed by ABC with an 11.9 rating and a 21 share, and CBS with an 11.3 rating and a 19 share.

Each ratings point represents about 921,000 households. A share is the percentage of TV sets in use that are tuned to a particular show or network.

The top programs for the week ending Sunday, Aug. 5, according to the A.C. Nielsen Co., were:

1. Cheers (NBC)
2. 60 Minutes (CBS)
3. (tie) Empty Nest (NBC)
4. Unsolved Mysteries (NBC)
5. America's Funniest Home Videos (ABC)
6. Roseanne (ABC)
7. Married...With Children (Fox)
8. Designing Women (CBS)
9. The Simpsons (Fox)
10. Murder Ordained, part 2, CBS Tuesday Movie

#90219u1448 08/07/1990 ~United Press International

(AUG. 7) UPI - Iraqi President Saddam Hussein took a hard-line stance on U-N-endorsed trade sanctions, vowing to repel any attack on Iraqi forces in Kuwait. But Hussein also sought to ease fears of a hostage crisis by saying Iraq may free 400 foreign nationals seized in Kuwait. To prevent Iraqi military action beyond Kuwait, the Soviet Union announced today it is sending two warships to the Persian Gulf region where the United States already has mounted a formidable naval presence.

Turkey says it agrees in principle with U-N-endorsed sanctions against Iraq and implied it was closing two Iraqi oil pipelines on Turkish territory. The move comes after Turkish President Ozal held an emergency

Cabinet meeting yesterday. A government spokesman implied, but did NOT directly say, that Turkey will close two Iraqi oil pipelines. He also denied reports that American F-111 bombers landed at a U-S air base in southern Turkey, some 400 miles from the Iraqi border.

Bulgaria's government resigned today... clearing the way for the formation of Bulgaria's first democratically elected Cabinet in four decades. Prime Minister Andrei Loukanov handed in his government's resignation in the planned move. He's expected to stay on to form the new Cabinet. Loukanov, a member of the former Communist Party now known as the Socialists, says he'll include members of the democratic opposition in his new government.

U-P-I today obtained a letter of apology which California Representative Fortney ''Pete'' Stark sent to Health Secretary Louis Sullivan. The white Democratic lawmaker had called the black Cabinet member a disgrace to his race for allegedly reversing personal views to gain the government post. Stark says in the letter dated August 6th that his comments were ''indefensible.''

(AUG. 7) UPI - West German Chancellor Kohl failed to strike a deal with his political rivals to move up the date of all-German elections from December to October. Kohl told reporters in Bonn there was agreement that German unification should be completed soon, but NO deal was reached on changing the election date. Political analysts say the Social Democratic party challenging Kohl would have a better chance to win an end-of-the-year election.

NASA managers today canceled a planned fueling test for the shuttle Columbia to save time in preparing the spacecraft for launch. The cancellation of the August 23rd test moves Columbia's launch date up about five days to around September 1st. Authorities say they'll use sensors during the shuttle's fueling process just before launch to determine whether Columbia still has a fuel leak.

#90219u1468 08/07/1990 ~United Press International

BANGKOK, Thailand (AUG. 7) UPI - A senior army commander charged that some civil servants are helping civilian political parties and anti-government groups to plan disturbances set for Wednesday, official Rangoon radio reported.

''Some public service personnel are engaging in politics on office time and are operating in their departments - either quietly or openly,'' said Maj. Gen. Myo Nyunt, the military chairman of Rangoon. ''They are using

office equipment to print and spread propaganda.''

Myo Nyunt said in a speech broadcast Monday night the military would take ''severe action'' against such civil servants.

Under martial law, the local military commander can hand down the death sentence for violations of tight restrictions on political activity that remain in place despite the May 27 elections that gave an overwhelming mandate to the leading opposition political party.

The Rangoon commander said the propaganda campaign, aided by foreign radio stations, was aimed at creating mass disturbances on Wednesday, the second anniversary of nationwide demonstrations calling for a return to democratic rule.

''We have already stated categorically that we will not allow a recurrence of the 1988 situation,'' he said.

Myo Nyunt said the military junta was ruling under martial law that gave it ''the right to take immediate action and we are capable of taking such action.''

He denied what he said were rumors of a split between him and military intelligence chief Maj. Gen. Khin Nyunt (no relation).

''This rumor was spread to create division,'' he said.

Myo Nyunt reiterated that the military would not yield power until a new constitution had been drafted to the satisfaction of the military and approved by the people.

Civilian politicians have charged that the military is deliberately drawing out the process for the civilian government to take office in order to hold onto power.

#90219u1489 08/07/1990 ~United Press International

DENVER (AUG. 7) UPI - Gov. Roy Romer ordered a statewide grand jury investigation Tuesday into allegations that homebuilder M.D.C Holdings and the failed Silverado Banking, Savings and Loan may have made illegal contributions to his and other political campaigns.

M.D.C. and Silverado may have laundered political contributions to several local, state and federal campaigns by funneling the payments through subcontractors and employees, according to accounts in The Denver Post and the Rocky Mountain News.

Romer said he had ordered Attorney General Duane Woodard to act as a special prosecutor and convene a statewide grand jury to investigate the allegations. The Colorado Bureau of Investigation was ordered to aid Woodard's investigation.

The Democratic governor, who is up for re-election this year, also placed $32,900 in an escrow account, representing contributions his 1986 campaign received from Silverado and two developers implicated in the thrift's failure, Ken Good and Bill Walters.

Romer said he would give the money to the Resolution Trust Corporation if Woodard's investigation showed the contributions were illegal or should have gone to pay off the debt being picked up by taxpayers because of the thrift's failure in 1988.

The Rocky Mountain News said M.D.C. "systematically pressured subcontractors for hundreds of thousands of dollars in contributions on behalf of state political candidates for at least four years." One contractor said M.D.C. promised to reimburse him by padding invoices on building services, the newspaper said.

Silverado's failure, which could cost the taxpayers $1 billion, has been under investigation by the government's Office of Thrift Supervision. It has become a symbol of the thrift industry debacle partly because a former director of Silverado was Neil Bush, son of the president.

"I was shocked by the allegations of laundering in numerous campaigns, including my campaign, in 1986," Romer told a news conference. "I had absolutely no knowledge of this event."

The governor said politicians are forced to raise large amounts of money and must take most of it "in good faith." He also said he had never received any contact from anyone associated with Silverado seeking favors because of the contributions.

#90219u1496 08/07/1990 ~United Press International

HOLLYWOOD (AUG. 7) UPI - ''Ghost,'' materializing as the summer's surprise hit, floated past Harrison Ford's courtroom drama ''Presumed Innocent'' to narrowly spirit away the No. 1 spot at the box office by taking in $10.8 million over the weekend at 1,766 screens.

''Ghost,'' a love story-thriller starring Patrick Swayze and Demi Moore, had finished in first place two weekends ago in its second week of release and landed in second place on its first and third weekends. It has scared up an impressive $69.1 million in ticket sales in 24 days for Paramount Pictures.

Overall, the top 10 films did a solid business over the weekend with $61.1 million in ticket sales, up 4 percent from the $58.9 million in the year-ago period and off 4 percent from the previous weekend's brisk $63.5 million.

For the week, the domestic box office totaled $132.3 million, up from $126.4 million for the same week last year and $118.5 million two years ago.

The weekend pushed the year-to-date box-office total to $2.94 billion, off slightly from the $3.02 billion at this point last year, when audiences bought a record-setting $5 billion in tickets.

''Presumed Innocent'' continued to make a persuasive argument as audiences gave it a second place verdict on its second weekend, with $10.2 million at 1,380 screens. The Warner Bros. release, based on Scott Turow's best-selling novel about a prosecutor charged with murdering his estranged lover, has brought in a convincing $28.4 million in 10 days of release.

Fox's ''Young Guns II'' blasted its way into the No. 3 spot with a fairly explosive weekend gross of $8 million in 1,770 theaters. The Wild West sequel, starring brat-packers Kiefer Sutherland and Emilio Estevez, has taken in an arresting $11.8 million in five days of release.

''Problem Child'' kept up its hell-raising pace for Universal in its second weekend, taking in $6.8 million at 1,768 screens, as it moved from third to fourth place. The comedy, starring John Ritter as the adoptive father of a devilish child, has taken in a boisterous $22.1 million in 10 days.

Disney's horror-comedy ''Arachnophobia'' scurried from fourth to fifth place, but still showed some legs in its third weekend, with $5.9 million on 2,005 screens. The film, the first release from Disney's Hollywood Pictures unit, has entangled a solid $34.1 million in its web during 19 days of release.

''Die Hard 2,'' which shot into first place on three consecutive weekends last month, fell from fifth to sixth place with $4.8 million over the weekend on 1,946 screens. The sequel, which sees Bruce Willis reprise his role as an off-duty cop taking on terrorists, has attacked the box office for an impressive $95.6 million gross during its first five weeks in release.

Spike Lee's tribute to jazz, ''Mo' Better Blues,'' hit the right notes with audiences and finished in seventh with a swinging opening weekend of $4.4 million at 544 screens for a lively per-screen average of $8,065.

Disney's animated feature, ''Duck Tales,'' flew into eighth place with an opening weekend of $3.8 million at 1,549 screens.

Meanwhile, the studio's comic-book extravaganza, ''Dick Tracy,'' became the fifth film released this year to top $100 million with a $2 million week at 990 screens to bring its gross to $101.1 million.

The year's top performer, ''Pretty Woman,'' kept showing its legs, adding $1.1 million over the weekend at 892 screens. After 20 weeks of release, its gross has reached $164.1 million.

For the year, the second, third and fourth best grossers: ''Teenage Mutant Ninja Turtles,'' $131.4 million in 19 weeks; ''The Hunt for Red October,'' $120 million in 22 weeks; and ''Total Recall,'' $112.8 million in 10 weeks.

The top 10, last weekend's gross, total gross, weeks in release:

1. ''Ghost,'' $10.8 million, $69.1 million, 4 weeks.
2. ''Presumed Innocent,'' $10.2 million, $28.4 million, 2 weeks.
3. ''Young Guns II,'' $8 million, $11.8 million, 1 week.
4. ''Problem Child,'' $6.8 million, $22.1 million, 2 weeks.
5. ''Arachnophobia,'' $5.9 million, $34.1 million, 3 weeks.
6. ''Die Hard 2,'' $4.8 million, $95.6 million, 5 weeks.
7. ''Mo' Better Blues,'' $4.4 million, 1 week.
8. ''Duck Tales,'' $3.8 million, 1 week.
9. ''The Freshman,'' $3.4 million, $10.1 million, 3 weeks.
10. ''The Jungle Book,'' $2.6 million, $31.7 million, 4 weeks.

#90219u1502 08/07/1990 ~United Press International

WASHINGTON (AUG. 7) UPI - The manufacturer of a potentially defective heart valve Tuesday announced plans to notify patients who have the devices in their chests of the possible dangers.

Shiley Inc. of Irvine, Calif., a subsidiary of Pfizer Inc., of New York, said it would establish a patient registry to ''facilitate the flow of medical information to these patients.

The action comes in response to concerns raised by the Public Citizen Health Research Group in Washington, a consumer group that asked the Food and Drug Administration in July to order the company to warn patients.

About 86,000 people were implanted with the Bjork-Shiley ''convexo-concave'' heart valve, which was voluntarily withdrawn from the market in November 1986 - five years after the first reports of life-threatening valve fractures surfaced.

The company sent warning letters to surgeons who implanted the devices, but Public Citizen contended each patient deserved direct notification.

Public Citizen estimates that at least 50,000 people worldwide still have the valves, including about 20,000 in the United States.

''The program will help promote patient awareness of the signs and symptoms of the serious of life-threatening complications associated with all mechanical valves, and the steps to be taken in the event emergency medical treatment is required,'' Shiley said in a statement.

''Whereever possible, the information will be provided through the patient's personal physician, although the program will also be designed to provide information directly to patients if necessary,'' the company said.

''The FDA's concern and reevaluation as well as (Public Citizen's) interest in enhanced patient communications were among the several important factors in our decision to attempt to develop a patient registry '' said Dr. Roger Sachs, vice president and medical director of Shiley, in the statement.

Shiley officials have said replacing valves already in patients would be foodhardy because the death rate from replacement surgery would be about 5 percent, far higher than the .02 percent to .13 percent annual risk that a Shiley valve will fail.

In May, a California judge dismissed a lawsuit filed by Public Citizen against Shiley and Pfizer, citing a technicality, that sought to force the companies to warn patients.

As of July 6, 395 of the valves had fractured, leading to at least 252 deaths, Public Citizen said. The death toll may be as high as 750 because not all deaths have been reported to officials, Public Citizen said.

''Pfizer is to be commended for changing its mind because its about face will save the lives of many patients,'' Public Citizen said in a statement.

#90219u1578 08/07/1990 ~United Press International

NEW YORK (AUG. 7) UPI - Electricity bills in the New York metropolitan area could jump by mid-September as the higher cost of fuel oil generated by the Iraqi invasion of Kuwait is passed to consumers, utility executives said Tuesday.

Long Island Lighting Co. and Consolidated Edison, which provide power to Long Island, New York City and most of Westchester County, have been hit

by jumps of as much as $5 a barrel in No. 6 fuel oil, executives said.

No one could predict just how much the hikes could be.

Public officials pointed out, however, that both utilities have millions of gallons in reserve, and vowed that consumers' electricity bills would not be affected until the higher-priced oil reaches power generators.

Marty Gidden, spokesman for Consolidated Edison, said the company had ''several million barrels in storage that we bought at earlier prices.''

He said that in the summer, Con Ed burned natural gas that wasn't needed to heat homes and businesses, and that helped to stretch fuel oil reserves. He added that Con Ed also could tap into nuclear-generated power.

''Last year, a quarter of (our) electricity use came from natural gas,'' Glitten said.

But he said the price jumps ''certainly are going to have an impact on the fuel adjustment portion of bills.''

''You certainly are going to see the price start to go up in the next month or 45 days,'' he said.

Elaine Davis, spokeswoman for the Long Island Lighting Co., said LILCO had 1.8 million gallons of No. 6 fuel oil in reserve, and another 1.8 million gallons ''on the way that we purchased before the Kuwait situation.''

''These inventories will be burned through August and well into September '' she said, and predicted that any higher-priced oil would not be used by LILCO for six or eight weeks.

She said LILCO was mostly dependent on No. 6 oil, but occasionally used natural gas to power two smaller generating units.

Davis said there was usually a lag in billing, and consumers billed on the monthly budget program would see the hike first, probably in their October bill, then others on their regular two-month billing for October-November.

''We hope that prices will start to go down,'' she said. ''Nobody wants to raise prices, and we are constantly looking at the market and trying to buy the cheapest oil possible.''

#90219u1598 08/07/1990 ~United Press International

CAMBRIDGE, MASS. (AUG. 7) UPI - American automakers will continue to lose U.S. market share to the Japanese in the 90s as the industry faces a stagnant domestic market, tougher competition and more government regulation, a management consulting firm predicted Tuesday.

Meanwhile, the process of making cars ''will undergo more extensive and exciting changes'' than in any previous decade because of a ''new emphasis on design and technology,'' the consultants, Arthur D. Little Inc., said.

''By the year 2000, the typical automobile will have $2,000 worth of electronic components, versus $200 in 1980,'' Little said.

Also, ''servicing and repair of automobiles, a traditional customer, complaint, will become a major arena of competition ... particularly with the lower production volumes as a result of the sluggish demand and niche marketing.''

The firm said ''cars will be dramatically redesigned, causing today's vehicles to appear visually and functionally dated.''

But cars will be more expensive, Little believes. ''Increased use of materials such as aluminum and plastics, introduced to reduce weight and improve fuel economy (to meet more stringent federal requirements), also will simplify assembly and yield greater design freedom, while at the same

time increasing the cost of cars and trucks.''

The erosion of the U.S. automakers' share of the domestic market will continue at a slower pace than in the previous decade, Little estimated. The Big Three automakers' share of the domestic market likely will slip to 59 percent by 1995 and the Japanese share will climb to 31 percent from 29 percent five years ago, the company said.

In just the five years from 1985 through 1989, the U.S. carmakers' share plunged to 61 percent of all autos sold in the United States from 71 percent at the start of the period, Little said.

NEW YORK (AUG. 7) UPI - Hank Steinbrenner will have to wait a while before New York Yankees partners can vote on his nomination to succeed his father as general partner of the team.

A meeting of partners scheduled in Cleveland for Wednesday has been

postponed because of a family emergency involving one of the partners. The partners have not set a new date but it's unlikely the Yankees will have a new general partner in place by Aug. 20.

That is the date Commissioner Fay Vincent told Yankees principal owner George Steinbrenner he must permanently resign as general partner. George Steinbrenner has nominated his son Hank to take over the club and he must first be approved by 67 percent of the Yankees partners.

Vincent, who punished George Steinbrenner for paying $40,000 to a gambler for providing information on former Yankee Dave Winfield, has said he will not delay his sanctions if the Yankees don't have a replacement for Steinbrenner by Aug. 20.

''If George has to step down, I guess the place will run itself for a while,'' one Yankees official said Tuesday.

If Hank Steinbrenner is approved by the partners, he must then gain approval from 10 of the 13 remaining American League owners and a majority of the 12 National League owners.

#90219u1640 08/07/1990 ~United Press International

(AUG. 7) UPI - Iraq's President Saddam Hussein warned today he will confront what he described as ''any imperialist, Zionist attack'' against Iraqi forces occupying Kuwait. The official Iraqi News Agency says Hussein met in Baghdad with the prime minister and military commander of the government he installed after the Iraqi invasion of Kuwait Thursday.

The Soviet Union says two of its warships are on their way to the Persian Gulf. But the Soviet foreign minister in Moscow today said there's NO intention to ''flex any muscles'' there. The Soviet press notes Iraq is a long-time ally... but says the Soviets cannot excuse what it called ''the plundering'' of Kuwait.

The Kuwaiti resistance movement says it has killed or wounded 11 Iraqi soldiers. The Kuwaiti News Agency says Kuwaiti soldiers and civilians used machines guns and grenades to launch three attacks against Iraqi forces. The news agency also said Kuwait radio resumed broadcasting today with anti-Iraq programs.

In Bonn... West Germany's top political leaders could NOT agree today on when to hold elections for a unified Germany. Chancellor Kohl wants to move the vote up to October and to merge the two states at the same time. But the opposition Social Democrats want the election in December... counting on hard times to help the party's cause by then.

Democratic Representative Fortney ''Pete'' Stark of California has apologized to Health Secretary Louis Sullivan. U-P-I today obtained a copy of yesterday's letter... in which Stark calls his earlier remarks against Sullivan ''indefensible.'' Stark had called Sullivan a ''disgrace'' to the black race because of his stands against abortion funds and national health insurance.

WASHINGTON (AUG. 7) UPI - Here are the names and types of the major U.S. warships in the eastern Mediterranean Sea and Persian Gulf region:

(Eastern Mediterranean - Eisenhower battle group, 13 ships)

USS Dwight D. Eisenhower, Nimitz-class, nuclear-powered aircraft carrier

USS Ticonderoga, guided-missile cruiser (with AEGIS air defense system)

USS Scott, guided-missile destroyer

USS Tattnall, guided-missile destroyer

USS Peterson, destroyer

USS John L. Hall, guided-missile frigate

USS Paul, frigate

Oilers, ammunition ships, etc.

(Northern Arabian Sea - Independence battle group, 13 ships)

USS Independence, Forrestal-class aircraft carrier

USS Antietam, guided-missile cruiser(AEGIS equipped)

USS Jouett, guided-missile cruiser

USS Goldsborough, guided-missile destroyer

USS Brewton, frigate

USS Reasoner, frigate

Oilers, ammunition ships, etc.

(Joint Task Force-Middle East in Persian Gulf, 8 ships)

USS LaSalle, command ship

Guided-missile cruiser (not identified)

Destroyer (not identified)

USS Robert G. Bradley, guided-missile frigate

USS Taylor, guided-missile frigate

frigate (not identified)

frigate (not identified)

frigate (not identified)

(On way to Mediterranean - Saratoga battle group, 15 ships)

USS Saratoga, Forrestal-class aircraft carrier

USS Wisconsin, battleship

USS Philippine Sea, guided-missile cruiser (AEGIS equipped)

USS Biddle, guided-missile cruiser

USS Sampson, guided-missile destroyer

USS Spruance, destroyer

USS Elmer Montgomery, frigate

USS Thomas C. Hart, frigate

USS Detroit, fast combat ship

Oilers, ammunition ship, etc.

Mediterranean Amphibious Group - 2,100 combat Marines

USS Inchon, amphibious assault ship

USS Nashville, amphibious transport ship

USS Whidbey Island, dock landing ship

USS Newport, tank landing ship

USS Fairfax County, tank landing ship\

#90219u1652 08/07/1990 ~United Press International
ANCHORAGE, AK (AUG. 7) UPI - Officials in Alaska, which receives 85 percent of its revenues from oil royalties, are reacting cautiously to the events unfolding in the Middle East that have sent oil prices soaring.

''The situation is so unclear. The situation needs to clarify. It may take days. It may take weeks. We have to wait and see what happens next, talk to our advisers,'' Hugh Malone, Alaska's revenue commissioner, said Tuesday.

Alaska is the nation's largest oil-producing state. At 1.8 million barrels per day, Alaska provides approximately one-fourth of U.S. needs.

After the Iraqi invasion of Kuwait, Alaska's congressional delegation has begun a push to open the Arctic National Wildlife Refuge to oil exploration.

Efforts to open the refuge have been stymied ever since the Exxon Valdez spilled nearly 11 million gallons of crude in Prince William Sound in March 1989.

Declining oil revenues in the past year also has forced Gov. Steve Cowper to make more than $325 million in cuts from the state's $2.9 billion budget. The cuts included a new deposit to Alaska's Permanent Fund account from which residents are annually paid dividends ranging from $500-$1,000 per person.

''We don't have any reason to think the events of the last few days suggest any reason to make any immediate policy changes or changes in operations right now,'' Malone said.

Alaskan policy-makers are being advised that long-term fiscal implications of the invasion will depend on changes in daily Mideast oil production and pricing levels that may be affected by Iraqi initiatives and world reaction.

Until production levels change, Malone said, ''We have to think this is a temporary aberration.''

Malone added, however, that advisers have warned the situation in the Mideast could remain unstable and dangerous.

''No one can predict what the Iraqis will do next, and whatever they

decide, if we don't like it, the only thing that will change their mind is military force,'' Malone said.

State Rep. Kay Brown echoed concerns expressed by the governor and others in the state that Alaskans don't want to be viewed as profiting from an international crisis.

''Certainly Alaska's revenue picture is substantially improved with a higher price (for oil). At least hopefully we'd meet projections for the current year. But we don't know what the world situation will be from day to day. Alaskans want to see their budgetary situation settled, but not at the expense of the rest of the country and world peace,'' Brown said.

Brown said there is legislative sentiment for a special session, not entirely driven by the Mideast crisis, to address the governor's budget vetoes and a looming crisis in subsistence fish and game management.

But, she added, ''it seems awfully early'' to rely on what may be temporary oil price increases to solve budgetary woes, and there is overwhelming public opposition to tapping the Permanent Fund for that purpose.

''There's a lot of sentiment that if we restored the cuts it would only be if we balanced the budget. That means if we put something back, we'd take something else out. That really complicates the debate,'' Brown said.

#90219u1683 08/07/1990 ~United Press International

ATLANTIC CITY, NJ (AUG. 7) UPI - The 11 Atlantic City casinos that were in business a year ago made 14.3 percent less off of gamblers last month than they did in July 1989, New Jersey Casino Association officials said Tuesday. The fall-off is a "cause for concern," the business group's president said.

Not counting the Taj Mahal, which opened in April, the city's casinos had a July win of $247.2 million - a decrease of more than $40 million from $288.4 million a year earlier. The figures are even gloomier than estimates released last week by the association, which projected the casinos made nearly $250 million in July.

Adding the $40 million won by the Taj Mahal, the casinos made $1.3 million less last month than in 1989. The association had forecast the casinos' total win would be $2.1 million more than in July 1989.

Tom Carver, the association's president, said the less than 1 percent discrepancy in the estimated and actual figures did not change the overall picture, which he said was bleak. "The fact we did not have any growth in

one of the major months of the year with a beautiful new facility is a cause of concern," Carver said.

Carver interpreted the latest win figures as a sign that Atlantic City has reached a point where there are too many casinos and not enough gamblers. "It's obvious we have too much capacity for the amount of market," he said. "What we have to do is expand the market."

Carver said Gov. Jim Florio's appointment last week of a new government panel to oversee the promotion and development of Atlantic City should help the New Jersey casino industry.

The "coordinating council" of state and local officials has set an ambitious agenda that includes developing a major airport, building a new convention center and sprucing up the city's physical appearance.

"For too long, the future of this city was left in the hands of a municipal government that wasn't prepared to handle it," Carver said. "Finally we have the government processes in order to turn Atlantic City into a year-round resort."

The latest figures showed too casinos made more money last month than in July 1989. The Claridge, the city's smallest casino, made $13.3 million for the month vs. $11.7 million, while the Sands reported a modest two percent increase.

Losers were led by Trump Castle, whose July gaming revenues plunged nearly 28 percent to $21.4 million from $29.7 million a year earlier. Other big losers were: Trump Plaza, down 23.6 percent, and Bally's Grand, down 20.1 percent.

#90219u1693 08/07/1990 ~United Press International

BOSTON (AUG. 7) UPI - Very overweight people who go on stringent diets apparently do not experience long-term metabolic changes that work against efforts to lose weight, scientists said Tuesday.

A study involving 18 obese women who were put on diets found that while their resting metabolic rates initially fell by more than twice the weight they lost, after 48 weeks their weight loss was greater than their metabolism drop, said Thomas Wadden of the University of Pennsylvania in Philadelphia.

Prior studies had indicated that when dieters cut back severely on calories, the corresponding slowing of their metabolisms hampered their ability to lose weight, even over a long period.

But the new study indicates that although falling metabolic rates might initially prevent the kind of weight loss dieters would otherwise expect from strict caloric cutbacks, the body readjusts itself over a long period and metabolism eventually is reset to a weight-appropriate level.

The findings show that dieting combined with modest physical activity does not result in metabolic rate reductions that exceed the degree expected with weight losses, Wadden and colleagues reported in the Journal of the American Medical Association.

The study shows that ''once you lose 30 to 50 pounds, your metabolic rate is lower, but it is a rate that is completely appropriate for your reduced body weight,'' Wadden said.

Metabolism refers to ''the amount of energy the body has to spend to maintain functions such as heart rate, blood pressure and temperature,'' he said. Resting metabolic rate refers to ''the amount of energy you expend if you are just lying in bed, doing nothing'' and accounts for about 70 percent of the calories most people expend in a day, he added.

In the study, nine women were limited to a 1,200-calorie daily diet for the entire 48 weeks, while the other nine women were restricted to a liquid diet of 420 calories for 16 weeks and then slowly returned to a solid food diet so that between weeks 24 and 48, they consumed between 1,200 and 1,500 calories daily.

The women in the 1,200-calorie group averaged 41 years old, while those in the other group had an average age of 34. The women weighed an average of 237 pounds when the study began.

During the first five weeks of dieting, those in the 1,200-calorie group experienced a drop of 10 percent in their resting metabolic rates and those in the group with the greater caloric restrictions had a 21 percent metabolic decrease. In both groups, the metabolic drops were about twice the percentage decreases in their weights, Wadden said.

But by the end of the study, those in the 1,200-calorie group had metabolic rates that were 9 percent lower than at the start and average weights 16 percent less than when they began. Those in the other group had an average 8 percent drop in metabolism and 19.5 percent drop in body weight.

The women on the constant 1,200-calorie diet lost an average of 40 pounds by week 48, while the others lost an average of 47 pounds.

While those on the more restrictive diet initially lost more than those on the 1,200-calorie diet, the fact that long-term weight loss in the two groups was not that much different means that ''it is hard to see much

advantage of one diet over the other,'' said Wadden.

The fact that women in both groups had lower metabolic rates after they lost weight was to be expected, he said, since ''like a small house versus a large house, it takes less energy to heat a smaller house.''

Wadden said only women were included in the study since he and the other researchers ''work mainly with women and women make up 75 percent of the dieters in the United States'' although the proportion of men and women who are overweight is roughly the same.

He cautioned that the study results dealt only with obese people and may not be applicable to those who are only a few pounds overweight. Wadden said he and his colleagues are now involved in one follow-up study involving obese men and another one looking at the impact of caloric restrictions on metabolic rates during exercise.

NAPA, CA. (AUG. 7) UPI - Fierce wind gusts slammed four hot air balloons to the ground Tuesday, injuring six riders who were tossed out as one of the giant balloons bounced back into the air.

A passenger in another balloon suffered a sprained ankle.

The worst injured was a woman who was admitted to Queen of the Angels Hospital in serious condition, Napa Fire Capt. Don Cohn said.

The excursion balloons, which take people on rides over the wine country, went down shortly after lifting off from Yountville when they were hit by gusts of 15 to 20 mph during a sudden lightning and windstorm, Cohn said.

The first balloon forced down spilled a woman from its passenger basket as it hit and then bounced back up 200 or 300 feet, Cohn said.

The balloon's other five passengers were thrown out when it hit the ground a second time, he said. They suffered minor to moderate injuries.

NEW YORK (AUG. 7) UPI - The union representing a quarter of the city's taxi drivers will propose a 25-cent surcharge on all taxi fares to compensate for the jump in gas prices sparked by the Persian Gulf crisis, officials said Tuesday.

The union said it would ask the city's Taxi and Limousine Commission at its monthly meeting Wednesday night to consider the surcharge to help drivers who have been pinched by the hike in gas prices, which have risen as much as 14 cents a gallon in the city since Iraq invaded Kuwait last week.

"Our members have spoken to us about it, we've been getting phone calls constantly," said Larry Goldberg, secretary-treasurer of the union, the Taxi Drivers and Allied Workers, local 3036, which represents about 6,000 of the city's nearly 25,000 cab drivers.

"The gas prices are killing them," Goldberg said. "Business has been slow as is this summer. Between the bad economy and the fear of crime and now this, taxi drivers are just not going out to work."

He said there was a precedent for the proposal - a 15-cent surcharge on taxi fares implemented following the 1973 oil crisis sparked by the war between Israel and Egypt. The 25-cent surcharge could not go into effect until the middle of September at the earliest, said Anthony Carter, a spokesman for the TLC.

The TLC will probably agree Wednesday night to hear the proposal, Carter said, thereby beginning the procedure by which the organization considers fare hikes. After the meeting, the TLC would schedule an open hearing on the surcharge to solicit comments on the matter from the public.

At its next meeting in September, the members of the TLC might then vote on the surcharge, said Carter, who pointed out that if gas prices decline by that time, the matter would be a "dead issue."

Ronald Stoppelman, the president of the Metropolitan Taxi Cab Board of Trade, which represents 19 taxi fleet owners, said his organization supported a surcharge, though one not as steep as that proposed by the union.

"I think 25 cents per trip for the driver only as a gas surcharge is slightly excessive," Stoppelman said. "Although, I don't know how much gas is going to go up (in the future). Something less would certainly be warranted."

He said the fuel price hike does not directly affect the MTCBT's members, who own and lease 1,821 of the city's 11,787 cabs to drivers. But he pointed out that if drivers feel they cannot make money, they will not lease cabs.

"It affects the fleet owner in terms of the driver coming to work," Stoppelman said. "If they don't come to work, obviously we're at a loss."

HONOLULU (AUG. 7) UPI - A yacht with an all-woman crew competing in the Kenwood Cup Hawaiian inter-island race apparently struck a reef off the island of Molokai before dawn Tuesday and sank, killing one crewmember.

The Japanese entry An, taking part in the race from Oahu to Maui and back, reported it was taking on water at about 5 a.m. off Cape Halawa on the northeast tip of Molokai, Coast Guard Petty Officer Sid Williams said.

The 40-foot vessel sank sometime between then and 5:20 a.m. about 300 to 400 feet offshore with 14 women aboard, Williams said. One of the crew members was from Hawaii and the rest were from Japan, race officials said.

Identity of the victim was not immedately established. Maui fire department divers recovered her body next to the sunken yacht in 30 feet of water, Coast Guard spokesman Dennis Hubbard said.

Other yachts in the race diverted to the scene, and the Will Jr. picked up 13 crew members, race officials said.

''There was extensive damage to the front end of the vessel, so it appears it may have run into the reef, which was 200 feet away,'' rescue Capt.

Conrad Ventura said.

The other 13 rescued crew members were reported safe and sound. They were being taken to Honolulu by another vessel, officials said.

WASHINGTON (AUG. 7) UPI - Investor fear over an oil shock pushed yields on three-year Treasury notes down to 8.10 percent in disappointing bidding Tuesday at the start of the government's three-day quarterly refunding.

"It doesn't look good," said Roger Craig, director of the fixed income portfolio at Banc One Asset Management Corp., in Columbus, Ohio. "Whenever a short issue like this has trouble in the market, it doesn't bode well for the longer issues."

The Treasury Department auctioned $11.53 billion of the eight percent interest rate notes at an average of $99.738 with 100 equaling the face value and one point representing $10 on each $1,000 investment.

At the last quarterly refunding, May 8, the average yield on three-year Treasury notes was 8.74 percent. Tuesday's 8.10 yield was the lowest yield on a three-year offering since 7.77 percent Nov. 9, 1989. In times of doubt, many investors prefer short-term securities, such as the three-year notes.

But against a backdrop of a new Mideast crisis and a weakening domestic economy, bids outnumbered acceptances by about 2.4 to one, which is considered a rather poor showing.

"This reflects more than anything else the uncertainty about the oil situation and the potential impact, if any, on inflation," said Samuel Kahan, chief economist at Fuji Securities in Chicago.

The quarterly refunding will continue Wednesday with an auction of ten-year notes totaling $10.5 billion. Cash raised through the auctions allows the government to settle its debts, including other securities reaching maturity.

On Thursday, the Treasury Department will auction 30-year bonds totaling $10.25 billion as well as 36-day cash management bills Thursday totaling $10 billion. All the issues offered through the refunding will settle Aug. 15.

There was doubt last week as to whether the refunding would go on as planned because Congress had yet to increase the debt limit. But lawakers passed a short-term bill granting $72 billion in additional borrowing authority through Oct. 2 to keep the government running.

Robert Glauber, the under secretary of the Treasury for finance, had said the quarterly refunding would be delayed if the House and Senate failed to pass the legislation increasing the debt limit.

MONROVIA, LIBERIA (AUG. 7) UPI - Seven African countries agreed Tuesday to send a peace-keeping force to Liberia after a rebel leader threatened to attack the U.S. Embassy in Monrovia in order to provoke international intervention in his country's civil war.

Liberian rebel leader Prince Johnson, who is holding an American and at least seven other foreigners hostage, said he would attack Marines protecting the U.S. embassy unless a U.S. or West African peace-keeping force was sent to end the fighting. Johnson also said he would hold the foreigners until the peace-keeping forces arrived.

The hostages were all abducted from a Monrovian hotel Monday, the day

after U.S. Marines evacuated 62 U.S. government employees, relatives and civilians from the war-torn country.

The hostages held by Johnson included three Britons, two West Germans, a Dutchman, an Argentinian and a U.S. mining contractor identified as Chris Mendes, 27, of Sacramento, Calif.

Diplomatic sources said representatives of the seven African countries, meeting in Banjul, Gambia, want to hold talks on Liberia that would include all political parties and ethnic groups in order to find a solution to the conflict.

Rebel leader Charles Taylor has been fighting for the past six months to overthrow Liberian President Samuel Doe, who took power in a coup a decade ago. When the rebels reached the capital of Monrovia last month, a splinter group led by Johnson broke from Taylor. Doe has remained in his presidential palace.

The United States staged Sunday's evacuation of U.S. embassy personnel when Johnson threatened to kill foreigners in a bid to force international intervention in the dispute.

State Department spokeswoman Margaret Tutwiler said in Washington the Marines would not intervene in the war.

''The U.S. Marines are in Liberia to defend the embassy, with force if necessary,'' she said. ''They are not there to intervene in the fighting.''

She said the rebel forces had not harmed the hostages, who are being kept in a location outside of the capital. U.S. officials have urged Johnson to release the group immediately.

African diplomats said they did not know how many soldiers would be included in the peace-keeping force or when it would be sent to Liberia.

Gambian President Dawouda Jawara, the host of the talks, said it was no longer possible to allow the situation in Liberia to deteriorate given the high loss in human lives during the past several weeks.

The heads of state from the seven countries - Ghana, Gambia, Mali, Nigeria Togo, Sierra Leone, and Guinea - said it would like to organize a provisional Liberian government that would not be dominated by any one of the four main tribes in Liberia, which was founded in 1922 by former American slaves.

If it becomes reality, the peace-keeping force will mark the third time that an all-African army has intervened in a local conflict. Similar peace-keeping operations have been previously conducted in Chad and Zaire.

Johnson, speaking Monday to a crowd of 3,000 in rebel-held Bushrod Island, said, ''What this country really needs is the peaceful intervention of the United States or ECOWAS (Economic Community of West African States).''

''If they don't intervene, I will attack the American Marines,'' said Johnson.

The State Department said about 41 embassy personnel, including the U.S. ambassador, would remain in Monrovia with about 300 other Americans.

Also Tuesday, the Marines abandoned a series of roadblocks in front of the embassy and moved within the compound.

''There is no need to expose people,'' an embassy spokesman said. ''Initially we didn't know what people's reaction was going to be.''

Soon after the Marines withdrew from the street, heavy fighting broke out in the embassy district within a few hundred yards of the Marine positions. The fighting continued throughout Monday afternoon, although control of the area remained in doubt.

NEW YORK (AUG. 7) UPI - The Bank of New York said Tuesday it was dropping out of the ranks of primary dealers of U.S. government securities in the latest exit from a business whose once-hefty profits have become badly squeezed. BNY Securities Inc. would continue its trading activities for the proprietary account of the Bank of New York only, a spokesman said.

Bank spokesman Pierre Brull said what convinced the institution to get out of the wholesale trade in Treasury bonds was "simply the fact that the business, as you know, is no longer profitable enough to stay in it."

Brull declined to provide any figures on profits or losses from the business. But, "From a profit standpoint it became very marginal," he said adding that it was "not very profitable, but profitable" in 1989.

Asked whether recent sharp losses motivated the decision, he responded, "The Bank of New York is not in the habit of staying in a business and incurring huge losses before we decide to get out of it - it's not our style."

Said one New York bank analyst, who declined to be named, "It's not a big deal, I don't think. I'm sure it's just a judgment on what businesses are more profitable than others."

The Bank of New York's decision brought the number of U.S. securities primary dealers to 41, compared with 46 in 1989. The attrition is blamed on paper-thin profit margins in a crowded business short of customers.

More than half the country's primary dealers lost money in 1989, a senior New York Federal Reserve Bank official was reported to have said in a speech to dealers this year. Many others showed the barest of profits.

Last month Midland Montague Securities Inc., a unit of Britain's Midland Bank PLC closed its primary dealership, and shortly before that Westpac Banking Corp. closed its Westpac Pollock Government Securities Inc. In 1989 National Westminster Bank PLC and Lloyds Bank PLC both got out of the business, as did L.F. Rothschild & Co., a U.S. firm.

The ranks were also thinned by the bankruptcy filing late last year of Drexel Burnham Lambert Group Inc., which had a bond unit, and by Prudential-Bache Securities Inc.'s purchase of Thomson McKinnon Securities Inc.

#90219u1801 08/07/1990 ~United Press International

ST. LOUIS (AUG. 7) UPI - Emerson Electric Co. Tuesday reported third-quarter earnings of a record $160.5 million, or 72 cents a share, up 4.4 percent from the $153.8 million, or 69 cents a share, earned in the same period a year ago.

Sales for the quarter ended June 30 were $1.98 billion, also a record. The company had sales of $1.78 billion in the fiscal 1989 quarter.

Earnings for the fiscal 1990 nine months were $458.6 million, or $2.06 a share, up 4.6 percent from $438.4 million, or $1.96 a share, in the first three quarters of fiscal 1989.

Nine-month sales climbed to $5.5 billion from $5.3 billion.

Earnings, earnings per share and sales reported for the nine months were allcompany records.

The 72 cents a share earned in the latest quarter represented the highest achieved in any quarter in the company's history, said Charles Knight, chairman and chief executive officer.

Emerson, which also announced plans Tuesday to spin off five defense businesses as a separate company, manufactures a broad range of electronic electrical and other products for commercial, consumer, industrial and government and defense markets.

NEW YORK (AUG. 7) UPI - Only 0.6 percent of the nation's certified public accountants are black, up from 0.15 percent 20 years ago, according to a study published Tuesday in the Journal of Accountancy.

The study, commissioned by the New York State Society of CPAs, showed that black CPAs currently number less than 2,500 out of the nation's 400,000 CPAs.

A similar study conducted in 1969 identified 150 CPAs who were black in the country.

''Admittedly, progress has been made,'' said Bert N. Mitchell, a managing partner with Mitchell/Titus & Co., the accounting firm that conducted the study. ''Yet the profession is still a long way from true integration.''

Mitchell/Titus is the largest minority-owned accounting firm in the country and one of the 50 largest overall.

While blacks represent less than 1 percent of the accounting profession, blacks by comparison make up 3.3 percent of the medical profession and 2 percent of the legal profession.

The study said that the number of black-owned accounting firms has grown from under 30 to almost 200 in 20 years but that ''these firms are not participating in the expanded opportunities enjoyed by public accounting firms in general and report litle growth in size over the past few years.''

Although 55 percent of the black CPAs in the study reported beginning their careers with the industry's largest firms, only 10 percent are currently employed by the so-called Big Six, the study said.

To strengthen the number of black CPAs, the study recommends a number of measures, including more strident recruitment, internships for black accounting students and ''providing key management positions for blacks.''

#90219u2000 08/07/1990 ~United Press International

WASHINGTON (AUG. 7) UPI - Lawmakers vowed Tuesday to seek anti-price gouging legislation against oil companies, saying the government is powerless to stop "virtual thievery" by the industry in raising gasoline prices due to the Persian Gulf crisis.

At Senate and House hearings, some legislators and economists also urged the Bush administration to sell oil from the Strategic Petroleum Reserve as a way to reduce market concerns about future supply shortages and, thus slow rising crude oil prices.

Administration officials said that action was not warranted at present and that the reserve should be used only to cope with shortages, not to counter price swings.

However, an Energy Department official said the U.S.-led embargo against Iraqi oil could trigger a "severe energy supply interruption" requiring use of the 590-million-barrel reserve.

Oil industry officials also suggested the government might want to tap the reserve to calm oil markets and make up any shortfalls. But they spent most of their time rejecting intense criticism from lawmakers, some of whom accused the industry of being unpatriotic in imposing potentially ruinous gasoline price hikes on the U.S. economy.

The oil executives denied they were taking advantage of American consumers and said the price increases were the natural result of crude oil price hikes of $8 a barrel since the Iraqi invasion of Kuwait.

Legislators said the price increases at the pump were so enormous as to be indefensible, averaging 12.6 cents per gallon nationwide since last Wednesday - adding $33 million a day to Americans' fuel bill. "The American public is angry," Sen. Richard Bryan, D-Nev., told oil company executives at a Senate Commerce Committee hearing. "They are mad as hell."

Bryan said most Americans were prepared to accept some sacrifices to stop Iraq, but he added: "That in no way justifies the virtual thievery that we have seen over the last few days. The giant corporations are plundering the American consumer."

Sen. John Kerry, D-Mass., went further, saying of the industry's behavior: "It raises questions even about patriotism and the best interests of the country."

Legislators said the price hikes were especially galling because they followed two similar episodes last year - volcanic gasoline price rises in the wake of the Exxon Valdez oil spill in Alaska last March and the huge heating oil price increases during last December's cold snap.

Despite growing public outrage, however, administration officials and lawmakers agreed the president had no authority to roll back such price hikes, no matter how suspicious they seemed.

They said Bush's only options were "jawboning" the industry to reduce prices or launching an antitrust investigation into possible collusion by oil companies to boost prices - a tough crime to prove.

The Justice Department expressed concern about the price hikes Monday and said it would closely examine oil industry behavior for possible anti-competitive activity. However, Sen. John Kerry, D-Mass., said Attorney General Dick Thornburgh had "already articulated a kind of powerlessness."

Sen. Joseph Lieberman, D-Conn., said the government's impotence was intolerable in view of the oil industry's repeated "profiteering." "After putting up with oil industry ripoffs in the 1970s and as recently as last winter, it's time to say, 'enough is enough,' and it's time to give the government the power it needs to protect American consumers at a time of national crisis.

"We've had enough of oil industry mumbo-jumbo every time they pick our pockets," he added. "When they take us to the cleaners, we should take them to court." Lieberman did not detail his proposal but said it could be modeled on existing state laws in Connecticut and New York.

Under intense criticism from lawmakers, Charles DiBona, president of the American Petroleum Institute, said oil companies were being unfairly maligned and that similar allegations in the past had been refuted.

He pointed to a recent Energy Department report that cleared the industry of improper behavior in the heating oil price increases of last December. The report said the price hikes resulted from normal market forces.

DiBona said while heating oil prices went up in December when demand rose, they fell in January when weather got warm and consumption dropped, illustrating the free market forces at work.

However, lawmakers said Energy Department data showed gasoline prices invariably and immediately soared when crude oil prices went up, but that pump prices did not decrease as sharply when crude oil prices fell.

"I don't see the same reaction driving (gasoline) prices down immediately " Bryan told DiBona. "Apparently the laws of economics only work one way - against the consumer. It's heads you all win and tails the consumers lose."

ANALYSIS BY LEE STOKES

CAIRO, EGYPT (AUG. 7) UPI - Profits from soaring oil prices may bring gulf crude producers more cash but little in the way of security from regional bully Iraqi President Saddam Hussein, analysts said.

''Oil producers may increase their revenues in the short-term, but this income will be swallowed up by Western arms purchases,'' said Ian Jones, a Cairo-based writer on Middle East affairs.

''Nobody's thinking about making a quick buck but about how to survive the military threat from Iraq,'' he said.

''Most of these states are already armed to the teeth ... so money alone, even lots of it, cannot buy them peace of mind.''

Other Middle East experts said to talk of fat profits for Persian Gulf crude producers at this stage showed a basic misunderstanding of the region's acute sensitivity to outside threats.

''To talk about the benefits of increasing oil prices is premature, and exposes the fragility of the region as a whole,'' David Butter, editor of the London-based Middle East Economic Digest told United Press International in a telephone interview.

''People in the Gulf wish this thing wasn't happening,'' he said. ''All of them, including Kuwait, invested huge amounts in security ... but it hasn't done them much good.''

He said oil producers might expect their revenue to increase as crude prices hit a five-year high at $28 a barrel, but they also knew that soaring energy costs could trigger a world recession, inflation and a fall in demand.

Western bankers in the gulf state of Bahrain said the whole region was marked by weak social, political and economic structures that did not inspire investor confidence at the best of times.

''The problem with the gulf banking institutions, for example, is that they are basically rather weak ... and this manifested itself when oil prices dropped in the mid-1980's,'' said one Japanese banker who asked that his name not be used.

''When you add military insecurity and fears about the free flow of oil through the gulf to problems associated with a basically weak infrastructure, then you are talking about countries with an uncertain future,'' the banker added.

Unlike gulf Arab states with relatively small populations, Persian Iran has demanded higher oil prices to finance the war-shattered and cash-strapped nation of 51 million's postwar economic recovery.

But Iranian Foreign Minister Ali-Akbar Velayati, during a visit to Damascus Monday, indicated that any extra revenues would have to be spent on the country's armed forces rather than on the economy.

''We need to ensure our armed forces are well-equipped ... we cannot sit idly by while Iraq occupies Kuwait,'' Velayati said.

On a purely economic level, one oil industry source in Abu Dhabi, United Arab Emirates, said Western pressure on Gulf producers to pump more and replace boycotted Iraqi and Kuwaiti crude could lead to further fluctuations on the market and doubtful benefits to producers.

Iran, Venezuela and the United Arab Emirates have already said they will not pump more than their OPEC-decreed quotas, apparently for fear that boycotted Iraqi and Kuwaiti crude might find its way on the black market

and depress prices.

''OPEC members could pump more crude on the quiet ... the gap is not so enormous, especially if the crisis (over Kuwait) can be resolved quickly '' the industry source said.

''There is a danger to producers of wildly fluctuating prices ... but the industrialized countries have large oil stocks ... if they keep their nerve they can last for a long time,'' the source added.

Gulf-based Western diplomats said the economic future of regional states was secondary to security considerations.

''During the gulf war, external rather than internal security was the major headache ... but these countries found it hard to admit they relied on outside powers for their protection,'' one Bahrain-based envoy said.

''When Iraq protected the Gulf Arabs from Iran, it exacted an economic price. ... When the West offers support against Iraq, it will also demand an economic price,'' the envoy added.

''But after Iraq's invasion of Kuwait, there is no talk here about the benefits from higher oil prices ... the danger is very real here now and the focus is on physical survival.''

#90219u2067 08/07/1990 ~United Press International
(AUG. 8) UPI - DIGEST:

Baseball

Hank Steinbrenner must wait before New York Yankees partners can vote on his nomination to succeed his father as general partner. A meeting scheduled for Cleveland Wednesday was postponed because of a family emergency involving a partner. It's unlikely the Yankees will have a new general partner by Aug. 20, when Commissioner Fay Vincent ordered George Steinbrenner to step down. ... The United States, backed by two homers from Chris Gomez of Loyola Marymount, routed Venezuela 13-4 at the World Baseball Championships in Edmonton, Alberta. The U.S. is 3-0 in the six-team division. The top four in each of the two divisions advance to Saturday's second round.

College

Following the lead of other conferences, the Pacific-10 is considering expansion. The league has made no formal moves but speculation centers on Brigham Young, Fresno State and San Diego State. ... Former Kentucky point guard Sean Sutton will be joining his father on the court again - at Oklahoma State. Sean Sutton did not play last year after leaving Kentucky. The Wildcats had been placed on probation and Coach Eddie Sutton was forced to resign. ... The basketball team of Upsala College of Division III was hit with NCAA sanctions for paying players, including cash handouts by the coach, and providing players with no-show jobs. Division III schools do not grant athletic scholarships.

Boxing

Promoter Butch Lewis may become an adviser to heavyweight champ James ''Buster'' Douglas against the wishes of manager John Johnson. Lewis has guided former heavyweight champ Michael Spinks and won legal battles against promoter Don King, HBO and the Las Vegas Hilton. ''(Douglas) needs a trench fighter,'' Lewis says.

Honors

The Ohio Baseball Hall of Fame inducted four members: pitchers Dave

Dravecky and Willis Hudlin; infielder and ex-manager Gene Michael, and outfielder Al Oliver.

Horse Racing

The Arlington Challenge Cup, jinxed by injuries that forced the retirement of Easy Goer and Sunday Silence, featured another casualty. Santangelo, who finished seventh in the eight-horse race, injured a tendon and will be retired to stud.

Law

Pete Rose, baseball's all-time hit leader, is expected to report to prison in Marion, Ill., by the end of the week to begin serving his five-month sentence for tax fraud.

Politics

Two Bulgarian women basketball players did not return home with their Goodwill Games team and remained in Seattle. That makes five Goodwill Games visitors who have spoken to U.S. immigration officials about asylum.

Soccer

A West German politician has proposed that stars who play abroad be banned from the national team. Some half dozen players from the World Cup champs play outside West Germany. The proposal was assailed by the team's coach and players. ... West Germany will play a squad of international stars in the second half of 1991, with proceeds going to UNICEF. ... Romania is planning a soccer players' union.

Yachting

A yacht in the Kenwood Cup race apparently struck a reef off the Hawaiian island of Molokai before dawn Tuesday and sank, killing one member of the all-female crew.

-30- 3365

#90219u2075 08/07/1990 ~United Press International

NEW YORK (AUG. 7) UPI - Stock prices closed lower Tuesday in the fourth straight day of heavy trading as selling tied to growing nervousness about the tensions in the Middle East erased early gains.

The Dow Jones industrial average, which plummeted 93.31 Monday in its biggest one-day drop since the October 1989 mini-crash, closed down 5.70 to 2710.64 after jumping more than 30 points in the opening minutes of trading.

Among broader market gauges, the New York Stock Exchange composite index edged up 0.13 to 183.45 and Standard & Poor's 500-stock index rose 0.40 to 334.83. The price of an average share rose three cents.

Declines led advances 840-739 among the 2,025 issues crossing the NYSE tape. Big Board volume totaled 231,580,000 shares, down from the 240,400,000 traded Monday but the fourth straight 200-million-share day.

After a three-day plunge following Iraq's invasion of Kuwait Thursday, stocks opened broadly higher after news that Iraq, facing U.N.-endorsed international trade sanctions and an oil embargo, said it was considering freeing about 400 foreigners seized in Kuwait.

Also heartening to traders, analysts said, was Iraq's denial of a Washington Post report that President Saddam Hussein threatened to attack Saudi Arabia if the Saudis shut down a pipeline that transports Iraqi oil to the Red Sea.

Within the first 15 minutes, the Dow industrials had jumped more than 30 points. But investors, nervous about what may happen in the region, then took prices down.

Later in the day, Saddam said his country would fight for "Arab honor," responding with defiance to crippling economic sanctions and an awesome gathering of international military might.

And the White House refused to comment on a CBS News report that members of the 82nd Airborne Division would be deployed to Saudi Arabia, which was sending troops to its border with occupied Kuwait to counter a feared attack by Iraqi troops.

ABC News, meanwhile, reported that Egyptian troops would move into Saudi Arabia to support that country. Analysts said all the reports of military activity made for a very jittery market.

"There's a lot of nervousness here," said James Andrews, first vice president in charge of institutional trading at Janney Montgomery Scott Inc. in Philadelphia.

"But the Dow basically hung in there at 2700 and it seems like we may be finding a bottom shortly," he said. "People are starting to see light at the end of the tunnel."

Andrews said the market seems to be running out of selling on the Mideast news. "We're down about ten percent from the highs and I've got to believe we're just about overdone here. The nervous nellies have already sold," he said.

Oil issues retreated after their rally of the past three sessions as the sharp rise in oil prices since the Iraqi invasion began to lose steam. Oil futures opened lower but were higher in late trading.

On the trading floor, Texaco was the most active issue, down 3/8 to 64 5/8. Alcan Aluminum followed, unchanged at 22 1/2. Wal-Mart was third, unchanged at 28 5/8.

General Electric was also active, up 1 1/4 to 67 1/4, as was Philip Morris up 1 1/4 to 45 1/4.

Among the other blue chips, AT&T rose one to 35 3/8, Sears fell 1 1/4 to 29 7/8, General Motors tumbled 1 3/8 to 40 1/8, Procter & Gamble jumped 1 5/8 to 77 1/4 and IBM lost 7/8 to 103.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 273,706,340 shares, compared with 273,264,110 shares traded in the previous session.

Prices closed lower in heavy trading on the American Stock Exchange. The Amex Market Value index fell 0.43 to close at 339.84. Declines led advances 343-265 among the 861 issues traded. The price of an average share fell two cents. Composite volume totaled 22,199,700 shares, compared with 26,885,000 shares traded Monday. The Kingdom of Denmark's put warrants on the Tokyo stock market's Nikkei index led the Amex issues, down 1/2 to 12 7/8.

The National Association of Securities Dealers composite index rose 2.04 to 402.08.

#90219u2111 08/07/1990 ~United Press International

WASHINGTON (AUG. 7) UPI - Last week, Congress bit the hand that feeds it. But representatives of political action committees whose hands are aching from the assault say legislation passed to restrict PACs is not likely to become law.

Even if some version is signed into law, PACs will find other ways to influence elections with their money, these officials say.

''You cannot eliminate the ability of an organization to be involved in politics,'' said John Motley, chief lobbyist for the National Federation of Independent Business, whose PAC gave $500,000 to Senate and House candidates during the last election cycle .

Motley predicted that contributions for advertising, voter registration and other efforts to help candidates would increase if the legislation

becomes law.

''I think (the legislation) was designed for members of Congress who can go home and say they voted for campaign finance reform,'' said Steven Stockmeyer, executive director of the National Association of Business PACs.

Before members of Congress scurried home for their summer vacations, they approved two versions of reform bills last week that took a broadside at the greatest perceived wrong of campaign fundraising - the lopsided domination of PACs.

The Senate bill would ban PACs, though lawmakers hastily approved a fallback position after questions were raised over the legality of the move. Many senators suspect the provision, if the bill becomes law, would be challenged and ruled unconstitutional as a violation of free speech.

The Senate would then reduce from $10,000 to $2,000 the total contributions PACs could make to candidates in an election cycle.

Senate supporters of the PAC proposals say the changes will diminish the role of PACs in elections, which they contend is a healthy evolution.

The House bill, intended to entice modest contributions, would reduce from $10,000 to $2,000 contributions PACs could make to candidates if they fill their coffers with employee and individual donations exceeding $240.

But House bill, if it becomes law, would not greatly alter the PAC landscape. Between January 1989 and March 1990, individual donations under $200 accounted for an impressive $154 million of the $198 million PACs received from individuals, according to the Federal Election Commission.

''I think that ($240) figure is clearly arbitrary,'' said Stockmeyer, who added that corporate PACs received an average $60 from employees during the last election cycle.

Critics contend the House legislation is specious because its contribution and spending limits are well above current levels.

The House bill would impose a ceiling of $275,000 in PAC contributions and a total spending limit of $550,000. Public financing provisions contained in the bill could raise that ceiling to $715,000 for many candidates.

In 1988, House incumbent victors spent an average $378,000 in their re-election bids, while PACs made average candidate contributions of $82,000, the FEC reported.

The Senate adopted a sliding scale for voluntary spending limits, ranging

from $950,000 to $5 million, depending on the size of a candidate's state.

#90219u2121 08/07/1990 ~United Press International

NEW YORK (AUG. 7) UPI - The dollar showed its safe-haven pulling power again Tuesday in New York trading as it moved up briskly on reports late in the day that the United States would send troops to defend Saudi Arabia.

As on previous days, the foreign exchange market was preoccupied with Mideast developments and watched attentively for signs that the West's standoff with Iraqi President Saddam Hussein might turn to war.

The dollar slipped in early trading but surged when CBS News said the United States would send ground troops and combat aircraft to buttress the Saudi defense against invasion by Iraq, which seized Kuwait last week.

"The dollar has gotten an additional boost today on the back of rising Middle East tensions," said Robert White, a vice president and corporate currency manager with First Interstate Bank Corp., Los Angeles.

In late New York trading, the dollar moved up to 1.5865 German marks against 1.5770 marks Monday. It was at 150.90 Japanese yen, up from 150.40.

Chemical Bank currency vice president Linda McLaughlin said dealing "got kind of nasty" after reports of a U.S. deployment decision.

She said the yen earlier reclaimed ground against the dollar on comments from the Bank of Japan calming the nervous Tokyo Stock Exchange, and rumors that U.S. and Japanese officials would act to stabilize markets.

But no one was ready to start selling dollars as most would be inclined to do on a purely economic basis. White of First Interstate noted that U.S. consumer credit plunged in June, indicating low confidence.

Such news "weighs the dollar down" even in the present crisis, White said. But, he added, "It's a very nervous market. People are trying to step very lightly and be very careful."

Other New York dollar rates: 1.3380 Swiss francs, up from 1.3310; 5.3180 French francs, ahead from 5.2850; and 1,160 Italian lire, off from 1,163. The British pound eased to $1.8710 from $1.8720.

In Europe, the dollar made small gains against most major European currencies in a calmer day on foreign exchange markets, analysts said.

They said speculators held back awaiting Mideast developments. "People played safe and stayed away from the dollar except for some shortcovering

" said a Lehman Brothers International trader.

With "no clear fresh news from the Gulf" there was a surge in cross-trading of the Swiss franc and the yen in particular, he said.

In Frankfurt, the dollar closed higher at 1.5790 German marks, against 1.5730 Monday. It rose in Zurich to 1.3315 Swiss francs from 1.3275.

In London, high British interest rates meant the pound remained a good bet on currency markets. It closed firmer at $1.8800 against $1.8740.

The U.S. unit was up in Paris and Brussels, at 5.2865 French francs compared with 5.2790, and 32.45 Belgian francs against 32.29. It was also up in Milan at 1,154 Italian lire against 1,153.20 Monday.

In Tokyo, the U.S. dollar soared to a four-week high against the Japanese yen on continuing tension in the Middle East. It closed at 150.60 yen, up 1.10 yen from Monday's close of 149.50 yen.

In Zurich, gold closed higher at $383.50 an ounce, against $382.25 Monday. In London, gold rose to $383 an ounce against $382.50.

Republic National Bank in New York closed cash gold slightly lower at $384.50 an ounce, compared with $384.75. The New York Commodity Exchange settled gold at $384.50 an ounce, also off from $384.70.

Silver was up in Zurich at $4.95 an ounce compared with $4.91. But it eased in London, to $4.89 an ounce against $4.90.

Republic closed cash silver at $4.89 an ounce, down from $4.915. Comex silver was also lower, at $4.857 an ounce compared with $4.892.

-30- 3898

#90219u2136 08/07/1990 ~United Press International

WASHINGTON (AUG. 7) UPI - The jury in the trial of Mayor Marion Barry reached a verdict on one of 14 counts Tuesday, but did not announce whether it found Barry guilty or innocent on the single misdemeanor cocaine possession charge in question.

Jury foreman Edward Eagles told U.S. District Judge Thomas Penfield Jackson that the jury had reached a verdict on Count 12, a charge that Barry possessed cocaine between Nov. 7 and Nov. 10, 1989.

A second juror, Hilson Snow, told Jackson that the jury was not yet prepared to announce its decision, and the judge accepted that.

Although Jackson had told the jury earlier it was allowed to return a

verdict in piecemeal fashion, prosecutors Tuesday asked that an announcement be delayed until a decision was reached on all the counts. Jackson overruled prosecutors and said that decision would remain in the jury's hands.

The jury then recessed for the day, its fifth day of deliberations. It was to resume deliberating on the 13 remaining counts at 9:30 a.m. Wednesday.

''The anxiety is great, let me tell you,'' Barry said outside court. ''There is a great deal of anxiousness on my part, a great deal of just feeling I made it through the waiting period.''

Count 12 refers to testimony of Doris Crenshaw, a former Barry friend who testified that on Aug. 26, 1989, she used cocaine with Barry at a hotel.

Last week, jurors had asked for an exhibit showing an agreement that Crenshaw had signed with prosecutors regarding her promise to testify truthfully.

Shortly before its announcement of a verdict on Count 12 Tuesday, jurors sent a note to Judge Jackson asking whether another government witness, Darrell Sabbs, had testified under any kind of agreement.

Jackson sent the jurors a note back saying there was no ''written agreement'' between Sabbs and prosecutors that could have prompted his testimony.

Sabbs, a friend of Barry's for two decades, testified that he used cocaine with Barry at least five times from 1986 to 1989.

But the testimony that was most important was his statement that he used cocaine with Barry on the date charged in Count 11, another of the 10 misdemeanor cocaine possession counts facing Barry.

The jury's question could be important because the government acknowledged that many of its other witnesses testified under plea agreements or with grants of immunity.

Asked his interpretation of Tuesday's events, Barry said: ''I have no idea. I can't read them. I can't tell what they're thinking about. My fate is in their hands. My faith is in God.''

Defense attorney R. Kenneth Mundy gave a thumbs-up sign to reporters, and said he was encouraged by the development, calling Crenshaw ''the government's strongest witness.''

''I'm still confident,'' Mundy said. ''Read your tea leaves.''

The jury, which has been sequestered for eight weeks, deliberated for nearly eight hours Monday without reaching a verdict and returned to the jury room Tuesday morning for its fifth day in deliberations. It broke at about 4:30 p.m.

The panel of 10 blacks and two whites, which has been sequestered since June 18, is considering Barry's guilt or innocence on three felony counts of perjury, 10 misdemeanor counts of cocaine possession and a single misdemeanor count of conspiracy to possess cocaine.

If convicted of all counts, Barry could be sentenced to a maximum of 26 years in prison and fined $1.85 million.

''I'm on an even keel here. I'm very hopeful. I'm very prayerful,'' Barry said. ''If I'm found guilty, my mood will be the same as if I were found not guilty. It's about an even keel.''

-30- 3876

#90219u2141 08/07/1990 ~United Press International

NEW YORK (AUG. 7) UPI - Madonna has hair that ''makes your head turn'' and Barbara Bush has hair that ''makes your stomach turn,'' according to results of a poll of leading hairstylists and colorists released Tuesday by the International Hair Color Exchange.

The national organization of 150 coiffure experts gave no reason for turning thumbs down on the first lady's matronly white curls or approving the free-fall blond locks of pop music's material girl. But it put Bush at the top of its list headed ''Awful Hair/Women'' and named Madonna No. 1 on its ''Great Hair/Women'' listing.

According to Dee Levin of Philadephia, IHCE chairman, the key to best hair looks today are ''elegant, natural, casual, soft, light, working with rather than against the shape of the face, classic, free-spirited, loose, young, and fresh.''

The worst hairlooks are ''drab, dull, stiff, carboardish, fake, contrived, flat, glued, sleazy, greasy and plain old ugly,'' Levin said.

Following Bush on the hairstylists' nix list were Kathleen Sullivan, Roseanne Barr, Jane Pauley, Kim Bassinger, Dolly Parton, Elizabeth Taylor, Ivana Trump, Jamie Lee Curtis, and Angie Dickinson.

Most have been wearing their ''awful'' hairstyles for years, but Trump made news earlier this year by adopting a new Brigitte Bardot retro hairstyle soon after her real estate tycoon husband, Donald Trump, left her, reportedly for a younger woman with a free-spirited, loose, and fresh hairdo.

Sharing IHCE's ''great hair'' cachet are Michelle Pfeiffer, Kimberly Foster, Barbara Walters, Joan Rivers, Cybil Shepherd, Jane Seymour, Brooke Shields Melanie Griffith and Valerie Bertinelli.

The hair poll took aim at men celebrities, too, naming Don King of the shocked locks look as having the most ''awful'' hairdo and citing Sylvester Stallone with natural, casual, soft hair as possessing the ''greatest'' hair.

Named with Stallone as sporting best dressed tresses are Michael Bolton, Arsenio Hall, Michael Douglas, Shadoe Stevens, Mel Gibson, Bryant Gumbel, Chuck Berry, Richard Lewis and Robert Plant.

Lumped with King on the ''awful'' hairstyle list were Geraldo Rivera, Ted Koppel, Michael Jackson, Donald Trump, Ronald Reagan, Alice Cooper, Prince Bruce Willis and David Letterman. Ivana's Donald made it without turning a hair of his old-fashioned, collar-grazing styling.

''Eighty percent of a first impression is conveyed by your face and 80 percent of that impression is created by your hair,'' Levin, owner of the Philadelphia's Salon Norman Dee, cautioned.

''The great images of today begin in beauty salons. Unfortunately, some of the worst also begin there.''

She said it first.

#90219u2151 08/07/1990 ~United Press International

BEAVERTON, Ore. (AUG. 7) UPI - The Food and Drug Administration has approved an request by Epitope Inc. to begin human testing of a saliva-based AIDS test, the company announced Tuesday.

The decision represents the FDA's first approved clinical study of a saliva-based AIDS test, the company said.

''Collecting saliva is preferable to collecting blood,'' said Adolph Ferro Epitope's president and chief executive officer, noting the relative ease of such collection and the lower risk of infection to health-care workers.

Epitope's AIDS diagnostic system contains a saliva collection kit called OraSure that collects samples from the mouth. It is designed to be pressed between the gums and cheek for about two minutes, then placed in a sealed tube for mailing to Epitope's laboratory, Immunologic Associates.

The system initially is slated for testing at San Francisco General Hospital,the Tampa, Fla., HRS Regional Laboratory, Portland's Veterans Administration Medical Center, New York University Medical Center and Northwestern University Dental School in Chicago.

The study is expected to last nine months and involve more than 4,000 samples of blood and saliva.

Epitope ''will be working with an outside agency to adequately address the concerns related to home use, such as counseling and anonymity,'' Ferro

said.

#90219u2190 08/07/1990 ~United Press International
(AUG. 7) UPI - Iraqi President Saddam Hussein is challenging United Nations-endorsed trade sanctions and an oil embargo voted against Iraq. He says his forces are ready to confront what he terms ''any imperialist, Zionist attack'' aimed at ousting Iraqi troops from Kuwait.

In Washington, the State Department says that 39 Americans are known to be in a hotel in Baghdad. A spokeswoman says the group has NOT been able to leave the hotel... but it would be premature to describe them as hostages. It's believed most of those involved were bussed to Iraq from Kuwait.

Seven African countries agreed today to send a peace-keeping force to Liberia. A rebel leader there had threatened to attack the U-S Embassy in Monrovia to provoke international intervention in the country's civil war.

Angry Jews attacked Arabs and stoned their cars in Jerusalem today following the funeral of two Israeli teen-agers found stabbed to death near an Arab neighborhood. At least six Arabs were injured.

Space agency officials say they have decided against a scheduled fueling test for the shuttle Colombia at Cape Canaveral. This will allow for a blastoff of the trouble-plagued space vehicle on a 10-day voyage around the first of September.

A lawyer for one of three youths on trial for the attack on a jogger in New York's Central Park suggested today that the woman was never gang-raped. The attorney said the woman cannot remember whether she had sex with anyone that night last year because of the beating she suffered.

Christian Brando... the eldest son of actor Marlon Brando... pleaded innocent today to murdering his pregnant half-sister's boyfriend. The younger Brando also pleaded innocent in Santa Monica, California, to a charge of possessing a machine gun.

Colorado Governor Roy Romer has ordered a statewide grand jury probe into the activities of a home-building firm and a savings and loan company.

Romer wants the panel to check into allegations that the firms made illegal contributions to political campaigns, including his own.

The manufacturer of a potentially defective heart valve today announced plans to notify patients who have the devices in their chests of the possible dangers. The action by Shiley Incorporated of Irvine, California, is in response to concerns raised by a consumer group.

Hurricane Diana is aiming its 85-mile-an-hour winds at Mexico's Gulf Coast. Weathermen say the storm's torrential rains could trigger flash floods and mudslides once it moves ashore.

#90219u2200 08/07/1990 ~United Press International

CHICAGO (AUG. 7) UPI - The Iraqi invasion of Kuwait could leave Americans paying $2 a gallon for gasoline and waiting in long lines to buy the fuel, energy law experts told reporters at the American Bar Association's annual meeting Tuesday.

Whether Saudia Arabia, they said, is willing to increase oil output will be a key factor in determining the extent of world oil shortages - and the Soviet Union could prove a wild card in determining the severity of shortfalls.

''The past several years have left us adrift on energy policy and, I think grossly underprepared for the kind of situation we face today,'' said Sheila Hollis, head of the ABA Coordinating Committee on Energy Law.

If an embargo of Iraqi and Kuwaiti oil is effective and the turmoil impedes shipments from Saudi Arabia, the impact could equal or exceed that of the 1974 Arab oil embargo, when Americans spent hours in line trying to buy high-priced gas, Hollis and other experts warned.

''I'd say $2 a gallon would be easy to get to,'' said Hollis, former chief of enforcement for the Federal Energy Regulatory Commission under President Carter.

''No aspect of our economy is safe in the event of a runup in oil prices and a shortage of supply,'' Hollis said.

Edward Renwick, former head of the ABA Section on Natural Resources, Energy and Environmental Law, said an effective blockade of Iraq and Kuwait would reduce world oil supplies by between 4 million and 5 million barrels a day - about 10 percent of the world output.

''Saudi Arabia could make up about 2 million barrels of that, but they have a lot of political reasons not to do that, and exactly what they will

do remains to be seen,'' said Renwick, an energy law specialist with the firm Hanna & Morton in Los Angeles.

Renwick said that the extent of price runups depends on numerous factors -including Saudi Arabia's willingness and ability to help bridge the crude oil gap - but that $2 a gallon was not an unreasonable expectation.

Jack Moore, former general counsel for oil giant Caltex Inc. and currently a partner in the Austin, Texas, law firm of Johnson & Gibbs, noted the International Energy Agency requires that the burden of any oil shortage be shared equally among its members.

That means available supplies will be divided up among IEA members, including the United States, the nations of Western Europe and Japan, so that supply reductions in each nation, on a percentage basis, are equal.

''It's a shared misery that could conceivably bring back some of the scenes we had in '73 and '74,'' said Moore.

However, ''the Soviet Union is not a part of the IEA, and it's anybody's guess what their position will be,'' Moore said.

Renwick noted the Soviets could be a wild card in the equation - at least in terms of sharing supplies of oil available for import.

But Hollis disputed this, saying it is doubtful the Soviets could become a significant supplier of oil.

''The Soviet Union clearly has enormous reserves, but they lack deliverability,'' Hollis said, noting it would take years to build pipelines and other facilities needed to bring Soviet oil to market.

Moore, Hollis and Renwick all urged against any move to impose price controls on gasoline.

#90219u2269 08/07/1990 ~United Press International

WASHINGTON (AUG. 7) UPI - President Bush ordered U.S. warplanes and several thousand troops Tuesday to bases in Saudi Arabia to help Saudi forces defend against a possible attack by Iraq, U.S. defense sources said.

Members of the 82nd Airborne Division at Fort Bragg, N.C., were preparing to leave as early as Tuesday night and were expected to land in Saudi Arabia Wednesday morning Washington time, the sources said.

The White House and the Pentagon officially declined comment other than to express continuing concern over the presence of Iraqi troops on Kuwait's border with Saudi Arabia.

White House spokesman Marlin Fitzwater said the United States would not send U.S. forces without a Saudi invitation - one of the requests Defense Secretary Dick Cheney made in Saudi Arabia Monday during a meeting with King Fahd.

''I have no comment on any military movements,'' Fitzwater said. ''I won't confirm or deny any military movements.''

Cheney, who was in Morocco Tuesday night for consultations before returning to Washington, received permission from Saudi Arabia during his talks to allow U.S. forces to use the bases, paving the way for the U.S. mobilization.

U.S. defense sources said the plan calls for sending aircraft and several thousand U.S. troops who will act in a defensive rather than an offensive role. Egypt is also believed to be sending troops, the sources said.

Few details were available but B-52 bombers were reported to be on Diego Garcia, a remote island in the Indian Ocean south of the Persian Gulf.

Reaction to the U.S. military moves on Capitol Hill, where lawmakers had soundly denounced Iraq's oil-grabbing invasion of Kuwait last week, was positive.

Sen. Claiborne Pell, D-R.I., chairman of the Senate Foreign Relations Committee, issued a statement saying, ''I support the reported decision to send U.S. combat aircraft to Saudi Arabia. This is a clear signal of our commitment to defend Saudi Arabia from a possible Iraqi attack.''

He added, ''A firm U.S. position, combined with United Nations sanctions, offers the best hope for ending Iraq's occupation of Kuwait without the use of force.''

Rep. Dante Fascell, D-Fla., House Foreign Affairs Committee chairman, praised Bush's move and called on the president to submit ''a timely report'' to Congress under the War Powers act. Under the law, Bush must notify Congress within 48 hours when he sends American troops into areas of imminent or actual hostilities.

Bush was reported to be on the phone talking to U.S. allies about the plans.

The president earlier told a Cabinet meeting ''that he viewedterests,'' Fitzwater said.

''That has been our message to Saudi Arabia and we believe that they understand that, and are appreciative of that statement.''

He said of the Iraqi presence near the border: ''We do have information showing that the Iraqi forces are there in considerable quantity and they are in an offensive posture and we believe there is an imminent threat to Saudi Arabia from the way that they are positioned and located in Kuwait.''

Fitzwater added, ''There have been changes of a sort that cause us to believe there is a growing and continuing threat.''

-30- 3444

#90219u2270 08/07/1990 ~United Press International

(AUG. 7) UPI - President Bush ordered U.S. ground troops and combat aircraft to bases in Saudi Arabia to defend against a possible Iraqi attack, while Iraqi President Saddam Hussein held firm against mounting international pressure, saying his country will fight for ''Arab muscle and Arab honor.''

U.S. defense sources said members of the 82nd Airborne Division were preparing to leave as early as Tuesday night for Saudi Arabia, which was sending troops to its border with occupied Kuwait to counter a feared attack by Iraqi troops.

The White House and Pentagon officially declined comment other than to express continuing concern over the presence of Iraqi troops on Kuwait's border with major oil power Saudi Arabia.

U.S. defense sources said the U.S. plan also calls for sending aircraft and several thousand U.S. troops to serve in a defensive rather than an

offensive capacity. Egypt also is believed to be sending troops, the sources said.

U.S., Soviet and French ships meanwhile steamed toward the region, displaying an unprecedented united front.

In a statement in Saddam's name read in Baghdad, Iraq, and translated by Cable News Network in Amman, Jordan, the Iraqi president defended his conquest of Kuwait, exalting his country as ''a most honorable country which fights for the Arab muscle and Arab honor.''

But in an apparent gesture to ease fears that Iraq had taken Western hostages, Baghdad said it was considering freeing about 400 foreigners seized in Kuwait.

The State Department said 39 Americans, including 11 oil workers in Iraqi custody since the invasion Thursday, and U.S. citizens taken from three hotels in Kuwait city were being held in a Baghdad hotel and told they were not allowed to leave.

There have been no indications of any mistreatment of the foreigners, nor any signs that they are being held hostage.

In keeping with the overwhelming U.N. Security Council decision Monday to impose tough sanctions against Iraq - five days after the world body condemned the invasion and demanded that Iraq pull its forces from Kuwait - Turkey said it closed two Iraqi pipelines passing through its territory.

Turkish President Turgut Ozal said in an interview with CBS News, ''The Turkish ... pipeline is not giving any drop of oil to the tankers.''

But the nation's oil minister later clafified that Turkey would not close the pipeline, but would instead store Iraqi oil and block it from leaving the country.

The twin pipelines, running about 700 miles from the Kirkuk oilfields in northern Iraq to a Mediterranean terminal at Yumurtalik, transport about 1.5 million barrels of Iraqi oil each day.

The United States hopes an oil embargo on Iraq engineered by closing the Turkish and Saudi pipelines will compel Saddam to leave Kuwait.

But the official Iraqi News Agency quoted a government spokesman as saying ''We do not believe that Saudi Arabia would cut the flow of oil through its territory because such a measure would seriously harm Iraq.''

Iraq and Saudi Arabia have a non-aggression pact, and most analysts believe closing the pipeline in Saudi Arabia would be construed as a

declaration of war.

To prevent Iraqi military action beyond Kuwait, the United States has mounted a formidable naval presence and boosted its military readiness in the Persian Gulf region.

The Soviet Union and France bolstered their naval forces in the region. Even Switzerland broke its long tradition of neutrality and said it would support the U.N. sanctions.

President Bush met with his Cabinet and maintained contacts with allied leaders, while Defense Secretary Dick Cheney went to Morocco Tuesday night for consultations before returning to Washington. Cheney received permission from Saudi King Fahd on Monday to allow U.S. forces to use the bases, paving the way for the U.S. mobilization.

Although White House spokesman Marlin Fitzwater said reports of a possible naval blockade of Iraq were premature, Western leaders said continued Iraqi intransigence could lead to such a move.

In Baghdad, Saddam met Lt. Col. Alaa Hussein, the prime minister and military commander of the ''provisional free Kuwait government,'' which was installed by Iraq after it overthrew the Kuwaiti leadership. ''Kuwait and Iraq share the same destiny,'' Alaa was quoted by the Iraqi News Agency as saying.

The news agency said Saddam assured Alaa that ''Iraq will confront any imperialist, Zionist attack against the Kuwaiti uprising,'' referring to a rebellion Iraq claims it had to intervene to support.

Iraqi media also reported that a flood of volunteers across Iraq had led to the creation of 25 new military divisions - about 250,000 men - to prop up the provisional government believed made up of Iraqi military officers.

Before the invasion, Iraq was estimated to have a 1 million-strong battle-tested military and about 700,000 reserves.

Saudi and Iraqi forces are deployed on the borders of an neutral oil extraction zone owned by both Kuwait and Saudi Arabia, and the kingdom - the main supplier of oil to the United States - has fully mobilized its military to show resolve against the Iraqis.

The United States has given Saudi Arabia firm assurances of its resolve to assist the kingdom against any further Iraqi advances and is vastly reinforcing its military strength in the region.

An Iraqi Embassy official in Amman, Jordan, said Baghdad was considering a U.S. request delivered through Jordan asking for the release of the

foreign nationals. ''Iraq has not issued an official declsion on the matter yet,'' he told United Press International.

A Jordanian official said the foreigners were welcome in Jordan and ''all facilities will be given to them.''

Jordan's borders with Iraq have been closed since the invasion and it is a five-hour drive from Baghdad to Amman, should the group be evacuated overland.

Officials in Bonn, Washington and London said Iraqi troops ordered about 400 foreigners, including 28 Americans, out of Kuwait city hotels and took them in buses toward Baghdad.

According to State Department figures, some 3,000 Americans were in Kuwait last week. Some of them apparently have left, but State Department officials said most are believed to still be in Kuwait.

Analysts believed any U.S. action would mostly involve air power and avoid committing ground troops against Iraq's formidable army, which has about 5,500 tanks.

They said any U.S. personnel in Saudi Arabia would be more likely to be ground crew for planes which Washington would like to deploy at bases from where any attack force would cross friendly air space to reach targets.

A group of U.S. F-111 bombers arrived Tuesday in Turkey from bases in England. Officials said the planes were on a routine training mission to the NATO ally bordering Iraq.

U.S. officials said Cheney may have sought permission from Egypt's Mubarak for the aircraft carrier USS Eisenhower and other vessels to pass from the Mediterranean through the Suez Canal and into the Red Sea and Indian Ocean.

Another U.S. carrier battle group has left the United States, and officials said Washington in 10 days would have 49 ships in the region, including three aircraft carriers, more than 200 aircraft and about 2,100 marines. Britain, France and the Soviet Union also have deployed warships.

The Soviet Union said Tuesday two other Soviet vessels were steaming towards the Gulf, but emphasized that the dispute should be solved diplomatically.

The Soviet Union and the United States have issued an unprecedented joint condemnation of the invasion, and some reports have said a combined naval action is possible between the superpowers.

Egypt is allied to Iraq, but has denounced the invasion through the

21-nation Arab League. Its role and military muscle are now regarded as crucial should Saudi Arabia's 95,000-strong military engage the superior Iraqis.

The British Broadcasting Corp.'s Arabic Service reported that the United States has offered logistical and air support to an unspecified Arab country, believed to be Egypt, as part of a wider plan of rallying the Arab world to confront Iraq.

Any Egyptian involvement would require massive airlift capability to take its troops to the conflict site.

At the United Nations, all 159 members of the world body have been asked to begin immediately observance of the U.N. Security Council's embargo on Iraq.

Yugoslavia said it had not decided whether to join the U.N. sanctions against Iraq, where it is building $1.9 billion in construction projects employing 9,000 of its citizens.

Mubarak of Egypt met in Alexandria with the crown prince of Kuwait, Saad al Abudallah al Sabah, the defeated nation's prime minister who has been the frontman for Kuwait's global appeals for help.

Exiled Kuwaiti groups issued a statement in Beirut claiming they killed and wounded 11 Iraqi soldiers in three ambushes.

The volatile situation in the Middle East caused further disruptions in financial markets, and the Bush administration bgan to examine increases in U.S. gasoline retail prices.

#90219u2277 08/07/1990 ~United Press International

ANKARA, TURKEY (AUG. 7) UPI - Turkey said Tuesday it would prevent the export of Iraqi oil from two pipelines that pass through its territory and would abide by U.N. Security Council sanctions against the Persian Gulf state.

The semi-official Anatolia News Agency quoted state minister Mehmet Keciler as saying the Iraqi authorities were told no loading would be allowed from the pipeline into oil tankers in the Mediterranean.

The twin pipelines, running about 700 miles from the Kirkuk oilfields in northern Iraq to a Mediterranean terminal at Yumurtalik, transported approximately 1.5 million barrels of Iraqi oil a day.

The Iraqi government shut off the flow from one of the lines Monday and

reduced the other by 30 percent, apparently because of reduced demand because of the embargo.

The British Broadcasting Corp. quoted oil experts in the gulf as saying Iraq had cut back the oil flow through its Saudi overland route as well because storage tanks at the pipe's terminus had been filled to capacity.

The Turkish minister's statement followed an earlier announcement that Turkey agreed in principle to the economic sanctions imposed by the security council against Iraq for invading Kuwait, but only implied Ankara was closing the pipelines.

Keciler said all Turkish trade with Iraq was being stopped, with the exception of trade in food and medicines.

President Turgut Ozal said in an interview with CBS News, ''The Turkish ... pipeline is not giving any drop of oil to the tankers.''

The Arab Service of the BBC quoted Ozal as saying that ''the flow and shipment of Iraqi oil through Turkish territories would be stopped.''

Turkey's oil minister later clarified that oil from the pipes would be put into storage and not allowed to be shipped from the country.

Government spokesman Mehmet Yazar said Ozal chaired an emergency Cabinet meeting after the U.N. sanctions were announced Monday. Chief of Staff Gen. Necit Turumtay and Defense Minister Safa Giray attended.

Yazar told reporters after the meeting that Turkey accepted in principle the Security Council sanctions against Iraq, which invaded Kuwait last week, and would take what he called a common stance with other U.N. member nations.

Yazar dismissed reports that American F-111 bombers had landed at the U.S. air base at Incirlik in southern Turkey, some 400 miles from the Iraqi border.

MEXICO CITY (AUG. 7) UPI - Hurricane Diana pounced on Mexico's Gulf Coast Tuesday, threatening villages at the foot of the eastern Sierra Madre mountains with 85 mph winds and up to 10 inches of rain.

Juan Antonio Neme, chief spokesman for the state government of Veracruz, told United Press International in a telephone interview that the coastal area had been put on hurricane alert.

Speaking from the state capital of Jalapa, 135 miles east of Mexico City, Neme said shipments of food and medical supplies are being flown in to emergency centers near the area, in preparation for possible damage from Diana.

There were no immediate reports of casualties or damage as Diana moved ashore.

At 5 p.m. EDT, the National Weather Service in Miami reported that the eye of Diana had moved onshore near Tuxpan, Mexico, and that a hurricane warning was in effect from Lerdo de Tejada northward to La Pesca. Cities covered by the hurricane warning included Veracruz, Tuxpan and Tampico.

Forecasters warned that Diana's torrential rains could trigger flash floods and mudslides.

''The main threat to life will be the rising waters on the coast and the heavy rains producing flash floods and mudslides inland,'' said Max Mayfield, a forecaster at the National Hurricane Center in Miami.

''We expect very strong rains,'' Neme said. ''We have asked people not to venture onto highways because we are expecting mudslides.''

In September 1988, Hurricane Gilbert hit Mexico's Caribbean coast with nearly 200 mph winds and killed more than 150 people. Gilbert hit the Caribbean resort of Cancun on the Yucatan peninsula, killing 25 people, and then moved up to the inland industrial city of Monterrey, 425 miles north of Mexico City, where it claimed 125 lives, flooded cities and forced evacuation of hundreds of thousands of people.

Diana was upgraded from a tropical storm Tuesday morning, slowing its forward speed and strengthening steadily as it moved toward Mexico.

Forecasters warned that Diana's tides would be 4 feet to 6 feet above normal with additional high waves to the north of landfall.

As the hurricane gathered strength as it closed in on Mexico, hurricane winds extended 85 miles from the center and tropical storm force winds outward up to 200 miles.

The Mexican government issued a hurricane warning from Lerdo de Tejada northward to La Pesca, including the cities of Veracruz, Tuxpan and Tampico. A tropical storm warning was in effect from north of La Pesca to Boca Jesus Mira, about 100 miles south of Brownsville, Texas.

Small boats were advised to remain in port from Baffin Bay, Texas, southward.

Gusty winds and rain were already spreading across the coast over portions of the warned area.

#90219u2286 08/07/1990 ~United Press International

WASHINGTON (AUG. 7) UPI - Great Britain has agreed ''in principle'' to delay a threatened ban on U.S. lumber imports that could cost the Northwest wood products industry $400 million a year, it was disclosed Tuesday.

The European Community,citing fears of insect infestation, had planned to impose a Common Market ban Jan. 1, 1991, on American shipments of ''green'' lumber products - those not treated with a special insecticide.

But Jo Ann Smith, assistant secretary of agriculture, informed Rep. Ron Wyden, D-Ore., in a letter made public Tuesday that a breakthrough on the issue had been reached in talks between U.S. and British negotiators.

''We are pleased to report that our Animal and Plant Health Inspection Service and the Forestry Commission of Great Britain have agreed in principle to develop a program that will permit the continued export of green coniferous lumber to that country,'' Smith wrote.

Smith's letter said she was ''hopeful'' that such a program could be in place by Jan. 1, the date that the lumber ban would take effect.

Terms of the compliance agreement would remain in effect for one year, said John Duncan, a spokesman for the Agriculture Department agency.

''It is not a done deal, but we feel we have it pretty well worked (one) out with them,'' Duncan said.

The British are in effect negotiating on behalf of the EC, and any agreement reached with Britain is expected to be adopted by the entire Common Market, an aide to Wyden said. A similar agreement already has been reached with Canada.

The talks apply for the most part to basic structural lumber, such as 2-by-4s and other wood beams used in construction.

The EC's planned ''green'' lumber prohibition ostensibly was aimed at preventing the possible spread of the pine nimatode, a type of wood-boring grub native to North American forests.

But the United States maintains European fears about the nimatode are unfounded.

Wyden said green lumber from North America has been shipped to Europe for centuries without causing insect-related damage to European forests.

''There is no question that the Europeans are trying to put up barriers to getting our lumber in there,'' Wyden said.

''We know the economy is a little sluggish, housing starts have tapered off and these export markets are critical,'' the Oregon congressman said.

Exports of green lumber to EC nations from Oregon and Washington, comprising the biggest timber-processing region of the United States, are valued at about $400 million a year, Wyden said.

An aide to Wyden said that without exports of green lumber from the United States, the EC would likely turn to Scandanavia, Central Europe and possibly the Soviet Union for structural wood products.

#90219u2288 08/07/1990 ~United Press International

WASHINGTON (AUG. 7) UPI - U.S. Savings Bond sales totaled $629 million in July, up 2 percent from June and a 4 percent gain over July, 1989, the Treasury Department said Tuesday.

The government sold $615 million in savings bonds in June and $607 million last July.

For the first 10 months of fiscal 1990, sales of the bonds - exempt from federal taxes when used for college tuition - were $6.58 billion vs. $6.57 billion for the same period of fiscal 1989.

''The value of all savings bonds held by Americans is now $122.55 billion, seven percent more than the $114.38 billion outstanding a year ago,'' the Treasury Department said.

U.S. Savings Bonds pay a market-based rate when held for five years or longer. The current market-based rate is 7.01 percent through Oct. 31.

#90219u2299 08/07/1990 ~United Press International

(AUG. 7) UPI - Turkey today said it would cut off the flow of the export of oil from two Iraqi pipelines on its territory... leaving Saudi Arabia as the main outlet for Iraqi oil. Iraqi President Saddam Hussein promises to defend ''Arab honor'' against any attack on his forces. Amid these developments... the White House refuses to comment on news reports that the United States is airlifting troops to Saudi Arabia. Meanwhile... the

State Department says 39 Americans are NOT being allowed to leave a Baghdad hotel.

Seven African nations plan to send a peace-keeping force to Liberia. The agreement was reached today in Gambia. Diplomatic sources say they want to hold peace talks to end Liberia's civil war. The initiative comes after rebel leader Prince Johnson threatened to attack Marines protecting the U-S Embassy in Monrovia... unless a U-N or West African peace-keeping force arrives.

A multitude of lightning strikes have helped spawn more than 100 wildfires along the West Coast. At least 70 of those fires burned in California woodlands from Lake Tahoe to Los Angeles County. Nearly three dozen sprang up in the Sierra National Forest. Hundreds of firefighters are hustling from one blaze to another to try to keep up.

Defense attorneys are presenting closing arguments at the trial of three youths accused of beating and gang-raping a woman jogger in New York's Central Park last year. One lawyer suggested in his summation today that the woman was never raped... but instead had a sexual romp at her apartment before jogging in the park.

The funeral of two Israeli teen-age girls found stabbed to death near an Arab neighborhood on the ouskirts of Jerusalem touched off violence in the city today. Police say at least six people were injured in a series of attacks by gangs of angry Jews who attacked groups of Arabs and stoned their cars.

#90219u2316 08/07/1990 ~United Press International

NEW YORK (AUG. 7) UPI - Travelers face higher airfares as U.S. airlines raise ticket prices or add surcharges to offset rising fuel costs triggered by Middle East hostilities, analysts and airline spokesmen said Tuesday.

Pan American World Airways has announced a fare hike and Northwest Airlines has added a surcharge to compensate for rising jet fuel prices. Other major carriers said they are considering similar moves.

The Airline Passengers Association of North America urged the U.S. Department of Transportation to prohibit surcharges as a means to recoup increased fuel costs.

Higher ticket prices could discourage summer travelers from flying and send the already ailing domestic industry into a tailspin, said George James, chairman of Airline Economics, a consulting firm in Washington.

''In this particular economy, which is not very strong anyway, they could get hit both ways,'' James said. ''They're paying for the inflationary costs of fuel, etc., and can't get it back in the sense that traffic will leave.''

The consulting firm has revised downward its yearly economic forecast for the U.S. airline industry in the wake of the Aug. 2 Iraqi invasion of Kuwait, James said.

The industry could face a billion-dollar loss for 1990, he said. Before the invasion, domestic airlines had been expected to make between $400 million and $500 million in operating profits, he said.

The airline industry already is suffering from lower-than-anticipated passenger loads this summer, and fuel is airlines' second-largest cost after labor.

West Texas Intermediate, the key U.S. crude for immediate delivery on the New York Mercantile Exchange, gained 26 cents to $28.31 a barrel.

The price of crude hovered around $18 a barrel before the Iraqi invasion, and every dollar increase translates into an additional $550 million in annual fuel costs for U.S. airlines, he said.

Every dollar rise in a barrel of crude also translates into a 3.5 cent-a-gallon increase in a gallon of jet fuel, industry experts said.

The per-gallon price of jet fuel has risen about 5 cents to about 70 cents a gallon from about 65 cents since the Iraqi invasion, they said.

Airlines may have to raise fares about 8 percent to cover higher fuel costs,nd another 4 percent to cover other rising prices related to the fuel hikes, James said.

Pan Am said it planned to raise domestic fares by 10 percent to offset higher jet fuel prices beginning Thursday, and increase international rates 10 percent next Wednesday.

Northwest Airlines announced last week it will raise fares, also beginning Thursday, by adding an $8 surcharge each way on domestic flights.

American Airlines, Delta Airlines, Eastern Airlines, Trans World Airlines, USAir and Continental Airlines were studying the possibility of adding fuel surcharges, spokesmen said.

American is anticipating an additional $10 million a month in fuel costs, a spokesman said in Fort Worth, Texas.

A spokeswoman for United Airlines, headquartered in Chicago, declined to comment.

Airline stocks dropped Tuesday on the New York Stock Exchange. UAL Corp., the parent of United, lost $9 to close at $101. Delta was down 62.5 cents to $58.50 a share.

#90219u2343 08/07/1990 ~United Press International

(AUG. 7) UPI - Now that Eric Dickerson finally wants to play football, he has to wait at least a week.

The four-time NFL rushing champion must rehabilitate his strained left hamstring before joining the Indianapolis Colts in training camp. Dickerson failed his physical Monday night after ending at 10-day holdout by reporting to the Colts' camp in Anderson, Ind.

Dickerson, who strained a tendon during workouts in June, is expected to take another physical next week.

''There's really no mystery involved in it,'' Colts General Manager Jim Irsay said Tuesday. ''We tested the hamstring and it was 40 percent down in strength from the right one. Basically, he needs to get the strength back in it, and it should be no problem.''

Irsay said he expected Dickerson back with the team in ''one to three weeks,'' plenty of time to prepare for the team's Sept. 9 opener at Buffalo.

Indianapolis Coach Ron Meyer said the team was aware of the injury but thought it would not prevent Dickerson from returning to practice.

Dickerson, the NFL's seventh-leading all-time rusher, said last week he was in good condition and ready to play.

''Reading his (newspaper) quotes, we assumed he was ready to go. Hopefully it's not a prolonged thing,'' Meyer said.

Dickerson was scheduled to go to Houston late Tuesday to begin rehabilitation, Meyer said.

Last season, Dickerson injured his right hamstring and missed a game because of injury for the first time in his seven-year career. He finished the season with 1,311 rushing yards and a lot of ill will toward the Colts.

At Flagstaff, Ariz., the Phoenix Cardinals waived running back Stump Mitchell, who was attempting to come back after a severe knee injury.

Mitchell, 31, was released along with free-agent kicker Kevin Nicholl and running back Donnie Riley, a 12th-round draft pick from Central Michigan.

Mitchell's 1989 season ended after he suffered the injury in the third game against the New York Giants. In announcing Mitchell's release, General Manager Larry Wilson called him ''one of the great players in the history of the franchise.''

Mitchell is the Cardinals' all-time leader in kickoff returns with 4,007 yards and in combined yardage - 11,988 yards including 4,649 rushing, 4,007 in kickoff returns, 1,955 receiving and 1,377 in punt returns.

He also is third in rushing touchdowns with 32 and seventh in overall touchdowns with 42. He gained more than 100 yards in 14 games, second in club history.

At Fredonia, N.Y., the Buffalo Bills offensive line took another hit when guard Leonard Burton suffered a sprained right knee near the end of the morning workout. Burton, a five-year pro who filled in on the offensive line last year, was attempting to fill the vacancy at right guard created by the release of veteran Joe Devlin at the end of last season.

Bills Coach Marv Levy said Burton's knee would be examined more extensively in the next day or two.

''It's a sprain and I hope it's not a serious one,'' Levy said. ''I hope that all it is is a nick and that he'll be back in there pretty quickly. But I'm no doctor.''

The Bills already are without tackle Will Wolford, who has a contract dispute, and guard Jim Ritcher is expected to miss at least three weeks with a left shoulder injury.

At Kirtland, Ohio, Cleveland tackle Rickey Bolden abruptly retired and the Browns acquired tackle Ken Reeves from Philadelphia for undisclosed draft picks.

Bolden was the second tackle to retire since camp opened. Cody Risien retired earlier.

Bolden walked off the field with about 20 minutes left in the early practice, saying: ''The main reason I'm going to leave is my body.'' He has been on injured reserve in four of his six seasons with Cleveland.

At Madison, N.J., defensive end Eric Dorsey signed a two-year contract with the New York Giants and began practice. Dorsey's signing leaves the Giants without five defensive starters - linebackers Lawrence Taylor and Gary Reasons, end Leonard Marshall, nose tackle Erik Howard and cornerback

Mark Collins.

In other roster moves, Green Bay signed linebacker Brian Noble and waived defensive lineman Deatrick Wise; San Diego signed safety Vencie Glenn and waived cornerback Keith Collins; and Pittsburgh waived tackle Jeff Fryar.

#90219u2348 08/07/1990 ~United Press International

WASHINGTON (AUG. 7) UPI - Sundstrand Corp. said in documents filed Tuesday with the Securities and Exchange Commission that it has agreed to a confidentiality and standstill agreement proposed by its acquisition target, Milton Roy Co.

The Rockford, Ill.-based Sundstrand owns 796,000 shares of Milton Roy common stock, representing 14.99 percent of the outstanding stock, and has offered $28 a share for the rest of the company.

Under their July 30 agreement, Milton Roy will provide Sundstrand with documents detailing its finances and operations, while Sundstrand will refrain from buying additional Milton Roy assets or stock. Sundstrand will also be barred from soliciting proxies and exercising its voting rights.

The standstill agreement runs for one year but would be superseded by a ''transaction agreement'' between the two companies.

The agreement ''ensures anything done within a year will be done on a friendly basis,'' said John McNamara, Milton Roy's chief financial officer.

Milton Roy is a St. Petersburg, Fla.-based manufacturer of metering and flow control devices and laboratory instruments. The company's West Coast division makes equipment used in auto emissions tests.

#90219u2361 08/07/1990 ~United Press International

(AUG. 7) UPI - The global scope of the embargo on Iraqi and Kuwaiti oil, aimed at punishing Baghdad for invading the Arab sheikdom, should make it easy to enforce, energy experts said Tuesday.

Industry specialists said it also will be extremely risky to violate the embargo, at least in the short term, because punishment can be severe and will be internationally coordinated. The U.S. embargo against Iranian oil, by comparison, did not work because it was imposed unilaterally by the United States and not many countries supported the action.

The only one way to transport crude oil in bulk is in huge tankers that can be detected easily. The sea lanes through which the tankers must sail

can be policed and even more effectively if the policing is done under international supervision and coordination.

Geophysical sciences are now so sophisticated that simple chemical tests can determine the oil's type, its specific gravity and composition and also accurately pinpoint where it was produced.

Oil also is so strictly controlled that it cannot be taken out of a producing country or transported to a buyer's port without voluminous documentation such as bills of lading, insurance papers, the transporter's own credentials and much other paperwork on where the oil was loaded and its intended destination, the volume shipped and the oil's physical characteristics.

Jay Amberg, managing editor of Oil Buyers' Guide International in Lakewood N.J., explained how the embargo will work in the United States.

''Let us say the destination is Galveston or Houston. There the tanker will first be met by the immigration people. Then the U.S. Customs will take over. If the cargo is a hazardous material, which oil is, the vessel will be checked by the U.S. Coast Guard.

''You see how many agencies will be checking the cargo? The papers accompanying the cargo must show the port of embarkation. U.S. authorities will also board the vessel and carefully test the cargo.''

Similar procedures are in place throughout the industrialized world.

''Much of the Iraqi and Kuwaiti oil has been going to the (Western European nations) and the governments of these countries have good control over their private sector,'' said Alvin Silber of Brean, Murray, Foster Securities Inc. in New York. ''So between them, the United States and also Japan this embargo should be quite effective.''

But problems can arise in the developing world where price consideration will eventually take priority over political concerns, Silber said.

He said reports indicated that Indonesia, a member of the Organization of Petroleum Exporting Countries, may not abide by the embargo.

Indonesia buys the cheaper and lower-quality Iraqi oil, instead of using its own higher-quality oil, to run its oil production machinery. The Indonesian oil is shipped mostly to Japan.

Brazil is another large buyer of Iraqi oil. If a major supply disruption takes place, these countries may be hard-pressed to go along with the embargo.

At that point, Silber said, it may become necessary to use a naval blockade to prevent any Iraqi or Kuwaiti oil from leaving their terminals.

The U.N. Security Council voted Monday to impose economic sanctions on Iraq and occupied Kuwait. U.S. and British official indicated they would be prepared to organize a naval blockade to enforce the boycott.

''Basically that is the next stage,'' he said. ''If the U.N. resolution eventually fails and before military action takes place, a naval blockade will be necessary. Inevitably, though, Iraq will lose the contest.''

In any case, the embargo will automatically take effect once the Ceyhan pipelines in Turkey and the Yanbu pipelines in Saudi Arabia - through which much of the Iraqi oil flows - are closed. One of the Ceyhan pipelines has already been closed by Iraq, indicating it is feeling the pinch of the embargo.

Donald Morton of Paine Webber Inc. in Boston said the immediate question is how the embargo will be policed.

''It has to be a consortium of several countries and only their navies can do the job of policing,'' he said. ''You have to be in the high seas to check any violation and seize the cargo. Only their navies are equipped to do the job.''

Again because of the international scope of the embargo, the experts said there is little likelihood of violating it at high seas or at spot - or free-market - terminals like Rotterdam.

In the oil business, ownership of a cargo of oil changes hands several times while the product still is at sea. Oil companies swap these cargoes to take advantage of fluctuations in transporation costs or when market conditions change.

At terminals like Rotterdam, crude and oil products are bought and sold freely by matching buyers and sellers. Rotterdam now accounts for more than 50 percent of the spot oil traded globally.

''But no matter what you do, you are going to know the origin of the cargo and you also have an international commitment. The oil is like your blood group. You can't change it at will,'' Morton said.

But Morton warned that after some time when the severity of the embargo gets worse, a black market may develop that could erode the effect of the ban.

''Iraq will get so squeezed it will start offering its oil at cheaper prices and that might encourage the development of a black market,'' he

said. ''The longer this embargo remains in effect, the more opportunities there will be to develop a black market.''

#90219u2363 08/07/1990 ~United Press International

NEW YORK (AUG. 7) UPI - Travelers face higher airfares as U.S. airlines raise ticket prices or add surcharges to offset rising fuel costs triggered by Middle East hostilities, analysts and airline spokesmen said Tuesday.

Pan American World Airways has announced a fare hike and Northwest Airlines has added a surcharge to compensate for rising jet fuel prices. Other major carriers said they are considering similar moves.

The Airline Passengers Association of North America urged the U.S. Department of Transportation to prohibit surcharges as a means to recoup increased fuel costs.

Higher ticket prices could discourage summer travelers from flying and send the already ailing domestic industry into a tailspin, said George James, chairman of Airline Economics, a consulting firm in Washington.

''In this particular economy, which is not very strong anyway, they could get hit both ways,'' James said. ''They're paying for the inflationary costs of fuel, etc., and can't get it back in the sense that traffic will leave.''

The consulting firm has revised downward its yearly economic forecast for the U.S. airline industry in the wake of the Aug. 2 Iraqi invasion of Kuwait, James said.

The industry could face a billion-dollar loss for 1990, he said. Before the invasion, domestic airlines had been expected to make between $400 million and $500 million in operating profits, he said.

The airline industry already is suffering from lower-than-anticipated passenger loads this summer, and fuel is airlines' second-largest cost after labor.

West Texas Intermediate, the key U.S. crude for immediate delivery on the New York Mercantile Exchange, gained 26 cents to $28.31 a barrel.

The price of crude hovered around $18 a barrel before the Iraqi invasion, and every dollar increase translates into an additional $550 million in annual fuel costs for U.S. airlines, he said.

Every dollar rise in a barrel of crude also translates into a 3.5

cent-a-gallon increase in a gallon of jet fuel, industry experts said.

The per-gallon price of jet fuel has risen about 5 cents to about 70 cents a gallon from about 65 cents since the Iraqi invasion, they said.

Airlines may have to raise fares about 8 percent to cover higher fuel costs, and another 4 percent to cover other rising prices related to the fuel hikes, James said.

Pan Am said it planned to raise domestic fares by 10 percent to offset higher jet fuel prices beginning Thursday, and increase international rates 10 percent next Wednesday.

Northwest Airlines announced last week it will raise fares, also beginning Thursday, by adding an $8 surcharge each way on domestic flights.

American Airlines, Delta Airlines, Eastern Airlines, Trans World Airlines, USAir and Continental Airlines were studying the possibility of adding fuel surcharges, spokesmen said.

American is anticipating an additional $10 million a month in fuel costs, a spokesman said in Fort Worth, Texas.

A spokeswoman for United Airlines, headquartered in Chicago, declined to comment.

Airline stocks dropped Tuesday on the New York Stock Exchange. UAL Corp., the parent of United, lost $9 to close at $101. Delta was down 62.5 cents to $58.50 a share.

U.S. airlines should increase fares ''as justified by higher fuel cost over time,'' the Airline Passengers Association said in a statement.

''What passengers don't need are additional, artificial 'surcharges' that are not imposed or approved by federal government agencies but are invented by the airlines as sales and marketing alternatives to straight fare increases,'' the organization said.

#90219u2401 08/07/1990 ~United Press International

RICHMOND, Va. (AUG. 7) UPI - A federal appeals panel ruled Tuesday insurers who claimed fraud - and then balked at covering mortgage-backed securities that made their way into S&L portfolios - must cover the losses because they should have known they were insuring faulty investments.

Mortgage-backed securities from Equity Programs Investment Corp., of Falls Church, Va., wound up in the portfolio of Silverado Banking, Savings and

Loan Association of Colorado and First National Bank of Maryland, among others.

EPIC collapsed in 1985, and the insurers, Foremost Guaranty Corp. and United Guaranty Residential Insurance of Iowa, refused to back its loan guarantees on the grounds EPIC officials had misled them.

But in a 29-page opinion, the three-judge panel of the 4th U.S. Circuit Court of Appeals said the insurers had in their possession documents that would have shown them EPIC's troubled financial condition. The court described EPIC's pool of limited partnerships as ''illiquid, highly leveraged and deficit producing.''

The panel wrote: ''The insurers had the ability to unearth the misrepresentations. The insurers did not investigate, however. Had they questioned, the lack of credibility of the misrepresentations would have been at once apparent. Having reason to investigate but choosing not to do so, ... (means) the insurers may not rescind'' coverage.

Christopher Wolf, an attorney for the banks left holding the bag after EPIC defaulted and the insurers balked, called the ruling ''a major victory for the S&Ls who were innocent investors in the EPIC products.''

Wolf added: ''The court emphasized the duty of financial guarantors prudently to underwrite the transactions they back, even if lulled into a false sense of security by oral statements of issuers.

''The case has significance not only for the insurance industry but also for other third-party backers of financial transactions. The case is seen as requiring, in minimum, the meticulous reading of transaction-related documents.

''The case may serve as a precedent in other cases in which savings and loans are seeking to cut their losses on bad deals ... and are looking to third-parties on whom they relied,'' Wolf said.

The insurers had won at the original trial, but the banks won the reversal on appeal. The amounts in question were detailed only as ''millions.''

#90219u2403 08/07/1990 ~United Press International

(AUG. 7) UPI - Seven African countries have agreed to form a peace-keeping force to send to Liberia. The decision is a reaction to threats by Liberian rebel leader Prince Johnson. He says he will attack Marines protecting the U-S Embassy in the capital of Monrovia unless a U-S or West African peace-keeping force arrives. Johnson also says he will continue to hold an American and at least seven other foreigners hostage

until the outside forces show up.

One member of an all-women crew was killed early today... marring an inter-island yacht race in Hawaii. The 40-foot vessel from Japan apparently struck a reef off the island of Molokai and sank. Officials say the remaining crew members were rescued and transported to Honolulu by another vessel. All the survivors are reported to be safe.

A freak and severe windstorm slammed four giant hot air balloons to the ground today in northern California, injuring 17 people. Authorities say the injured were thrown out of, or bounced around the passenger baskets. Injuries ranged from cuts and bruises to broken ankles and fractured ribs. Three women were hospitalized, including one who is in serious condition.

Colorado Governor Roy Romer today ordered a grand jury to investigate whether a homebuilder and the failed Silverado savings and loan made illegal contributions to campaigns... including Romer's. Published reports say M-D-C Holdings and Silverado may have disguised political contributions to local, state and federal campaigns by funneling payments through subcontractors and employees.

#90219u2421 08/07/1990 ~United Press International

HOUSTON (AUG. 7) UPI - Houston Industries Inc. Tuesday reported net income of $77.5 million, or 61 cents a share, for the second quarter compared with earnings of $56.7 million, or 45 cents a share, for the same period last year.

The improvement in HI's earnings stemmed primarily from increased earnings at Houston Lighting & Power Co. The electric utility's gain was attributed to the recording of cost deferrals related to previous periods.

HI's cable television subsidiary, KBLCOM Inc., also reported improved results for the second quarter compared with the same period last year.

HI revenues for the second quarter were $1 billion compared with $950 million for the three months ended June 30. Six month revenues were $1.9 billion compared with $1.75 billion for the first half of 1989.

Consolidated net earnings for the six months were $68.7 million, or 54 cents a share, compared with $142 million, or $1.15 a share, for the same time last year.

The decline resulted from cost disallowances that HL&P experienced in its general rate case and also resulted from losses at KLBCOM related to cable systems acquired in March 1989.

Last year's results also included gains from the sale of HI's oil and gas properties.

-30- 1438

#90219u2422 08/07/1990 ~United Press International

BOSTON (AUG. 7) UPI - The struggling Bank of New England Corp. said Tuesday it plans to merge its healthier Springfield subsidiary - the last of what were five separate Bay State banks - into its Boston operation.

The move, if approved by banking regulators, would create a single bank from what until February had been five separate institutions that all used versions of the Bank of New England name.

Also, the consolidation of Bank of New England-West into the Bank of New England N.A. ''immediately bolsters the capital of the (Boston) bank,'' said Lawrence K. Fish, chairman and chief executive officer of the parent corporation.

''The Springfield bank is well capitalized and can help us out,'' said James Dorsey, a company spokesman. It has about $1.5 billion in assets and a stronger ratio of assets to liabilities than the Boston bank, Dorsey said. With the merger, the Boston bank would have pproximatley $14 billion in assets, he said.

The western Massachusetts bank has 40 branches and about 700 full-time employees, Dorsey said. Any possible layoffs or branch closings would be decided within a month or so, he added.

The president of BNE-West, C.D. Harrington, who has been with the bank some 35 years, previously said he planned to retire this summer but will remain with the bank until a ''regional'' president can be named, probably in the next month or so, Dorsey said.

The parent company, which lost more than $1 billion last year in the region's collapsing real estate market and has continued losing money this year, had been trying to sell some of its subsidiaries as part of a recovery effort designed to return it to its core businesses.

The company had some out-of-state inquiries for purchase of the Springfield bank last spring, but the price was not high enough, Dorsey said.

Meanwhile, he said ''discussions are continuing'' about a possible sale of the company's Rhode Island subsidiary, Bank of New England-Old Colony. The company recently decided to stop seeking a buyer for its Maine bank.

Fish has said the Boston bank and Connecticut Bank & Trust were part of

the core franchise and would not be sold.

-30- 2355

#90219u2442 08/07/1990 ~United Press International

(AUG. 7) UPI - Democrat Zell Miller, for 16 years a fixture as Georgia's lieutenant governor, was favored to take a giant step Tuesday toward the state's top job and end the campaign of Andrew Young, who had hoped to become the state's first black chief executive.

Miller and Young faced each other in a runoff, made necessary by a July 17 primary in which they captured the top two spots. State election officials said about a third of the eligible voters would cast ballots Tuesday.

The polls closed at 7 p.m. EDT.

Earlier this year, Young's supporters had hoped he would be able to succeed retiring Democratic Gov. Joe Frank Harris. But Young's campaign never seemed to catch fire and he ran far behind Miller in the July primary.

Polls showed that Young not only was unable to effectively extend far beyond his base in the primary, but that the former confidant of Martin Luther King also was having trouble attracting enough black voters.

Going into the Tuesday runoff, surveys showed Miller holding a lead of about 20 points and even Young - a former Atlanta mayor and ambassador to the United Nations - conceded he would need ''a miracle'' to win.

But Young campaigned down to the wire Tuesday and state election officials reported a ''heavy black turnout in urban areas ... heavier than in the primary.''

''We did everything we could in the primary, and that wasn't enough,'' said Young. ''So we buckled down, we worked harder, we prayed. We leave it to the Lord and the people.''

Regardless of the outcome, Young said race had not been a key factor in the campaign. Instead, he attributed Miller's strong support to a well-financed and organized campaign.

''I have not found this was a backward, racist state that was not ready to receive a black candidate,'' said Young, who generated controversy by his refusal to offer a handshake while on the campaign trail.

Waiting in the wings for the November election is the Republican nominee, state Rep. Johnny Isakson. But the odds against him are long since the state has not had a GOP governor for 122 years.

While the Georgia showdown was the top race of the day, primaries also were held in three other states.

The top races included:

-Michigan: Gov. James Blanchard and Sen. Carl Levin, both running for third terms, were unopposed in the Democratic primary. State Senate Majority Leader John Engler was favored to win the Republican gubernatorial nod, while Rep. William Schuette was expected to capture the GOP Senate nomination. Also, Detroit Councilwoman Barbara-Rose Collins was expected to win a Democratic primary to succeed retiring Rep. George Crockett.

-Kansas: The prime race was Republican Gov. Mike Hayden's battle to win nomination for a second term. Polls gave conflicting signals whether Hayden or real estate executive Nestor Wiegand was favored.

-Missouri: With no Senate or gubernatorial primaries, attention was on a handful of races in the state's congressional districts, but no incumbents appeared to be in danger.

Since he began his race in Georgia, Young's effort to become the first black elected governor in the Deep South was considered an uphill task.

After Democrat Douglas Wilder became the nation's only black governor last year with a win in Virginia, analysts wondered whether Young would be able to duplicate the feat in the Deep South.

However, Young has been criticized for not approaching the race with enough fire and has had difficulty stimulating substantial support among black voters.

State political analysts had estimated that in order to win, Young would need to pull about 95 percent of the black vote and more than one-quarter of the white vote. But exit polls showed that in the July 17 primary, Young's black support was only near 80 percent in some areas.

In addition to that problem, Miller, who heavily outspent Young, was able to stake out a popular position early in the race - promoting a state lottery to pay for educational changes.

He also made a strong law-and-order pitch, promoting the establishment of boot camps for first-time criminal offenders, while attacking Young for being mayor of Atlanta at a time when crime rose in the city.

#90219u2464 08/07/1990 ~United Press International

IRVINE, Calif. (AUG. 7) UPI - Howard Ruff said Tuesday he has been fired as president and chief executive officer of troubled FundAmerica Inc., a week after assuming the job and promising to reform the discount buying club.

Ruff, the financial iconoclast who had revealed last week that FundAmerica had paid $17 million to founder Robert T. Edwards, blamed his ouster on the revelation about Edwards, who is facing criminal fraud charges in Florida.

''I believe I was sacked because I was honest,'' Ruff said. ''I was sacked because I revealed true but damaging information about Bob Edwards.''

Ruff was named July 30 to replace Edwards as president and chief executive officer. He also said that FundAmerica plans to file for Chapter 11 banruptcy protection.

Officials at FundAmerica, based in Irvine, were not immediately available for comment.

Ruff, the Utah-based publisher of the ''Ruff Times'' newsletter, said he was informed Monday that he had been fired late Sunday at a previously unannounced shareholders meeting.

Ruff, who made his name predicting a financial collapse was imminent, had said last week that he and unnamed associates were negotiating to acquire the stock of FundAmerica, which is designed to obtain cash rebates for its members.

But Florida officials have charged membership dues from new investors are used to pay bonuses to existing members.

On Monday, a federal judge in San Francisco barred the sale of memberships in FundAmerica and continued a freeze on an estimated $17 million in the company's bank accounts.

The actions by U.S. District Judge Marilyn Hall Patel arose from a class-action lawsuit filed against FundAmerica by some of its investors, who are seeking more than $150 million in damages on behalf of its 100,000 members.

Ruff had announced last week that FundAmerica would stop selling memberships, Ruff spokesman Goerge Duggan said.

FundAmerica claims to offer its members cash rebates on bulk-purchased goods and services, such as catalog merchandise, travel services, long-distance telephone calls and bank credit cards.

But authorities contend the company, which does business in eight states, has no real product and exists solely as a pyramid scheme.

Texas state Attorney General Jim Mattox said Tuesday that in recent weeks some suppliers, such as Best Products Co., of Richmond, Va., and Maryland Bank NA, of Newark, Md., have stopped offering their products and services through FundAmerica.

MCI Communications Corp., the long-distance provider, has also notified FundAmerica that it plans to sever service to some 50,000 customers unless it receives immediate payment for services.

Mattox earlier forced FundAmerica, which has been dubbed the ''yuppie pyramid'' because of its mostly young and upscale clientele, to make substantial disclosures to Texas consumers about its marketing practices and services.

Edwards, the company's founder and former president, posted a $1 million bail on the Florida charge but cannot be located, said Mattox.

The attorney general said Edwards reportedly fled the country after taking some $17 million from the company's bank accounts during the past nine months.

#90219u2476 08/07/1990 ~United Press International

BRUSSELS, BELGIUM (AUG. 7) UPI - The European Community outlawed all trade with Iraq and Kuwait, the Council of Ministers said Tuesday.

''There is no need for an oil embargo as this set of rules which the EC agreed upon covers all trade,'' European Commission spokesman Willy Helin told reporters late Tuesday after the meeting of ambassadors of the 12 EC member states.

The official statement said that ''from Aug. 7, 1990 it is forbidden to either import any product that is originating or on its way from Iraq or Kuwait or export toward those countries any product that originates from the Community.''

The U.N. Security Council voted Monday to direct all 158 member states to impose an embargo on Iraq and occupied Kuwait in an effort to pressure Iraq to withdraw its troops from the oil-rich emirate, which it invaded Thursday.

-30- 1008

#90219u2506 08/07/1990 ~United Press International
MONTREAL (AUG. 8) UPI - Canadian Pacific Tuesday reported second-quarter earnings of $86.4 million, or 27 cents a share, down 25 percent from $115.9 million, or 37 cents a share, in the year-ago period. Revenues edged up to $2.27 billion compared with $2.26 billion in the second quarter of 1990.

For the first six months, CP reported earnings of $151.1 million, or 48 cents a share, compared with $229.8 million, or 72 cents a share, in 1989. Revenues slipped to $4.47 billion from $4.49 billion a year earlier.

CP said the biggest drop came from its forest products division which reported earnings of $7.7 million in the first six months, down from $93.4 million in 1989.

The earnings drop reflected weak market conditions, reduced volumes and prices for market pulp and led to production cutbacks at several forest product plants, CP said.

The company said its energy division - oil and gas, and coal interests - also reported decreased earnings. But CP's transportation and waste services divisions reported strong gains during the first half.

CP is diversified company with a number of subsidiaries, including Soo Line Corp., CP Ships, Laidlaw Inc., Fording Coal Ltd., and Canadian Pacific Forest Products Ltd.

#90219u2511 08/07/1990 ~United Press International
(AUG. 7) UPI - Defense sources say President Bush today ordered combat aircraft and several thousand U-S ground troops to Saudi Arabia. The sources report that the soldiers are meant to help Saudi forces defend bases against a possible Iraqi attack. Members of the 82nd Airborne at Fort Bragg, North Carolina, are said to be preparing to leave as early as tonight. The White House woN'T comment... but congressional leaders praise the move.

Last week's Iraqi invasion of Kuwait sent more ripples through world markets today. The New York Stock Exchange dipped slightly... with the Dow Jones industrial average down about six points. In Japan, the blue-chip Nikkei Average plunged more than 900 points- more than three percent. But prices rebounded on most European stock exchanges. Stocks benefited from reports Iraq might let foreigners in Kuwait leave the country.

Turkey says it is cutting off the flow of oil from two Iraqi pipelines that cross its territory. A semi-official news agency quotes the state minister saying NO loading will be allowed at the pipelines' terminal at

the Mediterranean coast. The Iraqi government yesteday shut off one of the lines and reduced the other... apparently because of reduced demand. Turkey's move is part of a U-N-endorsed embargo on trade with Iraq.

Hurricane Diana slammed ashore along Mexico's Gulf Coast late today near Tuxpan. Diana was upgraded from a tropical storm this morning. The storm is threatening villages at the foot of the eastern Sierra Madre mountains with 85 mile-an-hour winds and up to 10 inches of rain. Officials say the main threat to life will be rising waters on the coast and heavy rains producing flash floods and mudslides inland.

-30- 1884

#90219u2519 08/07/1990 ~United Press International

(AUG. 7) UPI - Colombia today swore in a new president, who vowed to fight cocaine cartels with everything he's got. Economist Cesar Gaviria declared that he will confront the drug trade withOUT concessions... calling it the ''principal threat'' to Colombia's democracy. Vice President Quayle attended the ceremony in Bogota and called on Gaviria to continue extraditing drug suspects to the United States.

NASA managers today canceled a fueling test for the shuttle Columbia. Officials say the decision puts the repaired spaceship on track for launch sometime between September 1st and 5th... barring further problems. Engineers at Florida's Kennedy Space Center plan to haul Columbia to the launch pad tomorrow for final preparations before the craft takes off on its long-delayed astronomy mission.

Two Spokane, Washington, men jailed for refusing to stand in respect for a judge were back in court today pursuing their civil rights lawsuit. Robert Newmeyer and Glenn Braunstein claim their rights were violated in 1988 when both were cited for contempt after failing to heed the ''all rise'' call by the bailiff. Both men say they frequent courtrooms as observers. When the judge entered the courtroom to begin today's proceedings, Newmeyer and Braunstein again stood out- by NOT standing.

The results of a poll of leading hairstylists and colorists was released today and entertainer Madonna and first lady Barbara Bush head the list. But while the national organization of coiffure experts put Madonna number one on its ''Great Hair-Women'' list, the first lady was given the ignominous distinction of topping the ''Awful Hair-Women'' category. Put another way, the poll says Madonna's locks ''make your head turn''... while Mrs. Bush's curls ''make your stomach turn.''

(AUG. 7) UPI - The deployment of American warplanes and troops to Saudi

Arabia apparently has begun. They are being sent to defend against a possible attack by Iraq. Witnesses report F-15 fighter jets departing Langley Air Force Base in Virginia. The planes were equipped with exterior fuel tanks... indicating an extended trip overseas.

U-S defense officials say paratroopers of the 82nd Airborne Division at Fort Bragg, North Carolina, are leaving tonight and will be in Saudi Arabia tomorrow morning. In Morehead City... 100 miles east of Fort Bragg... some 25-hundred Marines from Camp LeJeune set sail for the Mediterranean.

The Bush administration reportly has obtained landing rights from the Saudis for 14 Air Force Fbombers... now in Turkey... that could be used to bomb Iraq, refuel and pick up more bombs.

The Gulf Coast of Mexico is being pummeled by the 100-mile-an-hour winds and torrential rains of Hurricane Diana. The storm moved ashore this afternoon near Tuxpan... hitting with greater force than anticipated. Flooding and property damage is reported, but authorities say NO deaths have been reported.

A Liberian rebel leader may have gotten his wish of international intervention in his country's seven-month-old civil war. Seven African nations agreed today to send a peace-keeping force to Liberia after rebel leader Prince Johnson threatened to attack the U-S Embassy in Monrovia to force such intervention.

The polls have closed in Georgia, where former Atlanta mayor Andrew Young faces an uphill battle to become the state's first black governor. Lieutenant governor Zell Miller is favored to win the Democratic gubernatorial nomination in the run-off made necessary when Miller and Young captured the top two spots in the July 17th primary.

While the Georgia showdown was the top race of the day, primaries also were held in Michigan, Missouri and Kansas... where the prime race was Republican Governor Mike Hayden's battle to win nomination for a second term.

(AUG. 7) UPI - California authorities say 17 people were injured when a freak windstorm hit the usually serene Napa Valley today... slamming four giant hot air ballons to the ground. Three people were hospitalized, one in serious condition.

Tragedy struck an inter-island yacht race in Hawaii early today when one of the entries- a Japanese yacht with an all-woman crew- apparently hit

a reef off Molokai and sank. One crewmember drowned. The others were rescued.

Christian Brando, the oldest son of actor Marlon Brando, pleaded innocent today in a Santa Monica, California, courtroom to murdering the lover of his pregnant half-sister last May. The judge set bail for Brando at 10-Million dollars- believed to be the highest ever set in Los Angeles County.

Researchers at the University of Washington in Seattle say antibiotics taken after sex appear to be just as effective as daily doses of the medication for women prone to urinary tract infections. The results are reported in the Journal of the American Medical Association.

A Beaverton, Oregon, company says the government has approved its request to begin human testing of a saliva-based AIDS test. Officials for Epitope say the decision represents the F-D-A's first approved clinical study of a saliva-based test for the deadly disease.

Navy officials in Key West, Florida, have deployed a fleet of wood chunks to test whether endangered turtle hatchlings would drift into a weapons test site in the Gulf of Mexico. Spokesman Dan Probert says they're also considering using fruit in the test. He says navel oranges would be ''most appropriate.''

#90219u2819 08/07/1990 ~United Press International
(AUG. 7) UPI - After several days of talking tough about Iraq's invasion of Kuwait, President Bush took action today while remaining publicly silent. Defense sources say the president has ordered several thousand troops to Saudi Arabia to defend bases against a possible Iraqi attack. Bush is expected to make a formal announcement tomorrow morning... after the ground forces and combat planes have reached their destinations.

Andrew Young's bid to become Georgia's first black governor fell short in today's runoff for the Democratic nomination. With votes in half the precincts counted, the former Atlanta mayor and U-N ambassador lost to lieutenant governor Zell Miller by a margin of 68 to 32 percent. Miller now faces Republican state Representative Johnny Isakson and Libertarian Carol Ann Rand in November to determine who will succeed retiring Democratic Governor Joe Frank Harris.

Mexico's Gulf Coast is feeling the wrath of Hurricane Diana. The National Weather Service in Miami reports that the eye of the storm moved onshore this afternoon... bringing with it 100-mile-an-hour winds and torrential rains. Sea levels rose seven feet and rains flooded highways and rivers. There were NO reports of people killed or missing, but hundreds of homes were damaged.

Seven African countries agreed today to send a peace-keeping force to Liberia. The countries bowed to the demands of Prince Johnson, the Liberian rebel leader who threatened to attack the U-S embassy in the capital of Monrovia to provoke international intervention in his country's civil war. Johnson is holding an American and at least seven other foreigners hostage and says he will NOT release the captives until the peace-keeping forces arrives.

#90220b0003 08/08/1990 ~Business Wire
LOS ANGELES (AUG. 8) BUSINESS WIRE - Mercury General Corp., a major California automobile insurer, reported Wednesday that net income for the six months ended June 30, 1990, was $20.2 million, or $1.50 per share, compared with $9.7 million, or 72 cents per share, reported a year ago.

Results for the first six months of 1990 include a provision for potential rate refunds under Proposition 103, the California insurance initiative enacted in November 1988, of $6.8 million. This includes $500,000 of interest recorded in the second quarter. That provision reduced earnings for the full six months by 33 cents per share.

Earnings in the first half of 1989 were reduced by 55 cents per share as

the result of an $11.3 million provision for potential rate refunds, all of which was recorded in the second quarter. Per-share results in both periods are based on 13,505,000 outstanding shares.

Net income in the second quarter was $12.3 million, or 91 cents per share. In the 1989 second quarter, a loss of 5 cents per share was reported principally as a result of the $11.3 million provision for potential rate refunds which reduced earnings for that period by 55 cents per share.

The company's reserve for potential Proposition 103 rate refunds totaled $21.8 million at June 30, 1990. Except for accrual of interest in the second quarter, which impacted earnings in the period by 2 cents per share the reserve was unchanged from the level recorded at March 31, 1990.

Proposition 103 substantially revised the California insurance code and mandated a 20 percent rate rollback for policies issued or renewed during the period Nov. 9, 1988, to Nov. 8, 1989. The proposition was upheld in part by the California Supreme Court in May 1989. The court held that premium refunds could not be imposed if they produced less than a ''fair return'' to the insurance company.

The issue of ''fair return'' has been the subject of extensive, so-called ''generic'' hearings, now concluded, conducted by an administrative law judge who issued his recommended decision to the California Insurance Commissioner on May 7, 1990.

The commissioner, in a decision issued on June 12, 1990, and amended on June 15, 1990, adopted the principal elements of the ''fair return'' standards recommended by the administrative law judge applicable to the prior approval of rates subsequent to the conclusion of the rollback period, November 1988 to November 1989.

With respect to the rollback period, however, the commissioner departed significantly from the recommended decision and adopted a number of positions, including a fair return standard of 11.2 percent on actual statutory surplus for leveraged companies such as Mercury, which are unsupported by the weight of evidence developed in the ''generic'' hearings.

It is management's opinion that the record developed in those hearings, together with the recommended decision of the administrative law judge, supports the company's position that its profits during the rollback period were not in excess of the ''fair return'' standard imposed by the California Supreme Court. The company intends to contest vigorously any order or argument to the contrary.

If the commissioner's amended decision were upheld in its entirety and the company were unable to obtain some variance from its effect, the company's

potential refund liability could approximate $37 million.

Management believes, however, that the reserve of $21.8 million established for the potential impact of refund liability is a reasonable estimate and is adequate as of June 30, 1990, to reflect any probable adverse court determination.

The company's earnings subsequent to the rollback period, i.e., 1990 year-to-date results, appear to be near the upper limits of the allowable range of returns, which are also subject to potential refund, as defined in the prior approval portion of the commissioner's amended decision.

Premiums earned in the second quarter increased by 3 percent to $119.7 million. Underwriting results in the quarter were sharply improved over the year-earlier period.

The combined ratio (GAAP basis), computed without respect to potential rate refund provisions, was 97.2 percent, compared with 105.9 percent in 1989. For the full six months, the combined ratio was 97.6 percent, compared with 102.7 percent a year earlier.

Investment income in the quarter increased 20 percent to $12.5 million. After taxes at an effective rate of 16 percent in 1990, and 9 percent in 1989, investment income per share was 77 cents, compared with 70 cents a year ago. For the full six months, investment income was $24.8 million, a year-to-year increase of 23 percent.

Apart from the refund provisions, the year-to-year improvement in after-tax net results for the six months was 44 percent.

Capital gains in the first half of 1990 contributed 1 cent per share to net results, compared with 3 cents a year earlier.

Total assets at June 30, 1990, were $705.3 million, and shareholders' equity, net of the potential refund liability, was $191.5 million, or $14.18 per share.

On Aug. 3, 1990, the company's board of directors declared a quarterly dividend of 15 cents per share to be paid on Oct. 1, 1990, to stockholders of record on Sept. 14, 1990.

DALLAS (AUG. 8) BUSINESS WIRE - Atmos Energy Corp. (NYSE:ATO) Wednesday announced that William M.(Bill) Quackenbush would retire from its board of directors effective Sept. 1, 1990.

Quackenbush has served on the board since February 1984.

In making Wednesday's announcement, Charles K. Vaughan, Atmos chairman, said, ''Bill is an astute businessman and his knowledge of the oil and gas industry has been a great asset to our company and its shareholders. Although his retirement comes at a normally anticipated time, Bill will be greatly missed.''

Quackenbush, an independent petroleum geologist in Amarillo, has been involved in evaluating, generating and participating as a non-operating working interest owner in oil and gas prospects within Texas, Louisiana, Oklahoma and Kansas.

Atmos Energy Corp. provides natural gas service to more than one-half million customers in Texas, Louisiana and Kentucky through its operating companies - Energas Co., Trans Louisiana Gas Co. and Western Kentucky Gas Co.

SUNNYVALE, CA (AUG. 8) BUSINESS WIRE - Advanced Decision Systems, a leader in defense and commercial applications of artificial intelligence (AI), is pleased to announce that Mike Kaul has been promoted to vice president.

Kaul holds a masters degree in systems management from the University of Southern California and worked previously as director of advanced technology applications for the BDM Corp. This promotion comes in recognition of Kaul's strong contributions as chief operating officer.

Founded in 1979, the company has enjoyed consistent growth in revenue and in staff related to its efforts in AI applications and research.

Revenues reached approximately $17.5 million in 1989, with continued growth projected for 1990. The company currently has 175 employees, most of whom work in the Mountain View headquarters. A second office in Arlington, Va., has grown quickly this year and now has 30 full-time staff.

Advanced Decision Systems conducts basic and applied research, prototype system development, applications consulting, custom system development, and product development in the areas of artificial intelligence, estimation and control systems, and decision theory for clients in the public and private sectors.

The employee-owned company is the largest independent supplier of AI services to the federal government.

KANSAS CITY, MO (AUG. 8) BUSINESS WIRE - US Sprint announced Wednesday that it has reached an agreement with South Central Bell Telephone Co. and Southern Bell Telephone and Telegraph Co. to provide a complementary 800 service, to simplify the ordering, billing and maintenance of 800 services in the Southeastern United States.

The agreement will allow customers in the BellSouth region to choose US Sprint as their interLATA 800 service carrier and the BellSouth Companies as their intraLATA carriers and order the full service through these companies.

Under the agreement, US Sprint can carry the interLATA 800 calls that reach outside the service boundary of the BellSouth Companies. The BellSouth Companies will transport intraLATA 800 calls. The service will utilize the recently deployed BellSouth Signalling System 7 Technology to provide this dynamic capability.

This is the second agreement of this kind for US Sprint. In November 1989 the company teamed with Pacific Bell to market complementary 800 service.

The California Service introduction has been remarkably successful. The service allows customers the convenience of ''one-stop'' shopping.

''This is another step towards providing customers the opportunity to make a choice,'' said Ron LeMay, president of US Sprint. ''Technology has opened the door for customers to have the freedom to tailor their 800 service and not be subjected to administrative policies which have long prevented flexibility between customers' marketing desires and their choice of long distance carriers.''

Long distance 800 service has been provided under an interim arrangement since 1987 that gives exclusive rights of NXX numbers (the three digits following the ''800'') to competing long-distance companies. Under the interim arrangement, customers desiring to change long distance carriers had to change their 800 number, thus preventing true competition in the market.

Now because of changing technology and regulations, companies such as the BellSouth Companies may utilize centrally located databases with the ability to process all 800 numbers, allowing customers to choose their 800 service carriers while retaining their 800 number. The provision of this service will begin when the BellSouth Companies have filed and received approval of appropriate tariffs.

''The agreement between US Sprint and BellSouth marks another step forward in the industry's progress toward a competitive 800 service market,'' said Brian Twomey, director of product management for US Sprint. ''The bottom line is that the customer will benefit from these types of agreements in terms of convenience and efficiencies.''

#90220b0037 08/08/1990 ~Business Wire

KANSAS CITY, MO (AUG. 8) BUSINESS WIRE - US Sprint Wednesday announced a network enhancement that dynamically impacts the international telecommunications market, providing a platform for Signaling System 7 (SS7) on US Sprint's international DMS-300 switches.

The company has completed installation of Northern Telecom's SuperNode central processing unit which performs computing functions for call processing and system control.

US Sprint has installed the upgrade in its international switches at New York, Stockton, Calif. and Honolulu, Hawaii. Last September US Sprint announced the completion of a nationwide SuperNode upgrade on its 41 Northern Telecom domestic DMS-250 switches.

On the threshold of innovative dimensions, US Sprint is leveraging its nationwide all digital fiber-optic network with advanced intelligent network architecture enhancements to provide evolving technologies for voice and data products of the '90s.

''With the implementation of SuperNode and SS7 on their DMS-300 systems, US Sprint has taken a major stride toward transparent global networking,'' said Lou Lafferty, vice president, US Sprint account, Northern Telecom Inc.

Implementing the DMS-300 SuperNode involved replacing Northern's NT40 16-bit central processing unit with a new high performance 32-bit microprocessor.

US Sprint is a unit of United Telecommunications Inc., a diversified international telecommunications company headquartered in Kansas City, Mo.

SOLANA BEACH, CA (AUG. 8) BUSINESS WIRE - Chart House Enterprises Inc. (NYSE:CHT) announced the opening of three new Chart House restaurants located in Greenwich, Connecticut; Alexandria, Virginia and Cohasset, Massachusetts.

This brings the 1990 openings to six with a seventh restaurant due to open in Scottsdale, Arizona in October.

Paradise Bakery Inc., a wholly owned subsidiary of the company announced the opening of two new retail bakeries in Southern California. Seven more units are projected to open by year-end.

The company also announced the consummation of a long-term debt financing with Metropolitan Life Insurance Co. The transaction involved the issuance to Metropolitan Life of a 10.40 percent Senior Secured Note due 2000 in the amount of $15 million. The company applied the proceeds to reduce borrowings under its bank credit line.

Chart House Enterprises Inc. operates 83 restaurants, including 64 Chart

Houses, one Peohe's, 15 Paradise Bakeries and three Cork 'N Cleavers. The company's restaurants are located in 20 states, Puerto Rico and the U.S. Virgin Islands. In addition, the company's franchisees operate 13 Paradise Bakeries in Northern California, Colorado, Arizona, Oklahoma and Oregon.

#90220b0046 08/08/1990 ~Business Wire

ST. LOUIS (AUG. 8) BUSINESS WIRE - An 8.3 percent sales increase for Budweiser, along with the continuing growth of Bud Light and Bud Dry Draft drove Anheuser-Busch to the highest July sales performance in the company's 138-year history, it was announced by Patrick T. Stokes, president of Anheuser-Busch Inc.

''Our strategy behind the Budweiser brand is working,'' said Stokes. ''The trends for the brand are positive and, with the continuing growth of Bud Light and Bud Dry Draft, we have a competitive triple threat going into the 1990s.''

In July, Anheuser-Busch recorded a 15.6 percent companywide sales increase compared to July of 1989. July year-to-date, Anheuser-Busch experienced a 6.7 percent increase in sales, significantly outperforming the U.S. brewing industry overall, which grew at the rate of only about 1 percent during the same period.

Bud Light experienced a 14.9 percent increase in July compared to the same period in 1989. And Bud Dry Draft, which was introduced nationally in April, has sold more than 1.5 million barrels through July.

''The strong performance of Budweiser in July is important,'' Stokes said, ''because it brings the brand to a year-to-date position which is equal to its 1989 performance. We've held Budweiser sales steady despite a strong increase from Bud Light and the successful introduction of Bud Dry. The trend for the Budweiser family of brands is extremely positive.''

A variety of factors have contributed to Budweiser's performance, said Stokes.

''Our new 'Nothing Beats a Bud' summer promotion has been received enthusiastically by both retailers and consumers,'' he said. ''And our decision to meet our competitors' discounted prices has returned Budweiser to a level playing field where it clearly can compete very effectively.''

The Budweiser family of brands -- Budweiser, Bud Light and Bud Dry Draft

-- represents approximately one-third of all beer sales in the United States. Budweiser, which alone outsells the combined barrelage of the next largest U.S. brewer, accounts for more than one of every four beers purchased in America.

#90220b0047 08/08/1990 ~Business Wire

BIRMINGHAM, AL (AUG. 8) BUSINESS WIRE - Alan V. Kaufman, president of Sandwich Chef Inc. (NASDAQ:SHEF), Wednesday reported increased sales and earnings for the fourth quarter and year ended June 30, 1990.

In addition, it was announced that the board of directors declared a three-for-two stock split. The stock split will be effected in the form of a 50 percent stock dividend. The new shares will be distributed on Sept. 7, 1990, to stockholders of record as of Aug. 20, 1990.

Fiscal 1990 revenues increased 9.3 percent to $37.4 million, up from $34.2 million recorded in fiscal 1989. Net earnings for the year increased over threefold to $629,400, compared with $208,900 in fiscal 1989. Fully diluted earnings per share increased 200 percent to 60 cents per share, compared with earnings of 20 cents in fiscal 1989.

Net sales for the fourth quarter increased 8.6 percent to $9.8 million, compared with sales of $9.0 million in the fourth quarter of fiscal 1989. Net earnings rose by 38.8 percent to $236,000, compared with $170,100 in the same period last year. Fully diluted earnings per share increased 37.5 percent to $.22 per share compared with 16 cents per share in the fourth quarter of fiscal 1989.

''Our earnings improved dramatically in fiscal 1990 as a result of our focusing on the development of larger units,'' stated Kaufman. ''This was achieved even though the number of operating units decreased. The 20 stores opened in fiscal 1990 are among the most profitable to date. During fiscal 1990, we continued our program of upgrading units, opening new units and closing units that did not meet our profit expectations.

''We closed or sold 29 units during the year, virtually eliminating the smaller and under-performing stores. We believe our existing store base is now the strongest in our company's history.

''With the close of fiscal 1989, we marked our tenth consecutive quarterly improvement in same store sales. Same stores sales increased 4.5 percent in the fourth quarter, largely due to higher sales in stores that we remodelled and to higher occupancy levels in many of the buildings in

which we have units,'' concluded Kaufman.

Sandwich Chef owns and operates a chain of 134 delicatessen-style sandwich shops in nine cities.

#90220b0064 08/08/1990 ~Business Wire

PORTLAND, OR (AUG. 8) BUSINESS WIRE - The Benj. Franklin Federal Savings and Loan Association reported a $9.7 million profit during the second quarter ended June 30, 1990, increasing year-to-date earnings to $14.5 million.

Earnings for the first six months included a gain on sales of assets of $9.6 million.

The Benj. Franklin was placed into conservatorship Feb. 21, 1990, by the Resolution Trust Corp. (RTC) because it had a negative tangible net worth and did not meet new industry capital rules passed by Congress last year.

RTC initiated a major write down of assets and other adjustments in fourth quarter 1989 in accordance with new regulatory and accounting requirements including the write-off of goodwill remaining from prior acquisitions. This restructuring has significantly benefited earnings.

Leland R. ''Rocky'' Johnson, Benj. Franklin executive vice president, said ''The institution's performance during this period of transition is testimony to the tremendous amount of support we have received from our customers and our highly committed staff.''

RTC is seeking a purchaser for The Benj. Franklin and has found significant interest. All parties bidding on The Benj. Franklin must be prequalified and meet certain financial and legal requirements. RTC has set an objective of finalizing the sale of The Benj. Franklin by Sept. 30, 1990.

In preparation for sale, RTC continues to restructure The Benj. Franklin by selling assets and repaying debt. The restructuring has reduced total assets to $3.8 billion as of June 30, compared to $4.7 billion six months earlier.

Deposits remain federally insured up to $100,000 and customers have full access to their funds through the date of sale and after.

The Benj. Franklin is the largest savings and loan headquartered in Oregon

with 88 branch offices in Oregon, Washington, Idaho and Utah.

#90220b0065 08/08/1990 ~Business Wire

BOSTON (AUG. 8) BUSINESS WIRE - cc:Mail Inc., the industry's leading provider of Local Area Network (LAN)-based distributed electronic mail (E-mail) systems, announced Wednesday at MACWORLD Expo that Martin Marietta Corp. has standardized on cc:Mail as its enterprise-wide E-mail system.

This announcement follows a comprehensive product evaluation performed by Martin Marietta. Products from 11 E-mail vendors were initially considered by the 90-person E-mail evaluation team. From that group, four vendors were chosen to participate in a rigorous nine month, multisite pilot program.

Based on superior connectivity, performance and overall product quality, cc:Mail emerged as the E-mail vendor of choice.

Martin Marietta's search for an enterprise-wide LAN-based E-mail solution followed an in-depth internal study of the company's electronic communication patterns. The 1988 Office Systems Survey conducted by their Computing Standards unit found that ''more than 40 percent of communications (at Martin Marietta) is within a department.''

According to Alan Soucy, manager of Computing Standards for Martin Marietta, Information Systems Group, ''Our study clearly indicated that our flow of information at Martin Marietta was moving into the local communications environment. As a result, we concluded that our strategic mail direction should be LAN-based with strong connectivity to our existing mainframe systems.''

As a premier Apple corporate account, Martin Marietta carefully tested all E-mail vendors' capabilities in the Macintosh arena during the selection process. ''Since roughly 50 percent of our LAN-based mailboxes would be MAC-based, we were intent on finding an E-mail vendor whose multi-platform line included a strong Mac offering,'' stated Soucy.

cc:Mail Inc. is a privately held developer and marketer of a variety of E-mail and other LAN software office automation products for Fortune 1,000 companies, large government agencies and eductional institutions.

The company's E-mail system runs on all major LANs and workstation platforms and provides transparent connectivity (gateways) to other major E-mail systems and to Group 3 facsimile machines worldwide.

SANTA CLARA, CA (AUG. 8) BUSINESS WIRE - Voicemail International Inc. (VOICEMAIL) Wednesday announced that it has expanaded its VOICEMAIL II system to 256 ports and increased the message storage capacity of its system product line.

The capacity of the VOICEMAIL II system has been expanded to support 256 ports with 1,000 hours of storage, making it the most powerful single-node system available today.

Like all VOICEMAIL systems, the VOICEMAIL II can simultaneously integrate with multiple external host systems -- PBXs, Centrex or computers -- to support multiple voice processing applications from a single platform.

The VOICEMAIL I system, which is designed to operate in a business office environment and can support from eight to 24 ports, has now been upgraded to provide up to 70 hours of message storgae.

''VOICEMAIL's increasing system capabilities will position the company to meet the foreseeable requirements of telecommunication service providers, universities and large corporations as voice processing applications continue gaining acceptance as a tool to increase revenues, improve customer support and streamline communication,'' said James M. Thompson, VOICEMAIL's vice president of sales and marketing.

VOICEMAIL is a publicly held company that markets voice processing services and systems worldwide. The company's proprietary, patented VOICEMAIL systems allow callers to record and retrieve natural voice messages and information from any telephone.

ANAHEIM, CA (AUG. 8) BUSINESS WIRE - Pacific Inland Bancorp (NASDAQ: PIBC) Wednesday reported financial results for its 1990 second quarter and first six months, ended June 30, 1990.

For the second quarter, the Bancorp reported net income of $71,200, or 6 cents per share, including a net operating loss carryforward of $24,103, or 2 cents per share. The company reported net income of $184,143, or 13 cents per share, including a net operating loss carryforward of $78,700, or 6 cents per share, for the second quarter of 1989.

For the first six months of fiscal 1990, the Bancorp reported net income of $129,055, or 10 cents per share, including a net operating loss carryforward of $47,903, or 4 cents per share. The company had net income of $424,483, or 29 cents per share, including a net operating loss carryforward of $186,200, or 13 cents per share, for the first half of 1989.

PIBC's banking subsidiary, Pacific Inland Bank, reported an operating profit of $202,000 for the quarter, compared with an operating profit of $258,000 for the prior-year period. Pacific Inland Bank's 1990 second-quarter operating profit was reduced $22,000 by losses associated with PIB Mortgage Co., a newly created mortgage banking subsidiary of the bank.

The Bancorp's asset management subsidiary, Trident Investment Management Inc., reported an operating loss of $59,000 for the quarter, compared with a loss of $19,000 for the second quarter of 1989.

Pacific Inland Bancorp is comprised of Pacific Inland Bank, a business and professional bank based in Anaheim and Trident Investment Management Inc., a registered investment advisor.

Pacific Inland Bancorp's common stock is traded over the counter. It is listed on NASDAQ as PIBC, and in newspapers as PACINLD or Pac Inland Bk.

SAN FRANCISCO (AUG. 8) BUSINESS WIRE - Bank of America's M.L. (Larry) Greenberg, head of its Asia commercial banking activities, has been named an executive vice president by the bank's board of directors.

Greenberg, 52, has been with Bank of America for 23 years, 18 of them in Asia. He has been responsible for commercial banking products and relationships in Asian countries since February, and reports to the bank's Asia Division Executive Vice President, John V. Rindlaub, in Hong Kong.

''Larry's personal understanding of Asia's cultures and banking environments, and his extensive customer relationships in the region, add to the stregth of our operations here,'' said Rindlaub.

Greenberg joined Bank of America in 1960 as a trainee, later serving as an administrative officer responsible for credit extensions to South and Southeast Asian banks and corporations.

In 1964, he was assigned to Bombay, where he helped open the bank's first Indian branch. Two years later he moved to Calcutta as senior credit officer to help open a branch there, and, in 1969, was named manager of

that branch.

Greenberg was appointed vice president and general manager of the bank's Thailand operations in 1972. He moved to the bank's New York Edge Act Office in 1975, with responsibility for developing its international business.

Greenberg left the bank temporarily in 1976 to head American Express International Banking Corp.'s Asia network and later served as chief executive officer of a San Francisco bank.

He returned to Bank of America in 1983 to manage its Taiwan activities. He was named senior vice president and manager of the Tokyo-based Japan/Korea area in 1986.

In 1988, he was named area manager of its East Asian Area activities, the position he held prior to assuming his current responsibilities in Hong Kong.

Born in Philadelphia and raised in Japan, Greenberg holds a BA degree from Claremont-McKenna College in California and has completed Harvard University's Advanced Management Program.

LOUISVILLE, CO (AUG. 8) BUSINESS WIRE - Storage Technology Corp. said Wednesday it has adopted a new, ten-year shareholder rights plan to replace its existing one-year plan which expires Aug. 31, 1990.

The plan is designed to deter coercive or unfair takeover tactics and to prevent an acquirer from gaining control of the company without offering a fair price to all of the company's shareholders. The company said the plan has not been adopted in response to any offer to acquire control of the company and that it is not aware of any such offer.

The new plan takes effect Aug. 31, 1990 and expires Aug. 31, 2000. It is substantially the same as the plan it replaces. Differences include a higher exercise price ($150 as opposed to $35) and a revised ownership "flip-in" provision which lowers the triggering threshold to 15 percent from 25 percent.

Storage Technology Corp. manufactures, markets and services, worldwide, information storage and retrieval subsystems for high-performance computers.

IRVINE, CA (AUG. 8) BUSINESS WIRE - Western Financial Savings Bank (NASDAQ:WSTF) Wednesday announced an offering of $150 million of automobile receivable collateralized bonds by its wholly owned subsidiary, Western Financial Auto Loans 2 Inc.

With this latest announcement the bank has now offered 11 auto bond issues totaling over $1.3 billion over the past four years. Stephen W. Prough, bank president, said the amount is indicative of the continuing demand for automobiles and light trucks in the California market.

The bank historically has done a significant portion of its business in automobile financing, both purchasing motor-vehicle sales contracts from new-car dealers and providing loans directly to consumers from its statewide branch network.

The newest bonds, Series 1990-A, due Oct. 1, 1995, have a coupon-rate of 8.35 percent, and were priced at 75 basis points over the two-year treasury to yield 8.51 percent. The average rate of the pool of receivables collateralizing the bond issue is approximately 16.05 percent.

Western Financial is the principal subsidiary of Westcorp Inc. (ASE:WES), a diversified financial-services company. Donaldson, Lufkin & Jenrette is sole manager of the offering which includes a guarantee of timely interest payment and of ultimate payment of the principal provided by Financial Security Assurance Inc.

This guarantee ensures the bonds will be rated in the highest category by at least one nationally recognized rating agency.

Western Financial Savings Bank operates 24 retail bank branches, 10 real estate loan offices and 5 automobile finance centers throughout California. The bank also offers consumer-finance services across the state through Westcorp Financial Services, a wholly owned subsidiary with 27 offices.

CARSON, CA (AUG. 8) BUSINESS WIRE - Dynasty Classics Corp. (NASDAQ:DNST) Monday reported net earnings from operations of $352,000, or 5 cents per share, for the second quarter ended June 30, 1990.

This represents a 78 percent increase over net earnings of $198,000, or 3 cents per share, for the second quarter 1989.

Net sales for the second quarter 1990 increased to $15,053,000, compared with $13,837,000, for the same period in 1989.

Dynasty Classics markets home decor products principally through major retailers. The company designs, imports, manufactures and distributes decorative and fixtured lighting, Christmas lighting and accessories and comfort products under the brand names Dynasty Classics, South Coast and Holiday Classics.

The company's customers include warehouse clubs, major nationals, home centers and, to a lesser extent, mass merchandisers, catalog retailers and hardware cooperatives.

REDMOND, WA (AUG. 8) BUSINESS WIRE - A new combination of ingredients will hit the menu board when America's favorite quick-service restaurant and America's number-one video game company -- McDonald's and Nintendo of America Inc. -- team up for a national ''Super Mario Bros. 3'' Happy Meal promotion.

The ''Super Mario Bros. 3'' Happy Meal will be available in all participating McDonald's restaurants from Wednesday, Aug. 8. Customers who purchase the Mario Happy Meal will receive one of four toys based on characters in the popular Nintendo video game ''Super Mario Bros. 3.''

''The Nintendo/McDonald's promotion represents our first major tie-in with a quick-service restaurant,'' said Peter Main, Nintendo's vice president of marketing, ''and responds to the incredible popularity of Mario, this country's number-one video game hero.''

''This is a great opportunity,'' said David Green, McDonald's vice president of national marketing, ''to bring the fun of Nintendo to the more than 18 million U.S. customers of McDonald's restaurants, particularly since Mario and McDonald's have such strong appeal to the entire family.''

Nearly 30 million games in the ''Super Mario Bros.'' series have been sold since the nationwide introduction of the Nintendo Entertainment System in the fall of 1986. The latest in the series, ''Super Mario Bros. 3,'' is projected to be the largest-selling video game in history, with sales of 9 million game paks expected in 1990 alone, representing retail revenues of $450 million.

Nintendo is supporting the ''Super Mario Bros. 3'' game with more than $10 million in television advertising and merchandising support -- in more than 12,000 retail outlets -- throughout the second half of the year.

Redmond-based Nintendo of America Inc. sells personal, home and arcade video games in the United States. The company is the headquarters for marketing in North America and is the largest subsidiary of the world's largest manufacturer and marketer of video games, Nintendo Company Ltd.

McDonald's is the world's leading food-service organization, serving 22 million people each day in more than 11,200 restaurants in 52 countries. Seventy-five percent of McDonald's restaurant businesses are locally owned and operated by independent entrepreneurs.

STANFORD, CA (AUG. 8) BUSINESS WIRE - Dr. Franklin Ebaugh Jr., chief of staff at the Palo Alto Veterans Affairs Medical Center since 1972, died Tuesday, Aug. 7, at his Stanford home after a long illness. He was 68.

Ebaugh had been on medical leave since July 10 and had recently stepped down from his position as associate dean for VA affairs and professor of medicine at Stanford University School of Medicine.

''Frank did an outstanding job during his long tenure at the PA VAMC, and he was widely recognized as perhaps the most outstanding chief of staff in the entire VA system,'' said Dr. David Korn, vice president and dean of the Stanford University School of Medicine.

''He was of enormous assistance to me as dean, and he was positively heroic in holding together our diverse VA academic programs in the aftermath of the Loma Prieta earthquake. He surely will be missed.

''He has made significant contributions to the Palo Alto VA Medical Center in the past 18 years,'' said James C. DeNiro, director of the VA center. ''His commanding presence, intelligent leadership and belief in the VA health care system will be missed.''

Ebaugh was well-known throughout the Department of Veterans Affairs and had testified before Congress. He had been pushing for congressional funding to replace the medical center buildings damaged by the earthquake last Oct. 17.

''Dr. Ebaugh has been a positive force for the betterment of health care for veterans,'' said Robert Lindsey Jr., director of the VA's Western Regional Office. ''As a mentor and leader, his qualities of persistence, generosity and willingness to break new ground have left us with a benchmark in management.''

Ebaugh graduated magna cum laude from Dartmouth College in 1944 and received his M.D. from Cornell Medical College in 1946. He did his medical internship and hematology residency at New York Hospital. After positions as research associate and member of the U.S. Public Health Service, he worked as associate director of laboratories in Hitchcock Clinic and Mary Hitchcock Memorial Hospital in Hanover, N.H.

He became dean of the Boston University School of Medicine in 1964. Four years later, he became dean of the University of Utah School of Medicine, where he remained until he came to the Palo Alto VAMC.

A colonel in the Army Reserves, Ebaugh recently received two of the highest honors awarded by the Department of Veterans Affairs: the Chief Medical Director's Commendation and the Secretary's Distinguished Physician Award.

He was also honored for his contributions to Stanford University, including being named ''Advisor of the Year'' in 1987. Korn has announced a faculty award will be presented annually at commencement in Ebaugh's name. It will honor a faculty member who has demonstrated outstanding dedication to advising medical students.

Ebaugh is survived by his mother and three daughters.

Before his death, Ebaugh had requested that memorials be donations to the Palo Alto VAMC Child Care Fund, made through the Community Foundation of Santa Clara County, 960 West Hedding, Suite 220, San Jose, Calif., 95126.

GRANDVIEW, Mo. (AUG. 8) BUSINESS WIRE - North American Savings Bank announced Wednesday net earnings for the quarter ended June 30, 1990, of $953,267, or 42 cents per share.

This compares to net income of $430,162, or 27 cents per share, for the same period in the prior year.

The nine-month period ended June 30, 1990 reflects a net loss of $1,155,777, or 59 cents per share. This compares to a net income of $1,365,478, or 85 cents per share, for the same period in 1989. The loan loss provision for the three quarters in 1990 was $3,190,944 and for the comparable period in 1989 was $874,411. North American exceeds the current and fully phased-in capital requirements.

Following the end of the quarter, North American received approval from its stockholders to change its name from North American Savings Association to North American Savings Bank. This change was made to more accurately reflect the business generally being conducted by North American.

The bank's stock is traded on the NASDAQ over-the-counter exchange under the symbol NASB.

KANSAS CITY, MO - (AUG. 8) BUSINESS WIRE - At their regular meeting on Aug. 8, 1990, the board of directors of BMA Corporation (BMAC) approved several actions:

- declared a regular quarterly dividend of 30 cents per share payable Sept. 14 to stockholders of record Sept. 11;

- declared a one-time, special dividend of $3.70 per share payable Sept. 14 to stockholders of record Sept. 11;

- elected James R. Seward - senior vice president

- elected Beth S. Hall - secretary, in addition to her current position as senior vice president.

- elected Steven K. Fitzwater - vice president, treasurer, assistant

secretary and chief accounting officer.

W. Thomas Grant, president and chief executive officer of BMA Corp. said, ''We are pleased that BMA Corp. stockholders are able to directly share in the value of the recent sale of BMAC's insurance subsidiary with the payment of the special dividend of $3.70 and the regular quarterly dividend of 30 cents per share, for a total of $4 per share.

''In a news release on July 31, we also confirmed board authorization of $70 million for BMAC to enter the market from time to time, for the purpose of acquiring shares of BMAC and/or Home Office Reference Laboratory (HORL) shares. Of the $70 million, up to but not in excess of $20 million may be utilized for repurchase of HORL stock.

''Although the sale of insurance operations will be booked in the third quarter, financial data regarding the estimated $35 million after-tax gain from the transaction will be included when the second quarter earnings are released next week.''

SAN FRANCISCO (AUG. 8) - Pacific Telesis Group announced the government of East Germany has asked Mannesmann Mobilfunk, a consortium in which Telesis holds a 26 percent interest, to submit a proposal to extend its D2 cellular service into the German Democratic Republic.

Last week the telecommunications ministers of East and West Germany announced their intention to make such an offer; Mannesmann Mobilfunk received the official invitation Wednesday, Aug. 8.

Terms of the invitation specify that Mannesmann Mobilfunk must submit a proposal by the end of November 1990.

Mannesmann Mobilfunk is currently building the world's largest digital cellular system in West Germany, known as D2. This will compete with the government-owned D1 system which will also be extended into East Germany. Mannesmann Mobilfunk won the West German D2 license in December 1989 through competitive bidding with nine other international consortia.

It expects to begin offering service in the summer of 1991.

According to Lee Cox, president and chief executive officer of PacTel Corp., the holding company for Telesis' diversified companies, ''We are pleased that Mannesmann Mobilfunk was the only group the East German

government approached for a cellular proposal and we're confident it will submit a plan fully responsive to East Germany's needs.

If our consortium is granted this license, its German D2 system would cover a total of 77 million potential customers (POPs). Telesis' share of these would equal 20 million POPs.''

Pacific Telesis Group is a worldwide diversified telecommunications corporation based in San Francisco.

ZURICH, SWITZERLAND (AUG. 8) BUSINESS WIRE - Switzerland's leading firms in the field of advertising and public relations -- the GGK Group and the Trimedia Group respectively -- have signed a basic agreement to form a partnership.

The resulting consolidated communications group will have an annual gross income exceeding $88 million. Through its 29 offices in 20 countries and total staff of more than 850, it will be well placed for the single European market.

GGK and Trimedia agreed to complete all major legal, organizational and financial aspects of the partnership before the end of the year. ''Our common goal is to keep the well-established identities of GGK as advertising experts and Trimedia as public relations and financial communications experts, giving our clients the best of both worlds,'' stressed Paul Gredinger.

Further information about the new partnership structure will be released as soon as all the necessary detailed agreements have been signed.

SAN JOSE, CA (AUG. 8) BUSINESS WIRE - SJNB Financial Corp. (NASDAQ:SJNB), holding company for San Jose National Bank, San Jose, and Tri-Valley National Bank, Dublin, reported net income of $294,000, or 18 cents per share, for the quarter ended June 30, 1990.

This compares with a net loss of $1,024,000, or 64 cents per share, for the like period in 1989. The per-share amounts have been adjusted for the 10 percent stock dividend declared in March of 1990.

For the six months ended June 30, 1990, the company posted net earnings of $539,000, or 33 cents per share, as compared with a net loss of $658,000, or 41 cents per share, for the first six months of 1989.

The company's total consolidated assets at June 30, 1990, were $104 million, as compared with $107 million at the same date in 1989. Total consolidated loans grew to $74 million at June 30, 1990, from $68 million in 1989, while consolidated deposits decreased from $92 million at June 30 1989 to $89 million at June 30, 1990.

SAN DIEGO (AUG. 8) BUSINESS WIRE - Cipher Data Products Inc. Wednesday announced that its business conditions have stabilized and that interest in the company's latest products and engineering developments should lead to improved revenue growth during the next 12 months.

The company, a subsidiary of Archive Corp., had previously been feeling the effects of a negative business environment within the minicomputer systems market.

Cipher President Craig V. Turner said: ''Cipher has placed focused emphasis on product development and marketing over the last several months.'' Recently, the company announced the addition of an embedded SCSI (Small Computer Systems Interface) on its F880 Microstreamer, thereby improving reliability while reducing cost and saving space in the industry's best-selling phase-encoded tape drive.

''We are very pleased with the marketplace reaction to our F880ES drive,''

Turner continued. ''Both Digital Equipment Corp. and Datapoint are taking volume deliveries of the drive and, most recently, Olivetti has accepted the product as well.''

Turner added that the company was also beginning to see positive results from recent marketing efforts: ''Within the last three months, Denmark's R.C. International, a division of I.C.L. in the United Kingdom, has accepted our 3830 half-inch cartridge drive and ROCC in the United Kingdom has qualified our M995 low-profile GCR CacheTape drive.

''In the United States, Dickens Data, which is another long-term Cipher customer, has qualified both the F880ES and the M995. The M995 is also part of the $16 million contract with DEC, which we announced earlier in the year.''

The company expects that its future growth, however, will come mainly from an anticipated product to be introduced in early fall.

''We are already seeing a great amount of interest in our 3480-compatible half-inch cartridge drive,'' Turner noted. ''The OEMs with whom we have spoken are impressed with the product's performance and capability. This tape drive will be significantly less expensive and offer more exciting attributes than its nearest competitors. Those are very persuasive selling points.

''We are convinced that 1991 will be a very strong year for Cipher and its new half-inch 3480-compatible drive. As a result of this new product, as well as the refinements we have made within our existing product line and our increased marketing activity, we expect Cipher to enjoy a period of growth and expansion over the next 12 months.''

Cipher Data Products Inc., an Archive company, is a leading designer/manufacturer of half-inch tape drives. More than 260,000 drives have been shipped by the company for use with systems ranging from personal computers to mainframes. Cipher markets its products through a worldwide network of direct sales offices, leading distributors, value-added resellers and system integrators.

SAN FRANCISCO (AUG. 9) BUSINESS WIRE - Bank of America's board of directors has named Sheryl L. Bartolucci, director of its World Banking Group Human Resources, a senior vice president. Bartolucci, 47, has been responsible for providing human resources services for the World Banking Group's domestic and international operations and several of its

subsidiaries since June. She reports to Vice Chairman Lewis W. Coleman, head of the World Banking Group.

Coleman said Bartolucci's strong corporate management and entrepreneurial skills are an excellent match for the varied human resources needs of the international marketplace. Bartolucci joined the bank in 1989 as head of Human Resources Planning and Development in Corporate Human Resources. In addition to managing her own consulting firm for three years, Bartolucci had also been a senior vice president in human resources for Crocker Bank in San Francisco and Los Angeles for seven years. Bartolucci received a BA in political science and psychology from the University of California, Los Angeles, in 1965, and served as a Peace Corps volunteer in Peru in 1966 and 1967.

#90220b0255 08/08/1990 ~Business Wire

SACRAMENTO, CALIF. (AUG. 9) BUSINESS WIRE - The Association of California Life Insurance Companies (ACLIC) Wednesday called for the enactment of guaranty fund legislation to protect policyholders from losses due to an insurance company insolvency.

ACLIC, representing 39 California life insurers, called for the passage of AB 4076 (Johnston), which sets up a state guaranty fund to provide coverage for insurance contract obligations. California is one of only six states without a life guaranty fund.

''Although our industry remains very healthy, we recognize the concern that policyholders be protected in the event of a company insolvency. They aren't now and this should be changed,'' ACLIC President Brad Wenger told members of the Senate Insurance Claims and Corporations Committee Wednesday.

''Under this legislation, 80 percent of contracts are covered, up to $250,000 for death benefits and $100,000 in cash values. With these limits, we are providing a safety net to life and annuity policyholders in case of an insolvency, but we avoid covering every failure of every company.''

''We don't want to guarantee investors a risk-free return nor force responsible companies to fully bail out irresponsible ones. At the same time, we must provide security for the innocent policyholder most in need of coverage. This legislation strikes that balance.''

''Insurance purchasers, insurers and regulators all have a stake in sound

marketplace and regulatory decisions. This legislation will motivate the California Department of Insurance to maintain strong regulatory controls and motivate insurance buyers to make informed marketplace decisions.''

In most states, industry contributions to the guaranty fund are offset against state taxes. California's fund will be paid for by company assessments, but without the tax offset. ''We firmly believe tax offsets provide the best system of coverage, but recognize the need to move forward with a California fund at this time,'' Wenger said.

The California law will apply to California residents only and will be used to pay claims after an insolvency.

NEWBURY PARK, CA (AUG. 8) BUSINESS WIRE - HOH Water Technology Corp. (NASDAQ:HOHI/HOHIU/HOHIW) Wednesday announced that it has delivered the first products to roll off its Puerto Rico subsidiary's production line -- High Purity (TM) water systems capable of producing up to 15 gallons per day of ultrapure water (greater than one megohm-cm resistivity) from tap water with minimal pretreatment.

According to the announcement made by HOH President James E. Cruver, water processing steps in the High Purity system include filtration, carbon adsorption, reverse osmosis, deionization, and ultraviolet light disinfection.

Cruver said that the first 300 units were sold to Health Distillers International Inc., a Puerto Rico-based distributor of water treatment systems with whom HOH is currently negotiating an agreement for certain exclusive marketing territories.

Cruver added that HOH has already received additional orders for High Purity systems, as well as for less-costly standard versions of its reverse osmosis system. The family of systems and models are available in configurations that range in end-user price from approximately $400 to approximately $1,100 per unit.

All feature high salt rejection, enhanced product flow, reduced wastewater volume and an uncomplicated construction to facilitate installation and

service.

''As our marketing reach expands, we expect to quickly attain sales levels of 1,000 units per month and to add new geographic regions to our distribution network,'' Cruver said. ''We already have orders from distributors in several states, and we are responding daily to new-dealer inquiries.'' He emphasized that dealer inquiries are invited, and that dealers should contact the company at 805/499-0507.

The company's principal technology -- the patented Electropure electrodeionization (EDI) water desalination system -- is now in pre-production field testing and showing excellent results. The first Electropure unit, scheduled to be marketed in late fall 1990, will be a point-of-use version designed to provide up to 720 gallons per day of high-purity water.

HOH Water Technology is engaged in the development and supply of a breakthrough line of water filtration and treatment systems for residential, commercial and industrial water treatment.

#90220b0613 08/08/1990 ~Business Wire

MIDDLETWON, PA (AUG. 8) BUSINESS WIRE - CareerCom Corp. (NYSE:CCM) Wednesday reported results for the three months and nine months ended June 30, 1990.

Revenues for the three months ended June 30, 1990 declined to $28,999,000 from $36,077,000 in the comparable period of fiscal year 1989.
As a result of the substantial decline in revenue, the company posted a net loss in the third quarter of fiscal 1990 of $2,253,000 or 22 cents per share, compared with net income of $301,000 or 3 cents per share in the third quarter of fiscal 1989.

Revenues for the nine months ended June 30, 1990 decreased to $105,599,000 from $109,259,000 in the comparable period of fiscal year 1989. Net income for the period was $475,000 or 5 cents per share, compared with $561,000, or 5 cents per share in the first nine months of fiscal year 1989.

Revenues and net income in the most recent fiscal quarter were adversely affected by a 49.6 percent year-to-year decrease (from approximately 2,139 to approximately 1,078) in average enrollments in the company's Truck Driver Training Schools.

The Truck Driver program represents approximately 33 percent of tuition and fee revenue, and at historical enrollment levels, constituted the most profitable program offered by the company.

The enrollment decline in the Truck Driver Training Schools was attributable primarily to changes in available federal financial aid for students attending programs in that division.

However, earlier this year, CareerCom implemented an improved program curriculum intended to respond to changes in industry requirements and for which student funding is more readily available. As a result, enrollments in the Truck Schools, while still below the 2,750 average enrollment level achieved in December 1989, have more than tripled from their low point of 590 in March 1990.

Company results were also adversely affected by an 8.2 percent decrease in average enrollments in the company's other schools between the third quarter of fiscal year 1989 and the third quarter of fiscal year 1990.

CareerCom Corp. is a leading owner and operator of career training institutes located throughout North America. The company currently maintains 72 accredited, post-secondary schools offering programs of study in a variety of career-oriented disciplines.

#90220b0615 08/08/1990 ~Business Wire

SANTA MONICA, CA (AUG. 8) BUSINESS WIRE - MERET Optical Communications Inc. has promoted Staphen J. Madigan to the position of executive vice president and general manager.

Madigan will assume responsibility for research and development, engineering, quality, manufacturing operations and program management.

Madigan recently joined MERET in May 1990 as vice president of program management. Madigan has accumulated over 20 years of experience in the microelectronics industry with companies such as Raytheon, TRW, General Instrument, NARDA Microwave, Semtech, CTI, ILC Data Device and PCO, playing key roles in manufacturing, engineering, strategic planning and the implementation of new facilities.

''Madigan's knowledge of the industry along with his excellent management

and decision-making abilities prompted us to make this choice,'' said Walter Menetrey, MERET's chief executive officer. ''His leadership will expedite the growth in which MERET is headed.''

Madigan will be establishing organizational goals, implementing interdepartmental systems and controls, as well as recommending and implementing strategic development and expansion requirements.

Madigan is a charter member of the International Society of Hybrid Manufacturers.

Established in 1972, MERET recently became a wholly owned subsidiary of Amoco Technology Co., part of the Amoco Corp.

MERET designs, manufactures and distributes fiber-optic video and data communications systems for a wide variety of military and commercial applications, such as high-resolution computer graphics; medical imaging; HDTV; teleconferencing; flight simulation; industrial automation and control; military communications, C3I and CCTV.

MERET specializes in wideband analog fiber-optic systems and has developed a sophisticated variety of modulation schemes, components and custom-designed hybrid electronics to satisfy almost any system requirement.

For more information please contact Dianne Cawthray, MERET Optical Communications Inc., 1800 Stewart St., Santa Monica, Calif. 90404; phone 213/828-7496; fax 213/828-7567. Photo available upon request.

WATSONVILLE, CA (AUG. 8) BUSINESS WIRE - David H. Watts, president and chief executive officer, announced that Granite Construction Inc.'s (NASDAQ, NMS:GCCO) second quarter revenue was $138.7 million, an increase of $21.0 million (17.8 percent) over the second quarter of 1989.

Granite's second quarter net income rose 34.9 percent to $5.9 million, or 53 cents per share, as compared to net income of $4.4 million, or 44 cents per share, in the second quarter of 1989.

For the six months ended June 30, revenue was $226.5 million, or 22.2 percent higher than the $185.3 million for the like period last year. The increase is primarily due to higher backlog of ongoing work, and successful settlement of contract claims and change orders on completed

jobs.

Net income increased $2.6 million (110.2 percent increase) to $5.0 million or 47 cents per share. The improvement in net income is the result of increased revenues, improved gross profit margin (0.4 percent increase to 12.6 percent), and lower general and administrative expenses as a percent of revenue.

Backlog at June 30 reached an all time high of $454.3 million, a $43.4 million (10.6 percent) increase over the like period last year, and $76.8 million (20.3 percent) over Dec. 31, 1989. New business awarded of $236.6 million in the second quarter of 1990 included the previously announced City of Dallas Cole Park Detention Vault ($28.1 million) and Las Vegas McCarran International Airport ($33.8 million) and also included California Department of Transportation highway contracts, other public works jobs and private subdivision site development work.

Granite Construction Inc. is one of the largest heavy construction contractors in the United States. Granite operates throughout the United States, focusing primarily in the west and southwest, and serves both public and private sector clients. The company concentrates on infrastructure projects, including the construction of roads, highways, bridges, dams, tunnels, canals, rapid transit facilities, airports and site preparation for buildings, plants, subdivisions and other facilities.

#90220b0618 08/08/1990 ~Business Wire

NEW YORK (AUG. 8) BUSINESS WIRE - Jay Gottlieb, president of The Computer Factory (NYSE:CFA), informed analysts this morning of the company's plans to restructure its retail operations. ''We have entered into a strategic repositioning of our retail operations which will require the consolidation of some of our smaller less profitable branch locations into larger and more efficient Superstores,'' he said. ''We intend to open up four of these 20,000-to-30,000 square foot units over the next nine months. The units, equivalent to about a 3 stores-into-one consolidation, will offer customers a significantly broader range of products.''

''We will obviously be gradually reducing our overall total number of stores. Contributing to that reduction will be the sale or closing down of certain other outlets over the next two years. It is important to note that we will maintain our presence in all of our current key markets,'' he emphasized.

In commenting on Computer Factory's just released third quarter results,

Mr. Gottlieb noted that one of the adverse factors affecting the company's performance was an inventory clearance sale held in May. ''Our margins were hurt by that sale'' he said. ''We established a reserve in the second quarter to cover anticipated losses from the liquidation of this inventory. In determining the reserve, we underestimated the sales value of the inventory.'' He also pointed out that a $4,000,000 pre-tax reserve was established to cover the expenses associated with the consolidation.

The Computer Factory had reported operating results for the third quarter and nine months ended June 30, 1990, prior to the analyst meeting. Net sales for the third quarter rose to $83,895,000 from the $81,971,000 reported for the same period of the prior year. Net loss from operations amounted to $4,733,000, or 55 cents per share. In addition, a one-time charge of $2,600,000 (net of tax benefit), or 30 cents per share, brought the net loss to $7,333,000, or 85 cents per share. This loss compares to net income of $82,000, or one cent per share, for the previous year's third quarter. Net sales for the first nine months rose seven percent to $297,688,000 from the $279,076,000 reported for the same period of fiscal 1989. Net loss for the fiscal 1990 nine month period was $10,428,000, or $1.21 per share, as compared to a net income of $6,496,000, or 73 cents per share, for the fiscal 1989 nine months.

The Computer Factory is engaged in the sale and service of personal computers, business computer systems, peripherals, computer software, training and computer networking through its network of company-owned stores.

#90220b0619 08/08/1990 ~Business Wire

SUNNYVALE, CA (AUG. 8) BUSINESS WIRE - ILC Technology Inc. (NASDAQ:ILCT) reported earnings from continuing operations of $419,000, or 19 cents per share, for the third quarter ended June 30, 1990, compared to income from continuing operations of $449,000, or 20 cents per share, for the comparable period last year.

Sales were $6.5 million, 9 percent higher than sales in the third quarter a year ago. After taking into account the net loss on disposition of assets from discontinued operations, the net loss was $413,000, or 19 cents per share, compared to a net loss of $367,000, or 17 cents per share for the prior year's quarter.

For the nine months ended June 30, 1990, income from continuing operations was $1,057,000, or 46 cents per share, compared to $1,076,000, or 49 cents per share, for the nine months ended June 30, 1989.

Sales for the current nine months were $17.5 million, a 6 percent increase over the prior year. Net income, after taking into account the results of discontinued operations, including embezzlement recoveries, was $1,125,000, or 49 cents per share, for the nine months ended June 30, 1990 compared to a net loss of $791,000, or 36 cents per share, for the prior year's nine months.

As previously announced, the company closed the sale of the UDT Components and Opto Hybrids Groups, Akra Tool Inc. and the UDT Instrument Group in the quarter ended June 30, 1990. Due to post-closing adjustments and expenses incurred related to the divestitures, a pretax loss of $1.1 million was realized on the disposition of net assets from discontinued operations. This loss is included in the results of operations for the quarter and nine months ended June 30, 1990.

On Aug. 2, 1990, the company signed a letter of intent for the sale of substantially all of the assets of Scientific Spectrum Inc., a manufacturers' representative for the laser and electro-optics industries. It is anticipated that this transaction will be completed by the end of the company's fiscal year.

ILC manufactures high performance light sources used in laser excitation, fiber optics illumination, spacecraft lighting and film set lighting applications worldwide.

#90220b0621 08/08/1990 ~Business Wire

NEW ELLENTON, SC (AUG. 8) BUSINESS WIRE - Roscoe Walker, president of Environmental Monitoring & Testing Corp. (NASDAQ:EMON), announced that third quarter revenue was $846,751 vs. $721,622 for the like period in 1989.

Walker stated the quarter showed a loss of $55,857 of which $21,518 represented a non-recurring loss on sale of equipment vs. net income of $17,151 for the third quarter of 1989. For the first nine months total revenue was $2,314,814 with net loss of $228,144 vs. $1,935,297 and profits of $99,377 for the like period in 1989.

As announced earlier, the backlog is presently in excess of $5 million as compared to $900,000 backlog a year ago. Walker stated, ''Most all the

company's rigs are in operation and we expect a very strong fourth quarter with revenue in excess of $1.2 million and profits in excess of $250,000.''

As was previously reported, the company discontinued operations of the pump business and closed two unprofitable divisions which resulted in approximately a 30 percent savings on general and administrative expenses. As a result, the company experienced profitable operations in the month of June with revenue of $324,000 and a profit of $17,500.

Environmental Monitoring & Testing is engaged in the business of drilling, primarily for the purpose of environmental monitoring and testing. EMON is listed on NASDAQ (over the counter).

WILMINGTON, MASS. (AUG. 8) BUSINESS WIRE - Altron Inc. (NASDAQ:ALRN) announced that it has entered into a multiyear agreement with Motorola, Inc., to supply complete backpanel and card cage assemblies for Motorola's latest cellular telephone systems.

Altron is currently the major backplane supplier for Motorola's present system, and the agreement further expands the two companies' partnership.

This agreement is a major success for Altron's recent expansion of its backplane product line to include card cages and other system packaging components. Altron is currently negotiating design proposals with several other major users of these products. The company expects this new capability will add $7,000,000 to $10,000,000 per year in sales within the next two to three years.

Altron recently reported sales of $27,178,000 and earnings of $875,000 or 26 cents per share for the first six months of 1990.

#90220b0624 08/08/1990 ~Business Wire

SAN JOSE, CALIF. (AUG. 8) BUSINESS WIRE - Effective Wednesday, Altera Corp. announced that it intends to withdraw its registration statement for a proposed stock offering, due to unfavorable market conditions.

On July 16, 1990, Altera Corp. announced that it had filed a registration

statement with the Securities and Exchange Commission (SEC) in conjunction with the company's proposed sale of 2.5 million shares of its common stock. At the time of the filing, the price of the company's stock was 13-3/4.

Subsequent to the filing of its registration statement, equity market conditions for technology stocks declined significantly, making the prospects for the company's offering much less favorable. As a result, Altera has requested that the SEC withdraw the registration statement.

Altera Corp., the inventor of the erasable programmable logic device (EPLD), was founded in 1983 and is the market leader in high-performance, high-density user configurable integrated circuits and associated computer aided engineering (CAE) software development tools. Altera common stock is traded on the NASDAQ National Market System using the symbol ALTR.

#90220b0626 08/08/1990 ~Business Wire

ORLANDO, FLA. (AUG. 8) BUSINESS WIRE - Laser Photonics Inc. (NASDAQ:LAZR) Wednesday announced results for the periods ended June 30.

Sales for the three months ended June 30, declined to $1,836,000, as compared to last year's sales for the comparable period of $3,428,000. A net loss of $(1,218,000) or (33 cents) per share was reported for the second quarter, as compared to net income of $104,000 or 2 cents per share for the second quarter last year.

Sales for the six months ended June 30, declined to $4,587,000, as compared to last year's sales for the like period of $7,087,000. A net loss of $(1,770,000) or (50 cents) per share was reported for the six months ended June 30, 1990, as compared to net income of $484,000, or 11 cents per share for the comparable period in 1989.

Commenting on the results, Mark T. Fukuhara, president and chief executive officer stated, ''While the financial results for the second quarter are worse than we anticipated, they do not reflect the improvement in our long-range business opportunities. We are finally seeing orders resulting from efforts put forth during the past six months.

''While the order rate is still not as strong as 1988, orders for the second half of 1990 are approaching 1989 levels. New orders are from a diversified group of customers rather than predominantly from one large OEM, and we anticipate that sales will continue to strengthen through 1991.''

In August we were able to make significant reductions in employees and overhead expenses through the consolidation of our California operations. We believe that the anticipated increase in sales, combined with reduced expenses, will allow us to achieve income from operations for the third and fourth quarters of 1990 and return to reasonable profitability in 1991.

Laser Photonics Inc., designs, manufactures, and markets solid-state and gas laser systems and other peripheral equipment for applications in medical and scientific markets.

SAN JOSE, CA (AUG. 8) BUSINESS WIRE - Piiceon, a Fortune 1000 third-party memory manufacturer, Wednesday introduced a 2MB memory module for the Toshiba T1600 portable computer.

This is in addition to Piiceon's 2MB modules for the Toshiba T3100e, T3200SX, T5200, and T8500. All memory modules are ready for immediate delivery.

Suggested listed price for the T1600 2MB memory is $945.00.

The Toshiba T1600 portable computer is currently one of the world's best selling portable computers, and Piiceon expects the demand for additional memory to be quite strong.

''Toshiba is leading the pack in the laptop arena,'' stated John Chess, Piiceon's vice president of sales and marketing. ''By adding T1600 memory to our line of Toshiba compatible memory, Piiceon is furthering its commitment to the Toshiba marketplace.''

Piiceon's memory boards are competitively priced, are identical to Toshiba's technical specifications, and include a five-year warranty. They are designed, manufactured and tested in-house using state-of-the-art manufacturing technology and stringent quality control procedures.

Piiceon, Inc. is the largest subsidiary in Dynatech Corp.'s speciality computer and broadcast group. Dynatech (NASDAQ: DYTC), a Fortune 1000 company, was named one of the 101 best performing companies in America by Chicago's Probus Publishing.

Piiceon is located at 1996 Lundy Ave., San Jose., phone 408/432-8030, fax 408/432-8960.

MURRYSVILLE, PA (AUG. 8) BUSINESS WIRE - RESPIRONICS, INC. (NASDAQ/NMS Symbol:RESP) Wednesday announced record sales and net income for the fourth quarter and fiscal year ended June 30, 1990.

Net sales for the fourth quarter were $7,748,000, an increase of 61% over net sales of $4,798,000 recorded in the comparable quarter last year. Net income increased 61% to $822,000, or $0.23 per share, from $510,000, or $0.15 per share, reported in the quarter ended June 30, 1989. Per share results for the fourth quarters ended June 30, 1990 and 1989 have been adjusted to reflect the 2 for 1 stock split effected in June 1990.

For the fiscal year ended June 30, 1990, net sales increased 37% to $23,009,000 compared to $16,843,000 reported for the year ended June 30, 1989. Net income was $2,155,000, or $0.62 per share, an increase of 63% over net income of $1,320,000, or $0.39 per share, for the year ended June 30, 1989. Per share results for the fiscal years ended June 30, 1990 and 1989 have been adjusted to reflect the 2 for 1 stock split effected in June 1990.

PHOENIX, AZ (AUG. 8) BUSINESS WIRE - Frontier Adjusters of America Inc. (NASDAQ:FRON), one of the largest and fastest growing insurance adjusting networks in the United States, Wednesday announced a special dividend of 1 cent per share.

The special dividend will be payable Sept. 10, 1990, to shareholders of record on Aug. 20, 1990. It is the second special dividend declared since June, when the company paid a special one-half cent dividend. Frontier also pays a regular quarterly dividend of 1 cent. The company

said the 1 cent special dividend and regular 1 cent dividend will be paid together in one check.

Frontier president and chief executive officer William J. Rocke said the board of directors declared the special dividend in response to the company's overall growth and financial strength.

''Frontier Adjusters enjoyed an excellent year in fiscal 1990,'' said Rocke. ''Revenue and earnings continued to trend upwards and our nationwide network of offices grew to more than 400 locations. As always our special dividend is a way of rewarding our many loyal shareholders.''

Through nine months of fiscal 1990 Frontier reported record net income of $509,931, or 12 cents per share, on record revenue of $2,787,873. Unaudited fourth quarter results were strong as well and the company expects to announce record year-end results later in August.

In addition to its more than 400 locations in the United States and Canada Frontier operates company owned adjusting businesses in Arizona and Oregon.

WILMINGTON, MA (AUG. 8) BUSINESS WIRE - Ernest W. Lattanzi, Chairman of the Board and Chief Executive Officer of Kevlin Microwave Corporation (NASDAQ National Market System:KVLM) Wednesday announced that James J. Connolly and Carmine Vittoria, Ph.D. have been elected to the Company's Board of Directors, bringing the total to seven members.

The new directors fill the vacancies on the Board resulting from the resignation of former president, E.J. Simmons in March of this year and the death of outside director Bernard Plansky last fall.

James J. Connolly, age 53, is Chief Operating Officer of Technical Communications Corp., based in Concord, Massachusetts, a company engaged in communications security systems. From 1980 until 1989, Mr. Connolly had held senior level positions with Adams-Russell Company, Inc., resigning as Senior Vice President prior to its merger with MA/COM.

Connolly started his career as a research engineer with Philco Corporation in 1958, after receiving a masters degree in mathematics from Villanova

University. He served as President of two companies, Inter Computer Electronics and Computer Product Service and Research. Between 1975 and 1980, Connolly was with Sanders Associates as Director of Development - Federal Systems Group. He has published a number of technical papers in the field of radar detection and as well as in related subjects.

Vittoria, age 49, is a professor of Electrical and Computer Engineering at Boston's Northeastern University. Before that, he had spent 20 years in government service as a consultant and/or on staff at the Naval Research Laboratory, Hanscom Air Force Base and Army Materials Technology Laboratory. A fellow of the IEEE and American Physical Society, Dr. Vittoria's research has been published extensively and he is a frequent speaker at technical meetings.

Vittoria received a Ph.D. in solid state physics from Yale University in 1970 after completing his masters and bachelors in electrical enegineering from Toledo University.

Commenting, Mr. Lattanzi, stated, ''Each of our two new directors brings to our Company superior qualifications and valuable experience. We welcome them both.''

Kevlin Microwave Corporation is a leading supplier of microwave rotary couplers and high frequency connectors and components which are sold to the major manufacturers of modern radar and communications systems.

BOSTON (AUG. 8) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) announced Wednesday that it has signed an agreement with The Du Pont Co. that will enable Du Pont to market and sell Informix's database management software products for Du Pont's MacBLITZ co-computer.

The combination of Du Pont's MacBLITZ and Informix's DBMS products gives Apple Macintosh users a powerful UNIX-based information management system solution.

MacBLITZ is the first co-computer for the Apple Macintosh. It uses reduced instruction set computing (RISC) technology to combine UNIX and Macintosh processing power through the Macintosh graphical user interface

(GUI).

Through the agreement, Du Pont will offer its MacBLITZ customers Informix's complete line of relational database management system software including Informix-OnLine, the first database engine to combine fault tolerant online transaction processing performance with multimedia capabilities.

With OnLine, MacBLITZ users can integrate information objects such as word processing documents, graphs, scanned and digitized images, facsimiles and voice into an SQL-based relational database on their Macintosh.

When installed in a Macintosh, Du Pont's board-mounted MacBLITZ co-computer adds new levels of performance, speed and functionality to both Macintosh- and UNIX-based applications.

Du Pont will offer MacBLITZ customers Informix's complete line of application development tools in addition to the Informix-OnLine engine.

These tools include the Informix-4GL family of fourth generation programming tools that dramatically reduce application development time; Informix-SQL, a menu-driven relational database management system; and the Informix-ESQL family of development tools for embedding SQL into C, COBOL, and Ada programs.

Informix products also include Wingz, a leading graphical spreadsheet for multiple desktop platforms. The recently introduced Wingz-DataLink technology enables Macintosh users to access corporate data from an Informix SQL database on the MacBLITZ co-computer via the graphical environment of Wingz.

With Wingz-DataLink, Macintosh users can access data directly into a Wingz spreadsheet, or use the HyperScript programming language in Wingz to create a completely customized graphical database application.

Du Pont expects to ship the first MacBLITZ with Informix database software during the second half of 1990.

Informix Software Inc. is a leading supplier of information management software providing solutions from the database through the desktop.

Informix products include powerful distributed database management systems robust application development tools, and graphical- and character-based productivity software for delivering information to every significant desktop platform.

Headquartered in Menlo Park, Informix has a European headquarters in London and an Asia/Pacific headquarters in Singapore.

Du Pont is a diversified energy, chemicals and specialty products company with 1989 sales of $35 billion.

#90220b0636 08/08/1990 ~Business Wire

GAITHERSBURG, MD. (AUG. 8) BUSINESS WIRE - Genex Corp. (GNEX:NASDAQ) Wednesday announced the issuance of a broad U.S. patent protecting its single-chain antigen-binding (SCATM) protein technology.

SCA proteins are novel bioengineered molecules that have the potential of replacing antibodies in medical diagnosis and therapy, notably cancer detection and treatment.

The patent, No. 4,946,778, titled ''Single-Chain Polypeptide Binding Molecules,'' protects the genes, vectors, hosts and manufacturing methods necessary for producing SCA proteins.

In addition to cancer detection and treatment, which are among the world's foremost medical challenges, the potential applications of SCA proteins include the treatment of cardiovascular and certain infectious diseases, clinical diagnostics, and the practical use of catalytic antibody technology.

''The claims issued to Genex will dominate the whole industry. Companies wishing to make, use or sell genetically engineered SCA proteis will have to negotiate with Genex for the rights to do so,'' said Dr. Jorge Goldstein, biotechnology head of the Washington, D.C. patent law firm of Saidman, Sterne, Kessler and Goldstein.

Reed R. Prior, Genex president and chief executive, said, ''We believe that the worldwide market opportunity for SCA proteins in diagnosing and treating life-threatening diseases is enormous. Our patent position give Genex a strategic advantage over our competition. In order to commercialize this technology as quickly as possible, we plan to collaborate with corporate partners, replacing their monoclonal antibodies with our better performing SCA proteins.''

Monoclonal antibodies are laboratory versions of the body's defense proteins that target and bind to cancer cells, viruses, and other ''foreign enemies.'' SCA proteins provide the binding capabilities of monoclonal antibodies, but overcome many of their drawbacks and are only

one-sixth their size. Potential advantages of SCA proteins include lower immunogenicity, faster clearance from non-targeted tissues, less expensive production and the ability to engineer further improvements.

Dr. Richard Lerner, director of the Research Institute at Scripps Clinic in La Jolla, Calif. said, ''Genex has carried SCA proteins from an idea to a proven technology. The ability to manipulate the genetic code to produce a novel single-chain, antigen-binding protein patterned after a biologically active antibody is a major advance.''

Scientists at the National Cancer Institute (NCI) reported in the July 18 issue of the Journal of the National Cancer Institute successful in vivo targeting of cancer sites using a Genex SCA protein directed at human tumors transplanted into mice.

Dr. Jeffrey Schlom, chief of the tumor immunology and biology laboratory at the NCI, and co-author of the report said, ''Compared to monoclonal antibodies and antibody fragments, SCA proteins bind as effectively to tumors, are passed more quickly from the body, and reach optimal tumor-to-normal tissue ratios in hours instead of days and weeks. Our studies demonstrate that SCA molecules can now be seriously considered for clinical application.''

Genex previously was issued three patents on SCA protein design methods. Additional patents covering the SCA proteins, their uses and other related technology are pending in the U.S. and foreign countries.

Genex Corp. utilizes its proprietary expertise in protein engineering to design and produce specialized pharmaceuticals, surgical bioadhesives and other high value added healthcare products.

#90220b0643 08/08/1990 ~Business Wire

BOSTON (AUG. 8) BUSINESS WIRE - Group Technologies Inc. announced Wednesday at Macworld Expo the release of Aspects 1.0, its new, real-time document conferencing software for the Macintosh.

Aspects is the first simultaneous collaborative computing software program for Macintosh computers. It allows users of networked or modem-linked

Macintoshes to view, create and edit the same graphics and text documents simultaneously, regardless of any distance that may separate them.

Aspects is designed to enable geographically dispersed workgroups to visually and interactively communicate with each other quickly, clearly and inexpensively. It introduces an entirely new way to utilize the personal computer -- the creation of ''dynamic documents'' which instantly reflect the thinking of the workgroup.

This new concept in electronic group communications was inspired by the basis of human interaction: the free-flow of ideas.

''We want to give people the power to communicate visually with one another in much the same way they communicate verbally over the phone,'' said Reid Lewis, president of Group Technologies.

''That kind of interaction needs to be dynamic. Individuals need to be able to make visual suggestions that are as quickly and easily perceived as the verbal comments they currently make to one another using the telephone. That's why we developed the dynamic document.

Group Technologies was founded in August, 1988 in Arlington, Va. The company's mission is to improve workgroup communication through the use of computer and communication technology, bringing people and their ideas together more simply and completely than ever before.

#90220b0645 08/08/1990 ~Business Wire

BOSTON (AUG. 8) BUSINESS WIRE - RasterOps Corp. (NASDAQ:ROPS), a leader in color imaging technology for Apple, Sun, Digital and IBM platforms, Wednesday announced the RasterOps 24S and 8S color graphics boards -- products that bring affordable 24-bit and 8-bit color to the Apple Macintosh II product family.

The 24S and 8S products, for Apple 13-inch and compatible monitors, support the Apple Block Mode Data Transfer standard for transferring large amounts of data across the Apple NuBus. Engineered to work in conjunction with the RasterOps Accelerator, which also supports the Apple standard, the boards provide Macintosh II users with up to a 600 percent

boost in performance.

The new RasterOps boards also utilize the company's surface-mount proprietary VLSI board design to increase product reliability by reducing the total number of components required and the heat generated by them.

''RasterOps is able to bring new generations of products to the Macintosh II quickly because of its custom chip-set technology,'' said John Barco, product manager at RasterOps. ''This provides the customer with the most advanced solution at a price-to-performance ratio unmatched in the industry.''

The 24S and 8S boards provide support for NTSC and PAL interlaced output -- when recording Macintosh graphics to videotape with the RasterOps Video Expander -- and will automatically switch to either frequency when using the required video cable. Hardware pan and zoom capabilities permit two, four or eight times screen enlargement and quick document panning.

The extended desktop feature creates an addressable window up to 2046-by-512 pixels, advantageous when working with large documents. Genlock capability, for locking to an external source, is also provided.

The 8S graphics board offers the same features as the 24S but provides an inexpensive initial color solution which can easily be upgraded to 24-bit True Color (16.7 million colors) with the RasterOps 8S Upgrade Kit.

The 24S and 8S boards were developed to complement the recently introduced large screen display systems, the RasterOps 24L and 8L. ''With the addition of the RasterOps 24S and 8S boards, we now have a complete line of small and large screen products compatible with our accelerator,'' said Barco.

The RasterOps 24S and 8S color graphic boards will be available in September 1990. The suggested retail price of the RasterOps 8S will be $695. The RasterOps 24S will be sold only as a bundle with the RasterOps Accelerator, at a suggested retail price of $1,195. The RasterOps Video Expander retails for $695, the Accelerator lists for $495.

RasterOps, with headquarters in Santa Clara, Calif., designs, manufactures and markets photorealistic color-imaging products for the graphic arts, printing, publishing and related industries. RasterOps is the only company that provides 24-bit color display products with live video-in-a-window capability for multiple manufacturers' platforms, including its own line of high-resolution monitors.

#90220b0646 08/08/1990 ~Business Wire

SAN FRANCISCO (AUG. 8) BUSINESS WIRE - URS Corp. (NYSE:URS) announced Wednesday that its board of directors has fixed Aug. 17, 1990 as the record date for determining the qualified shareholders entitled to receive nontransferable rights to purchase an aggregate of 800,000 common shares from the company at a price of $4.774 per share.

The term ''qualified shareholders'' means all holders of record of common shares at the close of business on Aug. 17, 1990, except entities managed or advised by Richard C. Blum & Associates Inc., Richard C. Blum, and, with respect to the common shares it acquired from the company on Feb. 21, 1990, Wells Fargo Bank N.A.

The company agreed to make this rights offering to qualified shareholders in connection with the restructuring of the capitalization of the company that was otherwise completed on Feb. 21, 1990.

Each qualified shareholder will receive rights to purchase the same proportion of the 800,000 common shares as the number of common shares held by such qualified shareholder on the record date bears to the total number of common shares held by all qualified shareholders on the record date (subject to downward adjustment to avoid the issuance of rights to purchase fractional common shares).

The proceeds of the offering will be used to repay outstanding indebtedness of the company to certain entities managed or advised by Richard C. Blum & Associates Inc. Any shares not purchased by qualified shareholders will be purchased for cash or cancellation of indebtedness by entities managed by Richard C. Blum & Associates Inc.

The company expects to mail prospectuses and rights, evidenced by nontransferable subscription certificates, to qualified shareholders on or about Aug. 20, 1990, subject to prior regulatory approval. The rights will be exercisable for 30 days after they are first mailed to qualified shareholders.

URS Corp., through its subsidiary URS Consultants Inc., is a multi-disciplinary engineering, architectural, planning and consulting firm. It provides a diverse range of professional services to governmental, industrial, educational and health care clients to solve hazardous material, environmental, transportation and water treatment problems.

#90220b0650 08/08/1990 ~Business Wire

OAKLAND, CA (AUG. 8) BUSINESS WIRE - The Clorox Company (CLX-NY, PSE) today reported that for the year ended June 30 net earnings, all from continuing operations, were $153,626,000 or $2.80 per share, up 6 percent over year ago earnings from continuing operations of $145,560,000 or $2.63 per share.

Year ago net earnings were $124,144,000 or $2.24 per share after a loss of $21,416,000 or 39 cents per share from the divested paints and stain business.

Net sales increased 9 percent to $1,484,042,000 from $1,356,294,000 a year ago.

Fourth quarter net earnings, all from continuing operations, were $42,346,000 or 78 cents per share. That was an improvement of 4 percent over year ago earnings from continuing operations of $40,789,000 or 74 cents per share. Year ago net earnings for the fourth quarter, after the divestiture, were $18,829,000 or 34 cents per share.

Fourth quarter net sales were $434,619,000, a gain of 5 percent over $413,609,000 a year ago.

Clorox chairman and chief executive officer C. R. Weaver said, ''We feel the earnings progress during the past year was quite satisfactory in view of the heavy investment spending for marketing support of new products.''

The improved performance, he noted, reflects in part total record shipments of the Company's products. The higher volume was due to a combination of individual shipment records for several nationally distributed grocery store brands and new product activity.

National introductions during the year included Take Heart, a new line of low-fat, no-cholesterol bottled salad dressing targeted at health-conscious consumers. Professional Strength Liquid-plumr drain opener, a thicker product based on unique technology, also was introduced nationally.

Introductory spending continued for Clorox Detergent and for Control cat litter, both of which are in distribution in about half the country.

Commenting on the fourth quarter, Weaver said three factors contributed to a lower than normal growth rate. Sales for the year ago fourth quarter

reflect shipments of Clorox Detergent to fill new distribution channels in about 25 percent of the country. Competitive activity has increased in some of the company's markets, including bottled salad dressing. And wet weather in much of the country on the Memorial Day weekend impacted sales of charcoal briquets.

#90220b0651 08/08/1990 ~Business Wire

OAKLAND, NJ (AUG. 8) BUSINESS WIRE - Diagnostic/Retrieval Systems Inc. (ASE:DRS.A, DRS.B) Wednesday reported net earnings of $141,000 or 3 cents per share for the first quarter ended June 30, 1990.

The net earnings for the first three months of fiscal 1991 represent a decrease of 52 percent, as compared with net earnings of $294,000, or 5 cents per share, for the same period last year.

Revenues declined 23 percent to $10,619,000 from revenues of $13,789,000 for the first quarter of fiscal 1990.

Contract backlog at June 30, 1990, was approximately $48 million, a 14 percent increase over backlog of approximately $42 million at March 31, 1990, the company's fiscal year end. The company received new contract awards approximating $16.6 million during the first quarter of fiscal 1991.

The decrease in revenues primarily was due to the reduction of shipments and completion of certain production contracts for the company's signal processing and recording system product lines during the quarter.

Revenue reduction also was attributable to delays in U.S. Government funding on the Advanced Video Processor (AVP) program for which the company is developing display workstations to be installed on Naval ships engaged in antisubmarine warfare.

The earnings decline resulted from lower sales levels and lower operating margins on business performed during the quarter.

Leonard Newman, chairman and chief executive officer, in commenting on the quarter said, ''Although the company has taken steps to curtail overhead

costs and expenses, improved performance this year will depend upon receiving certain production contracts within the next three quarters.''

Diagnostic/Retrieval Systems Inc., designs and manufactures special-purpose computer and display systems, as well as recording, trainer and optical systems for military and industrial applications.

SIMI VALLEY, CA (AUG. 8) BUSINESS WIRE - PerfectData Corp. (NASDAQ:PERF) Wednesday announced results of operations for the first quarter ended June 30, 1990.

Sales for the first quarter increased 84 percent to $1,424,000 from $773,000 reported in the year-earlier period. The net income for the quarter increased from earnings of less than $1,000 in the comparable period a year earlier to $138,000, or 4 cents per share.

Management believes that the quarter ended June 30, 1990, was the strongest first fiscal quarter in the history of the company. The increase in sales and earnings reflects the continued success of the operational restructuring and redirection of the marketing and product development of the company which commenced during fiscal 1988.

PerfectData is a leading designer, wholesaler and marketer of media maintenance equipment and aftermarket supplies and accessories sold under the PerfectData brand name.

#90220b0658 08/08/1990 ~Business Wire

SAN JOSE, CA (AUG. 8) BUSINESS WIRE - Europe's leading semiconductor technology committee has awarded the JESSI label to Anamartic Ltd., Bull S.A. and Siemens AG for the development of solid-state intermediate storage devices that use the latest semiconductors and a wafer-scale architecture, the companies announced Wednesday.

The award of the Joint European Submicron Silicon (JESSI) label will clear the way for up to $11.6 million in funding over four years -- for development of high-density reconfigurable computer memory (also called supercomponents).

These whole-wafer supercomponents will be used in a variety of intermediate storage devices including solid-state disk drives and expanded memory systems. The three partners are concentrating on 4-Mbit and 16-Mbit technologies for the whole-wafer supercomponents.

Half of the funding for JESSI projects is underwritten by each company's host country -- in this case, the United Kingdom, France and Germany. The other half is provided by the companies.

Anamartic's contribution to the technology alliance is its patented wafer-scale integration technology. This technology uses an entire silicon wafer -- rather than individual chips cut from the wafer -- as the basic unit of the supercomponent.

Proprietary Anamartic software and hardware, located adjacent to each chip create a network that can be configured to avoid faulty portions of chips and use the remaining good portions. The result is improved performance and reliability with reduced size and cost over intermediate storage devices that use discrete chips.

The German company Siemens, one of the world's largest high-technology companies, is contributing its semiconductor manufacturing and chip design expertise. The French computer maker, Bull S.A., is providing systems and packaging expertise to evaluate and optimize the system benefits of proposed intermediate storage products.

JESSI's objective is to help private industry in the European Economic Community remain competitive with other worldwide powers by fostering leadership in critical technologies. Started by Europe's leading technology companies in 1988, the initiative is supported politically and financially by EEC member countries.

Anamartic Ltd., founded in 1986, manufactures high-performance computer storage devices based on proprietary whole-wafer integration technology.

Anamartic's first intermediate storage system product is The WaferStack solid-state disk drive, based on 1-Mbit supercomponents and targeted to systems integrators and OEMs. The company began shipping systems in 1989.

Anamartic Ltd. is a privately held international company, with corporate headquarters, R&D and manufacturing operations in Cambridge, United Kingdom. Anamartic's U.S. subsidiary, based in San Jose, Calif., is primarily focused on sales, marketing and technical support.

WAYLAND, MA (AUG. 8) BUSINESS WIRE - Candela Laser Corp. (CLZR) announced Wednesday financial results for the fourth quarter and fiscal year ended June 30, 1990.

The company reported revenues of $10,266,000 for the quarter, an increase of 50.6 percent over revenues of $6,818,000 for the same quarter one year ago. Net income for the quarter was $1,976,000, an increase of 350 percent from $439,000 in 1989. Earnings per share for the fourth quarter were 38 cents, versus 9 cents for the same quarter last year, an increase of 322 percent. For the quarter, net income before the benefit of net operating tax loss carryforward was $1,246,000, or 24 cents per share.

Revenues for the 12-month period ended June 30, 1990 were $32,825,000, versus $18,219,000 for the previous year, an increase of 80.2 percent year to year. Net income for the year was $5,119,000, or $1.06 per share, as compared to a net loss of $3,820,000, or $1.01 loss per share, in 1989. For the year, net income before the benefit of net operating tax loss carryforward was $3,390,000, or 70 cents per share.

FEDERAL WAY, WA (AUG. 8) BUSINESS WIRE - Pacific Nuclear Fuel Services Inc. (PNFS), a subsidiary of Pacific Nuclear Systems Inc., announced Wednesday that Duke Power successfully completed the initial loading of spent nuclear fuel into the NUHOMS spent fuel storage system.

Duke's Oconee Nuclear Station near Seneca, S.C., becomes the third on-site independent spent fuel storage facility in the United States.

The NUHOMS system at Oconee was designed and fabricated by Pacific Nuclear and Duke Power. The system was approved by the U.S. Nuclear Regulatory Commission in April 1989. Duke Power received a license from the NRC to load as many as 88 fuel storage canisters over the next 20 years at their Oconee Nuclear Station near Seneca, S.C. According to PNFS Vice President William McConaghy, ''The successful initial loading of spent fuel at

Oconee culminates nearly three years of intensive effort by both Duke Power and Pacific Nuclear.''

The Department of Energy (DOE) is developing a permanent repository for spent nuclear fuel, which according to DOE's estimates, will become operational no earlier than the year 2010. Many of the nation's nuclear power plants will require additional storage capacity prior to the final repository becoming operational. The NUHOMS system, or systems offered by other vendors may be used to provide the additional storage capacity for the operating nuclear plants.

Pacific Nuclear Systems Inc. and its subsidiary companies (Nutech Inc.; NuPac Services Inc.; Nuclear Packaging Inc.; PN Services Inc.; and Alaron Corp.) provide a wide range of services to the nuclear industry. The company, founded in 1983 and headquartered in Federal Way, is traded in the NASDAQ - National Market System under the symbol PACN.

FORT LEE, NJ (AUG. 8) BUSINESS WIRE - On-Line Software International Inc. and Tata Consultancy Services (TCS) Wednesday announced a partnership to develop and market a new family of CASE tools that follow the IBM SAA guidelines and the AD/Cycle framework.

On-Line Software will use its worldwide marketing organizations to promote the new products, available Fall, 1990.

The new family of CASE tools will support the specific job functions of data administrators and data architects. Expert system validation facilities will perform many of the time consuming functions of model quality control, reducing project costs and improving overall applications quality. The new products will be compatible with Repository and all AD/Cycle tools from IBM and IBM's AD/Cycle cooperative software partners.

Headquartered in Bombay, India, TCS is part of the Tata Group of Companies one of India's largest corperations. TCS has extensive experience in designing, developing and implementing software solutions in numerous micro and mainframe systems. TCS has developed CASE tools such as CasePac a generalized CASE tool with an open architecture addressing all phases of the software development lifecycle, and project management software systems such as PRISM. TCS has offices and is working in the U.S., U.K., Australia, Japan and throughout the Middle East, Far East and Europe.

On-Line Software International is a NYSE company (OSI) headquartered in Fort Lee. The 21-year-old firm combines consulting and educational services with CICS, DB2 productivity software, and development systems products that enhance the productivity of IBM computer systems users.

As a Charter Vendor Member of the International DB2 Users Group and a Founding Member of R/AD, the Repository and AD/Cycle users group, On-Line Software supports the IBM user community. With 15 domestic and international offices, On-Line Software's distribution network services more than 25 countries. The company is an IBM Business Partner that has products and professional services utilized in more than 90 of the Fortune 100 corporations.

SEBRING, FL (AUG. 8) BUSINESS WIRE - The shareholders of First Home Federal Savings and Loan Association approved a merger agreement with Huntington Bancshares Inc. (Columbus, Ohio).

At a special meeting of shareholders held Tuesday, 83.3 percent of the total shares outstanding were cast in favor of the transaction. A total of 83.7 percent of the shares were represented.

Shareholders of First Home Federal will receive not more than 1.56099 nor less than 1.27718 shares of Huntington common stock for each share they own of First Home Federal stock in the tax-free exchange. Based on the current market price of the Huntington common stock, the maximum number of shares would be issued.

However, the actual number of shares to be issued will depend upon the average price of the Huntington common stock during the five trading days prior to the closing.

Approval for the merger has also been received from the Federal Reserve. Approval from the Office of Thrift Supervision is still pending. Consummation of the merger is currently expected to take place at the end of September 1990.

First Home Federal has $208 million in assets and operates eight banking offices in south-central Florida. Huntington Bancshares is an $11.7 billion regional bank holding company headquartered in Columbus, Ohio.

The company's banking subsidiaries operate 253 offices in Ohio, Indiana, Kentucky, Michigan, Pennsylvania, and West Virginia. In addition, Huntington's mortgage, trust, investment banking, and automobile finance subsidiaries manage 32 offices in the six states mentioned as well as

Florida, Delaware, Illinois, Maryland, Massachusetts, New Jersey, Rhode Island, and Virginia.

Both First Home Federal's and Huntington's common stock are traded on the NASDAQ National Market System using the symbols ''FSEB'' and ''HBAN'' respectively.

COLLEGE PARK, GA (AUG. 8) BUSINESS WIRE - Atlantic Southeast Airlines, Inc. (NASDAQ/NMS:ASAI) flew 37.2 million revenue passenger miles during July 1990, a .3 percent increase over the same period last year, according to John W. Beiser, a senior vice president for the Atlanta-based airline.

ASA's load factor was 50.9 percent compared with 54.2 percent during July 1989. Available seat miles increased to 73.2 million from 68.4 million, for a 7.0 percent increase.

The company enplaned 175,179 passengers during July, compared with 179,083 passengers for the previous July.

On a year-to-date basis, ASA carried 1,176,041 passengers compared with 1,128,767 during 1989, a 4.2 percent increase. Revenue passenger miles totaled 250.3 million compared with 230.7 million, for an 8.5 percent increase.

Available seat miles increased 9.8 percent from 445.3 million to 489.2 million. The load factor on a year-to-date basis was 51.2 percent compared with 51.8 percent during the previous year.

Atlantic Southeast Airlines Inc. is Atlanta's largest regional air carrier and now offers service to 15 cities from a second hub in Dallas/Fort Worth, Texas.

ASA's stock is traded in the National Market System under the NASDAQ symbol ASAI.

SANTA CLARA, CALIF. (AUG. 8) BUSINESS WIRE - Masstor Systems Corp. (NASDAQ

National Market:MSCO) Wednesday announced it intends to hold a special shareholder meeting on Thursday, Sept. 20.

The meeting is being held for the purpose of obtaining shareholder approval to amend the company's certificate of incorporation to increase the number of authorized shares of common stock from 25 million to 50 million shares.

The primary reason for the increase in authorized common shares is to allow the company to raise at least $2 million through the sale of its equity securities by Sept. 30.

Founded in 1976, Masstor Sytems Corp. manufactures and services mass storage systems for IBM, Cray and Bull HN mainframe customers with very high volume applications. It has over 100 large company and institutional customers in 10 countries in North America and Europe.

Its focused business strategy helps MIS managers quickly leverage their huge installed mainframe investments by automating their storage processes and expanding their on-line applications.

NEW YORK (AUG. 8) BUSINESS WIRE - Effective Aug. 1, 1990, KLM Royal Dutch Airlines will join Delta Air Lines' Frequent Flyer program.

Members of Delta's Frequent Flyer program who fly KLM from the U.S. to Amsterdam and KLM destinations worldwide will now earn mileage credit. Passengers traveling on KLM's economy fares will receive actual mileage credit, while business class travel will earn 125 percent and first class will earn 150 percent of actual mileage.

In addition to mileage awards on Delta flights, passengers may use mileage credits towards free or discounted travel on KLM to Amsterdam, London, Frankfurt and Paris. ''KLM is pleased to join Delta's Frequent Flyer program. KLM and Delta share the common goal of providing excellent service to our passengers. For example, KLM has launched a wide-ranging program of quality and service enhancements, called ''Product 90'', as part of our commitment to translating customer wishes into KLM services. Participation in this program is another way to enhance customer service ''said Peter van Vliet, vice president and general manager of KLM USA.

With more than 70 years of experience, KLM operates one of the most modern passenger aircraft fleets in the world. KLM serves eight U.S. gateways: Atlanta, Baltimore/Washington, Chicago, Houston, Los Angeles, New York, Orlando and Anchorage, and a total of more than 145 cities in 77 countries. KLM now flies to more cities in Europe, the Mid-East and Africa than all U.S. airlines combined.

''Delta is proud to welcome KLM, an airline that continues to distinguish itself in the industry, as our newest Frequent Flyer partner,'' said Whit Hawkins, Delta's senior vice president of marketing.

MEMPHIS, TN (AUG. 8) BUSINESS WIRE - Response Technologies Inc. (ASE:RTK)(NASDAQ/NMS:BITXP) Wednesday announced the opening of its fourth IMPACT (IMPlementation of Advanced Cancer Technology) Center in Columbia, Mo.

The company also announced that it has reached a tentative agreement to sell up to 10 million shares of newly issued common stock at 50 cents per share to Dakota Ventures Inc. in a private placement. The investor has had no previous association with the company.

Closing of the transaction is subject to execution of a definitive agreement and board and shareholder approval. The investor will also receive warrants to purchase up to 9 million shares of common stock at prices ranging from 50 cents to $1. If all shares are purchased, and all warrants exercised, the investor will obtain a majority position in the company's common stock.

Response Technologies owns and operates IMPACT Centers which provide private practicing oncologists with the resources necessary to deliver advanced cancer treatments on an outpatient basis, principally through licensed pharmacies, laboratories and blood banks. The company operates IMPACT Centers in Memphis and Tampa and Hollywood, Fla., in addition to the newly opened center in Columbia.

The common stock of Response Technologies Inc. is traded on the American Stock Exchange under the symbol RTK and its Preferred Stock is traded on the NASDAQ/NMS under the symbol BITXP.

#90220b0708 08/08/1990 ~Business Wire
CAMBRIDGE, MA (AUG. 8) BUSINESS WIRE - Lotus Development Corp. Wednesday announced it has begun shipping server and node editions of 1-2-3/G, the graphical version of its best-selling 1-2-3 spreadsheet designed for the OS/2 and Presentation Manager personal computer operating system.

1-2-3/G is available in standard, server and node editions.

''Response to 1-2-3/G has been very positive,'' said Jeffrey Beir, director of marketing for 1-2-3/G. ''Customers have responded enthusiatically to gaining 1-2-3 compatibility within a graphical user interface, and to getting the power of Solver, which delivers an advanced, yet easy-to-use, goal-seeking capability to OS/2 users. Because OS/2 is an extremely powerful networking environment, we've received many requests from customers for the network editions of 1-2-3/G.''

OS/2, with its multitasking capaibilities and access to large amounts of memory, is well-suited to networking. It can handle simultaneous operations efficiently, offering users superior perfomance on a local area network.

The 1-2-3/G server edition supplies network administrators with tools for easier network management. A count utility, for example, enables administrators to control and manage the number of users on a network. In addition, a file reservation feature in 1-2-3/G preserves the data integrity of files shared over a network.

1-2-3/G, which began shipping in March, combines advanced spreadsheet functionality with the familiarity of 1-2-3 and a graphical user interface allowing users to move to the new operating environment, while preserving their investments in 1-2-3. 1-2-3/G maintains familiar 1-2-3 commands, first letter selection, and provides full keyboard and mouse support. 1-2-3/G is fully compliant with IBM's System Application Architecture (SAA) and Common User Access (CUA) graphical interface guidelines for Presentation Manager applications. It also supports Dynamic Data Exchange (DDE) for sharing live data with other OS/2 applications.

1-2-3/G brings a range of new spreadsheet features to OS/2 users including Solver, an advanced goal-seeking technology that solves problems defined in the familiar spreadsheet environment. Solver automates the tedious ''what-if'' process, and shows the user ''how to'' achieve desired results.

In addition, 1-2-3/G incorporates true three dimensional worksheets; file linking across worksheets and files in memory or on disk; and the Lotus

DataLens technology, which allows users to access external data sources, directly from within the spreadsheet.

The server edition of 1-2-3/G is licensed for shared use from a central file server and includes a LAN administrator's guide, one complete copy of documentation, a license for one network user, and software in both 5.25- and 3.5-inch media. It has a suggested retail price of $895.

The node edition provides for an additional concurrent 1-2-3/G user on the network. The node edition has a suggested retail price of $595 and includes a single license for network use and complete documentation.
System Requirements and Special Upgrade Pricing

1-2-3/G requires an IBM PC AT, IBM PS/2, IBM PS/2 models 50Z, 60, 70, P70, 80, Compaq 286, 386, Compaq Portable 386, or 100 percent compatibles. Lotus recommends a 386-based computer. A minimum of 5 megabytes of RAM is required with the network versions of 1-2-3/G.

1-2-3/G is designed for use with networks that support OS/2 1.1 or higher including: IBM LAN Server 1.2 (with nodes using LAN Requester, a component of OS/2 Extended Edition 1.2), 3Com 3+ Open LAN Manager 1.1, Novell Advanced or SFT NetWare version 2.15, and Novell NetWare 386 version 3.0 (with nodes using NetWare Requester for OS/2 1.1 or higher).

Users 1-2-3 Release 2.2 or Release 3 node editions may upgrade to the 1-2-3/G node edition for a suggested retail price of $150; users of 1-2-3 Release 2.2 or Release 3 server editions may upgrade to the 1-2-3/G server edition for a suggested retail price of $250.

Users of 1-2-3 2.0, 2.01 and 1A stand-alone editions may upgrade to 1-2-3/G node and server editions for suggested retail prices of $150 and $250, respectively. For more upgrade information, customers may call 1-800-343-5414.

Lotus Development Corp. is the leading provider of applications software for personal computers and information services delivered on CD-ROM, and is a worldwide supplier of applications software for workstations, minicomputers and mainframes.

All prices and terms are for the U.S.A. only.

#90220b0711 08/08/1990 ~Business Wire

WOODCLIFF LAKE, N.J. (AUG. 8) BUSINESS WIRE - BMW of North America, Inc.,

plans to sharpen the driving skills of motorists this year at the expanded mobile version of the BMW/Skip Barber Advanced Driving School.

The Traveling Driving School motors into the Detroit area with its arrival at the Pontiac Silverdome on August 13-16. Now in its third year, the Traveling Driving School will visit more than 20 cities. Motorists may obtain further information on cost and how to reserve a seat at the school by calling 1-800-221-1131 or by contacting an authorized BMW dealer.

Celebrating its fifth full season of operation, the Advanced Driving School improves driving skills in everyday and emergency situations. Motorists also get the opportunity to experience the exhilaration of driving a BMW automobile.

Launched in September of 1985 at Lime Rock Park in Lime Rock, Conn., the school also teaches students about the active and passive safety features in BMW automobiles. The school operates at three other permanent racetrack facilities: Road America, Elkhart Lake, Wis.; Sebring International Raceway, Sebring, Fla.; and Willow Springs International Raceway, Rosamond, Calif.

''BMW designs automobiles to involve the driver fully in the driving experience, and the Advanced Driving School enables students to make the most of that experience,'' said Karl Gerlinger, president and chief executive officer of BMW of North America, Inc. ''Since automotive safety is BMW's highest priority, we are committed to providing drivers with the opportunity to improve their driving skills, and teaching them to utilize the active and passive safety features built into all BMWs.''

The school is taught by Skip Barber, a 15-year veteran of international racing competition and 12-year instructor to some of the world's most competitive race car drivers. Participants in the school are instructed by professional drivers.

#90220b0714 08/08/1990 ~Business Wire

BOSTON (AUG. 8) BUSINESS WIRE - Gulf Resources & Chemical Corp. (NYSE:GRE) announced income from continuing operations for the three months ended June 30, 1990 of $2.9 million, or 28 cents per share fully diluted, compared to income from continuing operations of $1.1 million, or 10 cents per share fully diluted, for the same quarter in 1989.

For the six months ended June 30, 1990 income from continuing operations was $0.2 million compared to $1.7 million, or 16 cents per share fully diluted, for the same six-month period in 1989.

Included in income for the second quarter of 1990 is an unrealized gain of $5.2 million resulting from the reduction in the unrealized market loss and foreign currency translation gains on marketable securities of approximately $2.9 million and foreign currency translation gains of $2.3 million on assets and liabilities other than marketable securities.

Included in income for the six months ended June 30, 1990 is a net unrealized gain of $5.9 million resulting from unrealized market and foreign currency translation gains on marketable securities of $5.7 million, and a net unrealized foreign currency translation gain of $0.2 million on assets and liabilities other than marketable securities.

Between June 30, 1990 and Aug. 7, 1990 there was an additional unrealized gain on marketable securities of $6.2 million, representing unrealized market gains of $3.3 million and unrealized foreign currency translation gains of $2.9 million. Pre-tax gains of $2.7 million and $4.6 million, respectively, were realized for the three months and six months ended June 30, 1989 from the sale of marketable securities.

Interest income for the second quarter of 1990 was $2.6 million, compared to $5.5 million for the same quarter in 1989. Interest income for the six months ended June 30, 1990 was $5.7 million, compared to $9.4 million for the same six-month period in 1989.

The decrease is the result of reduced cash balances due substantially to the previously announced investment in City Realties Limited, (''CRL''), a New Zealand Stock Exchange listed real estate investment company, other real estate properties and certain marketable securities.

Included in income is a gain of $1.4 million for the three months and six months ended June 30, 1990, related to the sale of certain non-active assets of the company.

#90220b0724 08/08/1990 ~Business Wire

BURBANK, CA (AUG. 8) BUSINESS WIRE - Matthews Studio Equipment Group (NASDAQ Symbol:MATT) Wednesday announced results for the third quarter and nine months ended June 30, 1990. In making the announcement, the company noted that record revenues were achieved during the latest third quarter

on a 51 percent increase over revenues during the third quarter ended June 30, 1989. Matthews also noted that net income for the latest nine months evidenced an extremely strong gain.

Revenues for the third quarter ended June 30, 1990 rose to $5,863,490, compared to $3,882,207 in the previous third quarter. Net income for the third quarter of fiscal 1990 was $180,648, or 2 cents per share, as compared to net income of $196,584, or 3 cents per share, for the previous comparable quarter.

Revenues for the nine months ended June 30, 1990 increased 44 percent to $14,814,542, up from $10,262,912 in the first nine months of fiscal 1989. Net income for the nine months ended June 30, 1990 increased substantially to $437,857, or 6 cents per share. This compares to net income of $5,720 (nil per share) for the nine months ended June 30, 1989.

Commenting on the results, Carlos DeMattos, co-chairman of the board and chief executive officer of Matthews, and Edward Phillips, co-chairman of the board and chief operating officer, jointly stated,''We are confident that these positive results and the reasons for them clearly reflect management's recognition that the entertainment industry far prefers utilizing supply sources that offer the widest possible range of services. That factor has led us to continue our aggressive acquisition program, implementing our strategy of continually increasing the lines of equipment we can make available to our growing roster of customers. During the latest third quarter alone, we added some $2.5 million of new equipment to our rental inventory, one of our most basic lines of business. Our increasing revenues also reflect the impact of the state-of-the-art technology we have developed and the industry's growing awareness of the benefits inherent in these technological advancements.

''Also enhancing our increasingly positive results has been an extremely strong entertainment industry environment, with its constant increase in both domestic and international production and growing box office receipts.

''All of these factors contributed to the continued improvement in revenues and earnings we experienced during the latest nine months. Based on these developments and the current continuation of these trends, we are very optimistic that there will be a substantial increase in revenues and earnings during the fourth quarter that will continue to be reflected in our fiscal 1991 results.

''Several factors are noteworthy in reviewing the latest third quarter and nine months results. Earnings for the third quarter ended June 30, 1990 reflect a full provision for income taxes as compared to a reduced tax provision in the prior third quarter. Earnings per share for both of the latest periods are based on substantially more shares outstanding,

primarily as a result of our public offering early in the current fiscal year. In another significant financial development, we recently entered into a new revolving credit and term loan agreement with a major bank that is providing additional working capital and financing to support our continued growth.

''Approximately 26 percent of the substantial increase in revenues achieved during the nine months ended June 30, 1990 was contributed by companies added to Matthews subsequent to the end of the previous fiscal year, while the remaining gains were generated principally from our equipment rental business.''

Matthews Studio Equipment Group is one of the fastest growing companies in its industry. The company designs, manufactures, rents, leases and sells a broad range of equipment used in the production of films, television shows and commercials, professional photography and theatrical productions. One of the company's major and most innovative products is its electronic Cam-remote System, a remote controlled system that makes possible a diversity of camera angles that would be virtually impossible or far too dangerous for any cameraman to attempt in standard camera operation.

MANSFIELD, MA (AUG. 8) BUSINESS WIRE - Codex Corp. Wednesday announced the appointment of Richard Peabody as vice president and general manager

for data networking.

In his new position, Peabody is responsible for the direction, development and overall profit and loss management of products and programs that support Codex's data networking business in the world-wide market.

Before joining Codex, Peabody served as vice president and general manager of Philips Electronics Ltd. in Toronto where he had full profit and loss responsibility and overall management of a computer peripherals business. Prior to joining Philips Electronics, Peabody served seven years as president of Amdahl Communications Inc., significantly growing the company's multiplexer business by increasing product and customer diversification, and emphasizing high-speed T1 networks.

In 23 years, Peabody has managed overall company revenues and employees, introduced new products in various engineering management positions, and has tested and developed founding products in the electronics industry. Peabody currently lives in Mississauga, Ontario with his wife, Marilyn.

Codex Corp., a subsidiary of Motorola, is based in Mansfield, Mass. The company is a leading supplier of network products and integrated network solutions. Offerings include network management systems, T1/E1 switches, LAN Internetworking products, X.25 networks, multiplexers, modems, and professional services.

MORGANVILLE, NJ (AUG. 8) BUSINESS WIRE - Corfacts Inc. (formerly Business Journal of New Jersey Inc.) Wednesday released financial results for the first six months ended June 30.

Revenues were $367,529 for the current period ended June 30, 1990, as compared to $407,514 for the six month period a year ago. The loss from continuing operations in the first six months of 1990 was $453,384, or $.04 per share, as compared to a gain of $45,894 or $.00 per share, in the first six months of 1989.

Due primarily to the sale of the company's magazine business, on Mar. 2, 1990, net income for the six months was $2,470,369, representing 21 cents per share. Included in the net income was a gain from the disposal of the magazine business of $2,742,253 or 23 cents per share, and a tax benefit of $181,500, or 2 cents per share, resulting from a net operating loss carry forward.

There were approximately 11,800,000 shares outstanding for both periods.

Corfacts Inc. publishes business directories and other information products in New Jersey and the Philadelphia metropolitan area.

MONROE, La. (AUG. 8) BUSINESS WIRE - Century Telephone Enterprises Inc. (NYSE:CTL) Wednesday announced that net income for the second quarter of 1990 increased 63.6 percent to $8,692,000 from $5,314,000 a year ago.

Revenues from telephone, cellular and paging operations increased 23.5 percent to $60,732,000 from $49,192,000 in the second quarter of 1989. Earnings per share increased 55.6 percent to 28 cents compared with 18 cents a year ago on 9.0 percent additional shares outstanding.

For the first six months of 1990, net income increased to $15,444,000 from $10,369,000, a 48.9 percent increase over the same period in 1989. Total revenues increased 25.4 percent to $121,160,000 from $96,655,000 for the same period in 1989. Earnings per share climbed 36.1 percent to 49 cents per share compared with 36 cents in the first half of 1989.

During the second quarter of 1990, Century sold its remaining investment in Telecom USA common stock for $4,081,000 which resulted in a gain in $2,237,000 (7 cents per share). As previously reported, Century sold a portion of the investment in the first quarter of 1990 which added $354,000 (1 cent per share) to that quarter.

''Major contributors to Century's increased net income during the second quarter were increases in telephone operating income and an increase in the number of cellular and paging units in service.

''We now have over 300,000 access lines, 30,000 cellular and 14,000 paging units in service,'' said Glen F. Post III, president and chief operating officer.

''The August 1989 acquisition of Universal Telephone Inc. and continuing strong earnings from our telephone operations, coupled with improved operating results from our cellular and paging segments, contributed to the strong performance of the company through the first half of the year.

''We are pleased with our results and remain committed to making strategic acquisitions of both telephone and cellular properties.''

Century Telephone Enterprises Inc., headquartered in Monroe, is a diversified telecommunications company with operations in 15 states.

BASKING RIDGE, NJ (AUG. 8) BUSINESS WIRE - AT&T Wednesday announced that Richard S. Bodman will become a senior vice president of the company, responsible for strategic planning and corporate development.

He currently is president of the Washington (D.C.) National Investment Corporation.

Bodman, 52, will report to AT&T Chairman Robert E. Allen and will be a member of the company's executive committee.

''Dick brings us a wealth of experience from the corporate, private and public sectors and has an extensive background in making strategic choices '' Allen said.

Bodman, a graduate of Princeton University with a master's degree from Massachusetts Institute of Technology, has been president of Washington National Investment since 1985.

Prior to that he was with Communications Satellite Corporation, where he served as president of Comsat General Corporation and later Satellite Television Corporation.

He also has held positions in the federal government as assistant director of the Office of Management and Budget in the Office of the President and assistant secretary, management and budget, in the Department of the Interior.

He also has been a partner of Touche Ross & Company and held various management positions with E.I. DuPont de Nemours.

Bodman, a certified public accountant, is married to Karna Small Bodman. They have four sons.

#90220b0737 08/08/1990 ~Business Wire

SALT LAKE CITY, UT (AUG. 8) BUSINESS WIRE - Equity Oil Co. (NASDAQ:EQTY) said Wednesday that despite continuing growth in revenues, production levels and cash flow, two unusual, non-cash abandonment charges contributed to a loss in the second quarter ended June 30 of ($1,385,619) or (11 cents) per share.

This compares to net income for the same period in 1989 of $303,984 or 2 cents per share. Reflecting the second quarter loss, results for the first half of fiscal 1990 were a net loss of ($393,203) or (3 cents) per share, compared to net income in the same period in the prior fiscal year of $601,174 or 5 cents per share.

Fred H. Evans, president of Equity Oil, commenting on the results stated, ''While we are disappointed that earnings have impacted adversely in the first half as a result of two unusual non-cash items, we continue to be very pleased with the production levels we achieved and the success and pace of our exploration program.

''Despite the fact that average oil prices were 20% lower in the second quarter than in the first quarter of 1990 and were 16% lower than in the second quarter of 1989, revenues increased 13% to $8,385,026 and cash flow from operations increased 44% to $3,537,581.''

Evans commented further, ''We believe that the company will have positive earnings for the full year if the price of oil remains at or above the average price sustained in the first half of the year.''

During the first half of 1989, Equity's oil production increased 2% to 345,476 barrels and gas production increased 79% to 735 million cubic feet. This translates into an oil/gas ratio of 74/26, converting gas to oil on a 6,000 per cubic feet per barrel equivalent basis.

The loss reported for the quarter, and subsequent first half loss, were a direct result of a non-cash charge of $1,960,000 resulting from the abandonment of two wells in Pecos County, Texas, and a non-cash charge to Leasehold Abandonments of $336,000. The well abandonment charge relates to the proposed abandonment of two deep gas wells drilled in 1978 that have been producing at nominal rates since that time but can no longer be produced economically due to the increasing presence of hydrogen sulphide gas.

The addition to Leasehold Abandonments resulted from the abandonment of exploratory leases that are outside of the presently identified geologic structures on Equity's Palisades prospect and consequently are no longer

considered to be prospective of oil and gas production. The plugging and abandonment of the two Texas wells will result in the minimal loss of 35 million cubic feet of gas reserves and no loss in future net revenue. The abandonment of the exploratory acreage will result in no loss of reserves or future net revenue.

Commenting further on these items, Evans stated, ''In short, both actions were non-cash events that have no impact on the company's ability to conduct its business and minimal impact on the reserve base of the company.''

The company reports that by the end of the first half, Equity had drilled or committed to drill a total of 19 wells during the year. Drilling expenditures and Leasehold Acquisition costs in the first half totaled $1,948,855 and are expected to reach a total of approximately $5 million by year end.

Highlights include the successful stimulation and production of hook-up of the third well in the company's Cemetary Ridge prospect as well as the drilling of a fourth well; the completion of a second horizontal well in the Austin Chalk; and the initiation of drilling a well at the Pinecliff prospect.

On July 18, the company successfully stimulated and placed on production the third well in the Cemetary Ridge prospect in Goliad County, Texas. The well, No. 1 Fromme, began producing into the pipeline following the stimulation and while still recovering stimulation fluids, is producing at a rate of 1,050 MCF per day at a flowing tubing pressure of 2,700 pounds through 9/64 inch choke.

The fourth Cemetery Ridge well, Albrecht No. 1, is presently drilling below 11,900 feet having set intermediate casing at 10,550 feet. The well is scheduled to be drilled to total depth of 12,500 feet to test the zones penetrated in the first three Cemetery Ridge wells. The well has already penetrated sands that appear to correlate with the producing zones in the No. 1 Fromme.

Equity also completed a second horizontal well in the Austin Chalk in Frio County, Texas. The No. 1 Johnston was drilled to a total vertical depth of 5,070 feet and a horizontal depth of 1,128 feet. During the drilling, circulation problems resulted in the loss of large amounts of water which will need to be recovered before an accurate gauge of the production potential can be determined. The well is currently producing at the rate of 123 barrels of oil and 425 barrels of water per day.

Drilling at the Exxon No. 1-7 Bingham well was begun on July 6. Located in the Pinecliff prospect in Summit County, Utah, the well, in which Equity has a 25 percent working interest, is operated by Exxon.

It is currently drilling below 6,500 feet and is scheduled to be drilled to a total depth of 12,500 feet to test the Twin Creek and Nugget formations at that depth.

Evans commented further, ''Our fundamental enthusiasm for the outlook for our business remains intact. While full year net income will be less than anticipated, we fully expect to continue our strong cash flow generation and an exciting exploration program which has significantly transformed our oil and gas production mix. We also are well positioned for the future with a strong balance sheet and no debt.''

Equity Oil Co., headquartered in Salt Lake City, is an independent oil and gas exploration and development company with operations in nine western states and Canada.

CLIFTON, N.J. (AUG. 8) BUSINESS WIRE - Keystone Camera Products Corp. (ASE: KYC) announced Wednesday that Congress Financial Corp. has agreed to an amendment to its loan agreement with the company, which will permit the company to borrow, on a short-term basis, up to an additional $600,000.

The loan proceeds are in addition to proceeds of $1.2 million realized during July from the sale of an interest in a lease, and other short-term borrowings, plus a $400,000 extension of credit by a supplier.

The funding will enable the company to increase its work force by 270 people to a total of approximately 800 employees. This increase in employment is needed to accommodate the production demands of the current $3.5 million Christmas backlog, as well as to place its new motorized Tele-Wide and motorized Compact 35mm cameras into production.

These cameras are the latest additions to Keystone's family of popularly priced compact ''point & shoot'' 35mm cameras. With features such as autowind/rewind, easy film loading, and an exclusive Tele-Wide lens for double magnification, they are expected to retail between $29.95 - $49.95 at leading mass market retailers throughout the country.

Myron J. Berman, chairman and chief executive officer of Keystone, said, ''The company anticipates that the $2.2 million of financing will provide

sufficient working capital to enable Keystone to complete its preparation for the Christmas season.''

NEW YORK (AUG. 8) BUSINESS WIRE - Petrolane Gas Service Limited Partnership (owned since August 1, 1989, by QFB Partners) reported 1990 second quarter revenues of $129 million, a 4 percent decrease over 1989.

Earnings before interest, taxes, depreciation and amortization for the 1990 second quarter were $11.5 million, a 18 percent decrease compared with 1989's second quarter. For the 1990 second quarter, the partnership had net loss after taxes of $33.5 million, compared with net loss of $4.9 million for the second quarter of 1989. Results of operations were adversely affected by reduction of retail and wholesale sales volumes due to a reduced number of retail customer deliveries and a reduction in wholesale business, higher unit cost of propane and higher interest expense due to the incurrence of debt to finance the acquisition.

Petrolane Gas Service Limited Partnership reported 1990 six months revenue of $378.7 million, a 4 percent increase over 1989. Earnings before interest, taxes, depreciation and amortization for the 1990 six months were $62.9 million, a 9 percent decrease compared with 1989.

For the six months ended June 1990, the partnership had net loss after taxes of $27.1 million, compared with net income of $30.2 million, for the six months ended June 1989.

Results of operations were adversely affected by exceptionally warm weather in the 1990 first quarter, a reduced number of retail customer deliveries in the second quarter, a reduction in wholesale business, higher unit cost of propane, and higher interest expense due to the incurrence of debt to finance the acquisition.

Petrolane Gas Service Limited Partnership is engaged in the domestic retail and wholesale distribution of liquified petroleum gas, predominantly propane, for residential, commercial, industrial and agricultural uses. The company is the largest domestic retailer and one of the largest wholesale distributors of propane based on gallons sold.

QFB Partners is a general partnership formed by affiliates of Quantum Chemical Corp. and CS first Boston Inc.

SOUTHPORT, CT (AUG. 8) BUSINESS WIRE - Crystal Brands Inc. (NYSE) Wednesday announced the appointment of Terry Conway as the new president of its Eagle Shirtmakers division.

He will report to Jay Shaw who is president of the Gant division of Crystal Brands.

Conway was formerly executive vice president of Megastar Apparel, an Interco division, and prior to that was president of The Designer Group, where he was responsible for the launch of Halston and Geoffrey Beene shirts. He was also executive vice president of sales and marketing for both the Van Heusen Co. and The Designer Group.

Chuck Smith, executive vice president of Crystal Brands said ''A major part of Conway's success stems from his innovative marketing direction in the better shirt business. His contributions to the prestigious Eagle Shirtmakers label will further enhance our market standing, and I look forward to his involvement in this business.''

Crystal Brands produces tailored clothing, dress furnishings and sportswear for men, women and boys under the brand names Eagle Shirtmakers Evan-Picone, Gant, Haspel, Izod, Izod Lacoste, Palm Beach, John Weitz, Polo by Ralph Lauren for Boys, Pierre Cardin for Boys, Hunter Haig, Turnbury, Brannoch, Fulcrum, Firenza, Milano and Austin-Hill. The company also produces costume jewelry and accessories under the brand names Monet, Trifari and Marvella.

#90220b0755 08/08/1990 ~Business Wire

NEW YORK (AUG. 8) BUSINESS WIRE - The Continental Corporation (NYSE:CIC) Wednesday reported second quarter 1990 net income of $2.5 million, or $.02 per share, compared with $65.2 million, or $1.18 per share, for the second quarter of 1989.

''Income from operations -- before capital gains or losses and 'fresh start' tax effects -- was $.19 per share, compared with $.55 per share for

last year's second quarter,'' said John P. Mascotte, chairman and chief executive officer. ''This result is about as expected given the depressed pricing environment. We're continuing to emphasize our traditional strengths in package and specialty business while cutting back on marginal accounts and non-strategic lines of insurance.''

Revenues for the second quarter were $1.4 billion, down from $1.5 billion in 1989. Consolidated net investment income for the quarter was $186.0 million, compared with $185.2 million a year ago. The company realized pretax capital losses in the 1990 second quarter of $11.8 million, versus pretax capital gains of $37.4 million for the same period last year.

After tax, second quarter 1990 realized capital losses were $.17 per share against realized capital gains of $.48 per share in 1989. Earnings for the 1990 second quarter do not include a tax benefit resulting from the ''fresh start'' provision of the Tax Reform Act of 1986. Second quarter 1989 earnings included a ''fresh start'' benefit of $.15 per share.

Book value per share was $39.62, compared with $41.98 at June 30, 1989. Book value with all investments valued at market prices was $39.56, versus $43.93 a year ago.

Insurance operations contributed second quarter pretax income of $29.6 million, compared with $89.1 million in 1989. The decrease resulted from a substantial reduction in realized capital gains and higher underwriting losses.

Net written premiums for the quarter were $1.1 billion, down from $1.2 billion a year ago. Growth in personal and commercial package business and in specialty lines where prices are adequate was offset by continued sharp reductions in reinsurance and monoline coverages such as general liability. Insurance operations' second quarter 1990 combined ratio, after policyholders' dividends, was 112.8%, compared with 111.2% for the second quarter of 1989.

Net income for the first six months of 1990 was $34.7 million, or $.60 per share, against $109.4 million, or $1.98 per share, through June 1989.

Year-to-date revenues were $2.8 billion, compared with $3.0 billion in the prior year. Consolidated net investment income for the period was $374.1 million, up from $361.8 million in 1989. The company realized six months 1990 pretax capital gains of $14.8 million, versus gains of $44.1 million for the same period last year. After tax, realized capital gains for the first six months of 1990 were $.15 per share, against $.54 per share in 1989.

First half 1990 results did not include a ''fresh start'' benefit, while the comparable 1989 period included a ''fresh start'' benefit of $.15 per

share.

Year-to-date pretax income from insurance operations was $75.0 million, versus $154.7 million through the first six months of 1989. Net written premiums for the first six months of 1990 were $2.3 billion, down from $2.4 billion through June 1989. Insurance operations' year-to-date combined ratio, after policyholders' dividends, was 113.8 %, compared with 111.0% for six month 1989.

The Continental Corporation, headquartered in New York City, has over $6 billion in annual revenues and $13 billion in assets. Its insurance subsidiaries write property/casualty coverages through independent agents and major brokers, with an emphasis on commercial package policies and select specialized insurance products and services.

MISSION VIEJO, CA (AUG. 8) BUSINESS WIRE - The Federal Reserve System has approved Viejo Bancorp (NASDAQ:VBMV), the owner of Mission Viejo National Bank, for sale of its stock through margin accounts, the company announced Wednesday.

The effect of this approval, according to the Federal Reserve, is that the bank company's stock -- which is now listed on NASDAQ -- has, effective August 14, ''loan value under Regulation T, permitting brokers and dealers to make margin loans using this security as collateral.'' This means that investors can purchase the stock at a lower immediate cash payment by using the stock as collateral for a loan to pay the balance of the purchase price.

Viejo Bancorp Chairman and Chief Executive Officer William T. Brady said: ''We are very pleased to receive this approval as it reflects the solid position of Mission Viejo National Bank and our growing presence as a public company. Also this should broaden the number of investors interested in becoming our shareholders.''

Mission Viejo National Bank is the largest independent bank in Mission Viejo. Its parent company, Viejo Bancorp, had assets of $131 million and earnings of $2.3 million, or 89 cents per share, at the year ended Dec. 31 1989.

Viejo Bancorp was recently listed on the NASDAQ exchange under the symbol VBMV.

#90220b0757 08/08/1990 ~Business Wire

NEW YORK (AUG. 8) BUSINESS WIRE - Michael S. Hudner, President of B+H Ocean Carriers Ltd. (ASE: BHO) announced Wednesday that for the period April 1 through June 30, 1990 the Company had a total of 68 days of off-hire for its thirteen vessels.

This off-hire resulted mainly from two scheduled drydockings totalling 63 days, for M/T's IVER ALKE and MACLE as compared to the budgeted 49 days. Each of these two product tankers had longer than normal drydockings. IVER ALKE had extensive renewal of deck steel and MACLE had blasting and coating of a number of ballast tanks.

Hudner said that this work will add to the trading life of the vessels and is part of the Company's policy of maintaining its dry cargo vessels for a 25 year life and a minimum of 22 year life for the product tankers. He estimated that the loss of revenue resulting from the off-hire was approximately $580,000.

For the remainder of 1990 the Company expects to drydock three vessels, M/T OSCO EDMO and M/V's NAIMO and ELSO, two in the third quarter and one in the fourth quarter.

#90220b0758 08/08/1990 ~Business Wire

NEW YORK (AUG. 8) BUSINESS WIRE - Michael S. Hudner, President of B+H Bulk Carriers Ltd. (NASDAQ: BULKF) announced today that for the period April 1 through June 30, 1990 the Company's vessels realized technical off-hire totalling 107 days, as compared to the budgeted 26 days.

This off-hire resulted mainly from drydocking two vessels (M/V MENTO and SPORT) for a total of 31 days and from major repairs to two vessels (M/V BREA and HOPE) which realized a total of 74 days off-hire. M/V MENTO had a regularly scheduled drydocking while M/V SPORT had an unscheduled drydocking to repair insured hull damage caused by a grounding.

M/V BREA had difficulties with her generators. Two of them are being

replaced, one already done and the other to be completed by mid-August. Repair work on BREA was impeded by the vessel being on the west coast of South America where adequate parts and shore-based logistical support were not readily available. M/V HOPE had a main engine repair which was completed in mid-July. Hudner added that this level of off-hire was completely unacceptable on a continuing basis and that he did not expect it to happen again.

The Company's objective is to operate its remaining seven vessels until they are 25 years old and Mr. Hudner said that the repairs effected on BREA and HOPE would get those vessels a long way towards that goal.

He estimated that for the period the Company incurred a loss of revenue of approximately $440,000 as a result of the off-hire and added that operating expenses for BREA and HOPE would be well above normal as a result of these repairs.

The Company expects one more drydocking this year, M/V ANTIO, in September.

#90220b0759 08/08/1990 ~Business Wire

NEW YORK (AUG. 8) BUSINESS WIRE - Michael S. Hudner, President of B+H Maritime Carriers Ltd. (ASE: BHM) reported Wednesday that for the period April 1 through June 30, 1990 the Company had realized 23 days of technical off-hire on its ten vessels as compared to the budgeted 38 days.

Fifteen days of this off-hire was attributable to M/T NANI and was caused mainly by damage repairs following contact with a pier and a problem with cargo pumps.

Hudner estimated that the loss of revenue from the off-hire was approximately $210,000. The Company did not drydock any vessels during the quarter but during the remainder of 1990 three vessels, M/V's ENA and REMA and M/T LIVI are scheduled to be drydocked, one in the third quarter and two in the fourth quarter.

The Company is upgrading three of its product tankers and the operating expenses, including approximately $500,000 for spare parts for M/T's NANI, LIVI and ITER, will be substantially above normal for the second quarter.

The Company's vessel upgrading program requires the use of much of the current cash flow but will go a long way towards allowing the Company to meet its objective of operating its vessels to 25 years of age for dry bulkcarriers and at least 22 years of age for product tankers.

#90220b0762 08/08/1990 ~Business Wire

MIDVALE, UT (AUG. 8) BUSINESS WIRE - Broadcast International Inc. (NASDAQ:BRIN) Wednesday announced the commencement of its Satellite Energy Network, SENERGY, a satellite-delivered petroleum information and price notification network now available through Bonneville Market Information, a wholly owned subsidiary of the company.

Charles McQuinn, president of Bonneville Market Information, stated: ''In active petroleum markets where immediate news of price changes is essential to compete, SENERGY provides petroleum marketers, jobbers and distributors with fast, accurate information. Today's volatile market conditions demonstrate the need for a reliable information network to eliminate the several-hour delay common to telephone-based price notification systems.''

SENERGY resulted from the joint efforts of Bonneville, Computer Petroleum Corp. and Sun Refining & Marketing (SUNOCO) to develop a better price and information distribution network. Sun conducted the initial testing and is now in the process of implementing SENERGY for its customers. Similar testing is being conducted by several other major petroleum suppliers with implementation expected within 30 days.

''We are offering SENERGY, free of charge, to petroleum marketers who currently deal with four or more suppliers delivering information on the SENERGY network. We estimate that over 90 percent of the 10,000 petroleum marketers now using telephone-based systems will qualify for the free service. SENERGY is designed to become the standard network of the energy industry,'' said McQuinn.

James Amaroso, Sun R & M general manager for Fuels West, stated: ''Although the initial work on the SENERGY petroleum market information/pricing network was a joint effort of Sun R & M, Bonneville and CPC, we also took the time to evaluate other alternatives.

''As an industry, we have learned in the past that for this kind of network to be viable, it must be able to be used by all suppliers and their customers. We at Sun are very excited with the potential of SENERGY to satisfy the information delivery needs of the industry with a fast, reliable, efficient satellite network.''

Based in Salt Lake City, Broadcast International installs and operates private satellite communications systems that deliver background music,

point-to-multipoint data communications, in-store point-of-purchase advertising and video conferencing services. Through its wholly owned subsidiary, Bonneville Market Information, it also distributes financial market data and agricultural and energy commodity data to a wide variety of subscribers.

BATAVIA, NY (AUG. 8) BUSINESS WIRE - Graham Corp. (ASE:GHM) announced Wednesday that the Employee Stock Ownership Plan of Graham Corp. (the ''ESOP''), adopted by the board of directors on February 23, 1990 and effective as of January 1, 1990, acquired 43,010 shares of Graham common stock on August 7, 1990.

The ESOP is an employee benefit plan for both salaried and hourly-rate employees of Graham and certain other of its affiliates and is intended to be qualified as a stock bonus plan under section 401(a) of the Internal Revenue Code of 1986.

Of the 43,010 shares purchased by the ESOP, 21,505 shares were purchased from the company and 21,505 shares were purchased from Frederick D. Berkeley, the president and chairman of the board of the company. In each case the shares were purchased at a price of $23.25 per share, the closing price of the company's common stock on the American Stock Exchange on August 6, 1990.

Graham designs and manufactures vacuum and heat transfer equipment for the process industries.

#90220b0766 08/08/1990 ~Business Wire

BATON ROUGE, LA (AUG. 8) BUSINESS WIRE - Piccadilly Cafterias Inc. (NASDAQ:PICC), Wednesday announced sales and earnings for the quarter and fiscal year ended June 30, 1990.

Sales for the fourth quarter were $77,248,000, an increase of 4 percent

over sales of $73,956,000 recorded in the same period last year.

Net income for the fourth quarter increased 11 percent to $2,898,000 or 30 cents per share, from $2,612,000, or 27 cents per share, posted in the same quarter last year.

Sales for the year ended June 30, 1990 increased 11 percent to $306,655,000 from last year's $276,198,000. Net income for the 12 month period was $11,901,000, or $1.25 per share, compared to net income of $11,270,000, or $1.20 per share last year. Fiscal 1990 earnings include the second quarter nonoperating charge of $550,000, or 6 cents per share, incurred by Institutional Equipment & Interiors Inc., a wholly-owned subsidiary of Piccadilly based in Elmhurst, Ill.

James C. Malmberg, president and chief executive officer, said that the fourth quarter earnings increase was primarily the result of improved margins, reflecting the company's successful efforts in controlling direct costs, namely food and labor.

''We are encouraged by our efforts in controlling direct costs, especially labor, in light of the pressure we face during the quarter from the mandatory increase in minimum wage compensation and soft customer counts.''

Malmberg added, ''The conclusion of the fourth quarter marks another year of growth and we expect continued growth in 1991 through higher sales volumes and efficient management of direct costs.''

Malmberg added that total customer traffic for the quarter decreased 1 percent over the last year while total customer traffic for the fiscal year increased 3 percent compared to last fiscal year, reflecting the contribution of new cafeterias opened. Customer traffic in cafeterias open during both fiscal years decreased 6 percent.

Piccadilly opened cafeterias during the quarter in Miami, and Nashville, Tenn. A total of nine new cafeterias were opened during fiscal 1990. Piccadilly opened a second new cafeteria in Nashville during July 1990.

Piccadilly currently owns and operates 142 cafeterias in 14 states and six Ralph & Kacoo's seafood restaurants. All operating units are company owned.

#90220b0778 08/08/1990 ~Business Wire
LOS ANGELES (AUG. 8) BUSINESS WIRE - St. Ives Laboratories Inc. (NASDAQ:SWIS) Wednesday announced that net sales for the three months ended June 30, 1990, were $26,757,000, a decrease of $1,894,000, or 6.6 percent, from sales of $28,651,000 for the comparable period in 1989.

Net income for the second quarter of 1990 was $961,000, or 14 cents per share, vs. $1,532,000, or 22 cents per share, for the comparable quarter in 1989.

Net sales for the six-month period ended June 30, 1990, decreased 12.4 percent to $51,041,000 from $58,247,000 in the same period of 1989. This decrease was the result of a $7,842,000 decrease, or 18.7 percent, in Personal Care Products sales in the United States as well as a $755,000 decrease, or 6 percent, in the Custom Label business.

Internationally, Personal Care Products sales increased $1,391,000, or 39.2 percent, during this period.

The decrease in sales of Personal Care Products relates to the introduction of a new packaging format for SWISS FORMULA Hair Care System Packs, late in 1989, that was not accepted by the consumer, resulting in lower sales volume and lower operating margins during the six-month period. The company, when sensing the problem, converted back to the original packaging.

Company inventories and virtually all of the trade-warehouse inventories have been converted to the original format. The company believes the packaging difficulty has been solved.

Net income for the six-month period in 1990 was $1,633,000, or 24 cents per share, vs. $3,123,000, or 45 cents per share, for the comparable period in 1989.

WESTON, WV (AUG. 8) BUSINESS WIRE - A team of New Hampshire teenagers recently competed against 14 states during the 11th annual National 4-H Forestry Invitational, a four-day event sponsored by the International Paper Company Foundation.

About 60 teenagers from across the country tried their skills at tree measurement, forest evaluation and other forestry events during the event held July 30 - Aug. 2 at Jackson's Mill State 4-H Camp.

Boys and girls competed for overall team and individual awards in tree identification, insect and disease identification, compass orienteering, forest evaluation and tree measurement. Participants also took a written test in forestry and competed in the ''Forestry Bowl,'' an academic contest of forestry knowledge.

Representing New Hampshire were Jason Aiken, Claremont, H.H.; Sham Beaulieu, Epsom, N.H.; Tony Gilbert, Gilmanton, N.H.; and Sylvia Taylor, Lyneboro, N.H.

Team awards went to Georgia, first place; Arkansas, second; Florida, third; Tennessee, fourth; and Missouri, fifth.

Dennis Kurkendall, 19, of Mena, Ark., was the top individual scorer during the invitational.

Second was Jeff Bennett, 17, Statenville, Ga.; third, Dee Staten, 17, also of Statenville, Ga.; fourth, Lance Lavergne, 17, Ville Platte, La.; and fifth, Lamar Spells, 17, Lake Park, Ga.

Anneta Smith, 18, of Hayneville, Ala., earned the Joe Yeager Leadership award, given to the participant who demonstrated excellent communication, management, decision-making and interpersonal skills.

Participants hailed from Alabama, Arkansas, Georgia, Florida, Illinois, Kentucky, Louisiana, Mississippi, Missouri, New Hampshire, Oklahoma, South Carolina, Tennessee, Texas and West Virginia.

The 4-Hers learned firsthand the importance of managing and conserving woodlands as a source of products and for recreation.

International Paper is a major worldwide producer of wood pulp, printing and writing papers, paperboard and packaging products and wood products. The company also operates specialty products and distributes paper and wood products. International Paper has manufacturing operations in 22 countries and exports its products from the U.S. to more than 70 nations.

SHREVEPORT, LA (AUG. 8) BUSINESS WIRE - Crystal Oil Co. (ASE:COR) Wednesday reported the operating results for the three and six months ended June 30, 1990 and 1989.

Crystal Oil Co.
Financial Highlights

	Three Months Ended June 30		Six Months Ended June 30	
	1990	1989	1990	1989
Revenues	$ 6,413,000	$ 7,712,000	$14,446,000	$15,521,000
Income before provision in lieu of income taxes	$ 265,000	$ 1,343,000	$ 2,017,000	$ 2,831,000
Net income/a	$ 85,000	$ 802,000	$ 1,110,000	$ 1,683,000
Increase to equity/b	$ 235,000	$ 1,322,000	$ 1,952,000	$24,011,000
Income per common equivalent share	-0-	3 cents	4 cents	7 cents
Weighted average number of common and common equivalent shares outstanding	25,294,820	24,354,124	25,294,672	22,978,105

(a) Includes the effect of a non-cash charge to operations of $100,000 and $520,000 in the three months ended June 30, 1990 and 1989, respectively, and $792,000 and $1,098,000 in the six months ended June 30, 1990 and 1989 respectively, for a provision in lieu of income taxes for financial reporting purposes only. Because of the company's quasi-reorganization in 1986, the offset to such charge is to increase paid-in capital.

(b) Includes the effect of the closing of a discount to market common

stock rights offering in which the company raised approximately $21,230,000, net of expense in 1989 and the net effect of non-cash charges to operations for a provision in lieu of income taxes for financial reporting purposes only which is recorded as a credit to additional paid-in capital in 1990 and 1989.

#90220b0842 08/08/1990 ~Business Wire

LONG ISLAND CITY, NY (AUG. 8) BUSINESS WIRE - Recoton Corporation (NASDAQ:RCOT) Wednesday reported results for the three and six month periods ended June 30, 1990.

Sales for the quarter ended June 30, 1990 increased 24% to $10,376,000 from $8,387,000 in the previous year's second quarter. The Company reported a net loss in the second quarter of 1990 of $48,000 or $.02 per share compared to net income of $14,000 or $.01 per share in the same period last year.

For the six months ended June 30, 1990, sales were $21,121,000, an increase of 17% from the $18,009,000 reported in the first half of 1989. In the first half of 1990, there was a net loss of $146,000 or $.07 compared to net income of $249,000 or $.12 per share in the corresponding period the prior year.

The increase in sales for the current quarter and six months is primarily due to the addition of sales from Recoton's Calibron, Inc. subsidiary, the assets of which were acquired in September 1989, and from sales of Rembrandt antennas, which product was acquired in December 1989 from All Channel Products, Inc.

Net income in the first half of 1990 was adversely impacted by the weak economy. The consumer electronics industry has for at least the past six months been suffering from a lowered level of consumer buying and, as a result, most retailers have reduced their inventories by curtailing their purchases. The resulting increase in competition by suppliers aiming to protect their market shares has necessitated increased promotional expenses, thereby putting pressure on Recoton's profit margins.

Robert L. Borchardt, President, stated, ''Recoton continues to expand its leadership position in the consumer electronics accessory industry. Calibron and Rembrandt continued to contribute to our growth in this period and Recoton's assortments of video, audio, telephone and home office products available at many leading retailers performed very well in the first half of 1990.

''Blank video tape sales, which contributed to the Company's performance last year, have decreased substantially due to severe price competition among most leading brands. We anticipate that this category will contribute substantially less in sales for the balance of the year.''

Mr. Borchardt added, ''As we enter the fall, we have high expectations for our new wireless video sender, ''Room Service'', which we introduced to much acclaim at the June consumer electronics show in Chicago. Room Service transmits picture and sound from any source -- including over-the-air-broadcasts, cable, satellite transmissions, VCRs and camcorders -- to a television set in any other room without the use of wires.

''Recoton also introduced over 30 new products which will be sold during the balance of the year. Although we anticipate that sales will continue to be effected by the weak economy, we are optimistic about our prospects for the balance of the year.'' Recoton Corporation's products include over 1,000 accessories that are used for the maintenance, hookup, interconnection and enhancement of consumer electronics equipment, including video cassette recorders, audio equipment, telephones and personal computers.

MESA, AZ (AUG. 8) BUSINESS WIRE - Army combat helicopter pilots of the 21st century will concentrate more on the fight and less on the flight thanks to leap-ahead technology going into its new LH armed reconnaissance/attack helicopter.

This dramatic transformation is being demonstrated during evaluation flights this month in an LH surrogate helicopter by Army pilots at McDonnell Douglas/Bell Helicopter Textron LH SuperTeam headquarters in Arizona.

A modified AH-64 Apache attack helicopter, known as the Advanced Cockpit Evaluator (ACE), is serving as the LH surrogate during development. The ACE looks like an Apache except for its ominous coat of black paint and an LH SuperTeam logo. But inside, it's a helicopter of the future with capability that radically alters the way aircrews fly it and fight with it.

This leap forward in capability is made possible by advanced sensors, computers and information displays, and an advanced flight control system, according to Cap Parlier, a veteran combat helicopter pilot and SuperTeam director of test and evaluation. ''Carefree flying'' is the result, Parlier says.

In current generation combat rotorcraft a pilot has more than his hands full. He controls rotor thrust with a collective lever in his left hand and maneuvers with a cyclic control stick in his right.

He adjusts the aircraft's heading trim with directional control pedals while scanning numerous cockpit instruments and terrain ahead and below through the canopy. Meanwhile, he's mentally integrating all of these functions to fly his mission. Weapons targeting, delivery and intelligence-gathering tasks are superimposed on these flying responsibilities, and he must be ever alert to threats from enemy aircraft and air defense systems.

Five new systems installed in the SuperTeam's ACE will substantially simplify the LH pilot's flying workload and increase his ability to achieve military objectives such as targeting.

The SuperTeam is one of two industry teams competing for a contract to construct and demonstrate prototype LH helicopters during the upcoming full-scale engineering development phase of the LH program, scheduled to begin in January 1991.

The team is comprised of McDonnell Douglas Helicopter Co., Bell Helicopter Textron and McDonnell Aircraft Co. The Army plans to replace 3,200 tactically obsolete, Vietnam-era helicopters with 1,875 LH helicopters.

MATTITUCK, NY (AUG. 8) BUSINESS WIRE - North Fork Bancorporation, Inc. (NYSE:NFB) announced Wednesday that, based on Eastchester Financial Corporation's (NASDAQ:ECFC) financial condition and results of operations for the period ending June 30, 1990, North Fork would not be prepared to consummate its previously announced agreement to acquire Eastchester at the price of $20 per share of Eastchester common stock.

However, North Fork said that it advised Eastchester representatives that North Fork would be willing to acquire Eastchester on significantly revised terms. North Fork stated that it is unable to assess at this time whether or not Eastchester will agree to enter into a transaction under revised terms.

As previously announced, North Fork Bancorporation, Inc. and Eastchester Financial Corporation entered into a merger agreement on Apr. 18, 1990, pursuant to which Eastchester Financial Corporation was to merge with a subsidiary of North Fork Bancorporation, Inc.

WASHINGTON (AUG. 8) COMTEX - The 8-K report filed at the SEC shows on Sept. 11, 1989, PNB Financial Group(TICKER: PNBF) entered into an agreement with Merchant House, a California corporation.

Pursuant to the agreement, Merchant House acquired 734,375 units of PNB Financial.

On Feb. 18, 1990, Terry M. Giles, an individual residing in California, purchased all of the outstanding shares of Merchant House from its existing shareholders.

Accordingly, Terry M. Giles is now the sole owner of all shares in Merchant House, which owns approximately 50.22 percent of the issued and outstanding shares of common stock and 100 percent of the issued and outstanding warrants of PNB Financial.

PNB Financial's executive office is located at 4665 MacArthur Court, Newport Beach, California 92660 and its telephone number is (714) 851-1033.

WASHINGTON (AUG. 8) COMTEX - The 8-K report filed at the SEC shows on July 27, 1990, American Health Care Management Inc.(TICKER: AHI) appointed Ernst & Young as its independent accountants, replacing Coopers & Lybrand.

In connection with the audits of the two most recent fiscal years and the subsequent interim period, there were no disagreements with the former accountant on any matter of accounting principles or practices, financial statement disclosures, or auditing scope or procedure.

The former accountant's report on the financial statements for the past two years contained no adverse opinion or disclaimer of opinion and was not qualified as to uncertainty, audit scope or accounting principles.

However, these reports are modified to refer to the uncertainties relating to American Health Care Management Inc.'s operation of its business as debtor-in-possession under Chapter 11 of the Federal Bankruptcy Code from Aug. 7, 1989 until Dec. 29, 1989, the effective date of American Health Care Management Inc.'s plan of reorganization.

The report of Coopers & Lybrand on American Health Care's financial statements for the year ended Dec. 31, 1989 was further modified as to the uncertainty regarding the ability of American Health Care Management Inc. to generate sufficient cash flows to meet all of its requirements under the plan of reorganization.

American Health Care Management Inc.'s executive office is located at 14160 Dallas Parkway, Suite 900, Dallas, Texas 75240 and its telephone number is (214) 385-7000.

GROUP LED BY C.E. PARENTE OF WILKES-BARRE, PA OWNS 4,572,893 SHARES (53.88%) OF C-TEC CORP (TICKER: CTEX) OF WILKES-BARRE, PA.

ANNOUNCEMENT:

This schedule 13D transaction represents Amendment No. 9 for Group and Amendment No 11 for Charles E. Parente. Pursuant to the shareholders' agreement, each shareholder of ECC is required to use his or its best efforts to cause any shares of C-TEC stock owned by ECC or subsidiary of ECC to be voted only as determined by an affirmative vote of a majority of

the whole board of directors, inclusive of proxies. Pursuant to an agreement dated June 30, 1985 among SEI, National Tree Surgeons Inc., and George B. Sordoni, SEI has a right of first refusal to purchase any shares or voting trust certificates, that George B. Sordoni may elect to sell. This right of first refusal currently applies to voting trust certificates with respect to 350,000 shares currently held by SEI under the voting trust agreement and will apply to the 350,000 shares subject to the voting trust agreement following its expiration on June 30, 1995.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 11

GROUP LED BY D.C. WALENTAS OWNS 336,100 SHARES (6.82%) OF BUILDERS TRANSPORT INC (TICKER: TRUK) OF CAMDEN, SC.

ANNOUNCEMENT:

On July 18, 1990, Walentas and Dinstein met with senior management of Builders Transport Inc. to discuss alternatives to a proxy contest that D.C. Walentas have proposed. D.C. Walentas expect to gain control of Builders Transport Inc. in the event of a proxy contest or at the very least request a majority of seats on the board or the election of Mayoras as CEO and Walentas as chairman of the board. Builders Transport Inc. rejected the request and offered two nominees to D.C. Walentas and expressed its willingness to cooperate in a due diligence review regarding Walentas' possible acquisition of Builders Transport Inc., providing that D.C. Walentas refrain from a proxy contest, to which Walentas refused. On July 27, 1990, D.C. Walentas entered into agreements with Arthur Baxter and George Hirschorn that are similar to the agreement with Frederick Morton described in amendment no. 9 to this 13D.

LATEST TRANSACTION:

On July 13, 1990, Mayoras purchased 3,000 shares for $9.25 per share.

PURPOSE:

Proxy contest.

WASHINGTON (AUG. 8) COMTEX - The 10-Q report filed at the NASD shows Mark Controls Corp.(TICKER: MRCC) earned $753,000, or $0.15 per share, on revenues of $20.62 million for the quarter ended June 30, 1990.

This compares with net income of $835,000, or $0.17 per share, on revenues of $19.29 million for the same period in 1989.

-30- 485

#90220c0057 08/08/1990 ~Comtex
WASHINGTON (AUG. 8) COMTEX - The 8-K report filed at the SEC shows on July 30, 1990, Deloitte & Touche notified First Executive Corp. (TICKER: FEXC) that it declined to stand for re-election as First Executive Corp.'s independent accountants.

In June 1990, First Executive hired William L. Sanders, the partner-in-charge of auditing First Executive for Deloitte & Touche, as First Executive's chief financial officer.

Since that time, First Executive has hired a number of former employees of Deloitte & Touche who participated in the audit of First Executive.

For the previous two fiscal years, audits performed by those former auditors contained no adverse opinion or disclaimer of opinion and was not qualified.

However, such report was modified to include explanatory paragraphs as to the uncertainty of certain matters.

WASHINGTON (AUG. 8) COMTEX - The 10-Q report filed at the NASD shows Park Communications Inc.(TICKER: PARC) earned $5.87 million, or $0.28 per share on revenues of $42.77 million for the quarter ended June 30, 1990.

This compares with net income of $5.83 million, or $0.28 per share, on revenues of $43.22 million for the same period in 1989.

-30- 497

#90220c0059 08/08/1990 ~Comtex
WASHINGTON (AUG. 8) COMTEX - The 10-Q report filed at the NASD shows Financial Resources Marketing Corp. lost $46,914, at an unknown price per share, on revenues of $60,594 for the quarter ended June 30, 1990.

This compares with net income of $40,114, at an unknown price per share,

on revenues of $209,521 for the same period in 1989.

-30- 494

#90220c0060 08/08/1990 ~Comtex

WASHINGTON (AUG. 8) COMTEX - The 8-K report filed at the SEC shows on Aug. 1, 1990, Security Environmental Systems Inc.(TICKER: SENV) appointed BDO Seidman as its independent accountants, replacing Deloitte & Touche.

Deloitte & Touche's report for the fiscal year of Security Environmental Systems Inc. ended June 30, 1989, contained the following qualification as to uncertainty:

"As discussed in Note 9c of the Notes to Consolidated Financial Statements, a number of lawsuits have been filed against the company. The ultimate outcome of the litigation cannot presently be determined. Accordingly, no provision for any liability that may result upon adjudication has been made in the accompanying financial statement."

"The accompanying consolidated financial statements as of and for the year ended June 30, 1989 have been prepared assuming that the company will continue as a going concern. As discussed in Note 2, conditions exist which raise substantial doubt about the company's ability to continue as a going concern unless it is able to generate sufficient cash flows to exercise its option for its operating property, meet its obligations and sustain its operations. Management's plan in regards to these matters are also described in Note 2. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty."

Security Environmental Systems Inc.'s executive office is located at 7245-D Garden Grove Blvd., Garden Grove, CA 92641 and its telephone number is (213) 431-8486.

JAKARTA (AUG. 8) - Members of the Organisation of Petroleum Exporting Countries (OPEC) will stick to their output quotas although world demand has surged with the Gulf crisis, an Indonesian minister said here Wednesday.

"Not a single OPEC member will take advantage of the current situation," Indonesian Mines and Energy Minister Ginanjar Kartasasmita was quoted by the official Antara news agency as saying.

He said he had discussed the current oil situation with most of his OPEC counterparts since last week's Iraqi invasion of Kuwait and the subsequent international embargo on oil supplies from Iraq and Kuwait.

He said Saudi Arabia, the United Arab Emirates, Iran, Venezuela and Algeria had agreed that all members should stand by the OPEC agreement on quotas reached at the group's meeting in Geneva last month.

The Geneva meeting set a production ceiling for OPEC's 13 members at 21.5 million barrels a day to lift oil prices to 21 dollars a barrel.

However, spot oil prices have since soared, with Brent crude quoted at 28.30 dollars a barrel in London from less than 20 dollars before the Iraqi invasion.

Mr. Ginanjar said any OPEC action on output would be taken jointly.

"This situation is very sensitive, and any violation by a member will make it hard to restore OPEC solidarity in the future," he said.

He also said the panic buying that helped push up oil prices in the past few days was unwarranted as industrial countries had large enough stocks to meet any immediate shortages, citing Japan's 140-day reserves as an example.

"The panic is a reflection that they were not ready to face this kind of situation and also that speculators were taking advantage of the situation " he said.

Asked about the embargo on trade with Iraq mandated by the U.N. Security Council, Mr. Ginanjar said the government was currently studying the issue.

He said Indonesia would look to the international market if supplies of Iraqi oil to Indonesia were disrupted.

Indonesia imports some 30,000 barrels of Iraqi crude a day as part of an agreement in exchange for exports of Indonesian textiles and other commodities.

#90220d0120 08/08/1990 ~French/German News Agency

HAMBURG (AUG. 8) - Former West German Chancellor Helmut Schmidt, 71, was recovering at home in suburban Hamburg Wednesday following release from a Kiel hospital where he was treated for a heart attack he suffered two weeks ago.

Doctors at Kiel University Hospital said Tuesday that the former chancellor had come close to requiring a bypass operation.

In confirming that his condition had been more serious than initially believed, doctors said they used a balloon catheter to relieve a

constricted coronary artery. Had that procedure not been successful, bypass surgery would have been necessary, they said.

Schmidt, who has a history of heart problems and has worn a pacemaker since 1981, was admitted to the hospital July 25 complaining of discomfort.

The former chancellor, who spent recent months working on a second volume of memoirs due for publication next month, was said to have recovered most of his former strength following treatment.

CAIRO (AUG. 8) - The USS aircraft carrier Eisenhower, backed by five U.S. warships, entered the Suez Canal Wednesday on its way to the Gulf, officials here said.

The move follows discussions here Tuesday between President Hosni Mubarak and visiting U.S. Defense Secretary Dick Cheney, amid a U.S. military buildup in the region following Iraq's invasion of Kuwait last Thursday.

Another aircraft carrier, the USS Independent, was reported to be 50 kilometers (30 miles) from the entrance of the Gulf and in a position to provide air cover for U.S. forces when they land in Saudi Arabia.

The United States is sending 2,000 to 4,000 ground forces to Saudi Arabia as part of a multinational force approved by Riyadh to counter any attempt by Iraq to invade Saudi Arabia -- which has the world's largest oil reserves after Iraq and Kuwait.

WIESBADEN (AUG. 8) - West Germany's annual inflation rate in July edged up to 2.4 percent, compared to 2.3 percent in June, the Federal Office of Statistics said here Wednesday.

The office attributed the cost of living rise above all to higher rents. In July, rents were 3.5 percent higher in West Germany than in the same month in 1989.

COLOMBO (AUG. 8) - Tamil rebels fighting for a separate state in Sri Lanka massacred more than 50 civilians, including 16 children, in two separate attacks in northeastern Sri Lanka in the last 24 hours, authorities said Wednesday.

A military spokesman here said that guerrillas of the Liberation Tigers of Tamil Eelam (LTTE) shot dead 27 people Wednesday after they were dragged out from a bus moving from northcentral Anuradhapura towards the eastern town of Trincomalee.

The Tigers also killed 30 Sinhalese villagers on Tuesday night after raiding a colony in neighbouring Ampara district, a senior police official in the area said.

The military spokesman said that the bus carrying mostly Sinhalese passengers was flagged down in the morning by three persons posing as passengers.

The moment the vehicle stopped, more guerrillas waiting in ambush emerged and ordered the passengers out before gunning them down, the spokesman said.

Troops who rushed to the scene found the bodies of 15 women, nine men and three children and despatched to hospital six survivors who were critically wounded, military officials said.

The attack came less than 24 hours after the Tigers allegedly massacred at least 30 Sinhalese villagers at a settlement in Ampara.

A senior police official said that 13 children and 17 men and women had died in the Tuesday night raid on the Bandaraduwa settlement of some 60 families.

Military officials here said the Tigers had not used automatic weapons when they stormed the colony, probably thinking that it would set off an alarm.

But the spokesman said that the nearest army detachment was 20 kilometers (12 miles) away from the colony which is surrounded by forests.

The police official said that many others in the colony had fled into the bush and jumped into a nearby lake.

He said that four others admitted to hospital with serious cut wounds included two children aged five and 12 years old.

DHAHRAN, Saudi Arabia (AUG. 8) - Americans and Britons were leaving key Saudi cities Wednesday as the first batch of U.S. warplanes landed in the kingdom ahead of an expected U.S. deployment there.

U.S., British and other Western nationals left Dhahran, Dammam and Al-Khobar and were heading in convoys of cars to Riyadh and Jeddah to catch flights for Europe.

Witnesses said Dhahran airport was closed to air traffic Wednesday with only military landings allowed, as U.S. warplanes landed in the eastern Saudi province to help protect the kingdom against a possible Iraqi invasion.

Americans and Britons in Saudi Arabia have been advised by their embassies in Riyadh to leave the kingdom, Western diplomatic sources said.

On Wednesday, the U.S. embassy advised dependents of U.S. nationals to leave the United Arab Emirates (UAE) but stressed there was no "specific threat" against the country following Iraq's invasion of Kuwait.

Sami Hajjar, spokesman for the embassy in Abu Dhabi, said the U.S. State Department was "permitting the dependents of U.S. government officials to depart the area on a voluntary basis."

"The department advises other American citizens to consider doing the same -- that is voluntary departure of dependents only," he added, quoting a communique from Washington.

He said the area cited in the communique comprises the "eastern province of Saudi Arabia, Qatar, Bahrain and the United Arab Emirates."

But he added: "The embassy has no information to indicate that there is a specific threat against the UAE or American citizens at this time."

"We will advise them if there is any change in our current assessment."

The State Department has also advised Americans to defer travel to the areas concerned "due to the Iraqi invasion of Kuwait and the continuing unstable conditions in the region."

BERLIN (AUG. 8) - A special meeting of the East German parliament was to vote later on Wednesday on three proposed timetables for unification and the holding of pan-German elections, against the background of mounting economic crisis.

The 167-strong CDU parliamentary group linked to the West German Christian Democratic Union headed by Chancellor Helmut Kohl was calling for the planned December 2 elections to be brought forward to October 14 to coincide with a fusion of East Germany with West Germany.

This would require a change to the West German constitution and therefore the support of two thirds of the Bundestag, the West German parliament. The move was expected to fail for want of support from the West German Social Democratic party led by Oskar Lafontaine.

The East German SPD with 91 MPs was to propose that East Germany join West Germany by September 15, and that the elections be held as planned on December 2.

Since both proposals are expressions of intent, they could be voted by a simple majority. The CDU which is supported by the conservative German Social Union with 25 members and the 23-strong Liberals, can count on 221 votes out of a total of 400.

But the SPD proposal has scant chance of being approved.

The German Social Union has said that it intends to make a third proposal, that East Germany join West Germany immediately. It tried unsuccessfully to push this through in mid June, and the proposal was sent to committee.

It is now up to the parliamentary praesidium to decide whether the DSU proposal should be put on the agenda. But in any case, it was given little chance of success since it would require a two-thirds majority.

Like the Bundestag, the East German parliament also has to ratify an inter-German treaty setting out the rules for pan-German elections.

The agreement was reached at the end of July between the main political parties in the two states. It envisages proportional voting in a single electoral territory, requiring a minimum level of five per cent of the votes to qualify for seats in parliament.

ADELAIDE, AUSTRALIA (AUG. 8) - About 150 Australian workers and their families will be evacuated from Saudi Arabia following Iraq's invasion of Kuwait, their employer said here Wednesday.

Don Corey, operations manager of Adelaide-based British Aerospace Australia (BAA), said the Australians were employed on contract in Saudi Arabia's major oil port of Dhahran.

Mr. Corey said the decision to evacuate had been taken by BAA's parent company British Aerospace after discussions with the British embassy.

The Australians are part of a large multi-national contingent including New

Zealanders working on a contract with the Saudi Arabian Air Force in the towns of Dhahran, Riyadh and Khamis-Musayt.

Mr. Corey said the port of Dhahran would be particularly vulnerable in the event of an Iraqi assault on Saudi Arabia, where the United States is sending troops .

He said the evacuees would be flown to Britain before returning to Australia or New Zealand.

Telecom Australia (International) Ltd. (TA) said in a statement issued in Melbourne that it was monitoring events in the Gulf where 449 workers and their families were involved in a joint venture with Saudi Arabia.

TA was half way through a three-year 86 million dollar (68 million U.S. dollar) contract to operate and maintain the Saudi Telecommunications network,
 it said.

The joint venture employed 143 mainly Australian advisors many of whom had families with them, the company said.

SINGAPORE (AUG. 8) - Rising Gulf tension and market rumours that Baghdad had been bombed pushed prices up on the Singapore rubber market on Wednesday.

Prices went to a high of 156.25 Singapore cents for September 1 RSS while forward positions put on three-quarters of a cent just before the midday break on the rumours of a bombing of Baghdad.

The afternoon session saw prices marked fractionally lower at the start as the bombing story proved unfounded, but they moved up again towards the close on reports of increased Gulf tension.

U.S. troops were despatched to Saudi Arabia in the wake of Iraq's invasion of Kuwait last week, and there were reports that Iraq had stoppped a convoy of foreigners trying to leave the country for Jordan, along with news that Iraq planned to announce union with Kuwait later in the day.

The market had opened unchanged from overnight closing levels, with September 1 RSS offered at 154.75 Singapore cents and initial trading quiet with some underlying buying interest.

The Singapore rubber market will be closed Thursday for the National Day public holiday.

#90220d0680 08/08/1990 ~French/German News Agency
SINGAPORE (AUG. 8) - Singapore's economic growth has slowed down and could further languish in the coming months if the Middle East conflict is not resolved quickly, a government official said Wednesday.

Senior Minister of State for Trade and Industry Mah Bow Tan said the situation in Gulf made it uncertain that Singapore could achieve its projected growth of eight to 10 percent this year.

The latest economic survey showed that the economy grew by 6.8 percent in the second quarter compared with 10 percent in the first and 9.7 percent in the corresponding period last year.

The survey showed that all major sectors except construction slowed in the second quarter and only financial and business services achieved double digit growth to remain the economy's leading sector with 12 percent.

Manufacturing and transport and communications both rose by 8.4 percent, while commerce and construction grew at 7 percent and 6.5 percent, it said.

Singapore's total trade growth was slower at 6.1 percent in the second quarter of 1990 against 19 percent in the first -- a trend attributed to reduced growth in both imports and exports.

The survey, conducted before Iraq invaded Kuwait, showed that the general expectation was for business to remain good in the next six months, but said the Gulf conflict was almost certain to have dampened that feeling.

"Higher oil prices will affect us directly, raising energy costs and the cost of living," it said, noting that this would have a "ripple effect" in developed economies -- Singapore's main export markets.

Warning against the danger of globally higher inflation, the survey said: "The U.S. economy, which is already sluggish, may be pushed into a recession."

Singapore exports would be "less buoyant" and foreign investors would be less ready to start new projects, which made it much less likely that the national economy could exceed eight percent growth in 1990, it said.

LAGOS (AUG. 8) - Nigeria has signed two separate agreements on its six billion naira (755 million dollars) petrochemical project in Eleme, near Port Harcourt, south-eastern Nigeria, press reports said here Wednesday.

Nigeria signed the accords Tuesday with the Nigerian Agip oil Company (NAOC) and Phillips Oil Nigeria, joint partners in the project on a 6O:20:20 percent arrangement.

The first agreement covers the exchange of loans and trust agreements providing for a more vigorous pursuit of export credit facilities of about six billion naira needed for the execution of the project.

The second is a liquid gas feedstock agreement under which it is expected that liquid gas from an NAOC plant would be released as raw materials to the Eleme project, the reports said.

While over 80 percent of the six billion naira credit facilities are expected from Japanese financial institutions, NAOC has voted 300 million dollars for the construction of the gas plant and other facilities.

The plant, when it comes on stream in 1992, would produce 480,000 metric tons of ethane, propane and butane, and 150,000 tons of pentane for the petrochemical project.

The petrochemical project, scheduled for completion in 1993, is designed to produce 3000,000 tons of ethylene, 400,000 tons of propylene, 80,000 tons of polypropylene, 250,000 tons of polythelene and 22,000 tons of butane yearly, said the report.

DUBAI (AUG. 8) - With Iraqi troops still in Kuwait, the national armies of Kuwait's five allies in the Gulf Cooperation Council (Gcc) can count on a military strength of about 145,700 troops.

Saudi Arabia, Oman, the United Arab Emirates (Uae), Qatar and Bahrain have a combined total of 800 tanks and 330 fighter airplanes. Their hardware comes mainly from the United States, Britain and France. The Omani army is the only one which has seen combat in modern history.

If these forces joined in a war aaginst Iraq, they would face a regular army of one million troops and 850,000 reservists, 5,500 tanks, 160 combat helicopters and 510 aircraft. Iraq also possesses short-range and medium-range missiles with conventional and chemical warheads. The bulk of the Iraqi arsenal is Soviet-made.

Following are the strengths of the five Gcc forces:

Saudi Arabia: The army has 65,700 ground troops and 550 heavy battle tanks. The air force has 180 fighter aircraft and 20 helicopters. Reports in 1988 said the kingdom purchased an unspecified number of Chinese-made Df-3 medium-range missiles.

The Uae: It has 43,000 soldiers, 130 battle tanks and 300 light armoured vehicles. Military experts estimate that 30 per cent of the army consists of foreigners. The air force has 60 aircraft and 20 combat helicopters. The navy has 15 ships.

The Sultanate of Oman: It has a 25,000-man army, including 20,000 ground troops. There are heavy battle tanks and 60 light ones. The air force has 60 aircraft, the navy 12 ships. The Omani army experienced battles against Marxist rebels in southern Oman in the early 1970s. Omani troops were then supported by Iran and Britain.

Qatar: Its army counts 7,000 troops, 6,000 of them ground forces. Its weaponry consists of 24 heavy battles tanks, 200 light armed vehicles, 13 figher aircraft, 20 combat helicopters and nine ships.

Bahrain: The smallest Gulf army has about 3,350 troops, including 2,300 ground-based. It has 54 heavy tanks, 140 light armoured vehicles, 12 aircraft,
12 combat helicopters and 13 ships.

TOKYO (AUG. 8) - Fujitsi Ltd. said Wednesday it had developed new soldering technology for printed circuit boards that does not require feron gas as a flux, or cleaning agent.

Fujitsu officials said the new technology jointly developed with Roverbond Research, a private institute, uses a new alchohol-based flux, without

giving details.

Feron gas is made up of chlorofuluorocarbons which are said to be responsible for global warming and destroying the ozone layer.

WASHINGTON (AUG. 8) - Iraq, in the face of an international embargo on its oil, has stopped pumping petroleum through Saudi Arabia, independent reports said here Wednesday.

Both the Washington Post newspaper and British Broadcasting Corporation reported that the oil flow through the pipeline leading to the Red Sea had been halted as of Tuesday.

Bbc said that the Iraqis stopped pumping the oil due to the international embargo against its oil. The Red Sea port tanks were now completely filled up with unsold Iraqi oil, the radio said.

According to the New York Times newspaper, meanwhile, Saudi Arabia had decided to increase its oil output by two million barrels per day. That volume corresponds approximately to about one-half of what Iraq and Kuwait were producing.

-30- 978

#90220d1110 08/08/1990 ~French/German News Agency

BONN (AUG. 8) - West German Chancellor Helmut Kohl made plain Wednesday he still hopes all-German elections will go ahead October 14, despite opposition from the Social Democrats.

This was the message in an appeal he made to the East German Volkskammer (pariament) just before it was due to debate the whole unity issue.

''A huge majority of people in East Germany wants accession (to West Germany) and also elections,'' he told reporters in Bonn. The Social Democrats had an obligation to bow to this will, he said.

The Social Democrats, who form the main opposition in West Germany and are part of an increasingly fragile broad coalition in East Germany, repeated their refusal to go along with early elections.

''Accession there can be, but not early elections,'' Social Democrat Chairman Hans-Jochen Vogel said. The party can block early elections because these require a two-thirds Volkskammer majority.

The Social Democrats accuse Kohl and his conservative Christian Democrats

and Social Democrat partners of seeking an early poll to cash in on the surge of popularity recent events have brought them.

Especially popular was the currency union which brought the longed-for West German Deutschmark to the pockets of East Germans last month.

However, the Social Democrats and other opposition parties have long warned that accompanying unemployment will soar, and reckon later elections in December will give them a better chance.

SEOUL (AUG. 8) - Business has been booming this year for South Korea's shipbuilding industry, which has received a record number of orders, officials said here Wednesday.

In the seven months to July, the country's 12 shipyards have won orders to build 71 vessels worth 3.7 billion dollars and weighing a total of 4.67 million gross tons, the officials said.

Almost all the orders came from abroad, they said.

The figures represent a whopping 176 percent increase in gross tonnage and 96 percent growth in value from the same period last year, according to statistics released by the Trade and Industry Ministry.

Ministry officials said the amount of shipbuilding orders received in the January-July period was the largest since the peak year of 1983, when South Korea received orders to build 4.09 million gross tons of ships in the whole year.

By the end of this year, the total amount of shipbuilding orders is expected to pass five million gross tons, the officials said.

Since strike fever subsided under a harsh government crackdown on labor disputes, the shipyards have been operating at full capacity, building 1.73 million gross tons in the first seven months, up 77 percent from the same period of 1989.

Most of the ships ordered this year were Very Large Oil Carriers, bulk carriers and combined carriers.

South Korean shipyards have often been accused of dumping in the past.

However, one ministry offficial said: "The world's shipbulding markets have turned into sellers' markets from buyers' markets and shipbuilders choose what orders they receive among orders rushing in.

"There is no need for us to offer dumping prices."

NEW DELHI (AUG. 8) - Indian Foreign Minister Inder Kumar Gujral said Wednesday that Iraq had given India assurances on the safety of Indian nationals in Iraqi-occupied Kuwait.

He told parliament there had been no confirmed casualties among the 172,000 Indians in Kuwait after the Iraqi invasion last week.

He said there were unconfirmed reports that five to six Indians were admitted to hospitals after being caught in the crossfire. However, Iraqi officials assured New Delhi that there were no Indian casualties after a check of hospitals, the minister said.

Gujral told deputies that New Delhi had requested Baghdad to ensure that Iraqi troops extented protection to Indian nationals in Kuwait. ''We have been assured by the Iraqi authorities that such instructions had been sent '' he said.

#90220d1330 08/08/1990 ~French/German News Agency
JERUSALEM (AUG. 8) - Prime Minister Yitzhak Shamir on Wednesday congratulated the U.S. administration on its decision to send troops to Saudi Arabia to face Iraq, saying Washington had given "confidence to the free world."

"The United States have shown proof of their determination and given all the free world confidence," Mr. Shamir told the U.S. Deputy Secretary of State for Human Rights Richard Shifter, officials here said.

Mr. Shamir said that the crisis triggered by Iraq's invasion of Kuwait on August 2 had overshadowed all the other problems in the Middle East, including the Israeli-Palestinian conflict.

Mr. Shifter Wednesday began a fact-finding visit to Israel and the occupied territories.

Mr. Shamir's remarks came as the first batch of U.S. military planes landed in the Saudi city of Dhahran as part of the deployment in the Saudi kingdom of 2,000 to 4,000 American ground forces.

Saudi Arabia approved the deployment, provided they were part of a multinational force.

There have been no immediate Arab and Gulf reactions to the U.S. move although the news was reported in many cities, including Syria and Egypt.

The Syrian dailies provided no comments while those in Egypt published the reports under banner headlines predicting large-scale military confrontations to come.

"Zero hour nears," was headlined in red in the Al-Gomhouriya newspaper, while the front-page headline of the semi-official daily Al-Ahram said: "Premonitory signs for a large military confrontation between the United States and Iraq."

#90220d1620 08/08/1990 ~French/German News Agency

BANGKOK (AUG. 8) - The Thai government will temporarily suspend trade with Iraq and Iraqi-occupied Kuwait while a special committee considers a permanent ban, a senior foreign ministry official said Wednesday.

Private firms that have contracts and deals with those Mideast countries will have to judge for themselves whether to continue their dealings while sanctions are being studied, said Thai Ambassador-at-large Kobsak Chutikul

The move comes in the wake of a United Nations Security Council resolution Monday to impose economic sanctions on Baghdad to force a withdrawal of its troops from Kuwait, which Iraq invaded last Thursday.

Thailand agreed in principle to the resolution but "the basic thrust of Thailand is to try to maintain good relations with all states in the Middle East," he added.

According to official figures, Thailand last year imported crude oil and other petroleum by-products worth 3.31 billion baht (132.4 million dollars) from Kuwait and exported consumer goods totalling 2.87 billion baht (114.8 million dollars) to the country.

Trade volume with Iraq is smaller, with Thailand last year importing one billion baht (40 million dollars) worth of oil and its by-products and exporting 38.8 million baht (1.55 million dollars) worth of consumer goods.

#90220d1660 08/08/1990 ~French/German News Agency

ROME (AUG. 8) - Italy and Greece are getting ready to boost gasoline (petrol) prices in the light of surging world oil prices, while a French oil company executive attacked the government's plan to control gasoline prices.

The Italian Petroleum Union, a private agency, reported Wednesday that a rise in retail prices of Italian fuels is to be decided by a special inter-ministerial prices committee "before the end of the week".

It said the expected increase is 25 lire (slightly over two U.S. cents) per liter for super, ordinary and lead-free gasoline, and 20 lire for diesel.

However, the anticipated increase is actually supposed only to reflect the decision by the Organization of Petroleum Exporting Countries (OPEC) to raise its target price from 18 to 21 dollars a barrel, and commentators here noted that the inter-ministerial committee could hardly avoid taking the current Gulf conflict into account.

Meanwhile, in Athens, Prime Minister Konstantinos Mitsotakis announced

Wednesday that the government would decide on Thursday on new fuel prices in connection with the Gulf crisis.

He told reporters that the government "is seeking a system making it possible to follow fluctuations in world oil prices automatically" to avoid the need for major price adjustments from time to time.

Economic sources said the increase should find super gasoline going up from 120 drachma (75 U.S. cents) at present to 135 or 140 (84 to 87 cents). The super price has already been hiked by 58 per cent since December.

In France, Shell-France chairman Henri Pradier attacked the recent French government decision to control fuel prices to prevent excessive rises, saying on Wednesday that "We'll be short of gasoline as long as control remains", and that "the government's decision is utterly impractical".

He said that today's France "is completely open to international competition,
 and only international prices count".

He said Shell would have to ration supplies to its French stations because it must "pay attention to our reserve stocks and our production is limited".

ANKARA (AUG. 8) - Turkey will decide about joining a multinational force stationed in Saudi Arabia only after the U.N. Security Council has itself reached a decision about forming one, presidential spokesman Kaya Toperi said here Wednesday.

He was commenting on an American TV report that such a force might be deployed with American troops arriving in Saudi Arabia to ward off any invasion by Iraq and could include Turkish army units.

Speaking on the eve of a visit by U.S. Secretary of State James Baker, Mr. Toperi said no country or organisation had yet asked to use the Incirlik air base near Adana in south-east Turkey for reprisals against Iraq.

The U.S. air force already has ''facilities'' there under a bilateral defence and economic cooperation agreement. Likewise under other agreements, Turkish military installations can be used to support NATO defence plans. Turkey is a member of the North Atlantic Treaty Organisation.

President Turgut Ozal meanwhile said in an American TV interview on Wednesday that Turkey would continue to respect the decisions of the

international community for tackling the Gulf crisis.

On Tuesday, Turkey stopped the loading of Iraqi oil at its Mediterranean pipeline terminals, in line with a United Nations Security Council resolution Monday for a trade embargo in Iraq and Kuwait.

#90220d1720 08/08/1990 ~French/German News Agency

JERUSALEM (AUG. 8) - Only sporadic anti-Arab rioting took place in Jerusalem Wednesday after police chiefs negotiated a ''ceasefire'' with the ultra-rightwing Kach movement which had coordinated the disturbances on the two previous days.

The most serious incidents took place on the highway leading from Jerusalem to the West Bank city of Bethlehem with groups of young Jewish hooligans stoning Arab-owned vehicles. Though a number of windshields were smashed, no injuries were reported.

Jerusalem mayor Teddy Kollek harshly criticised rioters, stating that the disturbances which were touched off Tuesday by the slaying of two Jewish youths by Palestinian extremists were ''the hardest day Jerusalem ever had''.

Kollek also called for an investigation of the police failure to quell Tuesday's rioting. ''Why the police didn't prevent these attacks, I don't know,'' he told Israel Radio.

Israeli police chief Ya'acov Turner said police had held back out of understanding for the feelings of rage sparked by the murders of the two Jewish youths.

DHAKA (AUG. 8) - Bangladesh has asked the Iraqi government to release immediately 61 Bangladeshi nationals working for the Kuwaiti air force who were taken into custody by Iraqi troops during the invasion, a foreign ministry spokesman said in Dhaka Wednesday.

He said 61 Bangladeshi nationals were arrested by Iraqi forces from the Ahmad al-Jaber air base. Some 17 other people from Bangladesh were missing since the invasion. A total of about 75,000 Bangladeshis live in Kuwait.

ISLAMABAD (AUG. 8) - A Pakistani army spokesman denied here Wednesday a claim by former prime minister Benazir Bhutto that the army was behind her government's dismissal by President Ghulam Ishaq Khan.

The spokesman said Ms. Bhutto's statement that military intelligence had pushed Mr. Ishaq Khan to sack her late Monday was "incorrect."

"First of all, it is a question to ask the interim government and the presidency," army press chief General Riaz Ullah told Agence France-Presse.

"The Army is an organ of the State, under the government, we dont have the right" to intervene in politics, he said, adding that the subject was "too serious."

Ms. Bhutto earlier told reporters in Karachi that the army was behind her dismissal and could overthrow the interim government now in place.

She said the dismissal order was prepared in the army's General Headquarters (GHQ) by military intelligence staff, who told President Ghulam Ishaq Khan "either you do it or we do it."

This was the first time Ms. Bhutto had directly linked the army with her government's dismissal late Monday for alleged corruption and abuse of power.

Gen. Riaz Ullah said soldiers posted outside official buildings, radio and television stations, the post office, Prime Minister's secretariat and Federal Investigation Agency (FIA) since Monday would stay for "one or two days."

"Precaution was taken" to "guard these places against any possible reaction," he said, denying that the soldiers had entered the buildings to give orders as had been reported in local newspapers.

He said the army was mainly concerned with "security" issues, adding that the "threat of war remains" for Pakistan.

WASHINGTON (AUG. 8) - U.S. forces sent to Saudi Arabia will be armed with cruise missiles programmed to destroy specific Iraqi targets such as oil refineries, Pentagon sources said Wednesday.

President George Bush, formally announcing the deployment, said U.S. forces would be on a "wholly defensive" mission in the oil-rich kingdom and "will not initiate hostilities but they will defend themselves."

If U.S. forces are in fact attacked, one source said, the 32 Tomahawk cruise missiles being taken to the Gulf area aboard the battleship USS Wisconsin would be a key part of the American arsenal.

"They are sophisticated, terrain-following cruise missiles programmed with special software packages that allow them to hone in on specific targets, such as Iraqi oil refineries," the source said.

The Wisconsin, escorting the carrier USS Saratoga, would take at least a week to reach the eastern Mediterranean, the source said.

Sources also said U.S. ships with heavy battle tanks had left a top-secret U.S. naval base at the island of Diego Garcia in the Indian Ocean.

"The first movement is of light infantry and airborne troops. But these ships have the heavy tanks, M1-A1 Abrams and M-60's, that are needed for heavy-duty ground fighting," one source said.

Mr. Bush, in his address from the Oval Office, gave no details of the composition of the U.S. contingent, except to say that "key elements" of the elite 82nd Airborne Division based in Fort Bragg, North Carolina, and key air force units were arriving in Saudi Arabia to take up defensive positions. Nor did he say how long they would stay there.

Mr. Bush said he was sending in U.S. forces to defend Saudi Arabia from attack by Iraqi troops occupying Kuwait.

Pentagon sources had reported Tuesday that Mr. Bush also ordered into action elements of the 101st Airborne Division from Fort Campbell, Kentucky and of the 24th Infantry Division (Mechanized) from Fort Stewart, Georgia.

Sources said at least 5,000 ground troops were involved in the U.S. operation, along with 140 sophisticated war planes.

TOKYO (AUG. 8) - Japan backs U.S. President George Bush's decision to send American troops and warplanes into Saudi Arabia to repel any Iraqi attack, a Japanese Foreign Ministry official said Wednesday.

"We support the measures taken by the United States to transfer military forces into Saudi Arabia for defensive purposes at the request of the Saudi Government," the official said to the press.

The top government spokesman said Japan had been informed by the United States in advance of the military action. The ministry official said Japan "understands the circumstances" under which Saudi Arabia had to request U.S. help. He hoped that "the situation will not escalate and that peace will be maintained. "It is our hope that the (U.S.) measures will contribute to this objective," the official added.

Meanwhile, the Japanese Embassy in Kuwait is trying to locate a 49-year-old Japanese trader who has not been heard from since Saturday, the Foreign Ministry here said.

Of the 277 Japanese nationals in Kuwait, 246 are holed up at the embassy compound and 30 others, including long-time residents, continued to live in their own homes, the ministry said.

But the trader, who arrived in Kuwait in late July on a business trip, has been unheard from since he was seen at a hotel where he had been staying, the ministry said. He was not identified.

THE HAGUE (AUG. 8) - Iraq Wednesday issued a stern warning to the Netherlands, charging that its attitude in the Gulf conflict endangered the country's ''present and future interests''.

A statement read out to journalists by Iraqi ambassador S.F. al-Faki said Baghdad viewed the position of the Netherlands government with ''deep regret and with surprise''.

Holland closed the port of Rotterdam for Iraqi oil exports on August 6 in line with European Community (E.C.) sanctions imposed after Iraq's invasion of Kuwait last Thursday. Iraqi and Kuwaiti assets in the Netherlands have been frozen.

The Iraqi statement said continued efforts to impose sanctions against trade from Iraq and Kuwait and to freeze capital assets only served to worsen the current situation.

In the long term, the sanctions would damage those who had imposed them, said the statement. It also contained a denial that Iraq had any intention of attacking Saudi Arabia.

The Dutch government has already advised nationals working in the eastern provinces of Saudi Arabia to leave the country. Several of them have left already, the Dutch Foreign Ministry announced in the Hague.

Washington has asked the Dutch to help participate in the military operation to help back up a trade boycott against Iraq, a spokesman for the Dutch foreign ministry said here Wednesday.

He did not say whether the U.S. had requested the Netherlands to contribute airborne, naval or land-based forces.

Foreign Minister Hans van den Broek had promised Washington that the matter would be given ''very serious consideration'', said the spokesman.

He said a decision on Dutch participation would not be decided until the forthcoming emergency meeting of the North Atlantic Treaty Organisation (Nato) and the E.C. on Friday in Brussels.

The evening paper, Nrc handelsblad reported Wednesday that the Dutch navy expected a frigate to be despatched to the Gulf.

The report said Dutch frigates were particularly suited to submarine surveillance duties and locating mines.

PARIS (AUG. 8) - The world oil market was hit by ups and downs on Wednesday, with prices rising at the announcement of dispatch of U.S. troops to Saudi Arabia, and then falling on rumors of a possible output increase by the Organization of Petroleum Exporting Countries (OPEC).

An Algerian source told AFP that the OPEC president, Algerian Mining Minister Sadek Boussena, was expected to make a statement during the day, but gave no indication of the content.

Iranian Oil Minister Gholamreza Aghazadeh added to the uncertainty by saying that OPEC "would be prepared to increase production in case of shortages". But he added in speaking to the BBC that the recent rise in oil prices is due to "market reaction to events, and not to a shortage".

And in Jakarta, Indonesian Mines and Energy Minister Ginanjar Kartasasmita said that OPEC members will stick to their output quotas, even though world

oil demand has surged with the Gulf crisis - set off when Iraq invaded Kuwait last Thursday. "Not a single OPEC member will take advantage of the current situation", he was quoted by the official Antara news agency as saying.

In London, North Sea Brent crude opened higher Wednesday, at 27.35 dollars a barrel against 26.55 at the Tuesday close, following Washington's decision to deploy forces at the Saudi Arabian border with Iraq.

But the price then plunged to 25.15 dollars a barrel on rumors that OPEC might up output to offset the effect of the embargo on Iraqi and Kuwaiti exports, which deprives the market of about four million barrels of oil a day. "The market's very nervous", one trader said. "The slightest news item can lead to a price explosion again. It's hard to see what will happen".

The New York Times, quoting Saudi officials, said that Saudi Arabia is getting ready to hike its output by two million barrels a day. It is now 5.38 mbd.

Early this week, the Iranian minister and his counterpart from the United Arab Emirates, Mana Saeed Otaiba, called on OPEC members to continue to respect their output quotas.

Following Turkey's closure on Tuesday of the only remaining Iraqi pipeline in operation in that country, the Iraqi pipeline through Saudi Arabia was also closed. A source close to the Saudi oil company Aramco said the reason was that storage facilities were full.

One European oil analyst said "oil companies had not been rushing" the last few days to load Iraqi oil at the Saudi terminal of Yanbu in view of the oil embargo on Iraq ordered by several Western powers, and then generalized on Monday by the United Nations Security Council.

Altogether, Iraq has now lost an export capacity of 1.6 mbd via Turkey and 800,000 barrels a day by way of Yanbu, Western analysts say. The same expert said Iraq can still load at its Mina Al Bakr terminal on the Gulf, which has a capacity of 400,000 barrels a day, but few tankers venture there.

He said that Iraqi President Saddam Hussein's position has now been weakened - but experts fear that, under pressure, Iraq might bomb Saudi oil terminals. If Iraqi, Kuwaiti, and Saudi oil exports should all be halted, that would deprive the world market of around 10 mbd, almost 20 percent of world supply (excluding planned economies).

The expert said that "One cannot let Iraq blackmail Saudi Arabia . . . Saddam Hussein would have control of much too much oil". Reserves of Iraq,

Kuwait, and Saudi Arabia account for 45 percent of known world reserves.

Pierre Terzian, editor of the specialized review Petrostrategies, said that the Gulf conflict is rooted in the stubbornness displayed by Kuwait and the U.A.E. in keeping oil prices low, depressing the economies of poorer OPEC members, including Iraq.

"Even after the riots in Caracas, Algiers, and Lagos, they did not want to relieve the price pressure", he commented. "Some 400,000 ethnic Kuwaitis and 200,000 Abu Dhabians had 450 million people in the other OPEC countries at their mercy".

LONDON (AUG. 8) - Anglo-Dutch group Shell and Mitsui of Japan are planning to link up to produce a chemical component of polyurethanes in Europe, Shell said here Wednesday.

Polyurethanes are a type of polymer used in furnishing and insulation material.

Shell International Chemical Company (SICC) and Mitsui Toatsu Chemicals (MTC) have carried out a feasibility study into the venture, Shell said in a statement.

MTC would provide the technology to make the component, diphenyl methane diisocyanate and production from the joint venture would be marketed independently by the two partners.

A decision on whether to go ahead with the project is expected early next year, Shell said.

LONDON (AUG. 8) - A woman passenger who was aboard a British Airways jet trapped in Kuwait during the Iraqi invasion was raped by an Iraqi soldier who threatened to kill other passengers if they intervened, a witness said here Wednesday.

The rape took place as passengers were being transferred by bus from the Regency Palace Hotel in Kuwait City to the nearby SAS Hotel, Jameel Alsane, managing director of the Regency Palace Hotel, told the British domestic news agency Press Association.

Mr. Alsane, who arrived here Wednesday on a flight from Bahrain, said a Lebanese crew member of the stranded British Airways flight had pleaded

with the soldier to show mercy towards the woman.

"The soldier took his gun and said: 'One move and I'll blow you up.' The rest of the soldiers were laughing," according to Mr. Alsane, who fled Kuwait Monday along with his two sisters and five children.

All the other passengers were taken into the SAS Hotel lobby and the woman, who was not identified, was released.

A spokesman for the British Foreign Office said they were aware of the incident and had taken it up with the Iraqi authorities.

"We managed to smuggle a doctor in," Mr. Alsane said. "The woman was scared and terrified. We kept the doctor until the hotel was evacuated.

A British Airways spokesman said the company could not comment on the case while passengers and crew from the flight were still in Kuwait.

Mr. Alsane also claimed that Iraqi forces staged a withdrawal from Kuwait shortly after the invastion by "stealing Kuwaiti tanks, painting them in Iraqi colours then driving them away."

#90220d2610 08/08/1990 ~French/German News Agency

BONN (AUG. 8) - Bonn has received no request for West German naval vessels to be despatched to the Gulf to join United States warships cruising there, defence minister Gerhard Stoltenberg told journalists here Wednesday.

Without saying whether West German navy ships could be deployed in the Gulf in the future, Stoltenberg said there was no need to make a decision on the issue at the moment. The U.S. could use its bases in West Germany to transfer forces to the Middle East, he added.

Stoltenberg said the deployment of U.S. warships and forces in the Middle East was an ''unmistakable warning'' that further aggression by Iraq against its neighbouring states would not be allowed to take place unchecked.

#90220d2620 08/08/1990 ~French/German News Agency

WASHINGTON (AUG. 8) - The United States can for the time being cope with an energy crisis resulting from the Iraqi invasion of Kuwait thanks to its huge Strategic Petroleum Reserve (SPR), energy experts say.

President George Bush said Wednesday he would consider tapping from the 590 million barrels in the SPR -- the equivalent of about 70 days' total U.S.

oil imports -- if necessary.

Gasoline and crude oil prices have skyrocketed in the wake of the invasion of Kuwait and consumers and members of Congress have accused U.S. oil companies of speculation and profiteering.

Tuesday, John Easton, a senior official at the Energy Department, said the administration was prepared to use the SPR "to address any severe energy supply interruption to this country."

But Mr. Easton stressed the situation was not sufficiently serious to warrant use of the SPR yet. He said unused production capacity in several oil-producing countries, such as Venezuela, Britain and Nigeria, could be brought in line to deal with any interruption of oil supply from the Middle East.

Energy experts seem to agree. Said Charles DiBona, president of the American Petroleum Institute (API): "While the Iraqi invasion of Kuwait has had a substantial impact on world oil markets, we are in a much better position to handle this than we were 10 years ago and there is no reason for panic.

"We have an asset we did not have in the 1970's -- a large government-held strategic (oil) reserve."

"Kuwait and Iraq provide a supply of oil to America approximating nine per cent of our daily imports. With a 590,000,000 barrel stockpile in the SPR, we could easily cover a shortall in supply from these two sources for a period approaching two-and-a-half years," said Senator Howard Metzenbaum in a letter to Mr. Bush sent Tuesday.

Roger Robinson, an energy consultant who served in the National Security Council during the Ronald Reagan administration, said the energy picture today was similar to that of the winter of 1983-1984 when the tanker war in the Iran-Iraq conflict had intensified and oil facilities were under periodic attack.

"To dampen undue market speculation, we initiated a round of quiet negotiations with our allies, designed to secure a firm, multilateral commitment on the immediate and coordinated release of Western oil stocks at the first sign of significant price hikes," he noted.

"Along with other steps taken at the time, this initiative helped to avoid any significant price increasess ... Today, the United States could release approximately 2-3 million barrels of oil per day (mbd) onto the market from the SPR. For their part Japan could release about one mbd, and Germany roughly one mbd. Other European nations like Britain, France and Italy might make additional contributions to this price-stabilization

effort."

The United States and its partners in the International Energy Agency are to meet in Paris Thursday to discuss this type of cooperation.

#90220d2660 08/08/1990 ~French/German News Agency

CAIRO (AUG. 8) - Egyptian President Hosni Mubarak, alarmed by the looming prospect of Western military intervention, made an impassioned appeal to Iraq Wednesday to pull out of Kuwait and to accept an Arab resolution of the Gulf crisis.

"I am trying to save Arab honor," said Mr. Mubarak, addressing himself to Iraqi President Saddam Hussein.

"But if you want to destroy it, you will have to accept the responsibilities," he said at a press conference here.

Mr. Mubarak urged Arab leaders to meet within the next 24 hours to forge an "Arab solution" to the Gulf crisis, triggered by Iraq's August 2 invasion of Kuwait in the midst of a bitter row over oil production.

Describing the current situation as "grave and terrifying," he called for a joint Arab force to separate Iraq and Kuwait following an Iraqi military withdrawal from its tiny but enormously wealthy neighbor to the south.

But Mr. Mubarak ruled out Egyptian participation in a non-Arab multinational force in the Gulf.

U.S. Defense Department sources had said Egyptian troops would join U.S. forces who were reported to be arriving in Saudi Arabia Wednesday to shore up the kingdom's defenses against a possible attack by Iraqi troops in Kuwait.

The Egyptian leader called on President Hussein to "withdraw his troops, re-establish the legal authority in Kuwait ... and accept an Arab umbrella to contain the crisis."

"If Arab countries do not act quickly," he said, "foreign military forces will impose themselves," warning that Iraq was now threatened with a "destructive attack."

Mr. Mubarak said Saudi Arabia's appeal for U.S. military assistance was justified because of legitimate doubts concerning Iraqi intentions. He noted that Mr. Hussein had ordered the invasion of Kuwait after assuring Arab leaders that he would not take such a step.

"You lost all credibility after that," said Mr. Mubarak of his Iraqi counterpart.

Egypt's Middle East News Agency meanwhile reported that King Fahd of Saudi Arabia and Presidents Hafez al-Assad of Syria and Chadli Benjedid of Algeria had already already accepted Mr. Mubarak's call for an emergency summit, which could he held here.

#90220d2710 08/08/1990 ~French/German News Agency

HABUR, TURKEY (AUG. 8) - The Iraqi Army is strengthening positions in northern Iraq near the Turkish border, truck drivers arriving here from Baghdad said Wednesday.

Turkish oil tank truck drivers said Iraqi forces were being reinforced in the Zaho region near this Turkish border town.

There was no immediate official confirmation of the report.

The truckers said they saw unusual military activity along the route they take transporting Iraqi oil to Turkey. The road runs parallel to the Iraqi pipeline shut down by Turkey on Tuesday.

Drivers had had to return to Turkey with their trucks empty because Iraq "hasn't been loading oil into Turkish trucks since Tuesday," one driver said.

A senior customs official meanwhile said the border crossing at Habur was "practically closed."

Iraqi authorities sealed off the frontier completely early last Thursday and reopened it after the invasion of Kuwait. But since Tuesday night, they had been barring everyone except Iraqi nationals from entering Iraq.

Trucks wanting to cross into Iraq were also being turned back, while others on the Iraqi side waiting to enter Turkey had formed a back-up 10 kilometers (six miles) long due to "excessive" Iraqi police and customs formalities.

More than 6,000 Turkish truckers are in Iraq at present, the customs official said.

Meanwhile foreign nationals, particularly Americans and Japanese working in Kuwait and Iraq, were expected to cross the frontier here Thursday or Friday "if Iraq lets them leave," a Turkish official here said.

#90220d2750 08/08/1990 ~French/German News Agency

CAEN, France (AUG. 8) - A group of runners, consisting of American Indians, Japanese and Europeans pounded the soil of northern France between La Hague and Caen Wednesday on the continental leg of a relay race to save the environment.

The 80 runners in the "race for land and life" started their relay in London on Monday, coinciding with the anniversary of the August 6, 1945 U.S. atomic bombing of the Japanese city of Hiroshima.

They are to complete more than 7,000 kilometres (4,300 miles) by the time they arrive in Moscow on October 12 after crossing Europe.

Before setting off from La Hague on the 200 kilometres (125 miles) to Caen the racers took part in a religious ceremony, dressed in traditional Indian costume, at the local nuclear waste processing station.

"The land is our mother, this race is a sacred race," they said.

Chippewa chief Dennis Banks, the co-founder of the American Indian Movement, said he decided to organise the event race to show that "by destroying rivers, trees, and animals to which his life is directly linked man has destroyed the balance which existed between himself and nature. Humanity is preparing a difficult future for itself."

The runners, sponsored by public donations given at meetings organised along the way, were due in Paris on Saturday, via Le Mans and Orleans.

The last "sacred race" was held two years ago between New York and Horonobe, in Japan, with a stop in Hiroshima.

PARIS (AUG. 8) - French Secretary of State for Defense Gerard Renon has postponed a visit he was to pay to Ankara on Thursday "due to defence meetings in Paris," his office announced Wednesday.

The announcement noted that Mr. Renon had been scheduled to meet with his Turkish counterpart, Vahit Erdem, whom he met here in June.

Separately, sources at the Thomson-CSF Group said that signature of a contract for supplying Turkey with military radar sets should take place "in the very near future."

-30- 695

#90220d2820 08/08/1990 ~French/German News Agency
LAGOS (AUG. 8) - Nigeria is totally opposed to any individual action by any OPEC member nation that would breach recent agreement on crude oil production and prices reached at its recent conference in Geneva, minister of petroleum resources Jibril Aminu said here Wednesday.

At a news conference on the crisis in the Gulf region, the minister called for individual and collective resistance to any temptation to take advantage of the unfortunate situation to renege on the accord.

He stated the country's preparedness to offer its services in any capacity that may be considered useful in resolving the crisis.

Such services, he said, would be specifically aimed at preserving the integrity of OPEC and ensuring that the decisions of its members at the Geneva conference were respected, he stated.

#90220d2850 08/08/1990 ~French/German News Agency

LONDON (AUG. 8) - Independent British oil and gas company Ultramar PLC reported a net profit of 36.1 million pounds Wednesday for the first six months of 1990, 42 percent down from 62.5 million a year earlier because of softer oil prices early in the year and downstream difficulties in California.

Turnover came to 866.8 million pounds against 877.4 million in the year-earlier period, and earnings per share dropped to 9.8 pence from 17.1 pence, reflecting a fall from 13 to 10 percent in the return on average invested capital.

Ultramar said lower oil and gas production, reduced refinery margins, higher interest rates and the strength of sterling against the U.S. and Canadian dollars all had adverse effects on its financial performance, but the main problems came from tough market conditions in California. These affected the first quarter but have since improved markedly.

The board has declared an increased interim dividend of 3.5 pence per share, up from a 3-pence payout in 1989, to reflect "the underlying strength and growth potential" of the company.

John Darby, chairman, said it was too early to predict effects of the current turmoil in the Gulf, but noted that Ultramar had no assets in the region and processed only North Sea and American crude in its refineries.

During the first half, production of crude averaged 24,300 barrels per day and 464.5 million cubic feet of gas, compared to 28,000 barrels and 461 million on average last year.

#90220d2900 08/08/1990 ~French/German News Agency

JOHANNESBURG (AUG. 8) - Sales of new cars dipped by 1.6 percent to 18,367 units in July compared to June's figure of 18,659, the National Association of Automobile Manufacturers of South Africa (NAAMSA) said Wednesday.

Compared to the corresponding month in 1989, June's sales show a decline of 7.5 percent, or 1,480 units.

In a statement here, NAAMSA predicted that due to high interest rates, conservative fiscal policy and disruptive industrial action in certain sectors of the industry, sales of new cars would continue to dip in the coming months.

-30- 749
#90220d3000 08/08/1990 ~French/German News Agency
JOHANNESBURG (AUG. 8) - The South African economy is in a real recession and a zero growth rate for the year can be expected, the South African Chamber of Business (SACOB) said here Wednesday.

Although SACOB's Business Confidence Index (BCI) improved marginally from 91.8 in June to 92 in July, SACOB director general Raymond Parsons said the latest figures indicated that the country showed a negative real growth rate in output over the past two quarters.

"While marginal shifts in the business mood must be expected over the short term, it is uncertainty over future options, such as nationalisation, which has a serious corrosive effect on business confidence," Mr. Parsons said.

SACOB called on all political parties in South Africa to show greater sensitivity and understanding on their economic policies.

Business confidence took a dive after African National Congress (ANC) deputy-leader Nelson Mandela said the ANC would nationalise mines and industries in his first public speech on February 11 after he was released from 27 years in South African prisons.

On August 2, Joe Slovo, the secretary general of the South African Communist Party -- the ANC's main ally-in-arms -- said the ANC would fully nationalise some industrial and financial groups as part of its restructuring of the economy.

"It is clear that the increased uncertainty created by political development has already contributed to the postponement of a number of investment plans and to the flight of short-term capital," SACOB said.

The increase in the gold price over the past week to 383.20 dollars Wednesday was one of the positive factors that affected the BCI in June, while negative factors were an increase in unemployment and an overall decline in average prices on the Johannesburg Stock Exchange (JSE).

-30- 2024
#90220d3090 08/08/1990 ~French/German News Agency
WASHINGTON (AUG. 8) - Iraq announced "total and irreversible" union with Kuwait on Wednesday as U.S. President George Bush said U.S. forces were being deployed in Saudi Arabia to defend the kingdom against possible Iraqi attack.

Iraq's decision-making Revolutionary Command Council said in a statement released by the official Iraqi news agency that the merger between Iraq and

Kuwait had been requested by Kuwait's provisional government.

Iraqi troops invaded the tiny Gulf emirate on August 2, ousting Sheikh Jaber al-Ahmad al-Sabah, and have since taken up positions along Saudi border.

In a televised address from the White House's Oval Office, Mr. Bush said that at the request of Riyadh, U.S. ground and air forces were being deployed in Saudi Arabia as part of a multinational force to defend the kingdom against any Iraqi aggression.

He said the decision followed telephone consultations with Saudi leaders and a visit by Defense Secretary Dick Cheney to Saudi Arabia, Egypt and Morocco.

Mr. Bush appealed for support from the American people for the "decision I've made to stand up for what's right and condemn what's wrong."

"Let me be clear, the sovereign independence of Saudi Arabia is of vital interest to the United States," he said.

"We must resist aggression or it will destroy our freedom ... Appeasement doesn't work," Mr. Bush said, describing Iraqi President Saddam Hussein as "an aggressive dictator threatening his neighbors."

The Iraqi leader, in an address to the nation on Tuesday, warned against foreign intervention and said that Iraq "would not hesitate to pluck out the eyes of those who dare to attack Iraq, or Arab and Islamic values."

Mr. Bush gave no details of the composition of the U.S. contingent, except to say that elements of the elite 82nd Airborne Division based in Fort Bragg, North Carolina, and key air force units were arriving in Saudi Arabia to take up defensive positions. Nor did he say how long they would stay there.

The first U.S. military transport planes landed at the Dhahran airport in eastern Saudi Arabia early Wednesday, according to eye-witnesses, and between 2,000 and 4,000 ground troops were expected later in the day.

In Cairo, Egyptian President Hosni Mubarak said he was willing to contribute troops to an Arab buffer force to be deployed between Iraq and Kuwait following an Iraqi withdrawal from the emirate. But he ruled out Egyptian participation in any multinational force in the Gulf that included non-Arab units.

He urged Arab leaders to hold an emergency summit within 24 hours to forge "an Arab solution" to the crisis.

In London, Foreign Secretary Douglas Hurd said Britain would contribute naval and air forces to the multinational force following an appeal from Saudi King Fahd. Britain has dispatched two frigates to join a navy destroyer already in the Gulf to protect merchant shipping in the region.

In other developments, Italy and Spain said that Washington was welcome to use U.S. bases in those nations to support its deployment in the Gulf, and Saudi Arabia and Turkey both shut down pipelines that carry Iraqi oil.

"America does not seek conflict ... But America will stand by its friends," Mr. Bush said. Of the invasion of Kuwait, he said: "There's no justification whatsoever for this outrageous and brutal act of aggression.

"A puppet regime imposed from outside is unacceptable. The acquisition of territory by force is unacceptable.

"The stakes are high. Iraq is already a rich and powerful country that possesses the world's second largest reserve of oil and over a million men under arms," he said.

Mr. Bush said his policy was based on four principles: seeking the immediate and unconditional withdrawal of Iraqi troops from Kuwait, the restoration of the legitimate Kuwaiti Government, a U.S. commitment to ensure the security and stability of the Gulf and his resolve to protect the lives of Americans.

Mr. Bush accused Mr. Hussein of lying twice first when he said he did not plan to invade Kuwait and four days ago when he said he would withdraw his troops. "His promises mean nothing," the president said.

He said Iraq had massed "an enormous war machine on the Saudi border." "To assume Iraq will not attack again would be unwise and unrealistic," he added.

#90220d3120 08/08/1990 ~French/German News Agency

MOSCOW (AUG. 8) - Armenia's new nationalist leader Levon Ter-Petrossian arrived here on Wednesday for talks with Soviet officials, just hours ahead of the expiry of a Soviet ultimatum for Armenian militias to turn in their weapons and disband, Armenian officials and Tass news agency said.

Tass said that Mr. Ter-Petrossian, who was elected president of the Armenian Supreme Soviet, or parliament, on Saturday, was scheduled to meet with Prime Minister Nikolai Ryzhkov and Interior Minister Vadim Bakatin.

He was also to discuss the looming crisis with Moscow over the defiance of armed Armenian nationalists with Alexander Yakovlev, a close advisor of

Soviet President Mikhail Gorbachev, the news agency said.

Mr. Gorbachev issued an ultimatum on July 25 demanding that unauthorized militias in the Soviet Union lay down their weapons and disband by midnight Wednesday or face possible Soviet intervention.

Tass reported that Mr. Ter-Petrossian had asked militia forces to be sworn in before the Armenian parliament.

Mr. Ter-Petrossian, whose Armenian National Movement holds a majority in the republic's parliament, also said that he could control the situation in Armenia without foreign intervention.

On Wednesday, he said many Armenian deputies believed a settlement to the crisis was in sight. The Armenian Supreme Soviet voted in favour of suspending Mr. Gorbachev's decree, although the resolution's legal standing was not clear.

The Armenian militia has ignored the decree, insisting that its existence was necessary for "Armenia's defence." Armenian militiamen have been accused by Soviet authorities of stealing arms from Soviet military camps.

Observers say Mr. Ter-Petrossian's visit here is aimed at delaying intervention of Soviet troops in Armenia.

In a front-page article, the newspaper Pravda referred to Mr. Ter-Petrossian by saying it "supported the position of those who propose to stabilise the situation by political means, through discussions and compromise, even if that should postpone the enforcement of the ultimatum."

The Communist Party daily added, however, it regretted that the Gorbachev decree is being defied in "other regions" where the "inertia and weakness of local authorities have only contributed to the illegality of the situation."

LONDON (AUG. 8) - British Prime Minister Margaret Thatcher and other senior government ministers turned out Wednesday amid tight security to attend the funeral of Conservative MP Ian Gow, assassinated by the IRA in a car bomb attack earlier this month.

Police sniffer dogs searched the church prior to the service and roads around the church in the southeastern coastal city of Eastbourne were sealed off while a police helicopter flew overhead as part of the security operation during the funeral.

Over 650 mourners, including Deputy Prime Minister Sir Geoffrey Howe and Conservative Party chairman Kenneth Baker, packed the church to pay their last respects to Mr. Gow.

Thousands of people were also gathered outside the church to listen to the service on loudspeakers.

Mr. Gow, 53, an outspoken critic of the Irish Republican Army (IRA), was killed July 30 as he left his home in the southern village of Hankham when a powerful bomb placed under his car by an IRA hit squad exploded.

Mr. Gow, who served from 1979 to 1983 as Mrs. Thatcher's parliamentary private secretary, knew his name was on an IRA "hit list" discovered by police in a south London flat in December 1988.

In 1985, Mr. Gow resigned his post as minister of state at the treasury in protest at the signing of the Anglo-Irish agreement, which he said gave the government in Dublin too great a say in Northern Ireland affairs.

AMMAN (AUG. 8) - At least 41 Westerners managed to depart from Iraq by land to Jordan on Wednesday, but hundreds more were believed to have been held back and forbidden to cross the frontier to safety.

There were growing signs that resident foreigners - Arab and western - in Iraq and Kuwait would be kept as bargaining chips against any possible western military intervention against Iraq.

British Airways in London confirmed that 295 passengers who had been aboard a jumbo jet stranded in Kuwait during the August 2 Iraqi invasion were still in a Kuwait City hotel but were unharmed, while a further 36 were being held in Baghdad.

Jordanian Tourism Minister Abdul-Karim Kabariti said only foreigners with exit visas or visitors' visas not exceeding one month were being allowed to leave Iraq. He said Iraq had communicated this decision to the Jordanian authorities. It included Arabs, he said.

An Italian embassy spokesman said Iraqi soldiers turned back a convoy of eight cars carrying Italians and one Swiss before they reached the border.

Other diplomats in Amman said 61 tourists arrived Tuesday by land, while 78 non-Iraqis had come out on an Iraqi Airlines flight Tuesday.

Kabariti announced that 22 Britons, 11 Germans, four Americans and four Czechs had crossed the border into Jordan on Wednesday, while many more

were awaiting permission on the Iraqi side of the border.

People who succeeded in crossing told the German Press Agency dpa that 70 Jordanian families had been stranded on the Iraqi side of the border because they were holders of Iraqi residence permits.

Euphoric westerners who crossed the border could not hide their feelings as they waited for buses to carry them to Amman.

One West German butexc xesioiuufirho zeabdgermany at the height of the Cold War''.

A british man who asked not to be identified said in Amman earlier Tuesday. ''The shadow of war is hanging over Baghdad. Everybody is waiting for the first strike. It is miserable. People feel it. They feel the war.''

Asked about the fate of other foreigners left behind, the Briton said: ''All are under the mercy of (Iraqi President) Saddam Hussein. There is no telling what he would do. I hope that the Americans do not do something foolish and risk everybody's lives.''

In Bonn, the West German foreign office said the European Community was recommending to all its citizens in Iraq and Kuwait to leave those countries for the time being. Gulf reports said U.S. and West German diplomats were counselling their citizens to stay away from Saudi Arabia, Bahrain, Qatar and the United Arab Emirates.

Yoshiko Masui, a tour guide who left Baghdad on a Monday flight with 16 Japanese tourists, told reporters on arrival in Vienna that the situation in Baghdad had been quiet with neither soldiers nor tanks to be seen on the streets.

The group's was stranded August 2 while making a stopover on a flight from Bangkok to Frankfurt. One of the group, Yumi Nugase, 21, said she and the others were put up at the Hotel Kadhimya, ,fqbfvj Babylon. Masui said the younger Japanese had enjoyed the stopover as something exciting during their world tour.

She said she had noticed how there were hardly any people at Baghdad international airport when their Iraqi Airlines flight took off from Baghdad. They flew onwards to Europe with Royal Jordanian Airlines.

Austria earlier banned Iraqi aircraft as part of the worldwide economic embargo against Baghdad.

MOSCOW (AUG. 8) - Estonian Prime Minister Edgar Savisaar arrived in Moscow Wednesday, the unofficial news agency Interfax reported, a day after the Estonian parliament voted a resolution declaring invalid the 1940 Soviet annexation of the Baltic republic.

Mr. Savisaar is to meet with Prime Minister Nikolai Ryzhkov during his visit.

The resolution adopted by the Estonian parliament said "The law of August 6, 1940 on the incorporation of the Soviet Socialist Republic of Estonia into the USSR does not bind Estonia," the official Soviet news agency Tass reported.

Future negotiations must be based on treaties signed by Estonia and the Soviet Union prior to the June 17, 1940 Soviet invasion, the resolution said.

It specifically excluded the Soviet constitution and laws that stem from it as a basis for relations between Estonia and the Soviet Union.

Meanwhile, the parliament of Lithuania, another Baltic republic seeking independence, sent a telegram to the Soviet leadership protesting the presence and conduct of Soviet troops in Lithuania.

A copy of the text obtained by Agence France-Presse, said the troops were "increasing tension and worsening relations between Lithuania and the Soviet Union".

The parliament also protested illtreatment of Lithuanians serving in the Red Army and called for them to have the right to return to Lithuania.

ATHENS (AUG. 8) - Greece authorised Wednesday the use of its airspace by U.S. warplanes headed for the Gulf, Greek government spokesman Vyron Polydoras said.

In a communique, Mr. Polydoras said permission was granted when the U.S. asked Wednesday for the possible use of Greek air space.

The communique added that "the position of Greece is in complete agreement with decisions taken by the international community" concerning the Middle East crisis.

U.S. President George Bush announced Wednesday that U.S. air and ground forces were being deployed in Saudi Arabia at the request of Riyadh following Iraq's August 2 invasion of Kuwait.

#90220d3200 08/08/1990 ~French/German News Agency
ABERDEEN, Scotland (AUG. 8) - Union leaders called Wednesday for a 24-hour strike Thursday of workers on British oil and natural gas platforms in the North Sea, a union source said here.

If the strike call is fully observed, it would affect about 100 rigs.

On Sunday, a strike call for those workers was "widely observed," according to union members of the Offshore Industry Liaison Committee, but on Wednesday only about 500 Shell employees were still observing the strike call.

Shell said production had not been affected.

Unions are demanding official recognition and better safety conditions on the platforms. They are also protesting against the firing of more than 1,000 contract workers who struck last Thursday.

#90220d3230 08/08/1990 ~French/German News Agency
EAST BERLIN (AUG. 8) - East Germany's Volkskammer parliament voted at a session Wednesday evening against immediate accession to West Germany.

Deputies urged a swift merger of the two Germanys but said the move, which means the demise oxti uedc ae h be subject to three conditions.

They said accession must depend first on the ratification of the treaty on German unity and on clarification of the foreign policy aspects of unity at forthcoming ''two-plus-four'' talks.

They also stipulated that the five future German states on East German territory must be constituted before unity.

West German Chancellor Helmut Kohl had appealed in Bonn to the East German parliament just before it was due to debate the issue. He made it plain he hoped all-German elections would go ahead October 14 despite opposition from the Social Democrats.

#90220d3270 08/08/1990 ~French/German News Agency
RIOM, France (AUG. 8) - French movie actor Gerard Depardieu was handed down a two-month suspended sentence for drunk driving by a court in central France Wednesday.

The celebrated actor, whose latest film Cyrano de Bergerec is a major hit here, had twice the legal limit of alchohol in his blood when he smashed into an oncoming car, slightly injuring two people.

On the day of the accident, Mr. Depardieu had been through three takes of the movie Uranus in which he played a drunken bar owner, his lawyer Serge Teillot explained to the court.

His client had just finished making the film under the direction of Claude Berri, when he lost control of his car on a motorway near Vichy.

Mr. Depardieu did not appear in court which his lawyer said would allow for greater "serenity" in the proceedings.

Mr. Teillot added that Mr. Depardieu had no previous convictions and that he "fully acknowledged his responsibility" for the accident.

At the time of the accident July 20, Mr. Depardieu's a blood-alcohol level was of 1.6 grams, double the maximum legal limit of 0.8 grams.

In addition to the two month suspended jail sentence, he had his driver's licence suspended for six months and was fined 10,000 francs (1,900 dollars).

#90220d3420 08/08/1990 ~French/German News Agency

CAIRO (AUG. 8) - An emergency Arab summit on the gathering crisis in the Gulf will open here Thursday evening, presidential spokesman Mohammad Abdel Meneem announced Wednesday.

The summit had been proposed Wednesday by Egyptian President Hosni Mubarak as a last-ditch Arab effort to avert foreign military intervention in the Gulf following Iraq's August 2 invasion of Kuwait.

Egypt, Syria, Algeria, Saudi Arabia, Qatar, the United Arab Emirates, Libya, Yemen, Tunisia, Oman and Mauritania have already announced they will attend.

Foreign Ministers from the 20-member Arab League met here last Friday and approved a resolution condemning the Iraqi invasion and demanding the immediate and unconditional withdrawal of Iraqi forces from Kuwait.

But Arab diplomatic efforts have since then proved powerless to defuse the crisis, as an international campaign to isolate and punish Iraq, led by the United States, gathered momentum.

Mr. Mubarak in remarks here Wednesday expressed alarm at the likelihood of foreign military intervention, notably as U.S. military forces were reported to have arrived in Saudi Arabia to shore up the kingdom's defenses against a possible attack by Iraqi troops in Kuwait.

Warships from the United States, Britain, France and the Soviet Union were also heading toward the Gulf region.

-30- 1539

#90220d3450 08/08/1990 ~French/German News Agency

LONDON (AUG. 8) - Britain would consider sending more military forces to the Gulf if the naval and air units being sent to Saudi Arabia to defend against an attack from Iraq fail to do so, Foreign Secretary Douglas Hurd said here Wednesday.

"We are dealing with the real risk that one act of aggression will be followed by further acts of aggression," Mr. Hurd said, hours after announcing the government's decision to send British naval and air units to help defend Saudi Arabia.

"We have never ruled out further measures if these do not work," he said, adding: "There is a threat of further violence by Saddam Hussein against Saudi Arabia and other states in the Gulf.

U.S. President George Bush said Wednesday that he had ordered U.S. ground forces into Saudi Arabia which the United States says is now threatened by 100,000 Iraqi troops deployed in neighboring Kuwait, which Iraq invaded Thursday.

Both Mr. Hurd and Defence Secretary Tom King declined earlier to specify what forces Britain was sending to join a multinational force to protect Saudi Arabia.

But the ministry of defence confirmed that there are currently two Royal Air Force Tornado F3 fighter squadrons in Cyprus. One of the squadrons which was due to be returning to Britain will remain because of the situation in the Gulf, the MOD said.

Informed sources said Britain could also deploy a number of Rapier anti-aircraft missile batteries to protect the fighters and two Royal Navy frigates were already steaming to the Gulf to join the destroyer York, already on patrol there.

"The essential point is that President Saddam Hussein now knows an attack on Saudi Arabia, were he to contemplate one, would not be an attack on Saudi Arabia alone," Mr. Hurd said earlier.

Mr. Hurd also said London was keeping Moscow informed of British military measures in the Gulf and added he was "glad and slightly surprised" that the Soviet Union had voted in favor of the United Nations Security Council resolution demanding the pullout of Iraqi forces from Kuwait.

#90220d3510 08/08/1990 ~French/German News Agency

WARSAW (AUG. 8) - Unlike Hungary, Poland has no intention of leaving the Warsaw Pact but will scale back its forces by almost a third, the Polish Defense Minister, Rear Admiral Piotr Kolodziejczyk, said in an interview published Wednesday.

"We will not take the path that Hungary took to leave the Warsaw Pact," he told Rzeczpospolita, the Polish government organ.

"The dominant opinion in Poland is that the Soviet Union is the guarantor of our independence," said the minister, who was appointed on July 7.

However, as part of the restructuring of the Warsaw Pact, Poland plans to cut its army of 347,000 by 100,000, he said.

The Warsaw Pact will become a "political-consultative organ" rather than a "Soviet policeman," he said.

In another change he said Polish officers will not be trained exclusively in the Soviet Union, but also in other countries, which he did not name.

Likewise, Poland may in the future buy arms in countries other than in the Soviet Union. The price of airplanes such as the MiG-29, will increase in price eight-fold when trade between Warsaw and Moscow will be carried on in U.S. dollars as of next year, he said.

#90220d3570 08/08/1990 ~French/German News Agency

TEHERAN, (AUG 8) - Official Iranian radio on Wednesday warned that foreign military intervention in the Gulf would run counter to the interests of the peoples of the region.

"The continued occupation of Kuwait by Iraqi forces has increased the possibility of foreign military action in the region," the radio said. "The United States, in deploying military forces in Saudi Arabia, is backing Riyadh in order to protect its oil installations."

U.S. forces were reported to have begun arriving in Saudi Arabia Wednesday in what Washington said was a defensive move to protect the kingdom from an attack by Iraqi troops in Kuwait.

The English-language Kayhan International newspaper meanwhile criticized the "short-term" policy of the government in reacting to the situation.

The paper said the crisis "is directly linked to our national security and we should not merely be delighted over rising oil prices."

Iran "should do its best in preventing the consolidation of the Iraqi-installed government in Kuwait and join the world community to this end," it said.

After condemning the August 2 invasion of Kuwait and demanding that Iraqi troops withdraw, Teheran has remained largely silent on the crisis.

But analysts here said Iran is apparently finding it increasingly difficult to reject foreign intervention in the region, as Iraqi dominance of Kuwait would be even more difficult for it to accept.

The governement of President Ali Akbar Hashemi Rafsanjani is under pressure from hardliners to intervene against Iraq, "in union with the world community," suggesting that they consider a foreign presence in the region to be less menacing than an emboldened Iraqi President Saddam Hussein.

#90220d3860 08/08/1990 ~French/German News Agency

PANAMA CITY (AUG. 8) - A bomb exploded Wednesday near the home of a cabinet minister probing alleged corruption under ousted military leader Manuel Noriega, police said.

No injuries were reported in the pre-dawn blast in the garden of the Panama City home of Treasury Minister Mario Galindo, the police added.

The explosion caused unspecified damage to the building. There was no claim of responsibility.

Last week, the home of another member of the cabinet, auditor general Ruben Carles, was attacked.

Both men sit on a government panel probing corruption and embezzlement allegedly committed by government officials while Mr. Noriega was in power.

Mr. Noriega was ousted in last December's U.S. invasion of Panama, and is currently jailed in the United States awaiting trial on drug trafficking charges.

Wednesday's bomb blast came a day after police launched a campaign aimed at curbing a wave of robberies at banks and private homes.

Officials said they did not rule out the possibility that the bomb was set off by a group calling itself M-20, which has claimed responsibility for a night club bombing that killed a U.S. soldier and injured 15 other people.

-30- 1380

#90220d3880 08/08/1990 ~French/German News Agency

NICOSIA (AUG. 8) - Iraq on Wednesday declared it had no intention of attacking Saudi Arabia but warned Israel and other Gulf states against joining any U.S. military operation against Baghdad.

"Iraq has no plans to launch an attack on Saudi Arabia or any other country," said a spokesman for the country's Revolutionary Command Council in a dispatch monitored here from the Iraqi News Agency.

He said Iraq respects its 1989 non-aggression pact with Saudi Arabia, with whom it enjoys "fraternal relations."

The spokesman said Iraq regretted that Saudi authorities had allowed themselves to be influenced by U.S. allegations that Iraqi troops in Kuwait were now threatening Saudi Arabia.

In an earlier statement the council vowed that it was prepared for "confrontation" following a U.S. decision to send ground forces to Saudi Arabia.

"We are saying to all plotters that we are ready to encounter your forces," the Revolutionary Command Council said in a communique carried by Iraqi television.

"The people of Iraq are ready for confrontation until victory," the statement added.

"Those who are implicated (in the plot against Iraq) will pay a heavy price," the communique said, warning other unnamed Gulf states against according military facilities to "the forces of evil."

U.S. President George Bush earlier in the day announced that he had sent troops to Saudi Arabia "to stand up for what's right and condemn what's wrong."

Iraq has come under an avalanche of international denunciation following its August 2 invasion of Kuwait, which Washington says now endangers Saudi Arabia.

Iraqi authorities also warned Israel against taking part in any "American aggression" against Baghdad.

A military spokesman said Iraq had informartion that "Israeli planes had been repainted in U.S. colors and that Israeli pilots chosen to take part in an aggression against Iraq had been given identity papers with American names."

In Israel a military spokesman said such statements were "lies" designed to enhance Iraqi President Saddam Hussein's "aggressive intentions by mobilizing the Arab world."

#90220d3920 08/08/1990 ~French/German News Agency

TOKYO (AUG. 8) - Sumitomo Chemical, one of the largest Japanese chemical firms, announced plans Wednesday to set up an agro-chemical production and marketing subsidiary in France by October.

The subsidiary, to be located in the Paris area with an inital capital outlay of seven million francs (1.3 million dollars), will focus on sales to France, Europe and Africa, the company said.

Sumitomo Chemical, part of the giant Sumitomo organisation, declared a 1989 turnover of 68 billion yen (453 million dollars) of which 35 billion yen (233 million dollars) came from exports.

Sumitomo Chemical has run sales outlets in the United States since 1988 and a sales network in Singapore since July 1989.

The company leads Japan in the production of high-grade chemicals and most agro-chemical products such as herbicides and pesticides.

-30- 1038

#90220d4010 08/08/1990 ~French/German News Agency
MADRID (AUG. 8) - Spain refuses to acknowledge the annexation of Kuwait by Iraq following the invasion of the Gulf sheikdom, the foreign ministry here announced Wednesday evening.

The statement read: ''The goverment of Spain, in accordance with the charter of the United Nations, regards the violent acquisition of territories as unacceptable.

''Consequently, it rejects the annexation of Kuwait by the Republic of Iraq announced by Baghdad today.''

-30- 625

#90220d4050 08/08/1990 ~French/German News Agency
BONN (AUG. 8) - West Germany condemned Wednesday the Iraqi annexation of Kuwait and offered the United States use of West German air space for the deployment of U.S. forces in the Gulf.

A Foreign Ministry communique said Bonn "condemns the annexation, which is contrary to international law, of Kuwait by the government in Baghdad."

The statement added that West Germany "will not accept this shocking violation of the rights of an independent state and its population," and called on Iraq to revoke at once its decision to annex the oil-rich emirate.

A West German government spokesman said meanwhile that Bonn had accepted a request made Tuesday by the United States for landing rights and use of West German air space in light of U.S. military moves in the Middle East.

"Taking into account the Iraqi military invasion, which violates international law, and the resulting threat to peace in the Gulf region, the government in Bonn gave its consent," the spokesman said.

Informed sources said the U.S. would use West German air space mainly for military transport aircraft carrying troops and equipment that would need to make a stop at U.S. military bases in West Germany.

U.S. President George Bush said Wednesday that U.S. ground and air forces were being deployed in Saudi Arabia at the request of the kingdom following Iraq's August 2 invasion of Kuwait.

West German Defense Minister Gerhard Stoltenberg said meanwhile that West Germany did not plan "for the moment" to send warships to the Gulf region to back up U.S. forces already in the area.

He said West Germany had not yet received any request for naval assistance

from Washington.

-30- 1891
#90220d4060 08/08/1990 ~French/German News Agency
AMMAN (AUG. 8) - Jordan's King Hussein said Wednesday the situation in the Gulf was ''deteriorating rapidly'' and that an emergency Arab summit conference to be held within 24 hours ''could be the last chance for a peaceful settlement to the crisis''.

Speaking at a press conference, Hussein said he hoped all Arab leaders would attend the summit set down for 7 p.m. local time Thursday in Cairo, including Iraqi President Saddam Hussein and Kuwaiti Emir Sheikh Jaber al-Ahmad al-Sabah who fled Kuwait during Iraq's invasion last week.

''I cannot be sure that all will attend, but I hope they do,'' the king told reporters. ''This may be our last chance to solve the problem within an Arab context and away from foreign military intervention.''

He said there was no specific peace plan to be proposed at the summit and said he was not aware of an Egyptian proposal to send a joint Arab force from several Arab states to replace Iraqi forces in Kuwait.

''Actions and reactions are escalating rapidly and dangers are growing with the passage of every moment,'' Hussein warned. ''The summit must succeed, otherwise the escalation would be allowed to lead us to the verge of disaster.''

The Jordanian monarch reaffirmed his country's position which recognises the former Kuwaiti regime, rejects the Iraqi occupation of Kuwait and ''all that the occupation has entailed''.

Asked whether he could personally influence Saddam Hussein not to ''fire the first shot,'' the king said: ''I do not think I am in any position to let anybody do or refrain from doing anything.''

Hussein refused to comment on his position on the deployment of U.S. forces in Saudi Arabia: ''Saudi Arabia is a sovereign state and it is its right to seek any kind of assistance that it may feel it needs. It is not for me to say whether it is a right or a wrong thing to do. Only time can tell whether it is was right or not.''

The king continued: ''We must do everything we can at the summit. I believe the area is passing through one of the most dangerous crises, and we hope we can halt the slide.''

In an apparent reference to Israeli threats, the monarch said Jordan had put its armed forces on alert since the crisis began ''as a precautionary

measure'' against ''certain parties taking advantage of the Gulf situation''.

#90220d4510 08/08/1990 ~French/German News Agency

VANCOUVER (AUG. 8) - Authorities here halted an Iraqi-bound ship loaded with 60,000 tonnes of grain after the Canadian Government decided to implement U.N. Security Council-approved sanctions against Iraq, an official said Wednesday.

The Panamanian-registered Oceanic Explorer was kept in port after authorities received orders not to ship any supplies to Iraq or Kuwait, said Canadian Wheat Bureau official Charles Thompson.

Canada voted in favor of the U.N. Security Council sanctions against Iraq and Kuwait in an effort to pressure Baghdad to remove its troops from Kuwait, which it invaded on August 2.

The U.N. embargo calls on all states to boycott Iraqi and Kuwaiti oil exports, to block the transfer funds and other financial resources to the

two countries, and to stop all exports -- especially of military equipment -- to the two countries.

Iraq imported 900,000 tons of grain from Canada last year. Iraq is the world's third largest purchaser of grain and the largest importer of Canadian grain.

#90220d4610 08/08/1990 ~French/German News Agency

WASHINGTON (AUG. 8) - The chief foreign trade negotiators of the United States and Mexico Wednesday agreed that their governments should begin formal negotiations "on a comprehensive free trade agreement" between the two countries.

A joint statement issued by U.S. Trade Representative Carla Hills and Mexico's Secretary of Commerce and Industrial Development Jaime Serre Puche recalled that on June 11 the presidents of the two countries had "directed us to undertake the consultations and preparatory work needed to initiate negotiations on such an agreement."

The two trade negotiators said: "Today, we jointly recommend to the presidents the initiation of formal negotiations ... on a comprehensive free trade agreement.

"Our consultations and preliminary work have convinced us that a free trade agreement could serve as a catalyst for a new prosperity and greater partnership between our nations."

They pointed out that the United States accounted for two-thirds of Mexico's trade, while Mexico was the third largest U.S. trading partner.

But the two trade negotiators also recognized that "there are concerns about the adjustments inherent in a free trade agreement."

Nevertheless, "we could address them creatively, such as through appropriate phase-in provisions."

The United States has already negotiated separate free trade agreements with Canada and Israel and President George Bush recently suggested the establishment of a regional free trade area to embrace all of the American continent.

MANAMA (AUG. 8) - The emir of Bahrain, Isa bin Salman al Khalifa, will attend a special Arab summit on the Gulf crisis called by Egyptian

President Hosni Mubarak, an official source said here Wednesday.

The summit, to be held Thursday evening, was proposed Wednesday by Mr. Mubarak as a last-ditch Arab effort to avert foreign military intervention in the Gulf following Iraq's August 2 invasion of Kuwait.

Lebanon, Jordan, Morocco, Kuwait, Egypt, Syria, Algeria, Saudi Arabia, Qatar, the United Arab Emirates, Libya, Yemen, Tunisia, Oman and Mauritania have already announced they will attend.

The Arab League has 21 members, including the Palestine Liberation Organization.

The PLO, Iraq, Sudan, Somalia and Djibouti have not yet indicated whether they will attend the Cairo meeting.

#90220d4840 08/08/1990 ~French/German News Agency

NICOSIA (AUG. 8) - Colonel Ala'a Hussein Ali, head of the Iraqi-installed military government in Kuwait, has been named Iraqi deputy prime minister, the official Iraqi news agency announced Wednesday.

The appointment by presidential decree of Col. Hussein Ali as a deputy prime minister of Iraq follows Baghdad's announcement earlier Wednesday of "total and irreversible" union with Kuwait.

Iraq's decision-making Revolutionary Command Council also named eight military men, including seven members of the "provisional government of Kuwait," advisors to the Iraqi presidency with ministerial rank, the INA news agency said in a dispatch monitored here.

They were Lieutenant-Colonels Walid Saud Mohammad Abdallah and Fuad Hussein Ahmed and Majors Fadel Haidar al-Wafiqi, Misha'l Saad al-Hadab, Nasser Mansur al-Mandil, Issam Abdel Majeed Hussein and Yacub Mohammed Shallal.

An eighth member of the nine-man provisional government named Saturday, Lieutenant-Colonel Hussein Ali al-Shamari, was not included on the list of presidential advisors.

However, INA named an eighth advisor as Major Adel Ali Khamis.

#90220d5190 08/08/1990 ~French/German News Agency

LONDON, (AUG 9) - British Ambassador Harold Walker left here Wednesday for Jordan with plans to take up his post in Baghdad, airport authorities said late Wednesday.

The Foreign Office refused to confirm the report, a spokesman saying only that Mr. Walker was on leave when Iraqi troops invaded Kuwait on August 2.

Mr. Walker, who left on a Jordanian aircraft, according to the Heathrow airport information service, was reported to have said: "One of my first concerns is to help the British community and those who come from Kuwait.

"Beyond that, I really mustn't say anything."

Fifty-nine British civilians, with 36 Royal Air Force personnel who had been serving as military advisors in Kuwait, are in a Baghdad hotel, according to the Foreign Office.

Some 2,000 British nationals reside in Iraq.

JAKARTA (AUG. 9) - Enterprise Oil of Britain has discovered oil and gas from its operation off the eastern coast of Java island, the Indonesian state oil firm Pertamina said Thursday.

Pertamina said in a statement that the Bunku-1A discovery well in the Bawean Block flowed 835 barrels of 42.3 API degree crude oil a day and 1.12 million cubic feet of natural gas.

Enterprise operates the bloc under a production-sharing contract with Pertamina.

JOHANNESBURG (AUG. 8) - The threat of a major strike by 16,000 black miners at South Africa's 22 collieries receded Wednesday following an improved pay offer made late on Tuesday by the Chamber of Mines.

Marcel Golding, of the 200,000-strong National Union of Mineworkers, said the union would recommend acceptance of the offer to colliery members, who had voted by more than 90 per cent for a strike.

No details of the new offer were available. The NUM had asked for increases of between 18 and 20 per cent.

But the union said it would conduct a strike ballot among 11,000 members at De Beers diamond mines after annual pay talks reached stalemate Tuesday.

PRETORIA (AUG. 8) - South Africa's maize farmers are set to borrow as much as two billion rands (772 million dollars) this year to plant and grow maize, the National Maize Producers' Organisation (NAMPRO) said here late Tuesday.

NAMPRO warned that if the crop failed the agricultural industry's debt could rise to a record 15 billion rands (5.8 billlion dollars) by the end of the year.

Production costs increased by 27 per cent last year to 468 rands (180 dollars) a hectare, which rose to 726 rands (280 dollars) a hectare when capital costs were taken into account, NAMPRO said.

Fuel, fertiliser, seed and other production costs were expected to rise 25 per cent this year, NAMPRO said.

But it revealed that the number of maize farmers going bust was decreasing, from 691 in 1987 to 425 in 1988 to 348 last year.

This season's crop would cover four million hectares, NAMPRO said.

KUALA LUMPUR (AUG. 8) - Malaysia's Tin Industry Board said Wednesday that it saw no prospects of prices rising above 6.29 U.S. dollars a kilo in the near future because of summer holidays in industrialised countries and high stocks in Europe.

The board, which oversees tin research and development, said in its market review that the daily public auction of metal from the United States' strategic stockpile since July 2 could further weaken the market.

It said the recent fall in tin prices as a result of a build-up in world stocks had caused many mines to close down in Malaysia. At the end of April,
217 mines were operating, down from 255 mines at the end of last year.

The seven-member Association of Tin Producing Countries estimated stocks to have risen to 43,200 tons at the end of February from 32,900 tons a year earlier.

At the end of June, London Metal Exchange warehouses stocked some 12,000 tons of metal of mostly Brazilian origin.

LONDON (AUG. 8) - Brent North Sea oil prices were on the rise again Wednesday morning, at 27.35 dollars a barrel in early London trading after closing Tuesday at 26.55, industry sources said.

The rise in Brent, which had reached 28.10 dollars a barrel in Far East trading overnight, was somewhat curbed however by reports that Iran had indicated the Organisation of Petroleum Exporting Countries could boost production to compensate for the loss of Iraqi and Kuwait deliveries.

International sanctions following Iraq's invasion of Kuwait last week include an embargo on oil from the two countries.

BANGKOK (AUG. 8) - The Securities Exchange of Thailand (SET) stopped its plunge on Wednesday, provisionally finishing 35 points or 3.77 per cent up at 957.35 points against Tuesday's 922.35 points close.

In early trading the index rose nearly 60 points but in the final 90 minutes slipped back.

The rise reversed a trend that had seen the SET slide nearly 20 per cent since the start of the month.

Analysts said the market was still jittery over tension in the Middle East and fears of higher oil prices.

TOKYO (AUG. 8) - Japan's Mazda Motor Corp. said Wednesday it was forming a transmission venture in Thailand with local car distributor Kijkamol Sukosol Ltd. and Japanese trading firm Toyo Menka Kaisha Ltd.

The new company, called Sukosol and Mazda Engineering Co. Ltd., will be capitalised at 393 million baht (15.4 million dollars) and involve additional investment of about 4.2 billion yen (28 million dollars), it said.

The venture -- owned 51 per cent by Kijkamol Sukosol, 40 per cent by Mazda and nine per cent by Toyo Menka -- is to build a plant in Chacheongsao province producing 4,000 transmissions a month for small vehicles from January 1992.

Mazda already assembles and distributes cars in two existing ventures with

Kijkamol Sukosol, which is also the Mazda dealer in the Bangkok area.

Japanese camera-maker Nikon Corp., meanwhile, said it was forming a 160 million baht (6.3 million dollar) unit in Thailand and investing 800 million baht (31.3 million dollars) in a new production facility north of Bangkok.

The wholly-owned subsidiary, to be called Nikon (Thailand) Co. Ltd., is scheduled to start producing photographic lenses in the year to March 1992, eventually expanding its production to include cameras, it said.

MEXICO CITY (AUG. 8) - Hurricane Diana lashed the Mexican coast east of here packing 120 kilometers per hour winds (75 miles), causing floods which left 3,000 people homeless, the authorities said.

There were no reports of deaths but "we cannot say the danger is over, because we expect widespread floods near the mountains," said Rafael Velasco,
Civil Defense coordinator for the state of Veracruz.

The hurricane, which came ashore Tuesday 300 kilometers (116 miles) east of Mexico City near the town of Tecolutla, was expected to be downgraded to a tropical storm, he added.

He said reports indicated that some rivers were already in flood and 1,500 people had been evacuated from the Poza Rica area.

LONDON (AUG. 8) - British Prime Minister Margaret Thatcher called an emergency meeting of a key cabinet security committee Wednesday as the Ministry of Defense reviewed plans for British military action in the Gulf officials said.

Though British frigates were ordered to head to the Gulf, a spokesman for

the Ministry of Defense said no troop deployments were planned for the time being.

The Foreign Office, meanwhile, said it had still made no progress in getting 58 British nationals who were sent by bus from Kuwait to Baghdad out of Iraq, though a spokesman said they were in regular and unimpeded contact with British diplomats in the Iraqi capital.

Government sources said the crisis meeting at Downing Street of the Cabinet Overseas and Defence Committee would discuss not only the military situation in the Gulf but also the impact the tension will have on the British economy.

Chancellor of the Exchequer John Major was expected to deliver a report on the consequences the embargo against Iraq and rising oil prices could have on the British economy.

According to media reports here, the rising oil prices could restrict the government's prospects of lowering interest rates and could further delay British entry into the exchange rate mechanism of the European Monetary System.

Britain has already announced that the frigates Jupiter and Battleaxe are being sent to the Gulf to join the destroyer York as part of the Armilla Patrol, but the defense ministry spokesman said no troop deployments were planned at the moment.

"There is a lot of activity looking at what can be done, by whom, if the need arises," one ministry source said, adding: "We are looking at the whole spectrum of military options."

But another source stressed: "We are looking to the diplomats and economic sanctions for a resolution of the problem."

Meanwhile it was announced that Iraqi nationals living in Britain will need special permission from the Bank of England to withdraw funds for living expenses.

There are between 1,500 and 2,000 permanent Iraqi residents in Britain with a further 600 living here on temporary student visas.

DUBAI (AUG. 8) - The U.S. Embassy advised dependents of U.S. nationals Wednesday to leave the United Arab Emirates (UAE) but stressed there was no "specific threat" against the country following Iraq's invasion of Kuwait.

Sami Hajjar, spokesman for the embassy in Abu Dhabi, said the U.S. State Department was "permitting the dependents of U.S. government officials to depart the area on a voluntary basis."

"The department advises other American citizens to consider doing the same -- that is voluntary departure of dependents only," he added, quoting a communique from Washington.

He said the area cited in the communique comprises the "Eastern province of Saudi Arabia, Qatar, Bahrain and the United Arab Emirates."

But he added: "The embassy has no information to indicate that there is a specific threat against the UAE or American citizens at this time."

"We will advise them if there is any change in our current assessment."

The State Department has also advised Americans to defer travel to the areas concerned "due to the Iraqi invasion of Kuwait and the continuing unstable conditions in the region."

#90220d9870 08/08/1990 ~French/German News Agency

PORT ARTHUR, TX (AUG. 8) - U.S. Customs seized 75 million liters (20 million gallons) of Iraqi crude oil from a Norwegian ship docked at a refinery here, officials said.

Customs spokeswoman Sharon Goodson said the oil was seized Tuesday because Bay Oil Co. paid for the shipment Monday, four days after U.S. President George Bush ordered an embargo on Iraqi oil.

The oil was unloaded from the Spanish-registered supertanker Cartho Genova onto the Thoraas, a Norwegian ship that was docked at Sun Oil Nederland holding area in Port Arthur.

Ms. Goodson said there probably would be no penalty against either Bay Oil or the Thoraas.

"The cargo was seized, not the ship," said Erik Leikvang, Norway's consul general in Houston. "The ship itself will not be held back once the oil is removed.

The Cartho Genova, carrying 1.6 million barrels of crude, was in international waters in the Gulf of Mexico beyond the jurisdiction of the U.S. Customs.

But Ms. Goodson said the Coast Guard would be on the lookout for any more oil from the Spanish super tanker.

ROME (AUG. 8) - Iraqi troops held up and turned back a convoy of foreigners heading Tuesday from Baghdad to the Jordan border, the Italian news agency ANSA said in a report Wednesday.

Four Italians were in the convoy of about ten cars. The foreigners had been travelling for about four hours when they were stopped by Iraqi soldiers and told to go back to Baghdad, according to the report which cited Italian diplomats in Amman.

The four Italians telephoned to their employers, a firm in Brescia near Milan, when they got back to the Sheraton Hotel in the Iraqi capital.

The Amman diplomatic sources said the travellers set off on the strength of assertions by Jordanian officials who maintained that the border between Jordan and Iraq had been opened for foreigners stranded in Iraq by the Iraq-Kuwait crisis.

TOKYO (AUG. 8) - Japanese stock and bond prices rebounded as the dollar lost steam in Tokyo Tuesday despite rising tension in the Gulf.

The Nikkei Stock Average jumped more than 856 points to just over 28,509 points -- up 3.1 per cent from the previous close -- following four days of steep losses triggered by Iraq's invasion of Kuwait.

Volume swelled from 526 million shares to 580 million shares but remained relatively light.

"It's basically a technnical rebound which isn't likely to go very far," said the managing director of the Tokyo branch of a European securities firm, noting that tension in the Middle East was if anything getting stronger.

Brokers agreed that a recovery was normal given the Nikkei's plunge of almost 3,200 points or 11 per cent since Thursday of last week, especially in the absence of any sharp deterioration of the situation in the Gulf.

"No news is goods news," one broker said. Others added that Japanese investors were encouraged by overnight rallies in stockmarkets abroad and reports that Saudi Arabia might increase its oil production.

Japanese government bond prices also surged, driving the yield on the

benchmark 10-year issue down from 8.08 per cent to 7.87 per cent. Short-term interest rates, under strong upward pressure in recent days, also receded.

The dollar, which has enjoyed strong buying demand since the Middle East crisis erupted, meanwhile shed 0.60 yen to settle at 150 yen as traders took profits. Spot volume shrank from 11.1 billion dollars to 10.5 billion dollars.

SAN SALVADOR (AUG 8) EFE - Outbreaks of violence thoughout El Salvador have left at least 37 dead and more than 1,700 injured during the past week, officials have reported.

Police Tuesday said that at least 33 civilians died in sporadic violence in different parts of the country during the the annual national festival, "El Salvador of the World," held over the past week.

Meanwhile, some 41 people were killed or wounded in clashes between leftist guerillas and the Army in the northern Chalatenango province between Monday and Tuesday, military officials said.

The battle was described as the fiercest since representatives of the rightist government met with rebel leaders of the leftist Farbundo Marti National Liberation Front (FMLN) in Costa Rica last month to discuss ending the decade-old civil war.

The officials said three FMLN guerrillas were killed and one soldier wounded in a confrontation in the eastern province of San Miguel over the weekend.

Elsewhere, one civilian was killed after stepping on a suspected rebel landmine on the outskirts of the northern town of Cinquera.

Meanwhile, Red Cross workers reported having attended more than 1,700 cases over the last week, adding that most of the people dealt with had been involved in civilian violence or accidents.

More than 70,000 have been killed since the FMLN began fighting a series of U.S.-backed Salvadoran governments in 1980.

ASUNSION (AUG 8) EFE - Paraguayan police have arrested two suspected members of the notorious Colombian "Medellin" cocaine cartel in an

Asuncion restaurant as they were discussing plans to steal a plane, officials said Wednesday.

The two suspects, who were arrested late Monday, have been identified by police as Ruben Granados Medina, a Paraguayan pilot, and Marcos Obdulio Sanchez, a Colombian citizen.

Officers failed to detain another three people who were with Granados Medina and Obdulio Sanchez at the restaurant.

According to the police, Granados and Obdulio were plotting to steal a plane on Tuesday, although it was no clear where the aircraft was to be flown to.

The Medellin cartel, which takes its name from the northwestern Colombian city where it is based, is the most powerful of Colombia's cocaine cartels.

Colombian police have mounted a months-long operation aimed at capturing suspected Medellin cartel chief Pablo Escobar.

Escobar is alleged to have ordered a counter-offensive against the Colombian government's 11-month war on drug-traffickers in which hundreds of people have died in bomb and gun attacks.

#90220e0040 08/08/1990 ~Latin America New Agency

JERUSALEM (AUG 8) EFE - Three Palestinians were injured Wednesday as gangs of Israelis continued attacks on Arabs in the Occupied Territories following the discovery earlier this week of the bodies of two murdered Israeli teenagers, police said.

The three Palestinians were injured near the Jordanian border in the West Bank where the attackers also overturned two cars.

Israelis have carried out several indiscriminate attacks on Arabs in the Occupied Territories in the backlash to the killings of Israeli teenagers Lior Tubul and Ronen Karamami, whose bodies were found Monday near East Jerusalem.

The two teenagers, who had been stabbed several times and gagged, had been missing since Saturday.

Despite heavy police reinforcements, gangs of hooded Israelis screaming, "Death To The Arabs" attacked Arabs Tuesday in several parts of Jerusalem, injuring 15.

Police said they suspected most of the attacks have been carried out by

members of a racist political party led by Meir Kahane.

Police chief Yaacov Turner, who is in charge of investigations into the killings of Tubul and Karamani, said Wednesday he would release Israelis suspected of being responsible for attacks against Arabs if they promised not to renew the assaults.

Over 1,000 Arabs and some 60 Israelis have been killed in the Occupied Territories since the Palestinian uprising or "intifada" began 31 months ago.

#90220f2188 08/08/1990 ~United Press International

CHICAGO (AUG. 8) UPI - Wheat futures were higher on a pick-up in export business while other grain and soybean prices were mostly lower Wednesday on the Chicago Board of Trade.

The overnight sale of wheat to Japan and Algeria and news the Philippines was in the market for 280,000 tons boosted wheat prices. Commercials were featured buyers, but the volume was relatively light.

Corn and soybeans traded in narrow ranges and were mostly lower at the final bell. Traders were consolidating their positions before release of the August crop report Thursday afternoon. Most of them expect the Agriculture Department to predict a corn crop at the high end of trade estimates.

Soybeans were pressured by the lack of activity as many buyers were on the sidelines ahead of the USDA report. Selling was tied to liquidation and closing prices were at or near session lows.

Losses in both corn and beans were limited by light country movement and the cool weather covering the Midwest.

Soybean oil futures were virtually unchanged and meal prices were slightly higher. An estimated 20,000 tons of meal changed hands in Rotterdam at lower prices.

Interior and Gulf basis levels generally were steady.

At the close, corn was off 2 1/2 to up 1/2, soybeans down 1 1/4 to 3, wheat up 2 1/2 to 3 3/4 and oats off 3/4 to up 1/2.

#90220f2200 08/08/1990 ~United Press International

LONDON (AUG. 8) UPI - Stock prices closed slightly higher in anxious trading Wednesday on the London International stock exchange as investors continued to worry whether there would be a military confrontation in the Persian Gulf.

The blue-chip Financial Times 100-stock index, which gained 15.6 points Tuesday, added another 1.7 points to 2,237.5. The narrower top 30 industrial average gained 0.1 point to 1,748.5.

Volume amounted to around 430 million shares, vs. 497 million that changed hands on Tuesday.

Analysts said that trading remained tense but that prices were more stable than in previous days, as the market absorbed a strong speech from President Bush, who called for Iraq's complete withdrawal from Kuwait.

Stocks cut early double-digit losses amid some late bargin hunting, bolstered by a confident Wall Street opening following Bush's speech on the deployment of U.S. troops in Saudi Arabia to deter a possible attack by Iraq.

The market opened slightly higher on news that U.S. troops were heading to Saudi Arabia to help stabilize the Middle East, but prices - sensitive to any news and rumors surrounding the region - turned lower around midday amid unconfirmed rumors suggesting Iraqi troops were about to invade Saudi Arabia.

On the trading floor, oil stocks continued to benefit from the Gulf turmoil.

Shell added 5 cents to $8.85 and British Petroleum gained 5 cents to $6.57.

The unrest had the opposite effect on British Aerospace, which has about 3,000 employees based in Saudi Arabia. The stock fell 18 cents to $9.72.

In the pharmaceuticals sector, Smithkline Beecham climbed 65 cents to $9.73 after reporting better-than-expected second-quarter results.

In the insurance sector, General Accident lost 11 cents to $8.90, Royal Insurance lost 14 cents to $7.74 and Commercial Union added 2 cents to

$8.42.

Elsewhere in Europe, stock prices on the Frankfurt Stock Exchange lost 2.63 percent of their value on concerns over the intensifying troubles in the Persian Gulf.

The closely watched German Stock Index, which gained 29.37 points Tuesday, tumbled 46.62 points to 1,723.68 a - new low for the year and the lowest close since last Dec. 22.

Analysts said prices fell on continuing worries over international political developments, which dampened investor sentiment.

Market watchers also said prices fell amid a deadlock over the timing of the planned full merger of the two Germanys into one nation and the related Pan-German election.

In Zurich, stock prices on the Swiss Stock Exchnage slid in nervous trading that was also marked by uncertainty about the Mideast situation.

The Credit Suisse Stock Index fell 13.4 points to 600.9, while the Swiss Market Index lost 32.8 points to 1,596.5.

MANILA (AUGUST 8) XINHUA - THE PHILIPPINE GOVERNMENT HAS TAKEN STEPS TO MINIMIZE WHATEVER ADVERSE EFFECTS THE RECENT IRAQ-KUWAIT CONFLICT WILL BRING ABOUT AND TO ENSURE THAT OIL SUPPLIES REMAIN SUFFICIENT TO MEET DOMESTIC REQUIREMENTS, EXECUTIVE SECRETARY CATALINO MACARAIG SAID TODAY.

IN A STATEMENT ISSUED TO THE PRESS TONIGHT, MACARAIG SAID THAT WITH IRAQ AND KUWAIT UNABLE TO FREELY TRADE THEIR OIL PRODUCTION, THE PHILIPPINES HAS TO LOOK FOR ALTERNATIVE SOURCES OF CRUDE OIL.

"FOR THE PHILIPPINES, THIS MEANS LOOKING FOR NEW SOURCES OF CRUDE FOR ABOUT ONE-FIFTH OF ITS REQUIREMENTS. DURING THE FIRST SIX MONTHS THIS YEAR CRUDE OIL FROM IRAQ AND KUWAIT ACCOUNTED FOR 20 PERCENT OF NATIONAL SUPPLY," SAID MACARAIG.

THE EXECUTIVE SECRETARY SAID THE AQUINO GOVERNMENT HAS ALREADY UNDERTAKEN MEASURES IN THE LIGHT OF THE UNRESOLVED IRAQ-KUWAIT CRISIS INCLUDING: FIRMED UP A NEW TERM CONTRACT WITH IRAN FOR THE SUPPLY OF 20,000 BARRELS OF CRUDE OIL PER DAY; REPLACED SCHEDULED AUGUST CRUDE OIL LIFTINGS FROM KUWAIT WITH THE SAME VOLUME OF 720,000 BARRELS FROM IRAN; STARTED HIGH-LEVEL NEGOTIATIONS WITH POSSIBLE SOURCES OF ADDITIONAL CRUDE OIL.

MACARAIG SAID THE PHILIPPINES HAS ENOUGH OIL INVENTORIES FOR MORE THAN 70

DAYS.

NAIROBI, AUGUST 8 (XINHUA) -- SOME AREAS OF ETHIOPIA AND SUDAN COULD FACE THE THREAT OF FAMINE FOR THE SECOND YEAR BECAUSE OF INADEQUATE RAINFALL AT THE START OF THE 1990 CROPPING SEASON, THE U.N. FOOD AND AGRICULTURE ORGANIZATION (FAO) SAID TODAY.

IN ITS THIRD SPECIAL AFRICA REPORT OF 1990, THE FAO SAID THAT DRY CONDITIONS STILL EXIST IN NORTHERN DARFUR AND KORDOFAN OF SUDAN, AND THESE AREAS ARE ENCOUNTERING SEVERE FOOD SUPPLY DIFFICULTIES FOLLOWING LAST YEAR'S DROUGHT.

WIDESPREAD CROP FAILURE IS EXPECTED IN NORTHERN AND WESTERN ETHIOPIA UNLESS GOOD RAINS ARE RECEIVED FOR THE REMAINDER OF THE CROPPING SEASON,

SAID THE REPORT ENTITLED "FOOD SUPPLY SITUATION AND CROP PROSPECTS IN SUB-SAHARAN AFRICA".

FAO DIRECTOR-GENERAL EDOUARD SAOUMA URGED DONOR COUNTRIES TO GET READY TO INCREASE FOOD AID IN 1990/91 AS ETHIOPIA AND SUDAN MAY NEED SUBSTANTIAL ASSISTANCE.

THE FAO REPORT SAID THAT THE FOOD SITUATION REMAINS CRITICAL IN ANGOLA AND MOZAMBIQUE WHILE FOOD SHORTAGES ARE BECOMING INCREASINGLY SERIOUS IN LIBERIA.

WITH CONTINUING CIVIL STRIFE IMPEDING THE MARKETING AND DISTRIBUTING OF FOOD AND DISRUPTING AGRICULTURAL ACTIVITIES, LIBERIA WILL NEED SUBSTANTIAL EMERGENCY FOOD RELIEF FOR AT LEAST ONE YEAR, IT SAID.

ALTHOUGH THE FOOD SUPPLY SITUATION IS GENERALLY SATISFACTORY IN OTHER AFRICAN COUNTRIES, THE TOTAL FOOD AID REQUIREMENT OF THE 46 SUB-SAHARAN AFRICAN COUNTRIES IN 1990/91 COULD EXCEED THEIR 1989/90 LEVEL OF 4.2 MILLION TONS, THE FAO PREDICTED.

LONDON (AUG. 8) XINHUA - IRAN'S OIL MINISTER GHOLAMREZA AQAZADEH SAID HIS COUNTRY WILL BE PREPARED TO RAISE ITS OIL PRODUCTION IN CASE OF A WORLD SHORTAGE, ACCORDING REPORTS FROM THE BBC.

IN AN INTERVIEW WITH THE PERSIAN SERVICE OF THE BRITISH BROADCASTING CORPORATION IN LONDON ON TUESDAY, AQAZADEH SAID IRAN WANTED A BALANCE MARKET AND WAS PREPARED TO RAISE OUTPUT AS PART OF A DECISION BY THE WHOLE OF OPEC.

BUT HE SAID THE RECENT SURGE IN OIL PRICES WAS TRIGGERED BY MARKET REACTION AND POLITICAL STATEMENTS, AND WAS NOT THE RESULT OF A SHORTAGE OF SUPPLIES.

ON MONDAY, HE CALLED ON OPEC TO STICK TO PRODUCTION AND PRICE QUOTAS AGREED UPON IN GENEVA LAST MONTH.

TOKYO (AUG. 8) KYODO - KYOCERA CORP. SAID WEDNESDAY THAT ONE OF ITS U.S. SUBSIDIARIES HAS BOUGHT THE REMAINDER OF VARELCO LTD., A BRITISH ELECTRONICS CONNECTOR MAKER IN WHICH IT ALREADY OWNED STOCK.

THE PURCHASE WAS MADE BY ELCO CORP., ITSELF A WHOLLY OWNED SUBSIDIARY OF KYOCERA CORP. SUBSIDIARY KYOCERA INTERNATIONAL INC. ELCO INCREASED ITS

STAKE IN VARELCO FROM 49 PERCENT TO 100 PERCENT.

THE CALIFORNIA-BASED ELCO BOUGHT THE REMAINING 51 PERCENT OF THE SHARES FOR 2.9 MILLION POUNDS FROM CAMBRIDGE ELECTRONICS INDUSTRIES, A BRITISH ELECTRONICS PARTS PRODUCER, ON JULY 27, THE MAJOR MAKER OF CERAMIC INTEGRATED CIRCUIT (IC) CASINGS SAID.

VARELCO, BASED IN NEWMARKET, BRITAIN, WAS ESTABLISHED IN 1964 TO MANUFACTURE ELECTRONICS CONNECTORS USED TO CONNECT PARTS OF PERSONAL COMPUTERS AND OTHER ELECTRONICS PRODUCTS.

THE COMPANY POSTED 796,000 POUNDS IN PRETAX PROFITS ON SALES OF 10.55 MILLION POUNDS IN THE YEAR ENDED DECEMBER 31.

#90220k0057 08/08/1990 ~Japanese News Agency

MANILA (AUG. 8) KYODO - THE PHILIPPINES MAY SEEK EXEMPTION FROM THE U.N. SECURITY COUNCIL'S RESOLUTION FOR A WORLDWIDE EMBARGO ON TRADE WITH IRAQ AND IRAQI-OCCUPIED KUWAIT IF IT COULD NOT FIND AN ALTERNATIVE SOURCE OF OIL, A DEPARTMENT OF FOREIGN AFFAIRS OFFICIAL SAID WEDNESDAY.

''IF WORSE COMES TO WORST, THE PHILIPPINES WILL NOT EVEN BE THE FIRST BLOCKADE BUSTER,'' SAID THE OFFICIAL WHO REFUSED TO BE NAMED.

THE OFFICIAL EXPLAINED THAT IN CASE THE PHILIPPINES IS UNABLE TO SECURE OIL FROM ALTERNATIVE SOURCES, MANILA MAY SEEK EXEMPTION FROM THE SECURITY COUNCIL'S MOVE.

ABOUT 20 PERCENT OF THE PHILIPPINES' OIL SUPPLY COMES FROM IRAQ AND KUWAIT.

THE SECURITY COUNCIL ON MONDAY VOTED UNANIMOUSLY TO PUT AN ECONOMIC STRANGLEHOLD ON IRAQ, URGING U.N. MEMBER NATIONS TO STOP TRADING WITH IT AS A PUNITIVE ACTION FOR ITS INVASION AND OCCUPATION OF OIL-RICH KUWAIT.

FOREIGN SECRETARY RAUL MANGLAPUS HIMSELF HINTED THAT MANILA MAY NOT JOIN THE WORLDWIDE EMBARGO.

''WE WILL ABIDE BY THE DECISION OF THE U.N. SECURITY COUNCIL, (BUT) WE ARE TAKING NOTE OF THE PROVISIONS OF SECTION 50 OF THE U.N. CHARTER WHICH PERMITS US TO GO BEFORE THE SECURITY COUNCIL ONCE WE FEEL THAT OUR ECONOMIC POSITION HAS BEEN SEVERELY AFFECTED BY ITS DECISION,'' MANGLAPUS TOLD REPORTERS WEDNESDAY.

MANGLAPUS, HOWEVER, SAID MANILA REMAINS ''OPTIMISTIC'' THAT THE PHILIPPINES WILL BE ABLE TO MAKE UP FOR THE SHORTAGES THAT MAY BE CAUSED BY THE EMBARGO.

HE SAID HE HAS PERSONALLY CONTACTED FOREIGN MISSIONS IN MANILA WHICH ARE IN A POSITION TO HELP THE PHILIPPINES WHILE THE DIFFERENT BRANCHES OF GOVERNMENT ARE COORDINATING EFFORTS TO ADDRESS THE SHORTAGE.

#90220k0086 08/08/1990 ~Japanese News Agency

TOKYO (AUG. 8) KYODO - CHANG HWA COMMERCIAL BANK OF TAIWAN OPENED A REPRESENTATIVE OFFICE IN TOKYO ON WEDNESDAY, THE FIRST TAIWANESE BANK TO SET UP AN OFFICE HERE IN ABOUT 40 YEARS.

IT WAS OPENED UNDER A JAPANESE-TAIWANESE RECIPROCITY ACCORD WHICH ALLOWED THE BANK OF TOKYO TO OPEN ITS REPRESENTATIVE OFFICE IN TAIPEI LAST FRIDAY FOR THE FIRST TIME SINCE THE TAIPEI GOVERNMENT INTRODUCED A ONE COUNTRY-ONE BANK POLICY IN THE LATE 1950S.

FINANCIAL INDUSTRY REPRESENTATIVES FROM BOTH JAPAN AND TAIWAN, INCLUDING K.H. YEH, PRESIDENT OF THE TAIWANESE BANK, ATTENDED AN OPENING CEREMONEY HELD IN TOKYO ON WEDNESDAY. THE EVENT WAS DELAYED ABOUT ONE MONTH FROM THE ORIGINALLY SCHEDULED DATE DUE TO STRONG OPPOSITION BY CHINA.

FINANCE MINISTRY AND OTHER JAPANESE GOVERNMENT OFFICIALS DID NOT ATTEND THE CEREMONY APPARENTLY OVER CONCERN ABOUT CHINA'S FEELINGS ON THE MATTER AND THE PRESENT ABSENCE OF DIPLOMATIC TIES BETWEEN TOKYO AND TAIPEI, INDUSTRY SOURCES SAID.

WITH INVESTMENTS BY THE STATE AND A GROUP OF PRIVATE SECTORS AT A RATIO OF 51-49 PERCENT, CHANGE HWA COMMERCIAL BANK IS A MAJOR COMMERCIAL BANK IN TAIWAN. ITS NEW TOKYO OFFICE WILL CONTRIBUTE TO EXPANDING BILATERAL TRADE AND BUSINESS TIES AND WILL EVENTUALLY AIM AT BEING UPGRADED TO A BRANCH OFFICE, THE SOURCES SAID.

#90220m0001 08/08/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (AUG. 8) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

IN THE NEWS:

The Nikkei rebounds from its string of losses to close up 856, the eighth largest gain in history. ... In early afternoon trading, the FT 100 is down slightly. ... Happy Birthday to the S&L bailout, which turns one year old today. The $50 billion originally allocated is expected to be exhausted by the Fall. ... TRANS WORLD AIRLINES is the latest airline to boost ticket prices because of higher fuel costs. year ago. ... ATTORNEY GENERAL DICK THORNBURGH says the Justice Department has decided to prosecute savings and loan officials for specific, case-by-case violations rather than trying to pursue more complex criminal conspiracies to loot failed thrifts.

WHAT'S AHEAD:

PRESIDENT BUSH is addressing the nation on the Mideast crisis at this hour (9 a.m.) in a televised speech from the Oval Office. ... Iraqi leader SADDAM HUSSEIN is supposed to appear in his own televised speech about an hour later. ... EMERSON ELECTRIC plans to spin off its defense units into a separate company. ... The FEDERAL RESERVE is scheduled to release their

"beige" book report on the economy at noon EDT.

FROM THE BULLS:

FNN's JEFF BOWERS reports that technical analyst JUSTIN MAMIS of the "Mamis Guide" writes that "a surprising turnaround in the utility average may be at hand." Overall he feels the stock market looks a lot more scary than it really is. In his eyes, a textbook new bull market bottom is forming. (FNN "Marketwrap", 8/7)

"You have some of the highest-quality companies in this country down 25% to 30% in a week," says JAMES AWAD, president of BMI CAPITAL, a money management firm. "I am buying aggressively. My cash level is down to 10% and going lower, and I expect to be fully invested." Awad expects a quick resolution to the Middle East crisis and looks for the Federal Reserve to cut interest rates. He says both events would trigger a quick rebound in stock prices. "Bearishness is pervasive, capitulation is pervasive," says Awad. "But every time there has been a panic like this, if investors bought stocks they made money." (WSJ, 8/8)

"The individual investor should use this [market decline] as an 1 opportunity, once things quiet down, to add to long-term portfolios the stocks that they wanted to buy," says TOM SCHLESINGER, a vice president and equity strategist at A.G. EDWARDS & SONS. "Our brokers are looking for stocks to buy, and that says something about the overall system and the long-term prospects." (NYT, 8/8)

FROM THE BEARS:

"I think we're in a bear market," says BERT DOHMEN of WELLINGTON MANAGEMENT CO. He thinks stocks have been hurt by a weak economy and high interest rates, and is predicting that the Dow may rally to 2800, but will then fall to its first "good support" at 2500. "The portfolios of many investors are underwater this year," says Dohmen. ("Investor's Daily", 8/8))

KENNETH SPENCE, director of technical analysis for SALOMON BROTHERS, says he expects the market to stabilize for a time between 2700 and 2750 on the Dow, but is pessimistic about a sustained rally from there. "This sell-off is fairly orderly," he says. "We don't have any significant institutional panicking. What that indicates to me is that there are still a lot of people left to sell." ("The Washington Post", 8/8)

P.Q. WALL believes the market has topped out until next Spring. He says, "3010.40 was it as an upside breakout scenario" and the probility of reaching that "has been demoted to a mere 10% probability." He adds that the market will find "an intermediate bottom in mid-October and the final bottom late in March 1991." (CNBC "Business View", 8/7)

STOCK MARKET:

"I think the message is getting through to individual investors not to disassemble a portfolio in a period of stress," says BRIAN MATTES, a vice president with the VANGUARD GROUP OF INVESTMENT COMPANIES. STEVEN NORWITZ, a vice president with T. ROWE PRICE ASSOCIATES, adds, "Investors are taking a wait-and-see attitude." (NYT, 8/8)

"We've all been turned into a group of event watchers and reactors to events," says ROBERT STOVALL of STOVALL/TWENTY-FIRST ADVISERS. "If anything, I expect if this continues we'll all profess to be interpreters of camel talk and tent gossip. ... We could see this going on for some time. I think, stepping back, I'd have to conclude that the market will stay under pressure for awhile longer unless there is some real reversal in the Iraqi attitudes." He continues saying the events in the Middle East will "cause the market to be very volatile, but in the background, I think, inflationary pressures are worse now than they were several weeks ago." Stovall's advice to the small investor is "to sit on their assets." (FNN "Marketwrap", 8/7)

"It would probably be best not to be doing a lot of selling now," says RICHARD McCABE, a first vice president at MERRILL LYNCH & COMPANY. MICHAEL SHERMAN, chief investment strategist with SHEARSON LEHMAN BROTHERS agrees: "I don't think you can predict how all this will come out or what it will all mean. Something that sounds right today could change tomorrow." (NYT, 8/8)

BOB BRINKER writes in "Marketimer" that the new price range "will be bounded by 3200 on the upside and 2600 on the downside." Given this scenario he recommends an overall equity weighting of 75% with "a 45% position in the U.S. and 30% in Europe" as "European markets have led the way." (CNBC "Business View", 8/7)

Reports of military activity in the Middle East made for a jittery market. "There's a lot of nervousness here," says JAMES ANDREWS, 2 first vice president in charge of institutional trading at JANNEY MONTGOMERY SCOTT INC. "But the Dow basically hung in there at 2700 and it seems like we may be finding a bottom shortly. People are starting to see light at the end of the tunnel. We're down about ten percent from the highs, and I've got to believe we're just about overdone here. The nervous nellies have already sold." (UPI, 8/7)

"It doesn't take much to shake the market up in here," says JEFFREY KAMINSKY of MABON, NUGENT & CO. He says stocks will be traversing "treacherous waters" until the Middle East crisis is resolved. (WSJ, 8/8)

"If the Iraqi situation settles down somehow and oil ends up down toward

the low 20s, then you have a much more favorable investment environment," says PETER CANELO, the chief investment strategist at BEAR, STEARNS & COMPANY. "Everyone understands this is the key to investment strategy. The problem is, there ain't nobody who knows where the price of oil is going to go." (NYT, 8/8)

"Don't forget, one of the things that has been driving world markets of late was the fact that walls were tumbling, democracy was spreading through the world, the Cold War was over," says MITCHELL MEISLER of LEHMAN BROTHERS. "But now we're facing with the realization that there is one area of the world where things haven't gotten better, but only worse." ("The Washington Post", 8/8)

"Most fund managers want to see the Treasury auction, the U.S. budget compromise and the Middle East crisis resolved before they commit heavily to the stock market," says PETER VANDENBERG, senior vide president at SHEARSON LEHMAN BROTHERS. (WSJ, 8/8)

SARA CERATO of NOMURA SECURITIES says portfolio managers were cautious about getting back into stocks yesterday because "they remember some of the slaughters where the courageous stepped back in" too soon in earlier sell-offs. She advises them to sit tight because the market has been had "by forces beyond our control. There's no solution on the horizon." ("USA Today", 8/8)

STOCK TIPS:

GRUNTAL & CO. recommends stock in DONALDSON CO., a Minneapolis-based maker of air cleaners, filters and exhaust systems used in factories and engines. It says the company's earnings should grow 32% in fiscal 1991 as major acquisitions are integrated and become profitable. ("USA Today", 8/8)

-30- 8395

#90220m0002 08/08/1990 ~Market Consensus Surveys

FALLS CHURCH, VA (AUG. 8) MCS -- A SAMPLING OF TODAY'S COMMENTARY COMPILED BY MARKET CONSENSUS SURVEYS, INC. IN TWO SECTIONS (1) STOCKS (2) MONEY & ECONOMY.

MONEY & CREDIT:

The U.S. dollar's enormous liquidity and investment opportunities still make it the safe haven currency, but VARICK MARTIN of MANUFACTURERS HANOVER says many are turning to the stability of the Swiss franc. "U.S. interest rates, fear of inflation may make money in the United States less valuable in the months and years ahead. There is some desire for stability and, of course, that's the Swiss franc." It may sound bloodthirsty, says

Martin, but coordinated military action against Iraq would be good for the dollar. (FNN "World Business Update", 8/8)

"The Fed learned [after the 1973 Arab oil embargo] that the thing you absolutely do not do is [push rates down] sharply after an oil shock," says JAMES SOLLOWAY, chief economist at ARGUS RESEARCH. LYLE GRAMLEY, chief economist at the MORTGAGE BANKERS ASSOCIATION and a former Fed governor, says he believes the Fed will stick to its announced long-range objective of bringing down inflation. ("USA Today", 8/8)

"We might very well see a 9% long bond by Friday," says BRIAN FABBRI, chief economist for MIDLAND MONTAGU ECONOMICS. Fabbri attributes this rate primarily to the breakdown in the budget process, inflationary fears and events in the Middle East. (CNN "Moneyline", 8/7)

"This is a [bond] market in a state of disarray," says JOE PLOCEK of McCARTHY, CRISANTI & MAFFEI. "It's completely buffeted by rumors." Consultant MARIA RAMIREZ of RAMIREZ CAPITAL CONSULTANTS calls the bond market "disastrous" and says, "Investors won't focus on the market when there's so much political uncertainty. They want cash and gold." ("USA Today", 8/8)

"As estimates of the oil-fueled inflation keep rising, it does not improve the environment for a record Treasury refunding or indeed for fixed-income securities in general," says DONALD STRASZHEIM, chief economist at MERRILL LYNCH CAPITAL MARKETS. "What also preoccupies the bond market is that the budget process in Washington has broken down. Now the Mideast crisis gives the Congress and the Administration perfect excuses not to act on the soaring budget deficit." (NYT, 8/8)

Treasury bonds rallied overnight on news that other OPEC members are willing to increase oil production. "This caused inflation fear to 1 be wrung out of the long bond, temporarily," says LAWRENCE LEUZZI, bond analyst at S. G. WARBURG, who is still looking for a topsy-turvy auction of the ten year note today and the thirty year bond tomorrow. One reason is the competitively high level of interest rates in Japan and Germany. Leuzzi looks for shorter dated issues to continue to rally and the yield curve to steepen as the yield between short and long term issues widens. (CNN "Business Morning", 8/8)

THE ECONOMY:

LAWRENCE KUDLOW, chief economist at BEAR, STEARNS & COMPANY, says he expects a mild recession lasting only six months or so, if the price of oil stabilizes at about $25. Should prices settle a bit higher at

$30, however, "the recession will be longer and deeper," lingering until mid-1991 or later. (NYT, 8/8)

Ten of the fifteen economists surveyed by CNN say we are close to a recession, but not yet in one. "We're near recession, [the economy is moving] about ten miles an hour," says DAVID JONES, chief economist at AUBREY G. LANSTON. Among those surveyed, only LACY HUNT of CARROLL McENTEE & McGINLEY thinks recession can still be avoided: "Even the stock market is not pointing to a recession yet. The stock market will normally decline for about four consecutive quarters from its peak to the start of a recession, and at most right now we have a one quarter decline." (CNN "Business Morning", 8/8)

"We're already in some sort of recession," says ALLEN SINAI, chief economist at BOSTON CO. "What else do you call it when consumer spending and business investment declined in two out of the three latest quarters?" DAVID HALE of KEMPER FINANCIAL SERVICES answers, calling the latest economic downturn "a cyclical cul-de-sac." ("BusinessWeek", 8/13)

"I certainly believe economic growth is going to be at best 0% - 1%," say BRIAN FABBRI, chief economist for MIDLAND MONTAGU ECONOMICS. His worst case scenario calls for recession throughout 1991. (CNN "Moneyline", 8/7)

The U.S. may have to suffer a recession as part of the price of stopping Iraqi strongman SADDAM HUSSEIN's grab for power in the Gulf, according to an unidentified SENIOR U.S. OFFICIAL. "We may have to take the hit. A recession is a real possibility." (Reuters, 8/7)

The inflationary impact of higher oil prices may be blunted by the weakness in the economy, reducing the likelihood of a repeat of the upward price spirals that accompanied fuel-price increases in the 1970s. "There is no doubt companies will try to raise prices to offset oil price hikes," explains CHARLES CLOUGH, chief investment strategist at MERRILL LYNCH & COMPANY. "The question is whether they can make the increases stick in the face of weak demand." (NYT, 8/8)

Consumer credit growth slowed in June to a 0.8% rate from a 6.1% pace in May, according to a Federal Reserve report yesterday. "Consumer spending is sluggish, so people are not extending themselves as far as credit is concerned," says ROSALIND WELLS, chief economist of the NATIONAL RETAIL MERCHANTS ASSOCIATION. "I don't think credit is really going to grow strongly." (WSJ, 8/8)

"We had a financial situation that was a bit like walking on eggshells and the oil crunch is like a Mack truck coming out and driving over the eggshells," says FRANCIS SCOTLAND, managing editor of the "International Bank Credit Analyst," a Montreal-based investment publication. ("The Washington Post", 8/8)

"Clearly the Saudis do want to overproduce ... particularly now that

they are pretty confident that the U.S. will come and prevent Saddem Hussein from entering Saudi Arabia without a visa," says NAUMAN BARAKAT, oil analyst with SHEARSON LEHMAN BROTHERS. But he cautions that new excess production from Saudi Arabia and Venezuela will take three to four weeks to come into the market. (FNN "World Business Update", 8/8)

IN WASHINGTON:

"The American public is angry -- they're mad as hell," says SENATOR RICHARD BRYAN (D. - NEV.) in Congressional testimony lambasting U.S. oil companies for price gouging consumers. SENATOR JOHN KERRY (D. - MASS.) asks, "How is it that gasoline that has already been paid for

that is sitting in a tank underneath the service station goes up 11 cents in three days?" ("Nightly Business Report", 8/7)

Critics of the savings and loan industry bailout say that the program is a failure. "It failed on two fronts," CATHERINE ENGLAND, a government affairs expert at the CATO INSTITUTE says of the program. "It didn't provide sufficient funding to clean up the mess that we have [and] it did not deal with the fundamental causes of the savings and loan crisis." (Reuters, 8/7)

Budget negotiators are growing increasingly worried that budget cuts will have a severe impact on the economy. "With the economy in a state of slow growth, people get worried that any adjustment will tip us over," says REP. BILL FRENZEL (R. - Minn.). House Budget Committee Chairman REP. LEON PANETTA (D. - Calif.) agrees, saying, "Obviously, we are going to have to make some adjustments based on what is happening with the economy." One of the problems being faced by the negotiators is an economy that has grown weaker since the original budget estimates were developed. (WSJ, 8/8)

#90220p3171 08/08/1990 ~PR Newswire

COEUR D'ALENE, IDAHO (AUG. 8) PR NEWSWIRE - Hecla Mining Co.'s (NYSE, PSE: HL) Yellow Pine Unit has resumed gold production, after a one-year suspension of operations in order to construct a new plant and heap leach pad at the site, the company said today. The Yellow Pine mine, located about 45 air miles east of McCall, Idaho, poured its first gold bar of the season on June 19. By the end of June, the gold mine had produced nearly 8,500 ounces of gold.

Yellow Pine produced about 21,000 ounces of gold during the 1988 season, using another company's heap leach facility located near the mine site. The mine is expected to produce about 60,000 ounces of gold this year, using Hecla's newly constructed gold recovery plant. Full production was

realized three days after plant start-up, with the first processed gold poured just 10 days later.

The Yellow Pine mine has an average grade of 0.08 ounce of gold per ton. Hecla's seasonal heap leach operation will process over 900,000 tons of ore during a seven-month season this year.

Existing oxide ore reserves at Yellow Pine are sufficient to produce about 20,000 ounces of gold during the 1991 mining season, in addition to the 60,000 ounces expected this year. Not included in the present mining operation is Hecla's large sulfide gold deposit at Yellow Pine estimated at between 15 and 20 million tons containing approximately 0.1 ounce of gold per ton.

Hecla Mining Co. is a leading domestic producer of newly mined silver and gold, and a supplier of premium ball clay, kaolin and specialty aggregates. The company has operations and projects under development in 12 states and three Canadian provinces.

#90220p3172 08/08/1990 ~PR Newswire

IRVINE, CA (AUG. 8) PR NEWSWIRE - The Computer Systems Division of Toshiba America Information Systems Inc. today announced a dramatic $800 price cut on the T1200XE notebook PC, from $3999 to $3199. Other price reductions were also implemented, all of which are effective immediately.

"As a leader in the laptop category, Toshiba has a tradition of providing superior value in terms of price/performance," stated Bill Johnson, vice president and general manager. "These price reductions maintain our leadership position by rapidly responding to recent competitive price reductions and new entries into the market.

"Given our exceptional feature set, the T1200XE once again sets the price/performance standard for 286 notebook PCs," Johnson said.

He pointed out that an independent study conducted in February 1990 documented the superiority of Toshiba's T1200XE. In the study, conducted by Lieberman Research West Inc., over 80 percent of PC business users polled selected the Toshiba laptop over the Compaq LTE.

"The T1200XE offers full functionality with a 20MB hard disk, superior keyboard, large high resolution sidelit supertwist LCD display, yet weighs only 8.1 lbs. and fits easily into a briefcase," Johnson said.

Other affected models include the Toshiba T1200HB, T1600/20T1600/40 and

T1000XE.

The T1600/20 (20 megabyte hard disk version) is now $3499, reduced from $3999, the T1600/40 (40 megabyte version), is now $3999, reduced from $4699. The T1000XE, previously $2699, is now selling for $2399.

Toshiba America Information Systems is a wholly owned subsidiary of Toshiba America Inc. Five divisions within TAIS market a wide range of office automation products within the United States. The Toshiba Computer Systems Division markets and supports high-quality Toshiba portable personal computers and peripherals for the United States marketplace.

#90220p3177 08/08/1990 ~PR Newswire

DURHAM, N.C. (AUG. 8) PR NEWSWIRE - Recent publicity regarding the weight loss industry has prompted many obese people to adopt a wait and see attitude toward dieting.

''That's a dangerous approach,'' said Susan S. Schiffman, Ph.D, professor of medical psychology and director of the obesity clinic, Duke University. Many people may be harming themselves by choosing not to lose weight.

She points to studies that indicate that obesity is a condition that can predispose people to many health problems, including heart disease, high blood pressure, diabetes and gallbladder disease.

Schiffman said that obese men and women are three to four times more likely to develop gallstones. This is supported by a statistic from the National Institute of Diabetes and Digestive and Kidney Disease that indicated that more than 500,000 Americans have their gallbladders surgically removed each year.

In addition, a study on the risks of developing cardiovascular disease found that the prevalence of coronary disease was approximately 2.0 times higher for the heaviest group of obese men and 2.4 times higher for the heaviest group of obese women both under the age of 50.

''Recently one of my patients told me that she was 'scared to diet' because of the unfounded danger being communicated to people,'' said Schiffman.

There have not been any studies linking health problems to a weight loss program comprising 1,000-1,500 calories per day, which is the desired

caloric intake while losing weight, according to Schiffman.

''When studies demonstrate that obese individuals show a high mortality rate from cancers of the colon, rectum, prostate, gallbladder, breast or uterus, the message is clear: obesity, not weight loss is the real danger '' Schiffman warned.

#90220p3179 08/08/1990 ~PR Newswire

LOS ANGELES (AUG. 8) PR NEWSWIRE - Pacific Enterprises (NYSE: PET) today announced a net loss of $229 million, or $3.34 per common share, for the second quarter. The loss included $275 million ($3.94 per share) in charges to earnings of the company's oil and gas and retailing businesses.

"Although these charges reduce income now, they should help to position our companies for future earnings growth. At the same time, the solid performance of our utility and our continued strong consolidated cash flow readily accommodate our dividend policy," said Pacific Enterprises Chairman James R. Ukropina.

Ukropina emphasized that although the company was reporting a loss, it continues to enjoy a healthy cash flow. He said that cash flow should be further enhanced by recent significant increases in oil prices.

Cash flow from operations totaled $148 million, or $2.07 per common share, compared with $155 million, or $2.36 per share for the second quarter of 1989. For the first six months of 1990, cash flow from operations was $330 million, or $4.65 per share, compared with $343 million, or $5.26 per share, for the same period a year ago.

Included in the charges against second quarter earnings were a $175 million ($2.51 per share) noncash write-down taken by the parent's Pacific Enterprises Oil Co. unit and a $100 million ($1.43 per share) charge by its Thrifty Corp. retailing business.

In announcing the quarterly results, Ukropina said a number of calculations and decisions were needed to determine the amount and timing of the charges. Final figures were only approved by senior management for recommendation to the board of directors just prior to the directors' Aug. 7 meeting.

In accordance with the Securities and Exchange Commission's full cost accounting rules, the oil company wrote down its oil and gas properties to reflect low energy prices in effect on June 30.

Ukropina noted that if current oil prices had prevailed on June 30, the company would not have had to take a write-down. The size of the write-down also was influenced by a decline in oil and gas reserves since the end of 1989.

The charge to retail operations, which represents 10 percent of retailing's assets, is part of an intensive review of retail group operations by corporate and retail management aimed at improving Thrifty's earnings performance over time. The company has identified preliminary steps to be taken, including accelerated closings of marginal stores, inventory adjustments and organizational changes.

In its retailing business, Ukropina announced that Richard G. Eils, 52, Thrifty president and chief executive officer, resigned to pursue other interests.

Daniel A. Seigel, 48, executive vice president, was named president and chief operating officer, effective immediately. Before joining Thrifty, Seigel served as president of two other Pacific Enterprises subsidiaries -- Pacific Energy and Pacific Enterprises Leasing Co. Leonard H. Straus continues as chairman.

Excluding the $275 million charge, but including an $11 million (16 cents per share) depletion benefit resulting from the oil and gas write-down, net income was $46 million, or 60 cents per share, for the second quarter of 1990.

For the second quarter of 1989, the company reported net income of $53 million, or 78 cents per share.

Reflecting the write-down, Pacific Enterprises reported a net loss of $161 million, or $2.44 per share, for the first six months of 1990. The company reported net income of $120 million, or $1.80 per share, for the same period of 1989. Excluding the $275 million charge but including the depletion benefit, net income for the first six months of 1990 was $114 million, or $1.53 per share.

Ukropina noted that the per share figures reflected an 8 percent increase in the weighted average number of common shares outstanding since the second quarter of 1989. For the second quarter of 1990, the company's weighted average number of shares was 69.8 million.

Consolidated operating revenues for the quarter ended June 30, 1990, totaled $1.6 billion, compared with $1.5 billion for the same quarter a year ago. For the year-to-date, consolidated operating revenues were $3.5 billion, compared with $3.4 billion for the same period of 1989.

Interest expense after taxes was $30 million for the second quarter of

1990, the same as last year.

Pacific Enterprises, with headquarters in Los Angeles, also owns Southern California Gas Co., the nation's largest natural gas distribution utility.
  Its Los Angeles-based Thrifty Corp. is a drug store and sporting goods chain retailer with more than 1,000 stores. Pacific Enterprises Oil Co., headquartered in Dallas, is a leading independent oil and gas company with operations concentrated onshore in the United States.

#90220p3191 08/08/1990 ~PR Newswire

NEW YORK (AUG. 8) PR NEWSWIRE - A California psychologist, dressed as a bum, will be panhandling in various sections of New York City, from Sunday afternoon Aug. 12 until Tuesday evening Aug. 14, 1990, to study people's reactions toward beggars. Media will be able to contact the researcher while he is on the street, via his cellular telephone, to get updates on his experiences.

Psychologist Robert R. Butterworth, Ph.D., wearing three rumpled shirts, a week's growth of beard, a disheveled appearance but with a concealed microphone up his sleeve, conducted a research project in May to discover firsthand, how beggars are treated on the streets of Los Angeles.

Now it's the Big Apple's turn to be tested. Butterworth will be experiencing firsthand how New York attitudes toward it's beggars differ from Los Angeles.

Butterworth's account of his experiences as a street panhandler in Los Angeles was chronicled in a story in the Los Angeles Times , (May 20, 1990; View section, page 1) titled, "Psychologist Goes Panhandling on the Streets of L.A. -- Not able to make minimum wage but rarely encountered hostility."

"Looking like a panhandler I said, 'Gotta Nickel?' in various sections of Los Angeles. I rarely met hostility but couldn't make minimum wage getting an average of 85 cents an hour -- Adult males gave the most, females over 50 ignored me and teenagers were the most annoying. My overall impression was that Los Angeles does not treat it's panhandlers harshly," according to Butterworth in the L.A. Times story.

The story stirred up, mixed emotions regarding people's feelings toward panhandlers. However, the Los Angeles' researcher feels for this study to be representative of the United States he needs to focus on an East Coast city.

Accordingly, Butterworth dressed as a bum and wired for sound will be begging on the streets of Manhattan by day, and sleeping in his car at night. He will be equipped with a cellular telephone so he can be contacted for updates. Stuffed in his sock will be an American Express Card and recent press clippings in case he is arrested.

Psychologist Robert R. Butterworth, Ph.D., is president of Contemporary Psychology Associates Inc., a counseling and research organization in Los Angeles. Butterworth's comments, observations and surveys have appeared in print and broadcast media throughout the United States and Europe.

WHEN: Sunday Aug. 12 starting at 4 p.m., until Tuesday, Aug. 14 at 6 p.m.

WHERE: Media sources can call Butterworth via his cellular phone to check on his daily progress and current location in Manhattan. Cellular phone no. 212-359-3719 activated on Aug. 12, 1990, 4 p.m. 4 p.m. Phone contact before Aug. 12, 213-487-7339.

CONTACT: Robert R. Butterworth, Ph.D., of Contemporary Psychology Associates, 213-487-7339 (24 hours)

SAN FRANCISCO (AUG. 8) PR NEWSWIRE - Transcisco Industries (AMEX: TNIA/TNIB) announced today that its 20 percent owned joint venture railcar leasing unit, SOVFINAMTRANS, has leased 830 additional Uni-Temp equipped tank cars. SOVFINAMTRANS is a joint venture owned by the Ministry of Rail and Petro Chemicals of the U.S.S.R., HAKA Corp. of Finland and Transcisco Trading Co., a subsidiary of Transcisco Industries Inc. SOVFINAMTRANS will purchase the Uni-Temp heating systems from Transcisco Trading Co. and install them in existing Soviet tank cars in Finland and the U.S.S.R. With the addition of these 830 leased tank cars, SOVFINAMTRANS will now have a fleet of over 1,300 Uni-Temp equipped heated tank cars. SOVFINAMTRANS also operates an additional 1,500 non Uni-Temp equippped tank cars and is the first and only railcar leasing company in the U.S.S.R.

Mark C. Hungerford, chairman of Transcisco Industries, said, "This new order of Uni-Temp equipped tank cars in the U.S.S.R. validates the tremendous technical performance and market acceptance of Uni-Temp tank cars both in the U.S.S.R. and by its export customers in Western Europe. We expect to begin delivery this fall and continue deliveries into 1991. SOVFINAMTRANS anticipates adding more Uni-Temp equipped tank cars to its lease fleet in the future. Adequate financing can be obtained for these tank cars because of the very positive financial and operating performance of SOVFINAMTRANS since it founding in 1989."

Transcisco Industries operates railcar maintenance and retrofitting operations through its Transcisco Rail Services division and its wholly owned subsidiary, Transcisco Tours, operates a dinner train in San Antonio Texas. Transcisco owns 36 percent of PLM International, an AMEX-listed diversified equipment leasing company, and Transcisco also owns 20 percent of SOVFINAMTRANS, a U.S.S.R. railcar leasing company that operates tank cars with Trancisco's Uni-Temp heating system. Trancisco expects to diversify its exposure, both in equipment-types and geography, to proprietary transportation equipment, parts and operating businesses using its own unique technologies and its proven financing skills.

SAN DIMAS, CALIF. (AUG. 8) PR NEWSWIRE - Vestar Inc. (NASDAQ: VSTR) announced today that it has been granted U.S. patent No. 4,946,683, which covers an efficient method for the preparation of liposomes containing the cancer drugs doxorubicin or daunorubicin. The claims encompass a wide variety of liposome formulations without limitations as to size. The process enables the drugs to be added to preformed liposomes such that the drugs are fully taken up into the internal part of the liposome by the end of the process.

Dr. Roger J. Crossley, president and chief executive officer, of Vestar, said, "We see this as a very important patent for Vestar since the process covered by this patent encompasses a highly effective method used by Vestar in developing its doxorubicin and daunorubicin anticancer agents."

Vestar currently holds 9 U.S. patents, 3 of which have been issued in 7-11 foreign countries, with 21 U.S. and 306 foreign patents pending. Vestar has also licensed rights under 3 additional U.S. patents.

Vestar Inc. is a pharmaceutical company focused on the development of therapeutic and diagnostic agents for cancer, AIDS, and related diseases.

STAMFORD, CT (AUG. 8) PR NEWSWIRE - Vestron Inc. (NYSE: VV) has announced the sale of its wholly owned subsidiary, Vestron Pictures Japan, to ASCII Corporation.

Vestron launched its Japan operations in 1984 with the groundbreaking home video success "Making Michael Jackson's Thriller." The company distributes motion pictures in all media through its own sales and marketing organization based in Tokyo with a branch office in Osaka.

In conjunction with the sale of its Japan subsidiary, Vestron has executed a multiyear license agreement covering theatrical, non-theatrical, home video and television catalog, including "The Princess Bride," "Hamburger Hill," "Young Guns" and "Dirty Dancing."

ASCII's acquisition includes completed product for release during 1990/1991 including the thriller "Blue Steel," starring Jamie Lee Curtis and Ron Silver, and "Back Track," starring Dennis Hopper and Oscar- winner Jodie Foster.

ASCII Corporation is a worldwide organization with diverse interests related to the personal computer market including book and magazine publishing and the development, manufacture and marketing of computer networking services and software.

All of Vestron's Japan management and staff, headed by Managing Director Dick Sano, have been retained by ASCII. Vestron's Japan home video rights will continue to be marketed under the Vestron Video International label by the new organization to be known as ASCII-Vestron Pictures Japan.

Jon R. Peisinger, chairman of Vestron International Group, stated: "The sale of Vestron Japan reflects Vestron Inc.'s previously announced intention of divesting itself of certain assets and operating units. We are pleased to have reached an agreement with ASCII, which assures us that Vestron's product for the Japan market will continue to be in strong hands."

#90220p3201 08/08/1990 ~PR Newswire

CANTON, OH (AUG. 8) PR NEWSWIRE - In one of the largest ATM orders placed this year, Bank One, Texas, NA is purchasing 400 automated teller machines (ATMs) from Diebold, Incorporated (NYSE: DBD) primarily for installation in Diamond Shamrock-owned convenience stores in Texas.

Bank One will install more than 350 Diebold Modular Delivery System 1060 compact cash dispensers in Diamond Shamrock-owned stores, while the other 1060s will be used in other off-premises locations. The multi-million dollar order also includes pedestals, signage towers and video surveillance cameras for the cash dispensers.

Installation will begin in San Antonio in September with replacement of 84 competitive machines owned by a former savings and loan organization. About half of the machines will be installed in 1990, with the remainder set to be installed by mid-1991.

Purchase of the Diebold machines is an important step in expanding Banc One's ATM network, according to Dominick. The bank will have over 500 machines in Texas, and Banc One Corporation (NYSE: ONE), based in Columbus Ohio, will then have over 1,000 ATMs nationally, making it the sixth largest bank ATM network in the United States.

Banc One Corporation has assets of $27.9 billion, not including Bank One, Texas, and common equity of $2.69 million as of June 30, 1990; Bank One, Texas reported assets of $13.1 billion. Banc One Corporation now operates banking organizations in Indiana, Kentucky, Michigan, Ohio, Wisconsin and Texas with 716 offices.

Diebold, Incorporated is a world leader in the automation of self- service transactions, security products, software and service for these systems. Headquartered in Canton, Ohio, Diebold maintains offices worldwide.

#90220p3203 08/08/1990 ~PR Newswire

BUFFALO, NY (AUG. 8) PR NEWSWIRE - Integrated Waste Services, Inc. (NASDAQ: IWSI) today reported record revenues and earnings for the second quarter and first half of 1990, ended June 30, 1990. Revenues for the second quarter were up 79 percent to $4.1 million, from $2.3 million for

the comparable 1989 period.

Net income for the quarter ending June 30, 1990, was $449,093, representing an increase of 192 percent from the $153,558 reported for the second quarter of 1989. Earnings per share were $0.10 for the recent quarter, compared with $0.05 per share in the 1989 period, with a larger number of weighted average shares outstanding in the 1990 period due to the company's initial public offering.

For the first half of 1990 the Company's revenues were up by 72 percent to $7.3 million, compared with $4.3 million for the 1989 period. Net income for the first half of 1990 was $620,093, representing a 140 percent increase from the $258,558 earned in the first half of 1989. Earnings per share for the first six months of 1990 were $0.17 on a larger number of weighted average shares outstanding, versus $0.09 per share for the similar 1989 period.

James H. Williams, chairman of the board and chief executive officer, said "Our record performance for the first half of 1990 was primarily due to significant profit margin improvement. Several of our operations began to achieve higher levels of productivity, in particular our Buffalo Transfer Station and Construction and Demolition Landfill."

He noted that the company's net profit margin widened to 19 percent in the second quarter of 1990 from 11 percent in the comparable 1989 period.

Reviewing the outlook for the remainder of 1990, Williams said, "We expect the second half of 1990 to equal or exceed the first half in profitability. The robust growth in our Buffalo Transfer Station is expected to continue throughout the rest of the year. In addition, we expect growth in earnings from our Construction and Demolition Landfill, where we are currently the only licensed operator in the region."

Williams added, "Our acquisition of a 200 acre facility near Buffalo for a sanitary landfill should prove to be very profitable once it is operational. We are currently waiting to obtain the necessary permits and expect to receive them within the next year."

Integrated Waste Services, Inc. of Buffalo is a non-hazardous waste management company which provides solid waste management services to governmental, commercial and industrial customers. The company's services include collection, transfer, disposal and recycling of solid waste, and tire shredding and slitting, including on-site remediation of tire stockpiles.

Integrated Waste Services, Inc. completed its initial public offering on May 14, 1990. The company sold 2,587,500 shares providing gross proceeds of $12,937,500.

PHILADELPHIA (AUG. 8) PR NEWSWIRE - SmithKline Beecham (NYSE: SBH) announced todaythat second quarter sales from continuing operations increased 9 percent to $1,966 million (1,130 million pounds sterling) and operating profit (trading profit) from continuing operations increased 30 percent to $393 million (226 million pounds), compared to the second quarter of 1989.

Reflecting this strong operating performance, and despite higher interest arising from the merger, pre-tax profits rose 6 percent to $343 million (197 million pounds) compared to $322 million (185 million pounds) in the second quarter of 1989. Interest expense in the second quarter was $52 million (30 million pounds) compared to $2 million (1 million pounds) for the second quarter of 1989. However, compared to the first quarter 1990, interest expense fell by 45 percent, reflecting the reduction in SmithKline Beecham's debt to $1,430 million (822 million pounds) on June 30, 1990.

Earnings for the quarter rose 2 percent to 16.2 cents (9.3 pence) per Ordinary Share and $0.81 (46.5 pence) per Equity Unit compared to the second quarter last year. The average number of shares outstanding increased 3 percent to 1,325 million from 1,289 million.

For the first six months of 1990, sales and trading profit from continuing operations were up 14 percent and 27 percent respectively. On a pro forma basis, profit before tax rose 34 percent and earnings per share rose 26 percent.

Operating profit growth for the second quarter was not materially affected by movements in exchange rates. Operating profits for six months gained 4 percent due to the effect of currency fluctuations.

Robert P. Bauman, chief executive, stated: "The second quarter performance was highlighted by continued sales growth, strong operating profit and significant debt reduction.

Henry Wendt, chairman, said: "Our results this quarter continued in line with our expectations. We are pleased with the accomplishments of SmithKline Beecham's first year."

CONTACT: Jeremy Heymsfeld, 215-751-5166, or Richard Williams (Financial) 215-751-7002, both of Smithkline Beecham

#90220p3205 08/08/1990 ~PR Newswire

NEW YORK (AUG. 8) PR NEWSWIRE - A spokesman for Jay H. Shidler and Robert W. Holman announced today that their consent solicitation materials to replace Grossman's Inc. (NASDAQ: GROS) current board of directors with their own nominees have been finalized. Solicitation of the company shareholders' consents will begin immediately.

The Shidler/Holman Group has been the second largest beneficial owner of Grossman's shares for the past 19 months. The Group made proposals to acquire all of the company's common shares on June 9, 1989, for $10.25 per share and 83 percent of the common shares for $9.00 per share on Oct. 21, 1989. The company's board of directors judged this second proposal as "not fair and adequate."

According to Shidler/Holman Group's spokesperson, the Group is committed to "taking all necessary steps to realize value for all Grossman's shareholders" in contrast to the failure of the company's highly publicized "value enhancement" program and the currently depressed stock price.

The Group's specific plans for creating value for Grossman's shareholders addresses what they believe is a fundamentally flawed strategy by the company to take on the industry giants like Home Depot in head to head competition. The Shidler/Holman Group also proposes a restructuring of Grossman's balance sheet to refinance subordinated debt and provide additional working capital, which could also be used in conjunction with a share repurchase program.

The nine nominees proposed by the Shidler/Holman Group to replace the current Grossman's board members are:

-- Jay H. Shidler, of Honolulu. Managing partner of the Shidler Group, a nationwide investment organization founded in 1972 investing in corporate securities, corporate sale-leaseback transactions, and commercial real estate properties.

-- Robert W. Holman Jr., of San Francisco. Chairman and CEO of Holman/Shidler Investment Corporation, specialists in corporate sale/leasebacks transactions.

-- W. Allen Doane, of Philadelphia. Currently chief operating officer of the Shidler Group and previously group vice president of IU International, a $1.6 billion revenue corporation.

-- Robert Harrow, of Newton, Mass. A 17-year veteran of Grossman's, he was most recently executive vice president before leaving the company in 1989.

-- Stephen Oresman, of Greenwich, Conn. Partner and president of the Canaan Group, Ltd., a management consulting firm, and previously president of the BBDO International advertising agency and chairman of Booz Allen & Hamilton, International.

-- Peter J. Elrick, of New York. Managing director of Elrick Capital Incorporated, an investment banking firm, and a former vice president of Allen & Co., Inc.

-- Stuart Rose, of Dayton, Ohio. Chairman and CEO of Audio/Video Affiliates, Inc., a NYSE retailer of consumer electronics.

-- James Rodden, of Honolulu. A private investor and former president of Monarch Building Supply, a privately owned building supplies wholesaler.

-- Stephen Cucchiaro, of Boston. Management consultant and former president and co-founder of Datext, Inc., a business information services company.

Jefferies & Company, Inc., is serving as financial advisor to the Shidler/Holman Group in connection with the consent solicitation and D. F. King & Co., Inc., is serving as the Group's consent solicitor.

Copies of the consent solicitation materials may be obtained from D. F. King & Co., Inc., 77 Water St., New York, NY 10005 (telephone 212-269-5550 collect or toll-free 1-800-522-5001).

TORRANCE, CALIF. (AUG. 8) PR NEWSWIRE - Ashton-Tate Corp. (NASDAQ: TATE) today announced it will feature the recently-released dBASE IV version 1.1 and demonstrations of prototype cross-platform ports for that product, at its forthcoming Technical Conference, Sept. 9-12, 1990, in Anaheim, Calif.

The conference will offer 40 technical sessions, many of which will highlight dBASE IV version 1.1 programming and usage tips, techniques and insights. Session topics include What's New in dBASE IV version 1.1; Programming Techniques for Multiuser Applications; Getting the Most out of Windowing and Menus; and Optimizing dBASE Applications for Performance.

"Our technical conference comes at a perfect time following the recent release of dBASE IV version 1.1," said Ron Dennis, head of Developer Services at Ashton-Tate. "There are many people out there who have a lot of questions about the product, and we have assembled a faculty of the most knowledgeable dBASE product experts to provide the answers."

Dennis said the conference will feature more than 70 speakers in all, including such noted dBASE product experts as Robert Davies, president, SBT Corp.; Adam Green, author and lecturer; Tony Lima, author and president of Pacific System Design Workshop Inc.; Michael Masterson, president of the Silicon Valley dBASE User Group; and Dr. Peter L. Olympia president of Darwin Systems.

During general sessions, Ashton-Tate executives and technologists, including president Bill Lyons, are scheduled to brief conference attendees on the company's strategies and plans. Heading discussion topics will be an update on Ashton-Tate's efforts to port dBASE IV to new hardware and operating system platforms.

Headquartered in Torrance, Ashton-Tate Corp. develops and markets microcomputer business applications and advanced connectivity software. The company's major product categories include database management systems word processing, integrated decision support, spreadsheets, graphics and software utilities. Ashton-Tate is an international company with products available in 20 languages in more than 50 countries. The company also offers a comprehensive line of consulting, training and support services for individuals, corporations and government agencies.

AUSTIN, TX (AUG. 8) PR NEWSWIRE - GONOSTAT, a genetic transformation test (GTT) for the detection of gonococcal infection, will be available for use in clinical and reference laboratories in reagent form in September, it was announced today by GenTrans Technology Inc., an Austin-based microbiology company.

The GONOSTAT test, which had previously been available only through the direct mail of specimens to the company's own reference laboratory, will be marketed in 40-test, reagent kits for use in other public and private laboratories.

The company, which recently acquired Technology Management & Marketing Inc. (TMMI) for the purpose of manufacturing and marketing the new reagent has completed construction of a manufacturing facility near Austin. Manufacturing prototype work and regulatory reviews are scheduled to be completed in August.

GONOSTAT is based on the detection of gonococcal DNA in clinical material and is independent of living gonococcal organism. It is a culture-based test similar to the long-established, standard gonorrhea culture methodology which depended on the living specimen reaching a laboratory. GONOSTAT has similar high specificity and sensitivity to the culture method, but does not require the costly and complicated transport of specimen under strict environmental conditions.

GenTrans Technology (which continues to operate TMMI's clinical laboratory at San Antonio) will initially direct its marketing program toward public health laboratories throughout the United States. Public health historically conducts most gonorrhea testing in the United States, and the GONOSTAT process is designed for larger volume testing and screening programs, such as state and regional public health, planned parenthood, and family planning, which require a highly- efficient, cost-effective method for testing.

GONOSTAT received 510K marketing clearance in August 1989 from the Food and Drug Administration.

GONOSTAT allows specimen to be shipped even by regular mail in transit for as long as 20 days, and specimen are not affected by heat or cold while in transit. Since the GONOSTAT test is conducted from the extract of DNA from patient samples, only the dry swab used for collecting samples must be shipped. The swab does not have to be shipped to the processing lab in special containers or under prepared environmental conditions.

The GONOSTAT Reagent's ease-of-use at the laboratory is enhanced by its similarity to standard culture methodology, and its compatibility with existing equipment found in most large clinical laboratories.

#90220p3214 08/08/1990 ~PR Newswire

IRVINE, CA (AUG. 8) PR NEWSWIRE - Corollary Inc. today announced an agreement with European Marketing & Sales Ltd. (EMS) of Heathrow, England, to develop distribution channels in Europe for Corollary's multiport products.

Corollary's family of Serial I/O Subsystems are used by leading PC OEMs who want to provide support for multiple users.

"We have been very successful in the U.S. through OEM agreements with Digital Equipment Corp. and Hewlett-Packard," said George White, president of Corollary. "With the help of EMS, we expect to achieve the same level of success in Europe."

Over the past eight years, EMS has developed export markets for companies such as Compaq, Lotus, Sequent, Cygnet and MIPS, by securing large contracts for volume distribution and OEM channels in both Europe and Asia.

Corollary's agreement with EMS encompasses Europe's fastest-growing high-tech markets: The United Kingdom, Germany, France, Benelux, Scandinavia, Spain and Italy.

"We are excited about the opportunity to work with Corollary because of its leadership in the UNIX-based PC marketplace," said Carter Alexander, president of EMS. "Corollary is setting the de facto standard in PC multiprocessing, and its multiport products are used by two of the world's leading computer companies."

Corollary's multiport product family currently consists of the 8x4 Serial I/O Subsystem, which supports 286, 386 and 486 ISA, EISA and Micro Channel-based computers. A single 8x4 card provides high-speed support for 32 terminals from one slot; up to four cards may be used to support 128 users.

Corollary Inc. develops, manufactures and markets proprietary high-performance hardware and software products that extend the power of 386- and 486-based PCs running the UNIX operating system by increasing processing capacity via multiprocessor technology and by providing support for multiple users.

CONTACT: Judi Uttal of Corollary Inc., 714-250-4040, or Margaret Burger of Miller Communications, 213-822-4669, for Corollary Inc., or Pip Smith of EMS, 415-433-4344, or Carter Alexander of EMS (United Kingdom), 44-81-759-4192

BOSTON (AUG. 8) PR NEWSWIRE - Radius Inc.(TM) today announced an open standard for the calibration of color display systems for Macintosh II computers. The Radius PrecisionColor(TM) Calibrator which supports multiple color reproduction standards, will now also support third party manufacturers' display systems. With the PrecisionColor Calibrator standard graphic designers and publishing professionals can specify colors at the design stage that can be accurately reproduced at the proofing and, most importantly, production stages.

PrecisionColor Calibrator Software Version 1.2 supports multiple color reproduction standards including PANTONE(R) (Pantone Inc.'s check-standard trademark for color reproduction and color reproduction materials.) Color Simulations, ANPA-COLOR(TM), and AD-LITHO(R)/AdPro(R) ROP Newspaper Color standards. Third party software developers that support the PrecisionColor Calibrator standard include Adobe Systems Inc., Letraset U.S.A., and Quark Inc. PrecisionColor Calibrator is also supported by third party printer manufacturers including QMS Inc. and Nikon Inc.

With today's announcement, the Radius PrecisionColor Calibrator is now compatible with the complete line of Radius displays, Apples's 13 inch RGB Color Monitor and selected third party Sony Trinitron displays, including those marketed by manufacturers such as E-Machines Inc., RasterOps Corp. and SuperMac Technologies.

"With the support of third party displays, only the Radius PrecisionColor Calibrator can provide an open solution that assures color accuracy and color fidelity across a wide variety of applications, and a number of different displays and printers," continued Bailey.

The Radius PrecisionColor Calibrator corrects individual display biases and calibrates the display to achieve accurate color simulations resulting in on-screen colors which can be accurately reproduced through the production process. It also displays accurate and repeatable gray scale values for professional black and white image processing.

Developed for graphics and publishing professionals, PrecisionColor Calibrator combines optical sensing hardware with Radius proprietary software.

To calibrate a display, the user selects the PrecisionColor icon in the Control Panel, and places the optical sensor on the screen. Calibration is simple and takes up to three minutes.

PrecisionColor achieves color consistency and accuracy by measuring light

output from the display and adjusting the display system. By adjusting the color temperature and gamma settings, a single display may be set to achieve any number of design objectives. In addition, displays in remote design locations may be calibrated to one another.

Color temperature control allows the user to compensate for various lighting conditions and variations in software applications. Gamma settings for scanning devices improve the display of scanned images so that all details, even those in shadows, appear accurately on screen. Gamma settings which display captured video images as they would appear on an NTSC (composite) display may also be chosen.

An Apple Desktop Bus Device (ADB), PrecisionColor installs with no more difficulty than a keyboard. When not in use, the optical sensing device stores in the base recess. PrecisionColor Calibrator requires any member of the Macintosh II family of computers with a minimum of 8- bit display capability.

Software products which will support the PrecisionColor Calibrator standard through the toolkit include: Adobe Illustrator 88(R), Aldus FreeHand(TM), Aldus PageMaker(R) Color Extension, Crosfield Lightspeed Color Layout System(R), Letraset ColorStudio(TM), Letraset DesignStudio(TM), Letraset LetraStudio(TM), Letraset Ready Set Go!, Electronic Arts Studio 32 and Quark XPress. Printer products include: Oce Graphics G5232 Color PostScript(R) Printer, QMS ColorScript 100 Printers, NEC Technologies, Nikon and Tektronix. Price and Availability

PrecisionColor Calibrator Software v1.2 will be included with every PrecisionColor Calibrator shipped in the fourth quarter. Current PrecisionColor Calibrator owners may obtain PrecisionColor Calibrator Software v1.2 from their local Radius Authorized Reseller. It may also be obtained electronically from AppleLink under the Radius icon, from CompuServe at 76004, 2155, from America On Line at RadiusDS, or from Connect at Radius.tech.

Radius, Radius Inc., the Radius logo, and Radius PrecisionColor are trademarks of Radius Inc. Other brand and product names are trademarks or registered trademarks of their respective holders.

DEARBORN, MICH. (AUG. 8) PR NEWSWIRE - The waiting is over, in more ways than one.

Today, the centralization of Ford Motor Company's (NYSE: F) Customer

Assistance Center is complete, as the last three of the Ford Parts and Service Division's 28 districts are brought on-line and all customer assistance requests are now handled by a Ford team stationed on three floors in Detroit's Renaissance Center.

Lee Miskowski, Ford vice president and general manager of the Ford Parts and Service Division, marked the launch of the center by personally handling a customer phone call.

With the consolidation complete, and a new national toll-free phone number in place, all customer calls and letters are being handled at the national center, meaning higher accessibility and quicker responses than ever for Ford and Lincoln-Mercury owners.

"Our goal is 95-percent customer accessibility on the first call for customers who call the center," said Al White, owner relations operations manager.

"Gone forever are the days when customers would call, get a ring, keep waiting but never get an answer," he added. "The move to centralization with one toll-free number for customers across the country was done for only one reason -- to improve customer satisfaction."

The Customer Assistance Center began handling inquiries from some parts of the country in March of this year. With the centralization complete, all calls that previously went to individual district offices now come to the national center, via the toll-free number: 1-800-392-3673 (FORD).

Customers who call the old district owner relations number now receive a phone recording of the new toll-free number. Starting in the 1991 model year, owner guides in every Ford-built car and truck sold in the U.S. will contain the new toll-free number.

BEDFORD, MASS. (AUG. 8) PR NEWSWIRE - Computervision, a Prime Company, today introduced a new series of aggressively priced solutions for computer-aided engineering, design, and manufacturing (CAE/CAD/CAM) based on the new SPARCStation IPC from Sun Microsystems.

The new CADDSolutions couple Computervision's integrated CADDS 4X CAE/CAD/CAM software with the Sun SPARCStation IPC workstation. The systems offer performance of 15.8 MIPS, greatly expanded memory and storage capability, and a warranty extended to one year, at a savings of up to 15 percent off previous systems. Prices for an entry level

drafting seat are as low as $23,995, and a fully configured mechanical design system is available from $41,400.

An entry level drafting seat, BabyCADDS 42F/CADDSdraft, on the new SPARCStation IPC is now priced at $23,995, reduced from $28,900. The new system provides greater memory and storage capacity than the previous system, as well as a one-year warranty. With CADDSdraft, users can view, manipulate, and detail product models and drawings created on any CADDS 4X system without the data conversion and translation required from other low-cost drafting tools. The entry level system provides many features of the full CADDS software, including associativity between 3-D models and 2-D drawings, and the ability to meet full ANSI, ISO, JIS, and DIN dimensioning specifications. In addition to its lower price, the new 42F/CADDSdraft offers customers expanded software options and an upgrade path to a full CADDSolution.

"The recent advances in Sun's hardware makes it possible for us to deliver much greater capability to our customers is a more cost- effective package " said Massood Zarrabian, Computervision vice president for CADDS marketing. "With these new systems, manufacturing firms can distribute the power of CADDS to more designers and engineers throughout their organizations."

NOTE: Computervision, the Computervision logo and CADDS are registered trademarks of Computervision Corporation, a division of Prime Computer, Inc. Sun is a registered trademark and SPARC and SPARCStation are trademarks of Sun Microsystems, Inc.

FORT WASHINGTON, PA. (AUG. 8) PR NEWSWIRE - Rhone-Poulenc Rorer Inc. (NYSE: RPR) today announced that it is considering divestiture of its Dermik Laboratories subsidiary, with the objective of obtaining prescription product lines in exchange.

Dermik Laboratories will have projected sales in 1990 in excess of $42 million and income before taxes and interest of $15.4 million, reflecting continued strong profitability, cash flow and growth. Dermik Laboratories competes in the topical steroid and acne segments of the dermatological marketplace and currently ranks third in sales overall among other dermatological specialty companies.

Rhone-Poulenc Rorer is seeking to offer Dermik in exchange for product lines that better fit the company's strategic direction in human pharmaceuticals (cardiovascular, allergy/inflammation, cancer, infectious

disease, central nervous system, and bone metabolism). Rhone-Poulenc Rorer said it believes that Dermik will be strategically attractive to a company whose R&D focus includes dermatology.

Rhone-Poulenc Rorer Inc. is a global pharmaceutical company dedicated to the discovery, development, manufacturing and marketing of human pharmaceuticals. With worldwide sales of more than $3 billion and R&D expenditures of $400 million, the company operates in all major markets of the world.

OAKBROOK TERRACE, ILL. (AUG. 7) PR NEWSWIRE - Telesphere Communications Inc. (AMEX: TSP), a full service long distance telephone company and a leading provider of interactive 900 network services, today announced that it has signed an agreement with Voice Control Systems of Dallas, to integrate voice recognition and speaker verification technology into Telesphere's TravelNet calling card. Available later this year, the new feature will allow users to speak, instead of dial, authorization codes and destination telephone numbers.

According to Scott Moster, Telesphere's director of product marketing, the new voice recognition capability will allow Telesphere cardholders to select their own authorization codes rather than use numbers assigned to them by the carrier. In addition, speed-dial feature will allow cardholders to reach frequently called numbers with spoken commands such as "home" or "office."

A further advantage of the new capability is that fraud resulting from lost or stolen credit cards will be minimized, since a thief would have to be able to imitate accurately the owner's voice when trying to make an unauthorized call.

"We're proud to be a pioneer in using state-of-the-art voice processing technologies as part of our calling card system" commented Moster. "Voice recognition represents a major feature enhancement to our long distance service offering. It will also allow us to offer calling card services to rotary dial as well as touch-tone telephone users."

Voice Control Systems is a privately held Dallas-Based manufacturer of enhanced voice processing products. The company is the world's leading provider of speaker-independent voice recognition technology, with more than 25,000 systems in use worldwide. VCS technology spans a variety of applications, including interactive voice response, telephone operator automation, cellular "hands-free" dialing and consumer electronics.

Telesphere Communications Inc. operates a nationwide, state-of-the- art digital fiber optic network over which it provides long distance, operator interactive 900 and other enhanced telecommunications services.

TRAVERSE CITY, MICH. (AUG. 8) PR NEWSWIRE - To work more effectively with all of its stakeholders, General Motors is forming a new GM Supplier Policy Forum, GM President Lloyd E. Reuss announced today. The forum will provide the supplier community with specific opportunities to interact with top GM policymakers on cross-divisional and corporate issues.

In a keynote address at the University of Michigan Management Briefing Seminar, Reuss said that the new forum is part of an overall effort to "profitably regain North American market share."

Reuss said this will be achieved by listening closely to customers and delivering the products they want, with a balance of "quality, cost, speed to market and total customer satisfaction" with the entire ownership experience.

In addition, he said, GM would leverage its specific assets -- its nameplates, customer base, dealer body and technological resources -- into competitive advantages.

Reuss said that GM's strategy is a decentralized one that balances corporate "strategic coordination" with "local freedom of execution." He emphasized that the new GM management team "is (now) moving the organization and all of its partners into an action mode," shifting from the "what" of strategizing to the "how" of execution.

Echoing the theme of the conference -- "Managing Paradoxes" -- Reuss said that the contradictions that face the industry, such as stimulating employee loyalty while under intense competitive pressures, can be managed only if each organization works constructively with all of its constituencies to do whatever will best serve the interests of its customers.

To satisfy its customers, GM has committed itself to "patient, hard" work with its stakeholders, including its employees, its dealers, and its suppliers, Reuss said.

He cited ways in which GM is working more closely with its people by identifying "the best operating methodologies and leadership practices in

the business world" and spreading them, via its joint union- management Quality Network, throughout the corporation. He said examples include the "synchronous organization" concept used by the Automotive Components Group and the production material inventory system used at the GM truck assembly plant in Shreveport, La.

Reuss pointed to the new GM-Dealer Policy Committee, recently formed to "ensure continuous dealer input on corporate issues and policy matters that affect dealers," as an example of how GM is working with another key constituency. To date, the committee has made progress on issues such as the 1990 Sales and Service Agreement.

PASADENA, CALIF. (AUG. 8) PR NEWSWIRE - Jacobs Engineering Group Inc. (NYSE: JEC) announced today that its subsidiary, Robert E. McKee Inc., has been awarded a contract by the California Department of Corrections for the construction of the reception facilities at the California State Prison, Kern County, Delano.

The new reception center facilities, which have a constructed value of approximately $51 million, will include 430,000 square-feet of housing cells and dormitories, medical and dental facilities, holding cells, processing centers, visiting centers, chapels, administrative offices, and support facilities such as a modern kitchen. McKee is also responsible for the installation of all security and fire protection systems.

The project is expected to take 16 months to construct with occupancy slated for the end of 1991.

Robert E. McKee, a wholly owned subsidiary of Jacobs Engineering Group Inc., offers both construction and construction management services and specializes in constructing high-tech, health care, and commercial and institutional facilities.

Jacobs Engineering Group Inc. provides single-source environmental and hazardous waste management, consulting, engineering, design, architectural construction, construction management, contract maintenance, and operations services to government and industry worldwide.

TROY, MICH. (AUG. 8) PR NEWSWIRE - K mart Corporation (NYSE: KM) announced the first of four Atlanta Little Caesars(R) Pizza restaurant test sites opens for business today at the K mart store located at 5615 Memorial Drive, Stone Mountain, Ga.

K mart and Little Caesars announced in April they had signed an agreement to test the operation in eight stores: four Michigan and four Georgia K marts. The first Michigan location opened in Rochester on July 3, 1990. Exact locations will be announced as they open.

The Little Caesars operation will be located near the store entrance and operate during K mart's normal hours.

Special breakfast pizzas as well as muffins and Danish will be served from 9-10:30 a.m. After 10:30 a.m., the menu will offer pizza by the slice, Baby Pan! Pan!(TM), Caesar Sandwiches(R), salads, Crazy Crust(R), Pizza! Pizza!(R) (medium only), ice cream, yogurt, soft drinks and slushes.

Little Caesars, the world's largest carry-out pizza chain, currently has more than 2,900 restaurants worldwide and expects to reach 3,300 by the end of 1990. Sales are projected to reach $1.5 billion by year end.

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,331 K mart stores, is also the parent company for Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Warehouse, Inc. and The Sports Authority.

WASHINGTON (AUG. 8) PR NEWSWIRE - Marriott Hotels, Resorts and Suites announced today the acquisition of the rights from Champions Sports, Inc. (NASDAQ: CSBR) to open sports bar restaurants under the "CHAMPIONS" trademark in its hotels.

"The CHAMPIONS' concept in conjunction with Marriott is an excellent fit. It is popular with both our male and female hotel guests. The agreement will allow us to expand the number of CHAMPIONS in more of our hotels nationwide," said Bill Hulbert, vice president of Marriott's Bar and Restaurant Development.

At present, there are 10 CHAMPIONS in operation at Marriott hotels throughout the country. A number of hotels are targeted under the new

agreement, including the Philadelphia Downtown Marriott scheduled to open in 1993.

Although terms of the agreement were not disclosed, this arrangement will provide CHAMPIONS Sports, Inc. the financial means to further develop its marketing and franchising efforts nationally and internationally.

James Martell, president and chief executive officer of Champions Sports, Inc. noted, "The trademark licensing agreement we have negotiated with Marriott Hotels, Resorts and Suites is a win/win proposition for both companies."

FLINT, MICH. (AUG. 8) PR NEWSWIRE - Consumers Power Company has opened a new facility to provide state-of-the-art training for its gas workers to prepare them to meet the challenges of the 1990s and beyond. The Gas Operations Training Center, located in Flint, includes more than 34,000 square feet of space dedicated to classroom-style and hands-on instruction for the utility's 1,000 natural gas system employees.

The facility, located in the utility's Flint Service Center, on East Court Street, has 12 classrooms, six laboratories and three outside field training areas. Here, Consumers Power employees receive instruction on how to perform their jobs better, whether they answer customer calls, respond to gas emergencies, install gas appliances or maintain the company's vast gas distribution system.

"The training is extensive and allows us to provide our employees with the knowledge and skills they need to continue to provide the best and safest service to our customers," said Gary Ewert, gas operations training supervisor.

The state-of-the-art facility was specifically designed to meet the training needs of the natural gas business. The labs contain gas meters, mains and appliances hooked up to simulate real-world devices. The outside areas are being developed into training fields for corrosion fighting and gas line location exercises.

The Flint Service Center will hold a public open house, which will include tours of the Gas Operations Training Center, on Saturday, Sept. 15, 1990, from noon until 5 p.m. The Consumers Power Energy Van will also be available for public viewing at the site.

Consumers Power serves more than 3.4 million people with natural gas in a 12,900-square-mile service territory covering 40 Michigan counties. It is the lowest cost major natural gas utility in the state.

Consumers Power Company, the principal subsidiary of CMS Energy Corporation (NYSE: CMS), is Michigan's largest utility serving almost 6 million of the state's 9 million residents in 67 of the 68 Lower Peninsula counties.

#90220p3232 08/08/1990 ~PR Newswire

NEW YORK (AUG. 8) PR NEWSWIRE - Net income of Woolworth Corporation (NYSE: Z) rose 4.2 percent to $50 million, or 39 cents per share, in the second quarter ended July 28, 1990, from $48 million, or 37 cents per share, in the corresponding year-earlier quarter, Harold E. Sells, chairman and chief executive officer, reported today.

For the 26 weeks ended July 28, 1990, net income rose 4.8 percent to $88 million, or 68 cents per share, from $84 million, or 65 cents per share, in the comparable 1989 period.

Per-share data for the prior year has been restated to reflect a two-for-one split of common stock on May 31, 1990.

Revenues for the 13 weeks ended July 28, 1990, rose 10 percent to $2,191 million from $1,983 million in the comparable 1989 period. Specialty store revenues rose 14 percent and general merchandise revenues rose 8.4 percent. Domestic revenues increased 7.4 percent and foreign revenues, expressed in U.S. dollars, increased 15 percent. If foreign revenues had been translated into U.S. dollars at year- earlier foreign exchange rates, foreign revenues would have increased 7.8 percent and total revenues 7.5 percent.

For the 26 weeks ended July 28, 1990, revenues increased 10 percent to $4,256 million from $3,860 million in the corresponding period of 1989. Specialty store revenues rose 15 percent and general merchandise revenues increased 7.0 percent. Domestic revenues increased 8.5 percent and foreign revenues, expressed in U.S. dollars, increased 13 percent. Foreign revenues would have increased 7.3 percent, and total revenues 8.0 percent, had foreign revenues been translated into U.S. dollars at year-earlier exchange rates.

Operating profit (income before unallocated items) rose 7.9 percent in the 13 weeks ended July 28, 1990, to $123 million from $114 million in the comparable 1989 period. Specialty store operating profit was unchanged

from the $66 million reported in the comparable period of 1989, and general merchandise operating profit rose to $57 million from $48 million. Domestic operating profit rose to $68 million from $62 million and foreign operating profit rose to $55 million from $52 million. If foreign operating profit were translated at year-earlier exchange rates, foreign operating profit would have been unchanged from the prior year. Sells stated, "Operating profit improvements in our European, domestic Woolworth and domestic Kinney operations offset profit declines resulting from increased promotional activity in the specialty chains making up our U.S. Apparel Group and in our Canadian and Australian operations."

For the 26 weeks ended July 28, 1990, operating profit rose 8.1 percent to $214 million from $198 million in the comparable period of 1989. Specialty store operating profit rose to $118 million from $112 million and general merchandise operating profit rose to $96 million from $86 million. Domestic operating profit rose to $141 million from $130 million and foreign operating profit rose to $73 million from $68 million. If foreign operating profit were translated at year-earlier exchange rates, foreign operating profit would have been $1 million higher than the prior year.

On Aug. 6, 1990, Moody's Investors Service upgraded Woolworth Corporation's senior debt rating to A1 from A2. According to Moody's, its action "is based on its expectation that the company will continue to show the above-average performance of the last five years" and "reflects the improvement in the balance sheet which has been achieved in spite of the aggressive capital expenditure program."

#90220p3234 08/08/1990 ~PR Newswire

COSTA MESA, CA (AUG. 8) PR NEWSWIRE - Irvine Sensors Corp. (NASDAQ: IRSN) today reported operating results for the firm's third fiscal quarter ended July 1, 1990.

Contract revenues were $1,015,000 versus $822,300 in last year's third quarter. Revenues through the first 39 weeks of fiscal 1990 were $2,768,700, a 26 percent improvement from the $2,202,300 of revenues in last year's first three quarters. Net loss for the fiscal 1990 third quarter was $151,200 versus the $252,400 loss incurred in the comparable fiscal 1989 period. Losses through the first three quarters of the current fiscal year were $458,500, a 35 percent reduction from the $708,900 in losses incurred through the comparable three quarters of fiscal 1989.

James Alexiou, president, said, "Our results to date ensure that fiscal

1990 will be significantly improved over last year. Furthermore, the underlying reasons for this improvement suggest that this trend should continue into fiscal 1991. However, until our commercial penetration becomes more broadly established, we remain sensitive to the short-term variability of government procurements which still constitute the majority of our business base."

Irvine Sensors, headquartered in Costa Mesa, is primarily engaged in the development of infrared devices and high density packages of computer electronics which will have broad applications in military and commercial systems.

SEATTLE (AUG. 8) PR NEWSWIRE - Immunex Corp. (NASDAQ: IMNX) today reported, as expected, a net loss of $3.8 million, or 48 cents per share, for the quarter ending June 30, 1990. The quarterly loss was due in part to increased investment in proprietary research and development spending as well as higher general and administrative costs related to necessary preparations for the eventual marketing of GM-CSF. For the same three-month period in 1989, the company reported a net loss of $1.6 million or 20 cents per share.

Immunex also reported net income applicable to common stock of $1.3 million, or 16 cents per share, for the six months ending June 30, 1990, compared to a net loss of $2.6 million, or 34 cents per share, for the same period in 1989. The improvement was due primarily to $9 million in one-time fees from Hoffmann-La Roche Inc. and Behringwerke AG realized in the first quarter.

"Immunex during the second quarter continued on target to prepare for the eventual marketing of the company's GM-CSF," said Stephen A. Duzan, Immunex chairman and chief executive officer. "For the rest of the year, clinical development will continue to increase as we focus more on the development of other products for the oncology and autoimmune markets to which we have marketing rights."

During the period, Immunex successfully converted its outstanding 7 1/2 percent convertible debentures into common stock thereby reducing the company's long term debt by $40 million. The conversion, completed on July 6, 1990, added 2.12 million shares outstanding and reduces annual interest expense by $3 million.

In addition, 5,000 preferred shares held by Eastman Kodak Company were converted into common stock on June 1, 1990, adding 275,000 shares to the common stock outstanding. That transaction reduces annual preferred stock dividends by $300,000.

Duzan noted that the company remains in excellent financial position, ending the second quarter with $47.4 million in cash and marketable securities.

Immunex is a leading biotechnology firm focused on the research, development, manufacture and marketing of immunological therapeutic products for cancer and autoimmune disease. The company is developing one of the biopharmaceutical industry's largest proprietary portfolios of cytokines and cytokine receptors.

#90220p3236 08/08/1990 ~PR Newswire

RICHMOND, BC (AUG. 8) PR NEWSWIRE - HQ Office International Inc. (NASDAQ: HQOIU) announced today that holders of record of its Class A Common Stock Purchase Warrants (the Warrants) as of Aug. 6, 1990, will have the right to exercise the Warrants at a price of $1.50 per share for a 30-day period beginning Aug. 6, 1990, and ending on Sept. 5, 1990. After Sept. 5, 1990, the exercise price of the Warrants will return to $2.00.

George J. Handgis, president and chief executive officer stated, "We anticipate that the reduction of the exercise price of the warrants will lead to their quick exercise. The proceeds from the exercise of the warrants will allow Great Canadian Office Supplies Warehouse to continue our expansion plans. We intend to open our third superstore on Aug. 9, 1990, in the downtown area of Edmonton, Alberta an two additional locations in Calgary and Victoria in September and October."

Robert J. McNulty, chairman stated, "Sales at Great Canadian's two existing superstores have exceeded original expectations. Annualized sales at our Vancouver superstore are 30 percent over plan, and sales at our Edmonton superstore are 20 percent over original expectations. Average sales per transaction at both of our Great Canadian Office Supplies Warehouses continue to exceed $80.00 per transaction."

Founded on a unique merchandising strategy based on direct shipment from manufacturers, rapid inventory turnover, and centralized control of purchasing, replenishment, and pricing, Great Canadian Office Supplies Warehouse maintains deeply discounted prices and excellent service. The company plans to have up to eight superstores open in Canada by the end of 1990.

WOODLAND HILLS, CALIF. (AUG. 8) PR NEWSWIRE - New Image Industries Inc. (NASDAQ: NMS) announced today that it anticipated releasing earnings for its 1990 fiscal year on Friday, August 10, 1990. Dennis Smolinski, chief financial officer of the company, said that the company's auditors were in the process of completing their work and anticipated that audited results would be available at that time. The company expects to recognize a loss in the quarter ended June 30, 1990, but will remain profitable for the year ended June 30, 1990. New Image indicated that it would have no further comment with respect to the results of operations for fiscal year 1990 until audited numbers are available.

VALLEY FORGE, PA. (AUG. 8) PR NEWSWIRE - NovaCare, Inc. (NASDAQ: NVCR) today announced audited results for the fiscal year ended June 30, 1990. Net revenues totaled $102,110,000, an increase of 46 percent over the prior year. Gross profits for fiscal 1990 increased 54 percent to $39,478,000 or a 39 percent gross profit margin as compared with $25,586,000 or a 37 percent gross profit margin for the prior fiscal year. Fiscal 1990 income from operations totaled $19,534,000 compared with $8,999,000 for the previous year. Income from operations as a percent of revenue increased from 13 percent to 19 percent. Fiscal 1990 net income was a record $.87 per share compared with prior year earnings of $.38 per share, a 129 percent improvement.

The company's performance continues to improve on a quarter-to- quarter basis. Compared with the three months ended March 31, 1990, gross profits and income from operations for the June 1990 quarter increased by 8 percent and 10 percent, respectively. Net earnings for the quarter ended June 30, 1990, were $.27 per share compared with $.24 per share for the March quarter 1990, and $.13 for the same period last year.

John H. Foster, chairman and chief executive officer, stated that, "Growth and improved profitability on a year-to-year and quarter-to- quarter basis resulted primarily from our larger number of rehabilitation therapists coupled with our acquisition of Heartland Prather in April which posted fourth quarter revenues of $613,000. Most importantly, our efforts to become the 'Employer of Choice' reduced employee turnover from an annualized rate of 47 percent during the fourth quarter of 1989 to an unprecedented 21 percent in the fourth quarter of fiscal 1990. Implementation of a 401K Plan and a new management training program during the fourth quarter contributed significantly to that success. Consistent with expectations, near-term productivity softened during the June 1990 quarter because of increased hiring. Fiscal year-to-year employee productivity improved by nearly 2 percent. We are confident that

staffing and productivity gains will continue into the new year".

NovaCare, Inc. is the largest provider of contract rehabilitation therapy services to the healthcare industry and the only provider of such services on a national basis.

CAMBRIDGE, MA (AUG. 8) PR NEWSWIRE - The American Heritage Electronic Dictionary, with powerful SearchText(tm) technology, is now available directly to PC users, Houghton Mifflin Company (NYSE: HTN) announced today.

The American Heritage Electronic Dictionary (AHED) is a sophisticated reference and writing tool that provides PC users with instant access to the information contained in Houghton Mifflin's American Heritage Dictionary. AHED contains complete dictionary information for more than 116,000 words in an integrated and easy-to-read format.

The SearchText feature helps users generate ideas, remember unusual words, verify facts, and find words when only a vague meaning, or a related concept is known. Type in "stock and market," for example, and SearchText returns bullish, bearish, rally, ticker, and stock market.

AHED also includes Roget's II Electronic Thesaurus, with half a million synonyms for 42,000 words, as well as Wildcard, Anagram, and Cut and Paste functions. As a free introductory offer, AHED also includes Writer(tm), a basic word processing system.

AHED is the first in Houghton Mifflin's Upon Request(tm) Series of reference and writing utilites designed to help PC users write more clearly, quickly, and with greater impact. Houghton Mifflin's Software Division previously distributed its business products through agreements with original equipment manufacturers. The division will continue to seek such agreements, while expanding into the retail market with its Upon Request Series.

AHED differs significantly from spelling checkers and other electronic dictionaries by offering a superior database of dictionary information, and innovative ways to access and use it. AHED's entries include: detailed definitions, parts of speech, spelling correction, hyphenation, usage notes, pronunciation, synonyms, inflections, and idioms, related words, example sentences, and more.

Houghton Mifflin's Software Division is a leading supplier of reference, writing, and proofreading software.

NEW YORK (AUG. 8) PR NEWSWIRE - Nasta International, Inc. (AMEX: NAS), announced today a $1 per share cash offer by Tyco Toys, Inc. (NASDAQ: TTOY), for the approximately 1.3 million outstanding shares of Nasta that Tyco does not already own. Tyco announced it intends to commence shortly a tender offer directly to the stockholders of Nasta.

Tyco also announced its intention to offer to exchange, on a dollar for dollar basis, a new issue of Tyco ten-year 8 percent subordinated debentures for Nasta's outstanding $7.5 million principal amount of 12 percent convertible subordinated debentures (AMEX: NAS.A). Tyco said agreement in principle has been reached for the exchange of over $3 million of the Nasta debentures. A Tyco spokesperson said a registration statement covering the debentures will be filed promptly and the exchange offer would commence upon its effectiveness.

A spokesperson for Nasta said that its board of directors has appointed a special committee of directors to review Tyco's tender offer and exchange offer and that such committee has retained an investment banking firm to assist it in evaluating Tyco's offers.

TROY, MI (AUG. 8) PR NEWSWIRE - Volkswagen United States, Inc. today announced that on Aug. 10 it will launch an unprecedented customer assurance program called the Passat Satisfaction Guarantee. With this program, the company will become the first automaker to offer a "money-back" guarantee on a new car purchase.

The program guarantees that a buyer of the company's new Passat family sedan or wagon will be completely satisfied with the purchase or the vehicle can be returned for a full refund within 30 days or 3,000 miles. Normal costs associated with purchase, such as sales tax, title and license fees, will also be refunded.

Bill Young, vice president in charge of Volkswagen United States, said: "If you buy a Passat, you'll like it - that's the message we got when 97 percent of our Passat owners said they'd recommend the car to a friend or family member. Based on that research, we're launching the Passat Satisfaction Guarantee. It's clean and it's simple: you're either completely satisfied with your new Passat or we refund all of your money. Period."

Young said the proliferation of models, "gimmicky" financing options and rebates within the mid-size family car segment in which the Passat competes have resulted in uncertainty and confusion on the part of the customer.

"Because buying a car is a significant investment, the consumer feels there's an element of risk involved. Is this a car they're going to be happy with and is this the right price, or is there a better price coming? With this program, we eliminate that risk by creating a no-lose purchase," he said.

The program is an extension of the non-traditional marketing approach which VW/US implemented last October. At that time, the company set itself apart from the competition by reducing prices on many of its models and announcing that it would do away with consumer rebates.

Concurrently, the company launched its Fahrvergnugen campaign designed to emphasize the European driving experience which differentiates Volkswagen products from Japanese and American competitors.

Volkswagen's first entry into the highly competitive mid-size car market, the Passat, is powered by a 134-horsepower, 16-valve engine. For its base suggested retail price of under $15,000, the Passat offers a long list of standard equipment such as four-wheel disc brakes, air conditioning,

height-adjustable steering wheel and more interior space than most of its direct competitors.

NEW CASTLE, PA (AUG. 8) PR NEWSWIRE - Galaxy Cheese Co. (NASDAQ: GALX) -- manufacturer of FORMAGG(R), the no cholesterol, premier cheese alternative -- today announced improved financial results for the company's first quarter of fiscal year 1991.

The company reported a 23 percent increase in net sales to $5,237,935 for the three-month period ended June 30, 1990, compared to $4,274,139 for the first quarter ended June 30, 1989. Net income for the quarter was $10,114 or $0.00 per share vs. a net loss of $87,784 or $0.02 per share in the comparable period of 1989.

Sales to food service customers increased 90 percent in the first quarter of fiscal 1991, vs. the comparable quarter last year. "While we are pleased that our sales growth continues to come from all markets served the tremendous opportunities in the food service sector are beginning to make a major impact on the company's sales," stated Angelo S. Morini, Galaxy's chairman and chief executive officer.

Galaxy Cheese Co. manufactures FORMAGG(R), the premier line of cheese alternatives, in over 30 varieties, made from pure skim milk protein, and canola and soybean oil. FORMAGG(R) developed in response to the public's increasing demand for more health-conscious products, contains no cholesterol, lactose or butterfat. These products are lower in calories, saturated fat, and higher in vitamins, calcium and other minerals than conventional cheese. Galaxy Cheese Co. also produces and sells two all-natural, soy-based cheese alternatives under the brand name SOYCO(TM) and SOYMAGE(TM).

FALLS CHURCH, VA (AUG. 8) PR NEWSWIRE - Champions Sports Inc. (NASDAQ: CSBR), a publicly-held Washington, D.C. area based sports bar and restaurant company announced today that it has agreed to the acquisition by Marriott Corporation (NYSE: MHS) of the rights to the "CHAMPIONS" trademark for use in their hotels.

The new trademark/licensing agreement will provide Champions Sports Inc. the financial means to further develop its marketing and franchising efforts nationally and internationally and allow Marriott Corporation to expand the number of CHAMPIONS sports bar/restaurants in more of their hotels nationwide.

James Martell, president and chief executive officer of Champions Sports Inc. stated: "This agreement is a win/win proposition for both companies. Since taking over as president and CEO in May of this year, I have implemented a number of changes in the company. I am confident that those changes and this new agreement will result in a profitable year to come."

"We are thrilled with this agreement which gives Champions a great expansion boost," said Michael O'Harro, the founder of the Champions concept. "Champions looks forward to a very long standing relationship with Marriott."

There are currently 15 CHAMPIONS sports bar restaurants. Ten of those are operating in Marriott hotels: Boston; Tampa, Fla.; Atlanta; Chicago (O'Hare); Baltimore (BWI); Los Angeles (LAX); Raleigh, N.C.; Portland, Ore.; Irvine, Calif.; and Springfield, Mass. The other company owned and franchised CHAMPIONS are in San Antonio, Texas; Falls Church, Va.; Tysons Corner, Va.; Richmond, Va.; and Hyannis, Mass. The original CHAMPIONS is located in Washington, D.C.

Entrepreneur magazine this year named Champions "Franchiser of the Year" in the Sports Bars and Tavern industry. Champions was also named "1988 Bar Chain of the Year" by Nation's Restaurant News. It is famous for its "Good Food, Good Times, Good Sports" theme, sports memorabilia, televised sports viewing and high energy promotions.

Champions Sports, Inc., owns, franchises and manages Champions Sports Bars and Restaurants nationwide.

MINNEAPOLIS (AUG. 8) PR NEWSWIRE - Honeywell (NYSE: HON) said today it has signed a memorandum of understanding for the sale of Honeywell Federal Systems Inc. (HFSI) to Bull HN Information Systems Inc., headquartered in Billerica, Mass. Terms of the agreement were not disclosed. Honeywell said the sale continues a transition begun in 1987 to focus the company on its controls businesses.

In March 1987, Honeywell sold majority interest in its computer business to Compagnie des Machines Bull and NEC, while it retained the division of the computer company that marketed computers to the U.S. government.

Honeywell said that together with Bull HN, it is seeking all necessary approvals for the transaction, including approval by Honeywell's board of directors.

HFSI, headquartered in McLean, Va., provides systems integration, marketing, computer products and technical services to the U.S. government and prime contractors. The unit employs approximately 1,600 people. Its 1989 sales were $274 million.

Bull HN Information Systems Inc. is a provider of proprietary and open information systems, software and services. With over 17,000 employees, including 8,100 employees based in the United States, the company had revenues of $2.1 billion in 1989.

Honeywell is a global controls company that provides products, systems and services for homes and buildings, industry, and aviation and space. The company had 1989 sales of $6.1 billion.

DALLAS (AUG. 8) PR NEWSWIRE - Intellicall, Inc. today begins trading common stock on the New York Stock Exchange under the symbol "ICL."

Intellicall's common stock has been traded on the NASDAQ National Market System under the symbol "INCL" since the company's initial public offering in September 1987. Intellicall completed a secondary offering of common stock in December 1989, and currently has 6,665,230 common shares outstanding.

"Intellicall's listing on the New York Exchange is a logical step in the ongoing growth and success of our company," said R. Stephen Polley, president and chief executive officer. "We believe that this move

further clarifies our position as a major player in the telecommunications industry."

Intellicall, Inc., founded in 1984, is a diversified telecommunications company providing innovative technology and services to private payphone networks throughout the United States. The nation's largest manufacturer of privately owned payphones and micro-automated systems, Intellicall provides communications products and services through its dealers nationwide at locations such as Los Angeles International Airport, Walt Disney World, Marriott hotels and 7-Eleven convenience stores.

GREENSBURG, PA (AUG. 8) PR NEWSWIRE - Sulcus Computer Corp. (NASDAQ: SULC) announced today it has established an operating arm in Conshohocken, Pa., to conduct business under a new wholly owned subsidiary: Radix Systems Inc.

The new corporation is based on an assemblage of certain former key management, systems integration, marketing, and sales and support personnel of WSI Inc., the largest automator of law firms in the Delaware Valley. Radix will hire certain of these people and certain Sulcus employees initially to establish a solid presence in the Philadelphia, New York, Washington and Baltimore markets. Management plans a phased expansion of Radix into a significant regional hub for products and services for law firms along the Eastern Seaboard.

Sulcus chose the Philadelphia area because of its geographic desirability and the availability of high-tech professionals. The company anticipates eventually creating upward of 200 positions in management, research and development, product engineering, software development, customer support and service, and other high-tech areas.

Sulcus designs, develops, manufactures and sells hardware and software systems for law firms through its Sulcus Law Management Services subsidiary. Sulcus Law, along with its Data Law Division, has 12 programs approved by the American Bar Association for use by the legal profession.

Corporate headquarters are in Greensburg, Pa. Sulcus and its subsidiaries have combined branch offices in 21 cities throughout North America.

Alan Ellenbogen, president of Radix, stated, "All of us involved are excited about the future of Radix, our opportunity to be a major supplier

to law firms throughout the East, and the added ability to develop software for additional applications as we continue to grow."

CONTACT: Jeffrey S. Ratner of Sulcus Computer, 412-836-2000.

#90220p3263 08/08/1990 ~PR Newswire

MIAMI (AUG. 8) PR NEWSWIRE - Pan American World Airways will increase its

flights out of Miami this winter with service to eight new destinations in the U.S., Central and South America and the Caribbean.

Included in the Miami buildup will be new service to Valencia, Venezuela; Managua, Nicaragua; Belize City, Belize; San Pedro Sula, Honduras; San Salvador, El Salvador; Aruba, Curacao and Newark, N.J.

Service between Miami and Europe will also increase with the addition of two weekly nonstop Miami-Frankfurt flights, bringing the total to three weekly nonstop flights between the two cities. All three flights will be operated with Boeing 747 aircraft.

Service between Miami and Los Angeles will be improved with the addition of a third daily nonstop flight between the two cities, effective Oct. 28. In addition, one daily flight will be added between Miami and Tampa, Orlando, St. Thomas, St. Croix and Montego Bay and Kingston in Jamaica. Additional frequencies will also be added on Dec. 15 between Miami and Port-Au-Prince.

"As the largest airline currently serving Miami, we are continuing to move forward with our expansion of service from a city that is so vital to Pan Am's total operation," said John M. Lindsey, senior vice president of corporate affairs for Pan Am, based in Miami. "Our increase in operations will include several new and exciting destinations that are already showing heavy advance booking levels," he added.

Effective Oct. 28, Pan Am will operate three weekly nonstop flights between Miami and Managua, Nicaragua. Flight 411 will depart Miami at 11:30 a.m. on Tuesday, Thursday and Saturday, arriving in Managua at 1:00 p.m. Northbound, flight 412 will operate on the same days, departing Managua at 2:00 p.m., arriving in Miami at 5:30 p.m.

Pan Am currently offers daily service to San Salvador from Los Angeles and will begin nonstop operations between Miami and San Salvador on Oct. 28. Flight 401 will operate Monday, Thursday, Friday, Saturday and Sunday, departing Miami at 11:30 a.m. and arriving in San Salvador at 1:15 p.m. Flight 400 will depart San Salvador at 2:05 p.m., with arrival scheduled for 5:30 p.m. in Miami.

Nonstop service between Miami and Belize City, Belize with a continuation on to San Pedro Sula, Honduras will also begin on Oct. 28. Flight 419 will operate on Monday, Wednesday, Friday and Sunday, departing Miami at 11:30 a.m. and arriving in Belize at 12:40 p.m. The flight will depart Belize at 1:15 p.m., arriving in San Pedro Sula at 2:00 p.m. Flight 419 departs San Pedro Sula at 2:35 p.m. and arrives back in Miami at 5:35 p.m.

Another addition to the Oct. 28 schedule is the startup of nonstop service between Miami and Aruba, with a continuation on to Curacao. Flight 407

will depart Miami at 4:45 p.m. on Thursday, Friday, Saturday and Sunday and arrive in Aruba at 8:30 p.m., then continue to Curacao for a scheduled arrival of 9:40 p.m. Northbound, flight 408 will depart from Curacao on Monday, Friday, Saturday and Sunday at 9:00 a.m., from Aruba at 10:10 a.m. and arrive in Miami at 11:55 p.m.

Pan Am's current three times per week service to Maracaibo will extend on to include Valencia, Venezuela. Flight 409 will depart Miami at 4:45 p.m., arriving in Maracaibo at 8:40 p.m. and in Valencia at 10:20 p.m. on Wednesday, Friday and Sunday. Flight 410 will depart Valencia on Monday, Thursday and Saturday at 1:00 p.m., arrive in Maracaibo at 2:05 p.m. and is scheduled to arrive in Miami at 4:30 p.m.

Additional changes to the Miami schedule include the resumption of Miami-Newark service on Oct. 28, with two daily flights. On Dec. 15 a third daily flight will be added.

#90220p3265 08/08/1990 ~PR Newswire

HOUSTON (AUG. 8) PR NEWSWIRE - Conquest Exploration Company (AMEX: CQX) today reported a net loss for the first six months of 1990 of $6,917,000, compared to net income of $1,584,000 for the first six months of 1989. The company's net loss for the second quarter of 1990 totaled $3,377,000 compared to net income of $1,211,000 in the second quarter of 1989. The company's net income for the six months and second quarter of 1989 includes an extraordinary item, the utilization of net operating loss carryforwards to reduce the company's provision for federal income taxes, of $595,000. The company's results of operations include the effect of the operations of Canadian Conquest Exploration, Inc., from April 17, 1989 the effective date of the acquisition of that company.

After giving effect to dividends on the company's preferred stock, the company reported a net loss attributable to common shares of $7,985,000, $.18 per share, in the first half of 1990 compared to income of $426,000, $.01 per share, in the first half of 1989.

Results for the first six months and second quarter of 1990 include charges to expense of $5,784,000 and $2,144,000, respectively, representing reductions, primarily due to price declines, in the carry value of certain proved oil and gas properties to expected future recoveries. Such charges totaled $2,818,000 and $811,000, respectively, in the first six months and second quarter of 1989.

Conquest Exploration Company explores for, develops and produces oil and gas. The company's exploration operations are concentrated in the

onshore and offshore areas of the Gulf Coast and certain international areas. The company's principal producing properties are located in Louisiana, Mississippi, Montana, North Dakota, Texas, Utah and Wyoming. The company also conducts exploration and production operations in Canada through its subsidiary, Canadian Conquest Exploration, Inc. Conquest is headquartered in Houston. The company's common stock and debentures are listed on the American Stock Exchange and trade under the symbols CQX and CQX.A, respectively.

DALLAS (AUG. 8) PR NEWSWIRE - Southwest Airlines Co. (NYSE: LUV) flew

922.2 million revenue passenger miles (RPMs) in July 1990, a 7.5 percent increase over the 857.5 million RPMs flown in July of last year. Available seat miles (ASMs) increased 12.4 percent to 1,437.1 million from the July 1989 level of 1,278.9 million. The load factor for the month was 64.2 percent, down 2.9 points from last year's load factor of 67.1 percent.

For the first seven months of 1990, Southwest flew 5,806.0 million RPMs, compared with 5,473.4 million RPMs recorded for the same period in 1989, an increase of 6.1 percent. Available seat miles increased 11.4 percent to 9,398.7 million from the 1989 year-to-date level of 8,436.2 million. The 1990 year-to-date load factor was 61.8 percent, compared to 64.9 percent for the same period last year, a decrease of 3.1 points.

Herbert D. Kelleher, chairman of the board and CEO stated: "We were disappointed with the traffic results posted for the first week of July but very encouraged with the traffic results for the balance of the month. The Fourth of July holiday fell on Wednesday this year and depressed our business traffic and revenue yields, as a result. However, the results for July excluding the first week compare very favorably with July 1989's results. Further, the increase in passenger counts was a brisk 13.8 percent, resulting in a drop in the passenger trip length of 5.5 percent. Our traffic growth continues to be generated from our short-haul markets, consistent with our second quarter 1990 results."

#90220p3276 08/08/1990 ~PR Newswire

KALAMAZOO, MI (AUG. 8) PR NEWSWIRE - The Dutch College for the Assessment of Drugs and The Upjohn Company (NYSE: UPJ) in the Netherlands today announced the reregistration of the company's product Halcion 0.25 and 0.125 tablets at a news conference held in Holland.

"Upjohn is very pleased that Halcion is now available in the Netherlands as an option for the short-term treatment of insomnia," said Geoffrey Rodgers, corporate vice president for Europe, Africa & Middle East Pharmaceutical Operations. "The registration emphasizes the Dutch College's confidence in the safety and efficacy of the product and paves the way for patients to receive the world's most prescribed sleeping medication, when deemed appropriate therapy.

"The reintroduction of the product in the Netherlands is particularly satisfying to Upjohn, because the company has resolved this unique regulatory issue."

Reregistration was necessary after the Dutch Registration College canceled the original product license for Halcion in 1980. This action came after an initial six-month withdrawal of the registration in 1979 in which the Registration College asked Upjohn to include in its labeling a list of possible and unusual side effects. Upjohn refused, as the side effects were unsubstantiated in the world medical literature, in extensive clinical tests and in worldwide experience with the product.

In 1980, an appeal was filed by Upjohn with the Dutch Council of State. The council recommended to the country's ruling body, the Crown, to cancel the earlier decision by the Registration College. In 1985, the Crown did cancel the Registration College's earlier decision, stating that the college acted without adequate review of available data. The Dutch Council of State suggested at the time of the decision that Upjohn apply for a new product license for Halcion through the Registration College. Today's registration is the result of Upjohn's reapplication and negotiations with the Dutch College.

The Netherlands is the only country where the product registration has been withdrawn since Halcion's worldwide introduction in 1979.

The Upjohn Company is a worldwide, research-based provider of human health care products and services, animal health products, agronomic and vegetable seeds and specialty chemicals. Headquartered in Kalamazoo, the company has been dedicated to improving health and nutrition for more than a century.

ARLINGTON, VA (AUG. 8) PR NEWSWIRE - USAir today reported a 4.3 percent increase in revenue passenger miles flown in scheduled service during July compared with the same month of 1989.

Available seat miles rose 9.1 percent, while passenger boardings were down 3.8 percent from the same month a year earlier. July load factor was 62 percent compared with 64.8 percent for July 1989.

During the first seven months of 1990, USAir posted a gain of 4.6 percent in revenue passenger miles versus the same period of 1989, a gain of 7.1 percent in available seat miles flown, and a drop of 2.2 percent in passenger boardings. Year-to-date load factor was 59.8 percent compared with 61.2 percent for the same period of 1989.

Statistics for 1989 periods prior to USAir's merger with Piedmont Airlines on Aug. 5, 1989, have been restated to reflect the combined airline operations of both carriers on a pro forma basis.

#90220p3280 08/08/1990 ~PR Newswire

ST. LOUIS (AUG. 8) PR NEWSWIRE - LaBarge, Inc. (AMEX: LB) today announced results for its fiscal year ended July 1, 1990.

Net sales for fiscal 1990 were $70,460,000 compared to $69,140,000 recorded for the year ended July 2, 1989.

Earnings from operations for the 12 months were $5,738,000 up 30 percent from $4,383,000 recorded for fiscal 1989.

Net earnings for the fiscal year were $1,609,600 compared to net earnings of $2,707,000 recorded for fiscal 1989. Net earnings for fiscal 1989 included two one-time gains from previously divested businesses which totaled $609,000. No such gains occurred during fiscal 1990. Further, net earnings for fiscal 1990 were impacted by the higher interest costs resulting from the recapitalization which was completed in August 1989.

After giving effect to preferred stock dividends, which were significantly lower in fiscal 1990 as a result of the recapitalization completed during the first fiscal quarter, earnings per common share for the fiscal year were 6 cents. This compares to earnings of 8 cents per common share reported for the 12 months of fiscal 1989. Earnings per common share for fiscal 1989 were enhanced by more than 4 cents per share as a result of the one-time gains recorded during that period.

#90220p3285 08/08/1990 ~PR Newswire

MINNEAPOLIS (AUG. 8) PR NEWSWIRE - Norwest Bank Minnesota has combined the marketing functions for corporate banking and has promoted J. Scott Slater to the new position of vice president and director of corporate bank marketing. He was director of marketing for the bank's capital management and trust group.

In his new post, Slater has marketing responsibility for the bank's relationship management, international, cash management, commercial insurance and capital management and trust business. He also will coordinate research, sales programs and sales and product training for corporate banking.

James R. Campbell, president of Norwest Bank Minnesota and head of corporate banking for Norwest, said, "Each of these business areas of the bank has grown to the point where a coordinated approach to marketing for all corporate bank functions is needed to help ensure continued growth and to make certain our marketing efforts are consistent with our strategic goals."

Norwest corporate banking serves the banking needs of domestic and international mid-sized and large businesses, and other banks and other financial institutions.

Slater joined Norwest in October 1987 from General Mills, where he had worked in product management for three years. Prior to receiving an MBA degree from the University of Chicago in 1984, he was at Citibank in New York City for two years, most recently as a unit manager in its international financial institutions group.

Slater, who grew up in Bronxville, N.Y., is a graduate of Phillips Exeter Academy (1976) and has a B.A. degree in English from Dartmouth College (1980).

He is vice president and treasurer of the Dartmouth Alumni Association of the Northwest and serves on the board of directors of the Hennepin County Historical Society.

He and his wife, the former Karen Gerster of Anoka (Minn.), reside in

Minneapolis.

Norwest Bank Minnesota is the largest banking affiliate of Norwest Corporation (NYSE: NOB), a $26.8 billion diversified financial services organization providing banking, banking-related and specialized financial services through more than 1,290 offices in 47 states and internationally.

FAIRFIELD, NJ (AUG. 8) PR NEWSWIRE - S2 Golf Inc. (NASDAQ: GOLF) (doing business as Square Two Golf), a manufacturer of a complete line of men's and women's golf clubs, today announced record sales and earnings for the quarter and for the first six months which ended June 30, 1990. Square Two Golf is the officially endorsed club of the Ladies Professional Golf Association (LPGA).

Shipments for the second quarter rose to $2,762,803 from $1,829,946 for the second quarter of 1989. Shipments for the first half rose to $4,560,901 from $2,793,743 in the first half of 1989.

For the second quarter, the company posted a net profit before taxes of $468,168, with an after tax profit of $334,163 or $.042 per share as compared with a pre-tax profit of $427,767 and after-tax profits of $272,415 or $.035 per share for the second quarter of 1989. For the first half, pre-tax profits were $595,852 with net after taxes of $433,186 or $.054 per share. This compares with a net profit before taxes of $494,181 share with after-tax profits of $331,961 or $.042 per share in the first half of 1989.

L. R. Jeffrey, president attributed the improved sales results to continuing high levels of consumer acceptance of the company's products, a higher percentage of shipments of graphite clubs and to an increased number of dealers. Jeffrey stated "While the April-June period is usually the best quarter for the entire golf equipment industry, we did somewhat better than we had anticipated. Shipments were up almost 65 percent over those of the first half of 1989. At the present time, we believe that the 1991 golf season should be reasonably good. We are bringing out several new lines of clubs which should strengthen our dealer organization as well as providing a greater choice of clubs for the consumer. We also plan to bring out a line of quality golf bags for the Christmas season, We are continuing to add new dealers and expect to be in an excellent position for the 1991 golf season."

The company's common stock is listed daily in the Additional NASDAQ Quotes list (additional list) which is carried in the Wall Street Journal,

Investors Daily and The New York Times.

#90220p3287 08/08/1990 ~PR Newswire

WILMINGTON, DE (AUG. 8) PR NEWSWIRE - The Columbia Gas System Inc. (NYSE: CG) today reported a loss of $4.6 million, or $.10 per share, for the quarter ended June 30, compared to net income of $3.6 million, or $.08 per share, for the same period in 1989.

For the first six months, net income was $43 million, or $.92 per share, compared to net income of $80.3 million, or $1.77 per share, in the first half of 1989.

Columbia Gas Chairman John Croom said second quarter results are generally nominal because of the seasonal nature of the natural gas business. He added that second quarter earnings would have been substantially unchanged from last year's earnings except for a change in the method used to allocate annual contract reformation costs among the quarters.

For the second quarter, net income from transmission operations was $4 million, a decrease of $1.9 million from 1989 primarily because the change in allocating contract reformation costs more than offset the beneficial effect of an improved rate design. A $6.8 million loss in distribution operations was greater than the loss in the prior period because increased operating expenses continue to outpace authorized rate increases. Oil and gas operations had net income of $300,000, a decrease of $3.2 million from the previous year. A higher depletion rate and an increase in operations and maintenance costs contributed to the decline in oil and gas earnings.

Croom said warm weather was the principal factor in the earnings decline in the first six months. Temperatures in Columbia's operating territory in 1990 were 14 percent warmer than in the first six months of 1989 and both years were significantly warmer than normal.

LONDON (AUG. 8) PR NEWSWIRE - THORN EMI plc announces today in London an agreement to acquire the whole of the issued share capital of the independent U.K. music publishing company, Filmtrax plc, and its U.S. subsidiary, Filmtrax Copyright Holdings Inc. The announcement was made by Jim Fifield, president and chief executive officer, EMI Music Worldwide; Charles Koppelman, chairman and chief executive officer, EMI Music Publishing; and Martin Bandier, vice chairman, EMI Music Publishing.

The total consideration to be paid by THORN EMI after completion, when all necessary adjustments to the purchase price have been agreed or determined will be up to $115 million (which includes the assumption of borrowings), but is dependent on the outcome of a due diligence examination of Filmtrax' catalogs and accounts.

The acquisition, which covers over 90,000 titles, brings EMI Music Publishing's total portfolio to over 600,000 titles, adding further variety to its music publishing catalog.

Commenting on the acquisition, Fifield said, "We are very pleased to be entering into this agreement with Filmtrax, which features an extensive array of music ranging from TV and film to truly classic compositions. This acquisition adds to our already worldclass music publishing company and enhances our position in the global marketplace."

Said Koppelman, "The addition of the Filmtrax group of companies and songs will enhance our ability to excel in a marketplace with ever-increasing demands for music in all areas of the media. We are also pleased with the continuing association with Columbia Pictures Entertainment and look forward to handling the music from their upcoming projects."

John Hall, chief executive of Filmtrax, said, "In six years Filmtrax has grown to be a major international company. As a leading independent music publisher, it has occupied a unique place in the British music industry. I am pleased that, in this agreement with THORN EMI, we have the opportunity to join forces with one of the leaders in the global music business to achieve huge success in the 90s and beyond."

NEW YORK, NY (AUG. 8) PR NEWSWIRE - Dreyfus Pennsylvania Municipal Money Market Fund, a no-loaded fund designed to enable Pennsylvania residents to earn double tax-free income while preserving capital and maintaining liquidity, has just been introduced by The Dreyfus Corporation.

The new fund will invest in municipal obligations of the Commonwealth of Pennsylvania. The interest from such investments is exempt from Federal and Pennsylvania income taxes.

Dreyfus said that, to provide shareholders with an extraordinary high yield, it has agreed to waive its management fee and absorb all fund expenses until the fund's assets reach $50 million of Jan. 1, 1991, whichever comes first, at which time further extension will be considered.

Minimum investment in the fund is $2,500, or $1,000 if shares are purchased through a broker/dealer. There is no charge to invest, reinvest or redeem shares and dividends are declared daily. Investors may also issue unlimited checks in amounts of $500 or more and exchange their shares for those of other Dreyfus no-load funds at any time, without charge.

Designed to maintain a fixed price of $1.00 per share, Dreyfus Pennsylvania Municipal Money Market Fund is managed by The Dreyfus Corporation, which currently manages of administers approximately $58 billion in assets for more than 1.7 million investor accounts nationwide. Investors who are interested should obtain a prospectus containing more information and read it carefully before they invest.

NEW YORK (AUG. 8) PR NEWSWIRE - Andal Corp. (AMEX: ADL) today reported a net loss of $1,652,000 or 25 cents per share for its 1990 fiscal third quarter which ended June 30, 1990, compared with net income of $101,000, or $.02 per share, in the comparable quarter ended June 30, 1989. Revenues were $16,459,000 in the current quarter compared with $31,194,000 last year. The decline in revenues in the current quarter compared to last year resulted from the divestiture in July 1989 of 75 percent of Andal's ownership in its business of trading and distributing flat rolled steel and tin mill products. After elimination of the divested business, pro forma revenues and the net loss would have been $13,690,000 and $29,000, respectively, for the quarter ended June 30, 1989.

For the nine months ended June 30, 1990, Andal reported a net loss of $2,425,000, or $.37 per share, from revenues of $48,645,000, compared with net income of $189,000, or $.03 per share, from revenues of $86,811,000 in the nine months ended June 30, 1989. After elimination of the divested business, pro forma revenues and net income for the prior year nine-month period would have been $41,285,000 and $197,000, or $.03 per share, respectively.

Andal, through its Multi-Arc Scientific Coatings division, is engaged in surface enhancement as a leading provider of thin-film metal coating services and systems. Andal also operates Salem Tube, Inc., which is in the business of manufacturing stainless steel, high nickel alloy and superalloy seamless and welded tubing.

Andal's nine month operating performance declined from the prior year primarily because of reduced operating profits from Salem Tube, Inc. caused principally by competitive pressures on selling prices. In addition the Multi-Arc division experienced reduced operating profits from its coating services business largely attributable to softness in the automobile industry and the effects of strikes at customers' facilities.

Andal owns a 21 percent interest in Steve's Homemade Ice Cream, Inc., a seller, franchisor and distributor of premium and super-premium ice cream and frozen yogurt.

CONSHOHOCKEN, PA (AUG. 8) PR NEWSWIRE - Apparel Business Systems Inc. (ABS) has joined forces with another Conshohocken-based firm, Integrated Productivity Systems Inc. (IPSi) to offer its customers complete bar code printing, scanning and integration services.

IPSi is the leader of a group of associated bar code systems integration companies located throughout the United States that provide local systems expertise and installation support. As a result, ABS customers can now benefit from dealing with a local bar code systems integrator and support service that knows the integration requirements of the ABS system.

In addition, all of the bar code systems integration companies in the IPSi group have experts working with apparel and shoe companies. Their user lists include such high-profile firms as Ellen Tracy, West Point Pepperell and Farah.

"This relationship with IPSi and its associated companies is the best solution for our customers who need bar code systems that integrate smoothly with their ABS systems," said ABS President Bob Shallow. "IPSi has the knowledge and expertise to link up any kind of bar code system to ABS systems no matter what the platform: S/36; S/38; AS/400; PS/2; or RISC/6000.

Apparel Business Systems is the leading developer of specialized computer software for the apparel and leather goods industries. Based in Conshohocken in suburban Philadelphia, the company serves more than 600 customers worldwide with systems and services oriented to IBM equipment, specifically the IBM AS/400 and the new IBM PS/2 and RISC/6000.

ABS is also an IBM Industry Remarketer, selling IBM software and hardware in addition to its own products, as well as providing support and services for all the products it sells.

IPSi is a Safeguard Scientifics Inc. (formerly Safeguard Business Systems) Partner Co. that develops and implements applications utilizing bar code technology as a leading supplier of complete data entry, tracking, time recording and verification systems for business. As a system integrator, IPSi has developed solutions for distribution centers, manufacturing shop floor control, and data centers.

AS/400, PS/2 and RISC/6000 are trademarks of IBM.

MINNEAPOLIS/ST. PAUL (AUG. 8) PR NEWSWIRE - Mesaba Aviation, Inc., today reported that it flew 20.6 million revenue passenger miles during the month of July, a 24 percent increase over 16.6 million revenue passenger miles flown during the same month last year (one revenue passenger flown one mile equals one revenue passenger mile). The airline said it carried 96,700 passengers in July, an increase of 24.2 percent over 77,868 passengers carried last July. Mesaba's load factor during the month was 57.8 percent, compared to 60.5 percent last year.

Robert D. Swenson, president and chairman of Mesaba, said that July's passenger figures were an all-time record for the regional airline, which has added considerable capacity to its Detroit and Twin Cities hubs over the past year.

Mesaba operates as Northwest Airlink under an airline marketing agreement with Northwest Airlines at the Minneapolis/St. Paul, Detroit and Milwaukee airports. The regional carrier currently provides scheduled airline service to 35 airports in the 10 states of Illinois, Iowa, Ohio, Michigan, Minnesota, Nebraska, North Dakota, Pennsylvania, South Dakota and Wisconsin.

Mesaba Aviation, Inc., is the wholly owned subsidiary of AirTran Corporation. AirTran's common stock is traded on the NASDAQ National Market System under the symbol ATCC.

#90220p3304 08/08/1990 ~PR Newswire

HAIFA, ISRAEL (AUG. 8) PR NEWSWIRE - Elscint Ltd. (NYSE: ELT) today announced its unaudited consolidated results of operations for the second fiscal quarter and the six-month period ended June 30, 1990.

Consolidated revenues for the second quarter totalled $38.8 million, as compared with $35.5 million in the corresponding quarter of the preceding year. Revenues for the six-month period ended June 30, 1990, totalled $74.4 million, as compared with $71 million for the same period in 1989.

Net income for the second quarter of 1990 totalled $2.8 million, or $0.04 per share, as compared with $0.1 million, or zero cents per share, for the corresponding quarter of 1989. For the six-month period, the company recorded net income of $5.1 million, or $0.07 per share, as compared to a net loss of $0.5 million, or a loss of $0.01 per share, for the first half of 1989.

Gross margin for the second quarter of 1990 was 42.4 percent of revenues, as compared with 41.8 percent for the second quarter of 1989. Gross margin for the six-month period ended June 30, 1990, was 44.1 percent, as compared with 40.9 percent for the corresponding six months of the preceding year.

Operating profit continues to improve and totalled $3.6 million for the quarter, as compared with $2.5 million for the same period of 1989. For the first half of 1990, operating profit was $6.8 million, as compared with $4.1 million for the same period of the prior year.

These results manifest the contributions of three major factors: continuing strong demand for nuclear medicine systems, growing MRI sales, and temporary softness in CT sales. The APEX SP family of Nuclear Medicine Gamma Cameras and Data Processors continues to be well received. Demand is particularly strong for the APEX SP-6 rectangular head camera with capacity booked into the first quarter of 1991. The "APEXVIEW" Advanced Nuclear Medicine Remote Viewing and Image Processing station was shown at two major trade shows and elicited favorable responses.

Elscint designs, manufactures, distributes and services medical diagnostic imaging equipment for selected international markets.

DANBURY, CONN. (AUG. 8) PR NEWSWIRE - The licensing of the UNICARB System technology to Nordson Corporation was announced today by Union Carbide

Chemicals and Plastics Company Inc. (UCC&P).

Under the UCC&P license, Nordson will develop, manufacture and market specially designed UNICARB System spray coating equipment.

The UNICARB System technology, a major advance in reducing VOC emissions, was designed to allow coating applicators to economically meet the environmental regulations proposed for the Clean Air Act amendments. Tom White, business manager for the UNICARB System, said: "coating operations that utilize the UNICARB System technology will be able to meet the Clean Air regulations at a cost significantly less than those using competing coating technology such as waterborne, or powder coatings and abatement systems like carbon adsorption or incineration."

Nordson Corporation, headquartered in Westlake, Ohio, has served the finishing industry for over 35 years with innovative, high-quality equipment and systems for applying protective and decorative coatings to wood, metal and plastic products. Nordson's strength has been its creativity and expertise in the design and manufacture of advanced-technology spray equipment. The UNICARB System is a continuation of Nordson's commitment to be a technology leader.

The UNICARB equipment developed by Nordson includes delivery systems and specially designed electrostatic and non-electrostatic spray guns. Unlike other VOC abatement systems that generate carbon dioxide, the UNICARB System uses recycled carbon dioxide that has been generated in other industrial processes, thereby not contributing to the greenhouse effect.

"We see UNICARB as a major breakthrough in spray coating technology," says Bob Lindrud, general manager of Nordson's Liquid Business Group. "With the new Clean Air Act amendments, we anticipate the UNICARB System supplier, we will work with coating applicators to retrofit our new UNICARB equipment in their existing coating operations."

Nordson joins UNICARB System licensees who will supply equipment and coatings to the automotive, wood and metal furniture, heavy equipment, appliances, aerospace, and truck and bus markets.

OAK BROOK, IL (AUG. 8) PR NEWSWIRE - Chemical Waste Management, Inc. (NYSE: CHW) today announced that James T. Banks has been appointed vice president and general counsel of the company.

He has been associated with Waste Management, Inc. since March 1985, serving as director of government affairs in Washington. Prior to joining Waste Management, Banks was senior staff attorney for the Natural Resources Defense Council, and also served as director of the Council's Clean Water Project.

Banks holds a bachelor of science degree in civil engineering from the University of Kansas and a juris doctor degree from the University of Michigan. He has served as a past vice chair of the American Bar Association's Water Quality Committee, Natural Resources Law Section and is a member of the District of Columbia bar.

He will be located at the Chemical Waste Management headquarters in Oak Brook and, with his wife, Alison Martyn, and their children, will be relocating to the Oak Brook area in the near future.

Chemical Waste Management is the nation's largest environmental services company specializing in the recovery, treatment and disposal of hazardous wastes and the cleanup of properties contaminated by such wastes, and is a 77 percent-owned subsidiary of Waste Management, Inc.

EL PASO, TX (AUG. 8) PR NEWSWIRE - Property Trust of America (NYSE: PTR) reported today that total revenues and net earnings for the three months ended June 30, 1990 were $3,159,000 and $506,000, or $0.10 per share, respectively. In the same period of the prior year total revenues were $2,626,000, while net earnings were $665,000, or $0.13 per share.

Total revenues and net earnings for the six months ended June 30, 1990 were $5,952,000 and $994,000, or $0.20 per share, respectively. Total revenues for the first six months of the prior year were $5,429,000, while net earnings were $1,397,000, or $0.28 per share.

The trust's cash flow from operations available for distribution to shareholders for the three months ended June 30, 1990 was $999,000, or $0.20 per share. For the prior quarter ended March 31, 1990 cash flow from operations was $905,000, or $0.18 per share. For the three months ended June 30 of the prior year cash flow from operations was $985,000, or $0.19 per share.

The trust's cash flow from operations available for distribution for the six month period ended June 30, 1990 was $1,904,000, or $0.38 per share, compared with $2,230,000, or $0.44 per share, in the year earlier period.

The board of trustees of the Trust have declared a $.21 per share quarterly distribution payable September 7 to shareholders of record August 24.

Commenting on the six months performance, James H. Polk III, president and chief executive officer, noted that conditions for new investment opportunities are improving, particularly in the apartment area. Construction of the Trust's new 180-unit apartment complex in El Paso is almost complete and is 72 percent occupied and 98 percent leased. The trust's Las Cruces, New Mexico 160-unit project is also 98 percent leased and occupied and the trust has optioned the adjacent five acres for a potential 135-unit second phase.

Property Trust of America is an El Paso based equity real estate investment trust with properties located in the states of Texas, New Mexico, Colorado and California.

#90220p3320 08/08/1990 ~PR Newswire

INDIANAPOLIS (AUG. 8) PR NEWSWIRE - Inland Container Corporation, a Temple-Inland Inc. subsidiary, announced today that it has reached agreements in principle to acquire Crockett Container Corporation, based in Santa Fe Springs, Calif., and Pakway Container Corporation, based in Indianapolis.

Inland also announced plans for an upgrade and expansion of its Ontario, Calif. recycle linerboard mill.

With the addition of Crockett and Pakway, the number of Inland corrugated box plants will increase to 40. The additional box plants will increase Inland's containerboard consumption by about 150,000 tons annually. Sales of the two companies in their last fiscal years totaled approximately $115 million.

The expansion of the Ontario mill, which began production in 1985, will increase production by about 200 daily tons to 800 tons per day. The mill expansion will provide new technology and additional state-of- the-art equipment which will result in the production of the premier recycle sheet in the industry. A new boiler is also being added which will supplement the steam produced by the existing cogeneration plant.

Ben J. Lancashire, Inland's chairman, president and chief executive officer, said, "The addition of Crockett Container and Pakway Container to Inland is exciting for our company. Crockett strengthens Inland's presence in the expanding California market. Pakway gives us a manufacturing facility in Indianapolis, our headquarters' city, and its operations will complement Inland's facilities in the Midwest.

We are also pleased that Randy Crockett, founder and owner of Crockett Container, Lee Bekiarian, vice president and general manager of Crockett, and Ken Matthews and Lloyd Baldwin, Pakway's owners, will continue in their respective management positions after the change of ownership. Both Crockett and Pakway will operate as wholly owned subsidiaries of Inland."

Crockett Container operates corrugator plants in Santa Fe Springs, Buena Park and El Centro, a sheet plant in Santa Fe Springs, and a distribution center in National City, all in California.

Pakway operates a corrugator plant, warehouse and polystyrene foam plant in Indianapolis, a corrugated sheet plant in Knoxville, Tenn., and a sheet plant and warehouse in Miamisburg, Ohio.

These two acquisitions are subject to execution of definitive agreements. Final determination of the mill upgrade and expansion cost has not been made. However, it is anticipated the total cost of these three programs will approximate $100 million.

Inland Container Corporation is an Indianapolis-based manufacturer of containerboard and corrugated containers. The company currently operates six containerboard mills and 33 box plants throughout the United States. Sales in 1989 exceeded $1.1 billion.

#90220p3321 08/08/1990 ~PR Newswire

WILSON, NC (AUG. 8) PR NEWSWIRE - Standard Commercial Corporation (NYSE: STW) today reported that sales for its first quarter ended June 30, 1990 were $193.1 million compared to $197.4 million for the same quarter of 1989, a decrease of 2.2 percent. For the 1990 quarter, the Company had income from operations of $1.5 million versus an operating loss of $1.6 million in 1989. Income before extraordinary items for the 1990 quarter amounted to $60,000 or $0.01 per share compared to a loss of $786,000 of $0.10 per share in 1989. There were benefits of tax loss carryforwards in 1990 of $99,000 and in 1989 of $18,000. Net income of $159,000 or $0.02 per share was posted for the June 1990 quarter in comparison with a loss of $768,000 or $0.09 per share in the comparable 1989 quarter.

Tobacco sales were up 18.8 percent from $87.7 million in 1989 to $104.2 million in 1990 and represented 54 percent of total sales for the 1990 quarter versus 44 percent in 1989. Wool sales of $86.1 million for the 1990 quarter, including $6.2 million by a company acquired as of April 1, 1990, were 19.2 percent lower than the $106.6 million for the comparable 1989 period, and represented 44 percent of total sales in the current quarter compared to 54 percent a year earlier. Increased deliveries of

oriental tobacco and higher prices were the principal reasons for the increase in tobacco sales. Lower wool prices in 1990 compared with 1989, attributable to an increasing over-supply, was the main reason for the decline in wool sales.

Margins on tobacco sales were somewhat better when comparing the 1990 quarter to 1989, and there was a substantial improvement in wool results in 1990 compared to 1989, when margins and inventory values were impacted adversely by an overall long stock position in a falling market. The wool division is expected to resume making a contribution to earnings in the third quarter.

Because of the seasonal nature of the Company's businesses, results for the interim periods are not necessarily indicative of results for the full year.

FINANCIAL HIGHLIGHTS

(In thousands, except per share amounts, unaudited)	Quarter Ended June 30 1990	1989

PLYMOUTH, MI (AUG. 8) PR NEWSWIRE - Highland Superstores, Inc. (NASDAQ: HIGH) reported sales for the second quarter ended July 31, 1990, of $196.5 million, down 1 percent from second-quarter 1989 sales of $198.5 million. The company noted that the sales decline was principally attributable to significantly lower sales of air conditioners. Exclusive of air conditioner sales, second-quarter 1990 sales increased 4 percent over 1989 sales. Comparable store sales declined 4 percent for the quarter and increased 1 percent for the quarter, exclusive of air conditioner sales.

Sales for July 1990 were $64.3 million, down 2 percent from July 1989 sales of $65.7 million. July 1990 included one less selling day than 1989 due to timing of physical inventories. Exclusive of air conditioner sales July 1990 sales increased 2 percent over 1989 sales. Comparable store sales declined 6 percent for the month and decreased 1 percent for the month, exclusive of air conditioner sales.

Sales for the six months ended July 31, 1990, were $381.8 million, down 3 percent from sales of $395.0 million during the same six-month period of 1989. Comparable stores sales declined 7 percent for the six months.

Sales for each of the 1990 periods exclude sales from the Shreveport, La., and Milwaukee markets, from which the company exited during 1990.

Highland Superstores, Inc., headquartered in Plymouth (Detroit), is one of the largest volume specialty retailers of consumer electronics and appliances in the United States. The company currently operates 92 retail stores in Michigan, Ohio, Indiana, Illinois, Minnesota, Massachusetts, Rhode Island, New Hampshire, New York and Texas, including a new store opened on Aug. 2, 1990, in Chicago.

#90220p3327 08/08/1990 ~PR Newswire

DALLAS (AUG. 8) PR NEWSWIRE - Atmos Energy Corporation (NYSE: ATO) today reported net income of $109,000, or $.02 per share, on increased operating revenues of $75.2 million for its third fiscal quarter ended June 30, 1990. This compares with a net loss of $1.1 million, or $.19 per share, on operating revenues of $66.5 million for the previous year's third quarter. The third quarter usually is unprofitable due to the seasonal nature of natural gas heating sales.

Volumes of gas sold and transported by the company during the third quarter increased to 27.6 billion cubic feet (Bcf), compared with 25.3 Bcf during the third quarter a year ago.

The company attributed the improved results to unusually dry weather and 21 consecutive days of 100-plus degree temperatures during June in its Texas service area. The dry conditions caused a surge in demand for gas sold for irrigating crops, more than doubling sales in June compared with sales for the month in the previous year. The area is a major contributor to the nation's cotton crop.

Operating expenses excluding purchased gas costs for the quarter were down

slightly from last year's third quarter.

For the nine months ended June 30, 1990, Atmos reported net income of $11.0 million, or $1.80 per share, on operating revenues of $296.2 million. This compares with net income of $10.4 million, or $1.71 per share, on operating revenues of $284.7 million for the nine months ended June 30, 1989.

Volumes of gas sold and transported by the company during the nine- month period were 97.6 Bcf, up from 95.5 Bcf for the same period the previous year.

Although the fourth quarter is expected to be unprofitable as usual, Atmos Chairman Charles Vaughan said he was optimistic that continued strong irrigation sales in July and the company's cost containment programs will have a positive impact on fourth quarter results.

Atmos previously announced that it had applied for new rates in the Kentucky service area on Feb. 13, 1990. Public hearings have been conducted and concluded, and the company anticipates it will be allowed to place new rates into effect in Kentucky before the fiscal 1991 heating season. Vaughan added, "We are currently reviewing rates of return in the company's other jurisdictions as well."

The board of directors of Atmos today declared a $.29 per share regular quarterly dividend on the company's common stock to be paid on Sept. 10, 1990, to shareholders of record on Aug. 24, 1990.

Atmos Energy Corporation provides natural gas service to more than one-half million customers in Texas, Louisiana and Kentucky through its operating companies -- Energas Company, Trans Louisiana Gas Company and Western Kentucky Gas Company.

#90220p3328 08/08/1990 ~PR Newswire

ANDREWS, SC (AUG. 8) PR NEWSWIRE - Phoenix Medical Technology, Inc. (NASDAQ: PHNX) reported sales of $3,761,000 for the quarter ended June 24, 1990, a decrease of six percent from the second quarter of 1989.

A net loss of $845,000, $.43 per share, was incurred as compared with a net loss of $1,084,000, $.55 per share, for the prior year quarter. The prior year quarter included a writedown of latex inventory of $540,000 and an income tax credit of $291,000.

Net sales for the six month period ended June 24, 1990 were $7,704,000, a decrease of two percent from the first six months of 1989. A net loss of $1,682,000, $.86 per share, was incurred as compared with a net loss of $843,000, $.43 per share, for the first six months of the prior year.

The company also announced that it had entered into a letter of intent with MBf International Limited, a Hong Kong Corporation. MBf International Limited is a wholly owned subsidiary of MBf Holdings, Berhad, a diversified Malaysian company which owns a latex glove manufacturing subsidiary.

The letter of intent provides for the sale by the company to MBf International Limited of 2,000,000 shares of the Company's common stock at a price of $1 per share, which will represent slightly more than 50 percent of the then outstanding common stock.

It is contemplated that as part of such transaction, all or a substantial portion of the company's glove capacity would be moved to Malaysia over a period of several years.

The completion of this transaction is subject to the completion of the foreign corporation's due diligence, successful negotiation of final agreements, and obtaining any necessary approvals, including approval of the company's bank. There can be no assurance that such a transaction will take place.

The company has suffered recurring losses from operations and the losses are continuing. The company has exhausted its available cash and credit line. The company must have additional capital to continue operations. The company has attempted to provide cash for operations through lowering its inventory levels and receivables.

As a result of this reduction in inventory and receivables, the company, at July 31, 1990, had outstanding borrowings on its revolving line of credit of approximately $443,000 more than the borrowing base available on the line of credit.

CONTACT: Edward W. Gallaher, Sr., President and Chief Executive Officer, Phoenix Medical Technology, Inc., (803) 221-5100.

WASHINGTON (AUG. 8) PR NEWSWIRE - British Aerospace, Inc. today announced that AMR Eagle, Inc., the regional airline partner of American Airlines, has placed a follow-on order for 35 BAe Jetstream Super 31s, with options on a further 15 aircraft. The total value of the order plus options is approximately $200 million.

The order exercises options for 25 aircraft AMR Eagle had reserved as part of the Jetstream transaction announced in June 1989, plus an additional 10 aircraft.

The airline also has existing options for 50 of the new Jetstream 41 aircraft, to be operated in a 29-seat configuration.

Delivery of the first Jetstream Super 31 from this second order is scheduled for November 1990 with remaining aircraft delivered by the end of 1991. Currently operating 25 Jetstreams based at its Nashville, Raleigh/Durham, and Miami hubs, the Eagle fleet will grow to 125 Super 31s and 41s assuming all options are exercised.

Robert E. Martens, AMR Eagle's president, said the new order builds on its established Jetstream fleet and increases the carrier's flexibility.

"These aircraft give us a strong competitive advantage," Martens said. "The Jetstream Super 31 has become a dependable and valuable part of our fleet, helping us provide superior service to smaller communities."

Brian Thomas, president of British Aerospace, Inc., explained the significance of the new order. "The follow-on commitment by AMR Eagle to the Jetstream is an indication of its suitability to one of the world's largest operators," Thomas said. "Their confidence in the aircraft is a testament to its technological superiority and passenger acceptance."

The Jetstream Super 31 is renowned for its unique stand-up headroom, comfortable seating, generous baggage stowage area, and individual reading lights and air conditioning units.

To date, 345 orders have been placed for the Jetstream 31/Super 31 aircraft, with more than 290 of those in service with 33 operators worldwide. In the North American market there have been 296 orders for the aircraft, with more than 240 in service with 18 operators.

BOXBOROUGH, MASS. (AUG. 8) PR NEWSWIRE - Racal InterLan, Inc. today announced the results of benchmark testing conducted to analyze performance differences between board-based and host-based transmission control protocol/internet protocol (TCP/IP) implementation in a client/server networking environment. The company will provide the information to users and network integrators for use when making network specification and purchasing decisions.

Designed by the consulting firm of Arthur D. Little Corp. of Cambridge, Mass., the benchmark testing distinguishes the appropriate use and load capacity of board-based and host-based TCP/IP implementation.

"The benchmark results will provide users with hard information useful in choosing between board and host-based network interface solutions. In addition, system integrators can use the test results to guide non-network decisions regarding memory requirements, disk performance, CPU speed and overall system capacity," said Bob Nerz, product line director at Racal InterLan.

Host-based TCP/IP refers to the TCP/IP protocol stack being processed in the main CPU of the computer, while board-based TCP/IP processes the protocol stack in memory located on an adapter card slotted into the computer.

Each network adapter solution has certain performance advantages, but end users and VARs have had little hard data to help determine which solution is best for their application. Racal InterLan commissioned benchmark tests to help users make such choices.

Racal InterLan, Inc. designs and manufactures hardware and software solutions for standards-based local area networking at the workgroup, departmental, and premises levels. Headquartered in Boxborough, Mass., Racal InterLan employs 275 people in the United States and abroad. Racal InterLan is a subsidiary of the Racal Corporation, Fort Lauderdale, Fla., a company within the $550 million Data Communications Group of $2.6 billion parent corporation, Racal Electronics Plc.

GRAND RAPIDS, MICH. (AUG. 8) PR NEWSWIRE - Knape & Vogt Manufacturing Co. (NASDAQ: KNAP) today reported record sales and earnings for the fourth quarter and fiscal year ended June 30, 1990.

In the fourth quarter, net sales increased 8.8 percent to a record $33.2 million from $30.5 million a year earlier. Net income for the 1990 fourth quarter, which included a gain on the sale of a facility, was $5,980,773, or $1.53 per share, compared to net income of $1,440,356, or $0.37 per share in the 1989 quarter.

For the full year, net sales rose 8.2 percent to a record $124.3 million from $114.9 million in fiscal 1989. Net income for 1990, which also

includes the gain on the facility sale, was $9,749,107, or $2.49 per share as compared to net income of $5,324,159, or $1.31 per share in 1989.

The previously disclosed sale of the La Mirada, Calif., facility resulted in an after-tax gain of $4,038,988, or $1.03 per share, in both 1990 periods.

Raymond E. Knape, chairman and president, pointed out that accounting rules require the gain on the La Mirada sale to be treated as other income although the company considers it a one-time gain. "Treating this sale as an extraordinary item, Knape & Vogt showed a strong fourth quarter strictly from operations," Mr. Knape said. "Earnings were up a strong 35 percent to $1,941,785, or $0.50 a share, from the previous year's quarter. This was slightly better than we had anticipated going into the quarter. Eliminating the gain from the full year's results shows an increase in line with our most recent forecasts."

Knape & Vogt manufactures wall-attached shelving, a wide variety of home-furnishing items, and also derives about one-third of its sales from drawer slides for kitchen and utility cabinet manufacturers.

CONTACT: Knape & Vogt Vice Chairman Robert Bowman, 606-459-3311; or Jack Queeney, 312-266-7800, or Kathleen Phelan, 212-661-8030, both of The Financial Relations Board, for Knape & Vogt

#90220p3334 08/08/1990 ~PR Newswire

PITTSBURGH (AUG. 8) PR NEWSWIRE - National Intergroup Inc. (NII) (NYSE: NII) announced today that, in accordance with its previous announcement, it has increased the offer price under its outstanding tender offer for all outstanding cumulative convertible preference units representing limited partnership interests of Permian Partners, L.P, to $3.85 per preference unit, in cash, subject to adjustment, and one non-transferable contingent value right per preference unit.

The $3.85 per preference unit cash portion of the offer price is subject to reduction on a per unit basis to reflect any distributions on the preference units as of a record date subsequent to May 18, 1990, and prior to the consummation of the offer, other than the regular quarterly distribution of $0.2875 per preference unit for the quarter ended June 30, 1990 (which will be paid on Aug. 31, 1990). The contingent value rights (which are more fully described in the supplement dated Aug. 8, 1990, amending the terms of the offer) will afford unitholders the right to participate, subject to certain conditions, in the net proceeds (as defined in the supplement), if any, allocable to the preference units acquired by NII in excess of the cash portion of the purchase price paid pursuant to the tender offer, in the event of a sale of the partnership to

an unaffiliated party within a specified period of time after the consummation of the offer and the minority acquisition referred to below. The specific terms of the contingent value rights are set forth in the supplement and the foregoing is qualified in its entirety by reference to the supplement. NII commenced the tender offer on May 24, 1990, at an original price of $3.75 per preference unit in cash, subject to reduction on a per unit basis to reflect any distributions on the preference units subsequent to May 18, 1990, and prior to the consummation of the offer, other than the regular quarterly distribution for the quarter ended March 31, 1990 (which was paid on May 31, 1990).

The increased offer price under the tender offer reflects the terms of the previously announced settlement of certain litigation relating to the tender offer and is subject to approval by the Delaware Court of Chancery (and the resolution of any appeals therefrom). The tender offer is conditioned on, among other things, a majority of the publicly held preference units being validly tendered and not withdrawn; the adoption of an amendment to Permian's partnership agreement that would permit NII, upon acquiring a majority of the publicly held preference units pursuant to the tender offer, to purchase all remaining preference units at a price equal to the purchase price paid under the tender offer (the "minority acquisition"); and the issuance of a final, unappealable judicial order approving the terms of the settlement. A hearing date for approval of the settlement has been scheduled for Aug. 27, 1990, subject to adjournment at the court's discretion.

In connection with increasing the offer price under the tender offer, NII also announced that it is extending the tender offer until 12:00 midnight (New York City time) on Aug. 27, 1990, subject to NII's right to extend the offer further. The tender offer was previously scheduled to expire at 12:00 midnight (New York City time) on Aug. 10, 1990. NII stated that the supplement and the other definitive offering materials containing the terms of the amended offer are being filed with the Securities and Exchange Commission today and will be mailed to holders of preference units promptly.

NII also announced that it has been advised by The Permian Corp. (TPC), a wholly owned subsidiary of NII and the sole general partner of Permian, that TPC plans to commence today its solicitation of consents from the limited partners of Permian with respect to the adoption of the amendment that is a condition of NII's tender offer.

As of the close of business on Aug. 7, 1990, approximately 5,177,510 preference units had been tendered and not withdrawn under the offer, representing approximately 32.9 percent of the publicly held preference units.

BALTIMORE (AUG. 8) PR NEWSWIRE - Baltimore Gas & Electric Co. (NYSE: BGE), in conjunction with the City of Baltimore, the Rouse Co., and various other city, private and non-profit organizations, is sponsoring a one-stop crisis intervention center at the Mondawmin Mall.

The center will provide Baltimore City residents with a centralized resource which can respond immediately and effectively to emergency human service problems. Opening ceremonies are scheduled at 3 p.m. on Wednesday, Aug. 15.

Baltimore Gas and Electric customer relations representatives, already located in the mall, will closely coordinate their efforts with the center to provide energy assistance to low-income citizens. Representatives will help eligible customers develop acceptable utility payment plans as well as provide them with guidance on obtaining funding from other sources such as the Fuel Fund.

Current human service programs are designed to provide non-emergency service to city residents. The crisis center will provide timely emergency service to low- to moderate income residents by putting existing resources together under one roof.

In addition to the Urban Services Agency and the Mayor's Station Program, BG&E, the Mayor's Office of Community and Neighborhood Relations, the Department of Social Services, the Baltimore Police Department and Energy Advocates will jointly assist in the coordination of services. City residents faced with crisis situations such as energy assistance, eviction prevention, homeless services, emergency food, substance abuse and juvenile delinquency can now receive timely help, if eligible, by visiting the crisis center.

Mondawmin Mall was chosen because of its accessibility by MTA lines, the Metro substation, the large number of area residents requiring crisis intervention services and the availability of other city, state, federal and private service providers currently located in the mall. The crisis center will be a valuable resource to the communities of Pimlico, Lower Park Heights, Upton, Rosemont, Reservoir Hill and Wyman Park.

While this is a new one-stop center, BG&E reminds its customers that representatives are always available to counsel those having problems paying their utility bills. For more information, please call 301-685-0123.

CONTACT: Charles J. Franklin Jr. of BG&E, 301-234-7433

SAN FRANCISCO (AUG. 8) PR NEWSWIRE - Bechtel Corp. is developing a prequalified bidding process for construction-related work on the PGT-PG&E Pipeline Expansion. Bechtel, project manager to construct the 845-mile natural gas transmission pipeline expansion of Pacific Gas Transmission Co. (PGT) and Pacific Gas and Electric Co.'s (PG&E) existing facilities recently awarded the engineering contract for the project to Gulf Interstate Engineering-ICF Kaiser Engineers and Fish Engineering, both of Houston.

The PGT-PG&E Pipeline Expansion will use 36-inch and 42-inch pipeline to transport Canadian natural gas to the Pacific Northwest and California. It will traverse parts of Idaho, Washington, Oregon and California. Pending approval by the Federal Energy Regulatory Commission and California Public Utilities commission, construction of the $1.2 billion expansion will occur over a two-year period estimated to begin in late 1991.

An extensive range of ancillary products and services will be required to construct the pipeline expansion and related compressor and meter station facilities. Bid opportunities for qualified subcontractors and suppliers are being developed and will be announced soon.

Qualified minority and women-owned business enterprises will be actively sought as suppliers in all phases of the project and are encouraged to participate.

NEW YORK (AUG. 8) PR NEWSWIRE - Tranwood Earl & Company Limited, a U.K.-based private investment firm led by Peter Earl, has announced that agreement has been reached on the terms of a recommended acquisition of The VPI Group PLC, a global financial public relations firm, including its U.S. subsidiary, Quorum Communications, Inc., formerly The Carter Organization. The acquisition is to be implemented by TCF Partners PLC, a special-purpose company controlled by The Tranwood Consortium Fund, of which Tranwood Earl is manager.

The transaction is valued at approximately $13.1 million plus additional amounts that may arise by way of awards for damages pursuant to litigation entered into by VPI in relation to the acquisition and subsequent operation of Quorum Communications.

Richard Koch and Peter Earl, directors of TCF Partners, have been appointed to the board of VPI as non-executive directors. Following completion of the acquisition, it is intended that The VPI Group's U.K. and U.S. businesses will operate as two entirely separate entities, with Koch as chairman of the U.K. businesses, and Earl as chairman of Quorum Communications, Inc. in the U.S.

Quorum Communications, acquired by VPI in 1987, currently employs 70 people at its New York headquarters and offers proxy solicitation services.

Peter Earl, 35, was a Kennedy Scholar at Harvard University before joining Boston Consulting Group as an advisor on corporate strategy. He went on to work in international mergers and acquisitions at Blyth Eastman Dillon and Orion Royal Bank. In 1982, he became a vice president of Arab Banking Corporation, helping to establish its merchant banking arm, ABC International Limited, of which he was a director. In 1985 he formed Tranwood Earl. Currently chief executive of Tranwood PLC, Earl is also a non-executive director of Prospect Industries PLC and co-author of International Mergers & Acquisitions (Euromoney Publications, 1986).

The Tranwood Consortium Fund is a limited partnership established under English Law and formed for the purpose of investing in equity and equity-related securities in the U.K. and elsewhere in Europe. The Fund was established in the second half of 1989 and has aggregate capital commitments of approximately $44 million.

For a full copy of the announcement made to the Stock Exchange in London, contact Broadgate Consultants, Inc. in New York at 212-742-1280.

BETHESDA, MD (AUG. 8) PR NEWSWIRE - The Washington Real Estate Investment Trust (WRIT) (AMEX: WRE) cash flow from operations for the second quarter of 1990 was up 16 percent to $4,933,677, compared with $4,260,242 for the second quarter of 1989 (32 cents vs. 29 cents per share).

Net income for the second quarter ended June 30, 1990, of $4,093,347 was up 16 percent compared with $3,523,311 for the second quarter of 1989 (26 cents vs. 24 cents per share).

All four of WRIT's property groups contributed to the increased operating profits. WRIT's heavy emphasis on achieving high occupancy rates produced an overall occupancy rate of 94 percent for the second quarter of 1990.

The restaurant and the last two remaining stores in the new 19,500-square-foot addition to the Concord Shopping Center have been leased, resulting in the entire 76,400-square-foot center now being 100 percent leased.

WRIT's capital improvement program continues at 444 North Frederick Ave., the office building acquired last October. At the time last fall that the trust signed its purchase contract, 444 was 40 percent vacant and leases for an additional 44 percent were expiring on or before May 31, 1990. The majority of the expiring leases renewed and some expanded. With other new leases signed, the leased space on Aug. 1 had increased to 74 percent, and climbing. Pepsi-Cola moved into its 69,000-square-foot distribution center during the second quarter, and WRIT completed capital improvements in excess of $1 million for Pepsi. Construction is in progress at the 145,000-square-foot Capitol Freeway Center for the District of Columbia Metropolitan Police Department under a 10-year lease. WRIT is committed to an ongoing program of reinvestment in is properties to produce greatly increased rental revenues.

WRIT's third quarter dividend of 27 cents per share will be paid on Sept. 28, 1990, to shareholders of record on Sept. 7, 1990. This will be the 116th consecutive quarterly dividend equal to or greater than the previous dividend.

NEW YORK (AUG. 8) PR NEWSWIRE - USLIFE Income Fund, Inc. (NYSE: UIF), a closed-end investment company, reported today that net investment income from interest and dividends decreased to $5,042,261 or 94 cents per share, for the fiscal year ended June 30, 1990, compared to income of $5,238,048 or 98 cents per share in the previous fiscal year. Regular quarterly dividends totalling 93 cents per share were paid to stockholders during the fiscal year.

For the twelve months ended June 30, 1990, net realized losses from securities transactions amounted to $2,480,398. The net increase in unrealized losses on investment securities during the period amounted to $3,102,872.

The net assets of USLIFE Income Fund totalled $46,741,889 at June 30, 1990 compared to $52,264,599 on June 30, 1989. Net asset value per share at June 30, 1990 was $8.73 compared to $9.76 on June 30, 1989.

The board of directors of USLIFE Income Fund today declared a quarterly

dividend of 23 cents per share from net investment income. The dividend will be payable on Sept. 4, 1990 to stockholders of record on Aug. 24, 1990.

USLIFE Income Fund is managed by USLIFE Advisers, Inc., a subsidiary of USLIFE Corporation (NYSE: USH).

SARASOTA, FL (AUG. 8) PR NEWSWIRE - Salvarori Ophthalmics (NASDAQ: EYES) today announced an increase in earnings for its second quarter ended June 30, 1990. On sales of $1,542,135, Salvatori had net income for the current quarter of $39,589 compared to 1989 second quarter sales of $1,436,761 and net income of $11,231. Salvatori also reported, for the first time, a profit at the conclusion of its first six months of 1990 operations. For the six months ended June 30, 1990, the company had net income of $6,211 on sales of $2,853,405 compared to a net loss of $61,237 on sales of $2,232,161 for the same period in 1989. In addition to record earnings, the company reports that the sales achieved for the two 1990 periods are both records. The 1990 results of operations includes a $17,000 extraordinary credit for the tax benefit of a net operating loss carryforward.

Salvatori attributes its continuing growth in sales and earnings to increased sales of its Sof-form (R) 55 Toric contact lens (a soft lens that corrects astigmatism) as well as increased sales of RGP (rigid gas permeable) contact lenses. The RGP sales increase results from the company's March 1989 acquisition of its Lincoln, Neb. sales and manufacturing division ("Lincoln") from BMC Industries, Inc. The Lincoln division primarily manufactures and sells RGP contact lenses.

Salvatori is looking for further growth in its RGP sales with its previously announced introduction of the Boston Envision (R) contact lens. The Boston Envision (R) lens will be manufactured under a license with Polymer Technology Corporation ("PTC"), a division of Bausch & Lomb. The Boston Envision (R) lens will only be available from Authorized Manufacturers of PTC such as Salvatori. The Boston Envision (R) contact lens design, PTC believes, is a significant advance which will create new levels in patient comfort and fit. Salvatori believes this new product will have a positive impact on its RGP sales in the last half of 1990.

#90220p3351 08/08/1990 ~PR Newswire

CHICAGO (AUG. 8) PR NEWSWIRE - Santa Fe Railway has advised its intermodal customers that it is considering a surcharge related to fuel prices. Don McInnes, vice president-intermodal, said the surcharge would be effective as early as Aug. 15, if the railway concludes to apply it.

"Our final decision, including the magnitude of the surcharge, will be related directly to the cost of fuel," he said. "By Aug. 15 we should have a better feel for the extent of the fuel cost increase, and perhaps some indication of its duration. Our tentative plan is to adjust our intermodal surcharge as needed after Aug. 15, based upon the price of fuel."

McInnes reported that the railway's costs for diesel fuel have increased nearly 30 percent in the past two weeks. "We are reluctant to raise our tariffs, and do not want to act precipitously, but if these conditions continue we really have no alternative," he said.

The railway said it was also considering what action to take with regard to non-intermodal traffic, but that since intermodal is completely deregulated it can move quicker in that area of its business.

#90220p3360 08/08/1990 ~PR Newswire
DALLAS (AUG. 8) PR NEWSWIRE - American Airlines announced today that it will increase all fares by 10 percent to offset skyrocketing fuel costs.

The increase will be effective Aug. 10 for fares in the continental United States, Hawaii, and the Caribbean. A similar increase for international fares will take effect Aug. 15.

"We regret that recent events in the Middle East have caused a significant increase in fuel prices, leading to the need to increase air fares," said Michael W. Gunn, American's senior vice president- marketing.

"American wants to be fair with its customers and we are especially sorry to do this because we know that higher fares will create hardships for many," Gunn said.

"Unfortunately, unlike some other industries, airlines feel the effects of fuel price increases almost immediately; thus we must move quickly to recover these rapidly rising costs, particularly since a high percentage of our seats have already been sold at prices which do not reflect the impact of higher fuel prices."

Fuel is an enormous cost item for us, Gunn said, and a 10 percent fare increase will, at best, simply recover our increased costs after allowing for the expected loss of business which higher prices will inevitably mean.

In an attempt to avoid any need for further price increases, American has launched an aggressive effort to find additional ways to reduce costs.

Every 1-cent increase in the price per gallon of jet fuel adds more than $2 million a month -- or $25 million a year -- to American's costs, Gunn said, and he pointed out that American uses more than 200 million gallons of jet fuel each month.

Leeco's Chief Financial Officer Franco Tomasini stated, "Overall product sales increased 10.74 percent during the quarter. The increase came from strong foreign sales contributed by Leeco's wholly owned subsidiary in Italy, Technogenetics. Losses this quarter and for the six-month period resulted primarily from high costs of goods sold at Leeco, increased SG&A expenses at Technogenetics and the shift from net interest income to interest expense. The company is continuing to focus its efforts on bringing its costs in line with industry standards and implementing automation."

As reported on July 31, 1990, Leeco announced the appointment of Rod Raynovich as chief executive officer and Ron Steckel as vice president of operations. Additionally, Leeco announced the promotion of Michael Miller to senior vice president.

Through facilities in the United States, Italy and the People's Republic of China, Leeco develops, manufactures and markets test kits used in the diagnosis of more then 50 medical conditions or diseases. These test kits are supplied to hospitals, clinical laboratories and over-the-counter markets.

#90220p3366 08/08/1990 ~PR Newswire

BOSTON (AUG. 8) PR NEWSWIRE - Caere Corp. (NASDAQ: CAER) today introduced a hand-held scanner with true 300 dpi CCD input array that can import text and numbers directly into the user's personal computer application. Announced here at the MacWorld Show, Caere's Typist(TM) lets users scan information into an application at the rate of 500 words per minute.

The product's affordable price and high performance will create new market opportunities for Caere, according to Larry Miller, Caere's vice president of marketing and sales for office products. "The Typist is designed to function as a personal scanner," Miller said. "It sets a new standard for speed, ease-of-use, practicality and versatility, and its price point -- under $700 -- makes page recognition very affordable to individuals as well as all sizes of businesses."

Designed specifically for page recognition, the Typist uses Caere's AnyFont(TM) optical character recognition technology to recognize text regardless of the font style or the number of columns on a page. This enables users to take information from almost any hard copy source and put it directly into word processors, spreadsheets, databases or other applications. Direct Input into Applications

Caere's Typist enables the user to input scanned, recognized material directly into whatever application is currently running on the user's computer. As the user scans the page, the text or numbers automatically appear in the report, presentation, analysis, etc. that he/she is working on. This direct input is made possible by a design methodology which interrupts the keyboard operation and allows data to enter the application via the keyboard buffer. Fast, Easy Scanning

The Typist offers a scanning speed of up to two inches per second, while competing products offer a speed of only one inch per second. In addition the Typist includes the ability to recognize multicolumned pages, one column at a time. To prevent column overlap, the Typist recognizes the column that is in the physical center of the scanner and throws away the incomplete columns on either side.

Users may scan either horizontally or veritcally without adjusting any

settings. The Typist's software automatically interprets the direction. When scanning horizontally, the Typist automatically discards repeated text which occurs when two scans overlap. The Typist accomplishes this process by comparing the ASCII text of the last line of the first scan with the ASCII text of the first line of the second scan. This procedure is commonly referred to as "stitching." Ergonomically Designed Hardware

The Typist was specially designed for user comfort and flexibility. Its two-inches-per-second scanning speed not only saves users time, but is optimized to allow the user's hand to have a more consistent pull rate than is possible with the typical one-inch-per-second speed. "Caere studied this issue and found that this feature can make scanning easier and more comfortable for the user, thereby contributing to increased productivity," Miller said.

The Typist also has a five-inch scan width, which enables the user to scan a typical business document with only two scans of the page. A large, well-lit viewing window makes the data visible to the user from a wide variety of angles. Five yaw-resistant rollers prevent side-to-side movement, and a single wide button enables right- and left-handed people to use the Typist equally effectively. Affordably Priced

The Typist is priced to appeal to a wide variety of users. The suggested retail price for the Apple Macintosh version, which includes a SCSI interface box, is $695. The suggested retail price for the 80286- and 80386-based personal computer version which includes an AT- or MCA-interface card, is $595. "At this price point, the Typist is affordable for people who don't have the volume needs or office space to justify buying a flatbed scanner and a separate page recognition package like Caere's OmniPage(R) or a high-volume system like our Parallel Reader(TM)," Miller said. "It may also be easier for more people to buy, because its low price places it in a category of products, that typically is not subject to lengthy purchase approval processes." Multiple Markets and Environments

The Typist is intended for use in new markets, such as home office, finance, education and research environments. as well as those markets traditionally served by Caere's current page recognition product line, including the general office, desktop publishing and legal environments. "People will discover new applications for the Typist as they use it," Miller said. "A home-based writer with one personal computer will find it useful, as will a salesperson working with a laptop in the field, as will a manager or a secretary who uses a computer network in a corporation." Additional Features

The Typist includes the ability to scan graphic images through image capture software that supports industry standard PCX, TIFF and PICT output file formats. A dither pattern switch enables the user to choose among

four different patterns when working with photos or line art. Clicking the scan button once automatically sets the contrast correctly.

Standard page recognition features of the Typist include Caere's AnyFont technology, which reads fonts from six points to 72 points in size and in either landscape or portrait orientation. It also reads any nonstylized font in any type of layout or mix of text and graphics. AnyFont supports 11 languages. System Requirements and Availability

The Macintosh version of the Typist requires four megabytes of RAM and a Macintosh SE or any member of the Macintosh II family. It will ship in September 1990.

The 80286 and 80386 versions require IBM PC or compatible with an AT bus or a Micro Channel bus, 640 kilobytes of base memory, two megabytes of expanded/extended memory and a hard disk. They will ship in the fourth quarter of 1990.

Caere Corp., based in Los Gatos, Calif., designs, manufactures and markets information recognition software and systems products that provide a low-cost, accurate means of converting text, numeric and bar code data into computer-usable form.

#90220p3367 08/08/1990 ~PR Newswire

HOUSTON (AUG. 8) PR NEWSWIRE - Southern Mineral Corp. (NASDAQ: SMIN) announced today its best ever three-month and six-month periods. Prompted by a $9.4 million gain from the June sale of its interests in the Trimble Field, the company set a new net income record of $5,715,000 or $1.42 per share for the three months ending June 30, 1990, compared to net income of $337,000 or $.08 per share, for the three months ending June 30, 1989. While the provision for income taxes rose to $3,386,000 in the 1990 second quarter from $150,000 in the 1989 second quarter, revenues soared to a $9,753,000 record this quarter from $850,000 in the 1989 second quarter as a result of this sale.

Due to the gain, the company also posted impressive totals for the first six months. Compared to net income of $660,000, or $.16 per share, for the six months ending June 30, 1989, net income rose 900 percent to a new record of $5,983,000, or $1.49 per share, for the six months ending June 30, 1990. Revenues for this period rose to $10,926,000, also a record, from $1,672,000 for the same period last year. Partly offsetting the rise in revenues, the provision for income taxes increased to $3,512,000 this six months from $292,000 for the same period last year.

Southern Mineral Corp. is primarily an exploration company with production in the states of Alabama, Arkansas, Mississippi, Texas and Wyoming.

DALLAS (AUG. 8) PR NEWSWIRE - Forney International, Inc., for more than 60 years a leading designer and fabricator of electronic control systems and combustion products, today reported that revenues were up by 20 percent and order backlog by 100 percent for fiscal year ended June 30, 1990.

Forney, which entered 1990 with a backlog of $14 million, added $50 million in new business during the year. Based on products shipped, the company recorded sales of $36 million compared to $30 million in 1989. The company enters fiscal year 1991 with a backlog of $28 million, double the previous year's total. Forney, a privately held company, generated profits and positive cash flow for the year.

Based on its current backlog and continuing market penetration, the company estimates sales for 1991 will be 30 percent over the 1990 level. The company attributes its improved performance to three factors: a change in sales and marketing strategies, new ownership, and new management. The growth in Forney's business has enabled the company to increase its workforce by 140 during the last 12 months, bringing total employment to 380.

In March 1989, New Orleans-based TANO Corp. acquired Forney from Foster Wheeler. The new owners selected Jesse M. Lawrence, a 29-year veteran of General Electric, to head the company as president and chief executive officer.

In addition to expanding its domestic market share, Forney has succeeded in penetrating foreign markets. Forney has a strong track record in the Pacific Rim marketplace, including South Korea, Taiwan, Republic of China, Philippines, Australia and India. Founded in 1927, Forney International products have been installed in over 2,700 facilities worldwide.

FULLERTON, CA (AUG. 8) PR NEWSWIRE - The Yokohama Rubber Co. Ltd., the second largest tire manufacturer in Japan, has announced its investment and production plans for the Mohawk Rubber Co. of Akron, Ohio which Yokohama Rubber acquired last October.

According to the plan, Yokohama-brand radial tires for passenger cars and light trucks the replacement market will be produced by the end of the year, in addition to the existing production of Mohawk- brand and private brand tires. Yokohama also intends to supply OEM tires in North America.

The production capacity of Mohawk, which now is 4.1 million units per year will be increased to 5.3 million in 1991. Yokohama's plan is to increase capacity to 10 million units per year by the mid- 1990's.

Initial investment will be $40 million for expansion of production with a total investment of 200 million. Approximately 100 employees will be

hired in 1991.

Yokohama Rubber has already begun discussions with the state government, Mohawk's labor union and other concerned parties, seeking their cooperation and support.

Mohawk has already begun improvements of the production lines at its plant in Salem, Va. At the same time, Yokohama Rubber's technical instructors have been sent to Mohawk, and Mohawk trainees and engineers have been sent to Japan to refine their technical knowledge.

Yokohama-brand tires produced at Mohawk will be marketed by Yokohama Tire Corp. in the United States and Yokohama Tire (Canada) Inc. in Canada.

#90220p3383 08/08/1990 ~PR Newswire

MINNEAPOLIS (AUG. 8) PR NEWSWIRE - Bio-Medicus, Inc. (NASDAQ:BMDS) today reported net income of $1,547,000, or 20 cents per share, for its first quarter ended June 30, 1990, an increase of 30 percent over net income of $1,189,000, or 15 cents per share, for the same period of fiscal 1990. Sales were $8,085,000 in the first quarter of 1991, compared with $7,658,000 for the same period last year, an increase of 6 percent.

The company's financial results in the first quarter of fiscal 1991 were adversely affected by expenses incurred as a result of its proposed merger with Medtronic, Inc. In the comparable period of fiscal 1990, results were adversely affected by takeover defense and merger expenses incurred by HemoTec, Inc., which became a wholly owned subsidiary of Bio-Medicus on Aug. 29, 1989.

Sales of Bio-Medicus circulatory support products increased 5 percent over last year's first quarter, in spite of a 51 percent decrease in Bio-Console sales. The company attributed the Bio-Console sales reduction primarily to uncertainties among its independent domestic and foreign distributors, arising from the proposed merger with Medtronic, Inc., and to a more conservative approach by the medical community to supported angioplasty procedures. Bio-Pump unit sales increased 19 percent over last year's first quarter.

Sales of HemoTec products for the management of clotting factors increased 7 percent over the prior year's first quarter.

Bio-Medicus has signed a definitive agreement to merge with Medtronic, Inc., subject to certain conditions, including approval of Bio-Medicus

shareholders. Bio-Medicus operations would become part of Medtronic's cardiopulmonary business.

Bio-Medicus is the world's leading producer of centrifugal blood pumps and related equipment for circulatory support systems. Through HemoTec it produces computer-based instruments and disposables for the management of clotting factors during medical procedures. BIO-MEDICUS, INC. #90220p3385 08/08/1990 ~PR Newswire

PENNSAUKEN, N.J. (AUG. 8) PR NEWSWIRE - MEDIQ Inc. (AMEX: MED), a provider of healthcare and financial services, today reported operating results for the third quarter and the first nine months of fiscal 1990.

For the third quarter ended June 30, 1990, revenues were $94,596,000 vs. $87,940,000 for the comparable period last year and net income was $2,884,000 or 12 cents per share, vs. $3,024,000 or 13 cents per share, for the year-earlier period.

For the nine months ended June 30, 1990, revenues were $274,968,000 compared to $252,780,000 during the same fiscal 1989 period. Net income for the nine-month period in 1990 was $6,133,000 or 26 cents per share. For the comparable 1989 period, net income was $8,134,000 or 34 cents per share.

Bernard J. Korman, president and chief executive officer of MEDIQ, stated that the increase in 1990 third quarter revenues in comparison to 1989 was largely due to the significant continued growth of Copelco Financial Services Group's revenues which increased 31 percent over 1989 levels. Operating profit was adversely affected by the continuing poor performance by the company's free-standing psychiatric facilities, home care and optical subsidiaries. In the third quarter of 1990 the company's financial services subsidiary, mobile x-ray, and healthcare facility planning and project management companies exceeded 1989 third quarter results.

The 1990 results include the effects of the company's adoption, in the third quarter of fiscal 1990, of Statement of Financial Accounting Standards (SFAS) No. 96, "Accounting for Income Taxes," as of Oct. 1, 1989. The effect of adopting this change in accounting principle resulted in income of $362,000 or 2 cents per share and is shown as a separate component of income in the company's consolidated operating results.

MEDIQ Inc., whose shares (MED and MED.Pr) and debentures (MED.C) are traded on the American Stock Exchange, provides products and services to hospitals, nursing homes, health care professionals and consumers through its subsidiaries. MEDIQ's businesses include diagnostic imaging and testing; maintenance of diagnostic equipment; pharmaceutical packaging; medical equipmental rental; health care facility planning, design and project management; management and ownership of psychiatric units; utilization review of medical claims made to insurance companies, and financial services.

#90220p3387 08/08/1990 ~PR Newswire

MINNEAPOLIS (AUG. 8) PR NEWSWIRE - ADC Telecommunications, Inc. (NASDAQ: ADCT), announced today estimated sales and orders for the quarter and nine months ended July 31, 1990.

Estimated sales were $65.8 million for the quarter ended July 31, 1990, representing a 32 percent increase over the $50.0 million recorded in the quarter ended July 31, 1989. Estimated orders were $66.1 million for the quarter ended July 31, 1990, representing a 27 percent increase over the $52.1 million recorded in the quarter ended July 31, 1989.

For the nine months ended July 31, 1990, estimated sales were $188.0 million, reflecting a 37 percent increase over the nine months ended July 31, 1989 ($137.3 million). Estimated orders of $189.3 million for the nine months ended July 31, 1990, were 33 percent greater than the $141.8 million in estimated orders reported for the nine months ended July 31, 1989.

The quarter and nine months ended July 31, 1990, include estimated sales and orders for Kentrox Industries, Inc., purchased by ADC in July 1989, and American Lightwave Systems, purchased by ADC in July 1990. Due to the timing of these acquisitions, the sales and orders amounts for the quarter and nine months ended July 31, 1989, do not reflect significant contributions from the acquired companies. Final sales, orders and earnings for third quarter 1990 will be announced in late August.

ADC Telecommunications, Inc., designs, manufactures and markets a wide variety of electronic and electromechanical circuit management devices used by telephone companies and in large private telecommunications networks.

NOTE: All amounts are estimated as of Aug. 8, 1990.

CONTACT: Aimee Gallogly of ADC Telecommunications, 612-893-3338

#90220p3389 08/08/1990 ~PR Newswire

ATCHISON, KS (AUG. 8) PR NEWSWIRE - Midwest Grain Products, Inc. (NASDAQ-NMS: MWGP) reported that results for its fourth quarter ended June 30, 1990, improved slightly over the preceding quarter, but were down from the same period a year ago.

Similarly, annual profitability was overshadowed by last year's record performance.

The earnings decline stems mainly from price reductions in four of the company's major product lines, according to Ladd Seaberg, president and

chief executive officer. "The reductions were enacted," he said, "to protect our markets in response to abnormally intense competition."

Although competitive pressures are still being felt, Seaberg expects steady improvements based on lower raw material costs, increased mill production, and greater operational efficiency. He also indicated that recent developments in oil producing countries in the Middle East could stimulate greater growth in the company's fuel and industrial alcohol markets.

"My initial optimism is based on the fact that we did make some headway in our fourth quarter," Seaberg said. "Even though the results are disappointing compared to a year earlier, I feel we at least achieved a step toward getting things turned around."

Net income for the quarter was $1,737,000, or 27 cents per share, on sales of $44,284,000. For the same period last year, net income was $3,127,000, or 48 cents per share, on sales of $49,395,000. Part of the decrease was attributed to an unexpected, recently determined rise of $590,000 in annual workers' compensation costs.

Net income for the 12 months ended June 30, 1990, was $8,352,000, or $1.28 per share, on sales of $184,025,000. Last year's net income was $13,146,000, or $2.09 per share, on sales of $191,750,000.

Since November, the company's sales of vital wheat gluten have been hampered by an excess of imports, initially from Australia and most recently from the European Community. "This extra supply of gluten has caused price decreases and pushed our unit sales below last year's level," Seaberg explained. Counter measures being taken by the company include "attempts to establish more equitable trade practices to soften the impact of imports on the U.S. gluten market. Additionally, lower raw material costs resulting from this year's bumper wheat crop are allowing us to compete more aggressively in the current quarter," he said.

The combined effects of competition on the company's total alcohol operation also had considerable adverse impact on fiscal 1990 earnings. "Although our beverage alcohol unit sales were down for the year compared to fiscal 1989, we did experience slight volume and price increases in the fourth quarter," Seaberg noted. The increases were accomplished, he said, despite rigid competition from producers who switched their production from the industrial to beverage alcohol areas. "Meanwhile, our fuel alcohol production was increased to offset reduced demand in the higher margin industrial category," he said, adding that this shift was accompanied by a slight rise in fuel alcohol prices over last year's average.

The company experienced a decline in flour milling in 1990 due principally

to reduced internal use of flour for gluten production. However, Seaberg said he is "optimistic about a significant turnaround in milling output," as Midwest recently obtained two sizable flour export contracts and has developed new opportunities for increased domestic sales.

Premium wheat starch production continues to grow at a steady pace, with unit sales increasing approximately 17 percent over 1989. "We are confident this trend will gain momentum," Seaberg said, "as new applications are developed and our marketing efforts increase both here and abroad."

TULSA, OK (AUG. 8) PR NEWSWIRE - Vintage Petroleum Inc. (NYSE: VPI) announced today the consummation of the acquisition by Vintage from Chevron U.S.A. Inc. (NYSE: CHV) of certain oil and gas properties located in Plaquemines Parish, La., for approximately $14 million. Funding for this acquisition will be obtained from Vintage's previously announced initial public offering of 4 million common shares, which became effective on Aug. 3, 1990, and the acquisition was described in the Prospectus for that offering. Net daily production from the acquired properties averages approximately 665 Bbls of oil and 1,860 Mcf of gas. Vintage will assume the operation of those acquired properties which were previously operated by Chevron.

Vintage Petroleum Inc. is an independent energy company engaged in the acquisition, exploitation and development of oil and gas properties and the marketing of natural gas and crude oil. The company is headquartered in Tulsa, and its common shares are traded on the New York Stock Exchange under the symbol VPI.

NORWALK, CT. (AUG. 8) PR NEWSWIRE - Trans-Lux Corporation (AMEX: TLX) today reported earnings of 3 cents per share for the second quarter ended June 30, 1990.

Gross revenues for the quarter rose slightly to $5.5 million, compared to $5.3 million for the previous year. Net income for the quarter was $44,000 (3 cents per share) versus $153,000 (10 cents per share) in 1989.

For the six months, gross revenues were $9.8 million, compared to $9.7

million last year. The company had net income of $67,000 (5 cents per share) versus $233,000 (16 cents per share) for the same period in 1989.

Richard Brandt, chairman of the board, said, "Second quarter results, while an improvement over the prior quarter, continue to reflect softness in the stock and commodity brokerage display markets and the ongoing decline of our teleprinter terminal business. At the same time, our information displays are finding increased acceptance in various industrial markets, and some increased demand is evident in specialized segments of our terminal business. Results for the most recent three and six month periods from the entertainment division also represent an improvement over last year."

Trans-Lux Corporation has two operating divisions. The communications division designs, leases, sells and services large-scale LED information displays, credit terminals, facsimile equipment and teleprinters. The entertainment division operates a chain of theatres in the southwest and several other theatrical properties.

BETHESDA, MD (AUG. 8) PR NEWSWIRE - Federal Realty Investment Trust (NYSE: FRT) reported today that funds from operations for the second quarter of 1990 increased 38 percent to a record $6.3 million compared to $4.6 million in the second quarter of 1989.

On a per share basis, funds from operations posted a 15 percent gain reaching a record 38 cents per share in the second quarter of 1990 compared to 33 cents per share for the same period in 1989. Contributing to this increase are positive results from intensified leasing efforts, improved performance from recently renovated and remerchandised centers, and continued growth from the trust's base portfolio. Funds from operations also increased for the six months ended June 30, 1990, rising 28 percent to a record $12.5 million (75 cents per share) compared to $9.7 million (70 cents per share) in the first half of 1989.

Federal Realty is an equity real estate investment trust which concentrates on acquiring older shopping centers in prime locations. Trust properties are located in 10 states concentrated in the mid-Atlantic region between the New York metropolitan area and Richmond, Va.

#90220p3398 08/08/1990 ~PR Newswire

HARRINGTON PARK, NJ (AUG. 8) PR NEWSWIRE - Hackensack Water Company filed today with the New Jersey Board of Public Utilities (BPU) for a rate increase of 17.36 percent which will provide the utility with almost $17 million in additional annual revenues.

If granted, the proposed hike would raise the average residential customer's quarterly bill by $17.80. The average residential customer using approximately 22,440 gallons (3,000 cubic feet) of water per quarter would pay $86.63 for water usage compared to the current charge of $68.83.

This is the first time in five years Hackensack Water has filed for a rate boost that is not fully related to costs associated with its now completed major construction projects. The company's last "base," or general operating increase, went into effect on Jan. 1, 1986, when rates went up by 7.26 percent.

"Over the past five years, we've witnessed increases in virtually every cost associated with our utility operations. Overall operating expenses have risen by 31 percent. Some of the increases contributing to that are a 250 percent increase in costs reflecting the full operation of the Wanaque South Project; and a 66 percent increase in employee health care and benefits," said company President George M. Haskew Jr. He added that real estate taxes on utility properties have risen by 96 percent and that depreciation costs associated with plant and facilities have jumped by 127 percent.

In addition, the company expects to invest $19 million over the next 12 months in other water-related projects, such as construction of a new water-quality testing laboratory in Haworth and toward continuing the implementation of HOMER (Hands-Off Meter Reading) technology.

Under the company's proposal, rates for public and private fire protection would also rise for the first time since 1986. This 17.36 percent increase would raise the monthly rental charge to municipalities for fire hydrants from $116.16 to $136.32.

Facilities charges, which help cover the cost of water service lines, meter installation and billing, will rise for the first time since 1986 from $8.61 a quarter for an average-sized residential meter to $20.73.

"During the series of CWIP increases, only water consumption charges were raised," Haskew explained. "As a result, Hackensack has the lowest facilities charge of any major BPU-regulated water utility in the state. This increase will bring our facilities charges more in line with the related costs we incur," he said. As part of the increase, consumption charges will rise by 9.43 percent.

Hackensack Water Company, a subsidiary of United Water Resources (NYSE:

UWR) serves 750,000 people in Bergen and Hudson counties. The company operates and maintains four surface reservoirs with a capacity of almost 14 billion gallons and a complex network of 2,000 miles of water mains.

#90220p3399 08/08/1990 ~PR Newswire

LOS ANGELES (AUG. 8) PR NEWSWIRE - Kerr Glass Manufacturing Corporation (NYSE:KGM) today reported net earnings of $1,121,000 (prior to preferred stock dividends) for the second quarter of 1990, compared to $2,454,000 for the second quarter of 1989.

Kerr had net earnings applicable to common stockholders (after deduction for preferred stock dividends) of $914,000, or 25 cents per common share (primary and fully diluted), for the second quarter of 1990, compared to $2,247,000 or 61 cents per common share primary and 56 cents per common share fully diluted, for the second 1989 quarter.

The company said the decrease in earnings in the second quarte of 1990, as compared to the same period in 1989, was primarily the result of lower earnings in the consumer products business. Net sales for the 1990 second quarter were $85,580,000 compared to $83,235,000 for the second quarter of the prior year. The increase in sales was attributable to an increase in sales of glass containers and plastic products.

Roger W. Norian, chairman, president and chief executive officer, stated that consumer products results declined in the second quarter of 1990, compared to the same period in 1989, due to the sale of higher cost inventory, lower sales of home canning supplies and the cost of introducing the new Kerr pie filling and pickling spices product lines.

Norian stated that the plastic products business showed substantial improvement over 1989 primarily due to significant productivity improvement. During the second quarter, the company consolidated its prescription packaging operations at its new plastic packaging facility in Jackson, Tenn. The second quarter glass container operating results were lower than a year ago.

Net loss for the first six months of 1990 (prior to preferred stock dividends) was $303,000 compared to net earnings of $2,035,000 a year ago. Net loss applicable to common stockholders in the first six months of 1990 was $717,000 or 19 cents per common share (primary and fully diluted) compared to net earnings applicable to common stockholders of $1,621,000 or 44 cents per common share (primary and fully diluted) in the first six

months of 1989.

Net sales for the first six months of 1990 were $156,551,000 compared to $150,394,000 a year ago. The increase in net sales for the six months is due to higher sales of glass containers and plastic products.

Kerr, headquartered in Los Angeles, is a major producer of glass containers, plastic products, metal crowns and home canning supplies.

#90220p3401 08/08/1990 ~PR Newswire

BURBANK, CA (AUG. 8) PR NEWSWIRE - The publishing division of The Walt Disney Company (NYSE: DIS) will launch a new magazine in October called Disney Adventures, for children and pre-teens 7 to 14. It will appear monthly at check-out stands nationwide.

The 128-page, digest-sized magazine will be the first major publication for kids produced directly by Disney in the United States. A similar Disney-owned publication, Topolino, has been a success in Italy for years.

In highly readable articles and innovative graphics, Disney Adventures will present adventures and excitement relevant to kids today -- stories about real life heroes, fashion and styles, science, electronic games, sports, movies and celebrities.

The magazine will also contain comics starring characters from Disney's top-rated set of cartoon shows collectively known as "The Disney Afternoon " including "Chip 'n Dale Rescue Rangers," "DuckTales" and "TaleSpin." "The connection to 'The Disney Afternoon' is a key part of our plans for the magazine," said Michael Lynton, vice president of marketing for Disney Publications. Kids will instantly recognize the characters from our television programs. We believe the further adventures of these characters in Disney Adventures will have great appeal."

One objective of Disney Adventures will be to address parental concerns about literacy and their desire to have attractive alternatives to television.

Time Distribution Services (TDS) has been contracted to handle the distribution of Disney Adventures. The magazine will be available in racks at check-outs in supermarkets, drugstores and convenience stores, as well as bookstores and mass merchandisers. The initial circulation is expected to be 350,000. The magazine will be supported through national TV and print advertising, local TV co- promotions and sweepstakes

contests. An introductory promotion currently under way offers a previous copy of the magazine on 33 million boxes of Kellogg's Cornflakes.

The mix has been proven in the Disney Magazine Topolino. With sales of some 700,000 copies each week, Topolino is the third most popular weekly in Italy. Similar formats are being marketed throughout Europe, where sales of Disney comics and magazines exceed three million copies each week.

CHICAGO (AUG. 8) PR NEWSWIRE - Amoco Oil Company issued the following statement in support of President Bush's comments this morning about oil and gasoline prices:

"Amoco supports the President's call for responsible pricing in gasoline markets during this time of world crisis. Amoco's actions since the Iraqi invasion last week show the company's commitment to prudent and

responsible pricing.

"Despite the rapid general market increases in crude oil and refined product prices in the past week, Amoco has increased its own wholesale gasoline prices on average only by about 10 cents per gallon since Aug. 1. This compares with general increases of about 20 cents per gallon in the Gulf Coast and New York spot markets, which serve as the benchmark for gasoline prices in the United States.

"We understand that the market system of supply and demand and open competition in petroleum product pricing can allow for rapid price increases. We believe that in both upward and downward markets, the competitive system assures American consumers the lowest average price and most efficient system of delivery and supply of petroleum products.

"Failure to respond to wholesale trends weakens a marketer's ability to replenish product supplies that are drawn down by lower prices than the competition.

"Supply disruptions at a major company like Amoco could be far worse for consumers than temporary higher prices. The consumer is better served by a market system that reacts and distributes products efficiently.

"Amoco has been acting responsibly and reasonably throughout this period and will continue to do so. We have also encouraged our dealers and jobbers to do the same."

#90220p3425 08/08/1990 ~PR Newswire

NEW YORK (AUG. 8) PR NEWSWIRE - The Communications Workers of America today released the following:

Members of the Communications Workers of America (CWA) who work for

Western Union are demanding that Donaldson, Lufkin & Jenrette, the Wall Street investment firm which chairs the company's creditors committee, force management to stop ripping off the company and negotiate a fair contract with its workers.

The workers will set up a picket line and distribute leaflets in front of Donaldson's headquarters at 140 Broadway (between Cedar and Liberty) at 8:30 a.m., Friday, Aug. 10. The contract covering 2,500 members of the CWA at Western Union expired midnight, Monday, Aug. 6.

Western Union workers have made repeated concessions over the last six years to assist the company in its struggle to survive. The company faces an Aug. 14 deadline for refinancing its debt under a reorganization plan recently approved by the creditors committee. John Halisey Kennedy, a senior vice president at Donaldson, Lufkin & Jenrette, chairs that committee. If Western Union fails to meet the deadline, it faces bankruptcy.

"The workers have sacrificed plenty over these past many years," said Nick DeSantis, president of CWA Local 1177, which represents Western Union workers in New York. "From wage cuts and pension terminations to vacation rollbacks and inferior health care plans. If the creditors committee really wants to save the company, it ought to put a stop to the ripoffs by top management and insist Western Union adopt a collective rather than confrontational approach to these negotiations."

DeSantis noted that Chairman of the Board Bennett LeBow receives $250,000 a month in fees from Western Union through Western Union's contract with LeBow's management consulting firm.

According to statements by Western Union spokesman Warren Bechtel, management has trained and housed 1,000 scabs in hotels at key work locations throughout the country. "The creditors committee should investigate the cost of training and putting up scabs in hotels and compare that to what we're asking for. The company is acting in an irresponsible manner that may trip over to a confrontation that will cost the bondholders plenty -- and the jobs of thousands of long time Western Union employees may be jeopardized," DeSantis said.

DALLAS (AUG. 8) PR NEWSWIRE - Southwest Realty, Ltd. ("SRL") (AMEX: SWL) today announced results of its operations for the first half of 1990. Net cash from operations was $278,000 in the first half of 1990 compared to a

net cash deficit from operations in the first six months of 1989 of ($707,000).

Total revenues for the first half of 1990 were $7,863,000 compared to $6,144,000 for the similar period in 1989.

SRL had a net loss of ($1,191,000) or ($.29) per common share (common depository receipt) for the six months ended June 30, 1990. Net loss for the first half of 1989 was ($2,109,000) or ($.52) per share.

SRL also announced that a preferred distribution for the fourth quarter of 1990 of 45 cents will be made about February 15, 1991. The distribution rate is 15 cents per share per month and will be made to monthly holders of record of preferred shares (preferred depository receipts) as of the first business day of October, November and December 1990.

CHICAGO (AUG. 8) PR NEWSWIRE - Sears, Roebuck and Co. (NYSE: S) today announced realignment of management responsibilities in its merchandise group.

Edward A. Brennan, chairman and chief executive officer of Sears, Roebuck and Co., will assume the additional responsibilities of the chief executive officer of Sears Merchandise Group.

Michael Bozic, former chairman and chief executive officer of Sears Merchandise Group, will serve as president and chief operating officer of the group, a new position, and will continue to report to Brennan. Bozic will be responsible for the group's catalog, credit, product services, logistics, international and staff functions.

Laurence E. Cudmore, president of Sears Merchandise Group's retail segment and Alfred G. Goldstein, president of the group's specialty merchandising segment, will also report to Brennan.

The chairmen of Allstate Insurance, Dean Witter Financial Services and Coldwell Banker Real Estate Groups will continue to report to Brennan.

The action was approved by the board of directors at a regularly scheduled meeting today and is effective immediately.

Brennan said, "The realignment is designed to create a highly focused management team whose skills are well-matched with the challenges currently facing the retailing industry. Our basic merchandising strategy is in place and will remain the same. While we have complete confidence in our strategy, we need to move faster and step up its implementation. We will focus our efforts on reducing costs and improving profitability while we continue to feature competitive values and aggressively roll out our power formats," Brennan said.

#90220p3430 08/08/1990 ~PR Newswire

ST. PETERSBURG, FLA. (AUG. 8) PR NEWSWIRE - Trust America Service Corp. announced today that on Aug. 7, 1990 Trust America and its subsidiaries, The Florida Group, Inc.; Resource America Mortgage, Inc.; SW Mortgage, Inc.; TARI Inc. and Trust America Acquisition Corp., which are currently debtors-in-possession and in reorganization under Chapter 11 of the United States Bankruptcy Code, filed a lawsuit in the United States Bankruptcy Court for the Middle District of Florida, Tampa Division, against First Union National Bank of Florida and First Union Mortgage Corporation (collectively, "First Union").

The lawsuit, which was filed by the Tampa, Fla., law firm of Rudnick & Wolfe, alleges a variety of wrongdoings by First Union including breach of contract, tortious interference with contractual relationships and

business opportunities, breach of covenant of good faith and fair dealing, breach of fiduciary duties and gross negligence. In addition to the above and in connection with those allegations, Trust America will seek to prove that the alleged wrongdoings of First Union caused (i) approximately $16 million to remain unpaid to third party originators of mortgage loans which sold such mortgage loans to The Florida Group, Inc., (ii) the Government National Mortgage Association ("GNMA") to seize and take title to mortgage loan servicing rights on GNMA mortgage-backed securities pools in the principal amount of $745 million which were owned by TARI Inc. and The Florida Group, Inc., and (iii) the Department of Housing and Urban Development ("HUD") and the Veterans Administration ("VA") to initiate administrative proceedings to withdraw essential HUD approvals and VA authorities held by Trust America Service Corp. and certain of its subsidiaries.

Headquartered in St. Petersburg, Fla., Trust America Service Corp. is a mortgage banking company which, prior to its filing for protection under Chapter 11 of the Bankruptcy Code, was principally engaged in the business of purchasing, packaging, and reselling one to four family residential mortgage loans which were FHA-insured, VA-guaranteed or FNMA and FHLMC eligible.

#90220p3431 08/08/1990 ~PR Newswire

NEW YORK (AUG. 8) PR NEWSWIRE - The National Audubon Society announced today that it has received a grant from Fuji Photo Film U.S.A., Inc. to support a three-year, nationwide environmental program dedicated to finding "Solid Solutions for Solid Waste."

The Fuji grant will underwrite Audubon's solid waste community action project. The program, dubbed "Solid Solutions for Solid Waste," is a two-stage grassroots project aimed at helping communities formulate realistic and environmentally sound municipal solid waste management policies. The first step will be the publication of a guidebook entitled "Audubon's Community Solid Waste Management Program." The volume will outline Audubon scientists' strategies for devising and implementing a practical, cost-efficient and environmentally sound solid waste management policy.

"One of the most critical problems facing the environment is the amount of misinformation perceived to be truth," said Peter A. A. Berle, president, The National Audubon Society. "Therefore, the key goal of this program is to find practical, economical answers to the solid waste crisis that currently affects the U.S.

"Fuji's belief in and dedication to this project has been exemplary," added Berle. "The commitment displayed by the company has shown us that they will be indispensable when working to solve this country's solid waste crisis. We look forward to a productive relationship."

Arlington, Va., and Atlanta, Ga., have been chosen as pilot communities for guidebook testing and refinement. Project coordinators will work with local Audubon leaders to develop training workshops and organize citizens in each community.

By the end of the first year, Audubon will expand the program into ten communities. The communities will be chosen on the basis of recycling "need" and the presence of local Audubon personnel qualified to implement the project. Two national program coordinators will train, guide, advise and provide overall support to Audubon leaders in these areas.

"We're extremely honored to support The National Audubon Society in its efforts to improve solid waste management in the United States," said Osamu "Sam" Inoue, president, Fuji Photo Film U.S.A., Inc. "The National Audubon Society is unique among national environmental organizations in its ability to provide sound scientific evaluation of alternative solutions as well as effective community leadership. We share a common goal of finding ways to manage this country's solid waste problem. That is why Fuji is prepared to wholeheartedly support Audubon's efforts in this truly beneficial program."

To further demonstrate their commitment to improving the environment, Audubon and Fuji have published a free booklet entitled "Solid Solutions for Solid Waste." The booklet gives advice on how Americans can reduce solid waste at home, the workplace and in their community. Concerned citizens can receive the booklet by writing: Solid Solutions for Solid Waste, P.O. Box 1752, Ridgely, MD 21681.

LOS ANGELES (AUG. 8) PR NEWSWIRE - CF Income Partners L.P. (NYSE: CFI), formerly Cal Fed Income Partners L.P., a Los Angeles- based master limited partnership, today reported a net loss of $862,000, or $.06 per unit, for the three months ended June 30, 1990, compared to a net loss of $2.0 million or $.15 per unit, for the three months ended June 30, 1989.

The decreased net loss for the second quarter of 1990, reflects the gain of $1.4 million realized by the partnership from sales activity in the resale portfolio acquired at year end.

Operating results from the partnership's investment properties for the second quarter of 1990 produced net income of $178,000 compared to a net loss of $341,000 for the same period in 1989. This improvement is primarily attributable to increased rental revenue and tenant reimbursements reflecting higher occupancy levels and reduced rental concessions.

Non-cash expenses consisting primarily of depreciation and deferred interest, which do not affect available cash flow, totaled $2.7 million in the first quarter of 1990, in comparison to $3.5 million for the same 1989 period. The decrease in non-cash expenses during 1990 is the result of the year-end debt restructuring that placed more of the partnership's debt on a current pay basis.

The second quarter of activity for the partnership's new Resale Portfolio generated $1.4 million in income before financing costs and costs to administer the Resale Portfolio. Sales activity from the real estate held for sale generated $660,000 in income for the partnership during the first three months of 1990. The investments in real estate partnerships, which are accounted for using the equity method, produced income of $703,000 for the partnership.

For the second quarter of 1990, available cash flow was $3.9 million. This amount includes $3.3 million or $.25 per unit which the partnership will distribute to unitholders of record as of July 31, 1990, payable Aug. 14, 1990. The general partner will also receive a distribution of $34,000 which represents the general partner's 1 percent share of total distributions from the partnership pursuant to the partnership agreement, and $501,000 in payment of the 1990 second quarter Performance Incentive

Fee.

CF Income Partners L.P. is a publicly traded master limited partnership which has invested in income-producing multi-family residential, commercial and industrial properties.

CHARLOTTE, N.C. (AUG. 8) PR NEWSWIRE - Coca-Cola Bottling Co. Consolidated (NASDAQ-NMS: COKE) today announced the election of David L. Kennedy of Atlanta to its Board of Directors.

Kennedy, Vice President for Business Development at The Coca-Cola Company (NYSE: KO), replaces M. Douglas Ivester who is leaving the Coca-Cola Consolidated board after being named President of Coca-Cola USA. "We have been fortunate to have Doug Ivester as a part of the Coca-Cola Consolidated Business Family and we wish him great success as he takes the helm at Coca-Cola USA," Consolidated Chairman J. Frank Harrison, Jr., said.

"We are very pleased to have someone with the broad background and experience of David Kennedy joining Coca-Cola Consolidated's Board of Directors to replace Doug. We look forward to his input and counsel as Coca-Cola Consolidated continues to grow in the dynamic and rapidly changing soft drink industry," Harrison said.

Charlotte-based Coca-Cola Consolidated is the nation's fifth largest Coca-Cola bottler whose major markets include Charlotte, Raleigh,

Greensboro and Winton-Salem in North Carolina; Roanoke, Va.; Charleston, W.Va.; Nashville, Tenn.; Mobile, Ala.; Columbus and Albany, Ga.; and Panama City, Fla..

As Vice President for Business Development for The Coca Cola Company, Kennedy is responsible for worldwide acquisitions and divestments and the restructuring of the Coca-Cola bottling system. Before assuming his present position, Kennedy served as Executive Vice President for Operations of Columbia Pictures Industries when the major motion picture company was a subsidiary of The Coca-Cola Company.

Kennedy is a certified public accountant with a BS from the University of North Alabama and an MBA from the University of California at Los Angeles. His career with The Coca-Cola Company began in 1980 after nearly a decade with the accounting firm of Ernst & Whinney.

BOHEMIA, N.Y. (AUG. 8) PR NEWSWIRE - Symbol Technologies, Inc. (NYSE: SBL), today announced the strengthening of its worldwide selling channels with the signing of a strategic alliance with Andersen Consulting, headquartered in Chicago.

Andersen Consulting, an expert in systems integration with more than 18,000 professionals worldwide, will combine efforts with Symbol to provide bar code based system solutions, utilizing Symbol's broad range of bar code reading equipment portable data terminals and radio frequency products.

The initial focus of the Andersen Consulting relationship will be in implementing Quick Response support systems utilizing both Andersen Consulting's and Symbol's products and services. Quick Response is a partnership philosophy among U.S. retailers and their suppliers to effectively meet customer requirements utilizing the latest in technology tools.

Andersen Consulting and Symbol already have mutual customers across the entire retail spectrum and, with the agreement, now offer a full range of Quick Response services.

Other areas of joint marketing efforts will be explored in warehousing, wholesale distribution utilities, telecommunications, insurance and health care.

Under the agreement Andersen Consulting and Symbol will make joint sales calls, exchange sales leads, develop joint marketing programs, share existing information and cross-train each other on products.

"The primary motivation for our agreement is the synergy between Andersen Consulting's systems integration capabilities and Symbol's complete line. We complement each other by offering a complete package of data capture building blocks leading to a fully integrated system.

Symbol Technologies is the world leader in bar code based data capture systems with over one million scanners and terminals installed. The company designs, manufactures and markets bar code reading equipment, portable data terminals and radio frequency data communications products which are used as strategic building blocks in data collection systems for retail, military, manufacturing, distribution, health care and many other applications.

ENGLEWOOD, CO (AUG. 8) PR NEWSWIRE - Alan M. Angelich has been named chief executive officer of Jones Capital Markets Inc., a wholly- owned subsidiary of Jones International Ltd.

Jones Capital Markets Inc. develops institutional financial involvement in various corporate projects.

In his new position, Angelich will be responsible for institutional financing for the Jones International complex of companies.

Prior to this promotion, Angelich served in a number of key positions with Jones Intercable Inc. (NASDAQ: JOIN). Most recently, he served as chief financial officer of Jones Intercable and group managing director/finance of Jones International. He will remain in his position as vice chairman of the board of directors of Jones Intercable and a member of the executive committee of the board.

At this time, many of Angelich's current duties with Jones Intercable will be assumed by Vice President/Treasurer Kevin P. Coyle and Vice President/Taxation Timothy J. Burke. Both will report to the president of Jones Intercable, James B. O'Brien.

In announcing Angelich's promotion, Chairman and Chief Executive Officer of Jones International Glenn R. Jones said, "With this key appointment, we are strengthening the financial management capability of our various corporations. We need to take advantage of Mr. Angelich's financial skill and knowledge in all of our operations."

Prior to joining Jones Intercable in 1982, Angelich was with Arthur Andersen & Co., certified public accountants. He received a bachelor of arts degree in accounting from the University of Illinois and a master's degree in business administration from DePaul University.

BOGOTA, N.J. (AUG. 8) PR NEWSWIRE - Del-Val Financial Corporation (NYSE: DVL) today declared a dividend of 16 cents per share payable on Sept. 4, 1990 and Oct. 1, 1990 to shareholders of record on Aug. 28, 1990 and Sept. 24, 1990, respectively.

Del-Val also announced 1990 second quarter net income of $2,934,000 (49 cents per share) on operating revenues of $6,470,000, compared to 1989 second quarter net income of $1,817,000 (47 cents per share) on operating revenues of $5,087,000.

For the six months ended June 30, 1990, net income was $5,618,000 (96 cents per share) on operating revenues of $12,526,000, compared to year earlier levels of $3,702,000 (95 cents per share) and $9,936,000, respectively.

The second quarter increases in net income (61 percent) and operating revenues (27 percent), in large part, reflect the results of the company's successful public offerings of its common stock in May 1990 (1,200,000 shares) and in August 1989 (1,802,000 shares).

Average shares outstanding for the second quarter ended June 30, 1990 and 1989 were 6,011,571 and 3,909,571, respectively.

LOS ANGELES (AUG. 8) PR NEWSWIRE - Spelling Entertainment Inc. (AMEX: SP) a leading entertainment production and distribution company, announced today that it is no longer exploring a possible sale of the company.

The company indicated that although it received some interest in acquiring the company, the interest is not at a level management believes reflects the values of the company and its future prospects in both distribution and production.

The company specifically cited its distribution of "Twin Peaks," the highly successful and acclaimed television program recently nominated for 14 Emmy awards, which has been renewed for the fall season. This program is distributed worldwide by the company's Worldvision Enterprises, Inc., subsidiary and is achieving record international sales levels. In addition, Fox Television Network has ordered 13 episodes of "American Chronicles," also distributed by Worldvision.

As previously announced, Torand Productions, a wholly owned subsidiary of

Spelling Entertainment Inc., is involved in the production of a one-hour dramatic series scheduled this fall entitled "Class of Beverly Hills" for the Fox Television Network. Production has been completed on "Jailbirds " a two-hour television movie for CBS, starring Phylicia Rashad and Dyan Cannon. Also, Laurel Entertainment, a wholly owned subsidiary of Spelling Entertainment Inc., is in production on 24 additional half-hour episodes of "Monsters," its current first-run syndication series, bringing the total to 72 half-hours for distribution. Spelling Entertainment is also co-producing and will distribute "Wake, Rattle and Roll," a half-hour five-times-weekly program for children, in association with Hanna-Barbera Productions. In addition, the company continues to experience strong international revenues from its library of more than 11,000 hours of programming.

Spelling Entertainment Inc. is primarily engaged in the development, production and distribution of television series, television series pilots movies for television, and television mini-series. The company also produces feature films financed and distributed primarily by major studios and licenses music and merchandising rights associated with its television properties.

#90220p3459 08/08/1990 ~PR Newswire

NORWOOD, MA (AUG. 8) PR NEWSWIRE - Analog Devices, Inc. (NYSE: ADI) today announced that it has acquired Precision Monolithics Inc. from Bourns Inc. for $60.5 million in cash plus warrants to purchase one million shares of Analog Devices common stock at $12 per share.

In making the announcement, Ray Stata, president and chairman of the board of Analog Devices, said, "The acquisition of PMI strengthens Analog Devices' leadership position in high-performance analog and mixed-signal integrated circuits and makes ADI the world's second-largest nonconsumer analog IC supplier. With PMI we now have the people and resources to become the world leader in this market, and that is our goal.

"Already we have several major thrusts to expand into new segments of the analog IC market," he continued, "including computer peripherals and telecommunications equipment. A reallocation of resources in the combined companies will allow us to fund these new initiatives while expanding market share in our traditional markets."

Alan King, former president of PMI, has been named vice president and

general manager of the PMI division of Analog Devices, reporting to Jerry Fishman, executive vice president of Analog Devices. PMI's sales organization will be combined with Analog Devices', which reports to Doug Newman, Analog's vice president of sales and marketing.

The acquisition was financed with a combination of approximately $35 million in cash and $25 million in additional bank debt. "Even with the additional bank debt," Stata pointed out, "our debt-to-equity ratio is still less than 15 percent."

Stata said that Analog expects to have acquisition-related charges of $12 to $15 million applied against earnings for the fourth fiscal quarter that will end November 3rd. "These expenses," he explained, "will result from anticipated restructuring expenses and other nonrecurring operating costs.

"We expect the restructuring phase to be largely completed within six months," he continued, "by which time we are confident that the acquisition will be earning an attractive return on investment. The effect of the acquisition-- barring an unforeseen drop in revenues--should be antidilutive even during the restructuring phase except for the acquisition-related charge."

Stata estimated third quarter sales at $120 million, which adjusted for 13 weeks would have been about $112 million vs. the $116.4 million reported for the prior quarter and $113.3 million for the third quarter last year. Analog plans to announce its third quarter results on August 22nd.

The combined sales of Analog Devices and PMI are currently running at an annual rate of approximately $540 million. Analog Devices is a leading manufacturer of precision high-performance integrated circuits used in analog and digital signal processing applications. The company also manufactures board-level products used in computerized data acquisition and measurement and control applications. The company employs approximately 5,900 people worldwide, and has manufacturing facilities in Massachusetts; Greensboro, N.C.; Santa Clara, Calif.; Ireland; the Philippines and Japan.

COATESVILLE, PA. (AUG. 8) PR NEWSWIRE - Maurice "Gus" Gustin, 41, has been named to the specially created position of manager, Export Sales, for Lukens Steel Co., the largest subsidiary of Lukens Inc. (NYSE: LUC).

Gustin will assume his new responsibilities Sept. 1. According to Lukens Steel Co. President and Chief Operating Officer A. W. Eastburn, changing world economic conditions, especially in Europe, indicate the potential for competitive opportunities for Lukens Steel. Gustin will be responsible for evaluating Lukens' potential for participation in the international plate steel market.

Gustin, a graduate of the United States Military Academy at West Point, joined Lukens' sales organization in 1976. Following several advancements, he was named general manager of sales -- and later vice president and general manager -- of Canadian Lukens Limited, Toronto, a former subsidiary of Lukens Steel Co. Prior to his latest assignment, he served as manager of purchasing since 1988.

Lukens Steel Co. is one of the nation's leading plate steel producers.

ATLANTA (AUG. 8) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) said today its jet fuel costs are continuing the strong upward spiral that began last week with the Iraqi invasion of Kuwait, rising 10 cents per gallon since July 31.

On an annual basis, such an increase in the price of fuel represents an increase to Delta of more than $200 million in operating expenses.

"We have taken every step possible to ensure that fuel is being purchased and utilized in the most efficient way possible," said Whit Hawkins,

Delta's senior vice president - marketing. "For example, our fleet, with an average age of only 8.6 years, is the youngest and most fuel efficient among the nation's eight largest airlines."

Fuel is Delta's second-largest operating expense, and all of the airline's fuel suppliers have announced price increases. "Given the uncertainty surrounding the impact of these fuel increases, travelers who can confirm their plans might be well advised to make their reservations and purchase tickets now," Hawkins said. "Bargain fares are still plentiful, but price increases are likely as the cost of fuel escalates."

Delta, a major world airline, serves 177 cities and offers more than 2,400 flights each day.

BEREA, OH (AUG. 8) PR NEWSWIRE - Bolstered by increased new certificates and fewer lapses, Central Reserve Life Corp. (NASDAQ: CRLC) today reported strong gains in both premium revenues and net income for the quarter and six months ended June 30, 1990.

Fred Lick Jr., chairman and chief executive officer, said the company's performance was also advanced by a 3 percent decline in claims loss ratio, to 68 percent of premiums from 71 percent at the end of the first quarter.

"We appear well on our way to exceeding last year's record pace of $100 million in premiums," Lick said. "Not only are we selling more policies and retaining more of our existing customers, we are also exercising better control over our expenses, which we hope will enable us to improve upon last year's overall profitability as well."

For the second quarter, net income was $842,167 or 20 cents per share, up substantially from $75,975 or 2 cents per share in the prior year, when the provider of accident and health insurance for small business groups was impacted by an inordinate number of large-scale claims.

Total revenues were up 30 percent, to $35,653,880 from $27,359,570 in the year-ago period. Premiums were $34,478,484, compared to $26,298,118, while investment income was $1,162,301, 11 percent higher than the $1,044,730 reported last year.

For the six months, net income was $1,069,806 or 26 cents per share, on total revenues of $69,537,048, with premiums of $66,967,603 and investment income of $2,219,465.

Last year, Central Reserve had mid-year net income of $634,125 or 15 cents per share on total revenues of $53,572,926, premium income of $51,513,337 and investment income of $2,055,332.

Lick said 80,141 certificates were in force at June 30, reflecting an 18

percent net gain for the six-month period. A total of 21,842 new certificates were issued in the period, compared with 11,798 in 1989, while policy lapses fell almost 7 percent, to 9,646 from 10,403 in the year earlier.

Central Reserve's shareholders' equity at June 30 was $19.6 million, or $4.99 per share, and the company's $45 million investment portfolio was composed primarily of investment grade quality bonds, Lick added.

Central Reserve Life is a leading insurer of preferred risk accident and health insurance, specializing in groups of less than 25 employees. Based in Berea, Ohio, the company currently concentrates its activities in 14 of the 35 states in which it is admitted to sell insurance. Common stock is traded over the counter under the NASDAQ National Market Market System symbol CRLC.

#90220p3473 08/08/1990 ~PR Newswire

BRAINTREE, MASS. (AUG. 8) PR NEWSWIRE - Mike Grossman, chairman of the board and chief executive officer of Grossman's Inc. (NASDAQ: GROS) said today that in response to the consent solicitation proposal made by Hawaii-based real estate investor Jay H. Shidler and another real estate investor named Robert W. Holman, Jr., the directors of Grossman's unanimously oppose Shidler/Holman's efforts to take control of the

company's board. The company urged Grossman's stockholders not to take action until Grossman's sends to stockholders a complete response to the Shidler/Holman solicitation materials, including important information about Shidler, Holman and their nominees.

"Over the last few years, Grossman's has vigorously sought to restore the company's financial strength," Grossman said. "In three and one-half years, from December 31, 1986 to June 30, 1990, Grossman's has reduced its total debt from $226 million to $86 million and improved its debt-to-equity ratio dramatically from over 9:1 to less than 1:1. In addition, Grossman's stockholders' equity has increased 252 percent from $1.26 per share to $4.44 per share as of June 30, 1990."

Thomas R. Schwarz, president and chief operating officer of Grossman's said, "We believe that our program for the future is the right strategy. Beginning in May 1990, we initiated an aggressive remodeling and merchandising program in our Eastern Division to appeal to a broader customer base. We believe that this program will have a positive effect on the company's long term growth and competitive position. The program contributed to improved sales in the second quarter, with June sales registering a 6 percent increase on a comparable store basis over last June's sales, despite the continuing decline in the new housing market."

Grossman's, a major retailer of lumber and building materials, operates 156 stores in nine Northeastern states and California.

NEW YORK (AUG. 8) PR NEWSWIRE - The Asia Pacific Fund Inc. (NYSE: APB) today issued the following August monthly review:

July was a good month for the fund with the NAV rising by 6.4 percent. This was a result of good performance in Thailand and Hong Kong. Shortly after the month-end, Iraq invaded Kuwait. The impact of this has been a fall of approximately 10 percent in most of the Asia Pacific markets. The implications of a higher oil price and slower OECD growth are likely to impact the economies of the region. Inflation is likely to rise by 0.5 percent to 1.5 percent with the oil price at $25. Malaysia, a net oil exporter, is likely to benefit to the tune of $300 million per annum for each $1 US increase in oil prices. Slower growth in the OECD economies will, in the short term, impact export growth from the Asia Pacific countries. However, these economies remain amongst the most cost competitive in the world and, as the world adjusts to higher oil prices, the S.E. Asian economies will remain at the front of competitiveness. The markets have already discounted much of the new environment. As emotion in the market overtakes rational valuation, the managers intend to take advantage of these inefficiencies.

The Asia Pacific Fund, Inc. is a closed-end management investment company whose investment objective is long-term capital appreciation through investment primarily in equity securities of companies in Hong Kong, Korea

Malaysia, the Philippines, Singapore, Taiwan, and Thailand. The fund's investment manager is Baring International Investment (Far East) Limited. Additional information on the fund's assets and performance is contained in the annual report for the year ended March 31, 1990. For further information on the fund, call 212-214-3334.

CINCINNATI (AUG. 8) PR NEWSWIRE - Scripps Howard Broadcasting Company (NASDAQ: SCRP), an 80-percent owned subsidiary of The E.W. Scripps Company (NASDAQ: EWSCA), today signed a definitive agreement to purchase television station WMAR, Baltimore, from Gillett Group, Inc.

Scripps Howard Broadcasting announced July 19 that it had agreed to acquire the station from Gillett Group, Inc. for $154.7 million.

The parties expect to complete the transaction before the end of this year subject to certain regulatory approvals.

Scripps Howard Broadcasting currently operates nine television stations: ABC affiliates WXYZ in Detroit and WEWS in Cleveland; CBS affiliate WCPO in Cincinati; and NBC affiliates WMC in Memphis, WPTV in West Palm Beach, and KJRH in Tulsa. The company has three Fox affiliates: WFTS in Tampa, KNXV in Phoenix, and KSHB in Kansas City, Scripps Howard Broadcasting operates radio stations WBSB-FM, Baltimore, KUPL-AM/FM, Portland, and WMC-AM and WMC-FM in Memphis.

In addition to its broadcasting group, The E.W. Scripps Company also operates 19 daily newspapers and cable television systems with 576,000 basic subscribers, including 237,000 subscribers in systems owned through Scripps Howard Broadcasting. The E.W. Scripps Company is also a worldwide syndicator and licensor of news features and comics including "Peanuts" and "Garfield."

#90220p3493 08/08/1990 ~PR Newswire

PHOENIX, AZ (AUG. 8) PR NEWSWIRE - Syntellect Inc. (NASDAQ: SYNL) announced today that it has signed a letter of intent to acquire Dytel Corp., a manufacturer of call processing and voice messaging systems. The letter of intent contemplates that Dytel shareholders would receive $12.1 million in Syntellect restricted common stock based upon the market value

of such stock prior to closing, with no more than 650,000 nor less than 450,000 shares to be issued in the transaction. It is expected that the proposed transaction would close on or about Dec. 31, 1990. The letter of intent further contemplates the signing of a mutual distribution agreement by the two companies within the next 30 days.

"We are witnessing a revolution in which voice information systems will become pervasive in businesses worldwide," said Dr. S. Thomas Emerson, president and CEO of Syntellect. "Our combination with Dytel will allow us to provide our customers with products that can have a tremendous impact on their efficiency, productivity and profitability. Dytel and Syntellect share the view that there is an emerging opportunity for advanced voice processing systems which are feature-rich and easy to implement. The combined Syntellect and Dytel technologies will put us at the forefront of this voice information revolution. The experienced staffs of voice processing professionals at Syntellect and Dytel are joining hands to make this vision a reality in the marketplace.

"Dytel is a unique company," Emerson continued. "It was the first company to introduce Automated Attendant(TM) systems, and their technology is innovative and robust." Sanford J. Morganstein, president and founder of Dytel, said, "The technologies of the two companies will facilitate the merger of three important aspects of this industry by adding Dytel's expertise in voice messaging, voice mail and auto attendant systems to Syntellect's expertise in interactive voice response. Dytel's broad patent position in the voice processing industry yields significant royalty revenue and will allow Syntellect to move freely into additional arenas of voice processing technology. Dytel's strong and loyal distributor network will further the market penetration of the combined company's products."

"The merger brings together two companies with complementary strengths in market coverage, products, distribution and compatible hardware and software technology," said Jose Reines, chairman and CEO of Dytel. "This synergy should enhance the value for shareholders of both companies."

Syntellect Inc. develops, markets and supports a family of interactive voice response (IVR) systems, and is the leading supplier of these systems worldwide. Syntellect sells its products primarily through a direct sales force and has an OEM relationship with IBM (NYSE: IBM), which markets and sells private-label versions of the company's products on a worldwide basis. The company's technology allows individuals to use a touch-tone telephone to access information in, or services controlled by, host computer networks. Syntellect was founded in 1984 and is headquartered in Phoenix.

Dytel Corp., headquartered in Schaumberg, Ill., manufactures and sells advanced call processing systems through an extensive nationwide dealer

network. Call processing systems connect to the public switched networks and automatically answer incoming telephone calls and use touch-tone signals to route calls to the desired location. Voice messaging and voice mail capabilities are also provided as needed and desired by customers of these systems. Since its founding in 1982, Dytel has sold approximately 4,000 systems which currently answer more than 80 million telephone calls per month.

The proposed acquisition is subject to the completion and execution of definitive agreements and approval thereof by the Board of Directors of each company and the stockholders of Dytel; to certain investigations by each party; and to the satisfaction of several conditions, including required approvals and consents.

MIAMI (AUG. 8) PR NEWSWIRE - Carnival Cruise Lines, Inc. (AMEX: CCL) announced that on July 10, 1990, its board of directors declared a regular quarterly dividend of $0.12 per share for the third quarter ending Aug. 31 1990, payable Sept. 14, 1990, to shareholders of record Aug. 31, 1990.

Carnival is the world's largest cruise line based on the number of passengers carried. Together with its subsidiaries Holland America Line and Windstar Sail Cruises, Carnival currently operates 15 ships in Alaska, the Caribbean, the South Pacific and the Mediterranean. The company also operates Carnival's Crystal Palace Resort & Casino, a 1,550-room hotel and casino complex in Nassau, Bahamas. The Fantasy, Carnival's new 2,600-passenger ship, began service on March 2, 1990. Carnival has a second 2,600-passenger vessel under construction, scheduled for delivery in April 1991. Negotiations are underway for construction of a third 2,600-passenger vessel for the Carnival fleet. Carnival also recently contracted to construct three more ships for Holland America Line which are scheduled for delivery in late 1992, 1993 and 1994.

#90220p3500 08/08/1990 ~PR Newswire

CHICAGO, (AUG. 8) PR NEWSWIRE - The law firm of Holstein, Mack & Klein today released the following:

Eli Lilly and its subsidiary, Dista Products Co., were named today in a

federal lawsuit involving Lilly's antidepressant, Prozac.

The complaint, brought in the Northern District of Illinois by the Chicago law firm of Holstein, Mack & Klein, charges that Eli Lilly falsely represented Prozac's general safety and side effects.

According to the complaint, Prozac, approved by the Food and Drug Administration in 1987, has been presented to the medical profession and to the general public as an almost side-effect free alternative to earlier tricyclic antidepressants.

Shortly after plaintiff Ralph Langer began taking Prozac, he attempted suicide. Langer, although being treated for depression, never before expressed suicidal thoughts or engaged in self-destructive acts.

After taking Prozac, the plaintiff was hospitalized and diagnosed as a high-risk, potentially suicidal patient.

The suit alleges that Lilly has not provided accurate warnings to consumers and physicians concerning Prozac's ability to increase and create aggression and hostility towards oneself or others.

Holstein, Mack & Klein is a Chicago-based law firm which specializes in complex civil litigation.

#90220p3503 08/08/1990 ~PR Newswire

VANCOUVER, BRITISH COLUMBIA (AUG. 8) PR NEWSWIRE - Trading on the Vancouver Stock Exchange in July was up sharply from the same month in 1989. Year-to-date activity, especially trading value, was also up significantly.

Value for the month, at $462 million, was more than double the July 1989 value, but was down from the 1990 record monthly value set in June. Year-to-date value was $2.7 billion, an increase of 50 percent from the same period in 1989.

July 1990 volume was 404 million shares, an increase of 55 percent over July 1989's volume of 261 million shares, but a 13 percent decrease from the previous month's volume. Year-to-date volume at 2.6 billion shares was up 25 percent over the same period last year.

The senior sections (Commercial/Industrial and Resource) accounted for 15 percent of VSE volume and 43 percent of the value in July.

The VSE Composite Index closed the month at 776.71, a slight decrease from last month but up 10 percent from a year ago. At the end of July the market capitalization of the 1,634 stocks included in the Composite Index was $4.7 billion.

July financings by VSE listed companies totalled $46 million, down 4 percent from the previous month but up 16 percent from the same period last year.

Of the 2,390 issues listed on the VSE at month-end, 149 posted new highs and 277 posted new lows. The most active issues by volume in July included Eurus Resource, Wise Boy Resources, Aigner Holdings, Avondale Resources and Barkhor Resources -- all from the Venture section.

Vancouver accounted for 44 percent of Canadian trading volume in July, thus continuing a trend started in June 1990. The VSE's share of Canadian value, at 8 percent, was up sharply from the previous year's value of 3 percent. The average price per share was $1.14, up sharply from the July 1989 level of 85 cents, but down slightly from the previous month's 1990 record level of $1.22.

LISTINGS During the month of July, 10 new companies were posted and called for trading on the Vancouver Stock Exchange consisting of seven natural resource based companies and one each in the fields of finance, software and waste disposal.

Eight companies hold interests outside of British Columbia, two in Ontario and one each in Washington State, Nevada, North Carolina, Quebec, Newfoundland and the Yukon.

July's 10 new listings compared to eight last month and 23 in July 1989. The number of companies delisted in July was 14 compared to 35 last year.

During July one company was upgraded to the Resource section bringing the total number of companies in the Resource and Commercial/Industrial sections to 371.

VANCOUVER, WA (AUG. 8) PR NEWSWIRE - Pacific Telecom Cable Inc. (PTC) owner of the U.S. end of the 1,260 Mbit/s fiber optic North Pacific Cable (NPC) that will provide the first direct link between the United States and Japan, reports that the project is on schedule toward its December activation date as three cableships proceed with deployment in the Pacific.

The NPC project will also provide the first fiber optic connection between Alaska and the contiguous 48 states through an underwater branching unit located some 700 miles south of its Seward landing station. NPC's main landing stations are at Pacific City, Ore., and Miura, Kanagawa, Japan.

According to David Walker, PTC's vice president, engineering and

operations, cable for the Alaskan Spur is being placed by the Kuroshio Maru, while that portion from Pacific City to the splice point 500 miles west of the branching unit is being placed by the DSV Northern Installer. Both sections use cable manufactured by Ocean Cable Co. and NEC of Japan. The western part of the cable stretching 3,550 miles from Japan to the splice point is being placed by the CS Cable Venture using product manufactured by STC in the United States and United Kingdom.

Capable of carrying more than 85,000 simultaneous telephone calls, the North Pacific Cable is a project of Pacific Telecom Cable Inc. of the United States, Cable and Wireless plc of the United Kingdom and International Digital Communications Inc. of Japan. More than 50 percent of NPC's capacity has been subscribed to by international service carriers.

Pacific Telecom Cable Inc. is an 80-percent owned subsidiary of Pacific Telecom Inc. (NASDAQ: PTCM) of Vancouver, Wash.

TRAVERSE CITY, MI (AUG. 8) PR NEWSWIRE - ASC Incorporated and Modern Engineering, a division of CDI Transportation Group, today announced a joint venture that will eventually include mini plant assembly for specialty vehicle programs.

The joint venture matches a world leader in the design and manufacturing of specialty vehicles (ASC) and the world's largest full- service, independent automotive engineering service firm (Modern Engineering). The joint venture will operate under the name of Aeromotive Systems Company. Aeromotive Systems Company is currently a division of ASC, headquartered in Troy, Mich. Under the new agreement, the assets of Aeromotive Systems Company will be divided equally between ASC and Modern Engineering.

According to ASC Chairman Heinz C. Prechter and Modern Engineering President Ralph L. Miller, the initial intent of the joint venture will be to provide added horsepower for design, engineering, modeling, prototyping and development services to meet growing manufacturers' needs in the specialty vehicles market.

ASC Incorporated, headquartered in Southgate, Mich., is the parent company of American Sunroof Company and Automobile Specialty Company. The ASC organization has 31 facilities worldwide and employs nearly 3,000 people.

Modern Engineering is a division of CDI Transportation Group. Based in Warren, Mich., the CDI Transportation Group employs more than 5,000 specialists at 38 locations across southeastern Michigan. The largest

independent, full-service automotive engineering services operation in the world, the CDI Transportation Group is a subsidiary of CDI Corp. (NYSE: CDI) of Philadelphia.

#90220p3528 08/08/1990 ~PR Newswire

CINCINNATI, (AUG. 8) PR NEWSWIRE - American Financial Enterprises, Inc. ("AFEI") announced today that its net earnings for the first six months of 1990 were $5.1 million or $.39 per share compared to $8.6 million or $.65 per share in 1989. For the quarter ended June 30, 1990, AFEI recorded net earnings of $2.7 million or $.20 per share compared to a net loss of $2.4 million or $.18 per share.

At June 30, 1990, AFEI owned 23.0 percent of the common stock of The Penn Central Corporation (NYSE: PC) and 21.2 percent of Sprague Technologies, Inc. (NYSE: SPG). AFEI accounts for these investments on the equity method by recording a proportionate share of the investees' reported net

earnings in its results of operations. Results for the first six months of 1990 and 1989 include $15.8 million and $20.9 million, respectively, in equity in net earnings of these two companies.

Penn Central reported net income of $51.1 million for the first six months of 1990 compared to $119.6 million for the same period in 1989. Penn Central's net income for the first six months of 1989 included a net gain of $68.2 million from the sales of certain foreign wire and cable operations in the first quarter. Sprague reported net income of $3.4 million in the first six months of 1990 compared to a net loss of $45.3 million for the same period in 1989. Sprague's results for the second quarter of 1989 included a provision for restructuring of $39.2 million.

AFEI's common stock is listed on the Pacific and Midwest Stock Exchanges. Approximately 82 percent of the stock is owned by American Financial Corporation.

#90220p3532 08/08/1990 ~PR Newswire

TORONTO (AUG. 8) PR NEWSWIRE - LAC Minerals Ltd. (NYSE: LAC) today reported increased revenues and gold production during the second quarter and the first six months of 1990, reflecting the consolidation of Bond International Gold, Inc. (BIG).

Earnings for the three months ended June 30, 1990 were $1.4 million or one cent per share on revenues of $118.6 million. For the corresponding period in 1989, earnings were $13.4 million or 14 cents per share on revenues of $41.4 million.

For the six months ended June 30, 1990, earnings were $4.8 million or four cents per share on revenues of $229.9 million. For the same period in 1989 earnings were $19.3 million or 20 cents per share on revenues of $78.7 million.

Earnings from operations improved for the second quarter and the six month period of 1990 to $6.7 million and $13.6 million respectively compared to $4.5 million and $3.6 million for the same periods last year.

Other income declined in the first six months of 1990 to $3.6 million from $26.6 million a year earlier. The decline was a result of reduced financial income, higher interest expense and the non-reoccurrence of certain other income items realized in the first half of 1989. In addition the company experienced an unrealized loss on foreign exchange due to the impact of a stronger Canadian dollar on the company's U.S. cash balances.

Also offsetting the increase in operating earnings was a higher effective income and mining tax rate.

Cash flow from operations for the first half of 1990 was up significantly to $67.3 million compared with $13.6 million a year earlier.

LAC's total gold production for the second quarter of 1990 was 246,802 ounces of which LAC's share was 187,248 ounces compared to 92,822 ounces for the same period in 1989. A total of 492,438 ounces of gold was produced in the first half of 1990 with LAC's share being 368,890 ounces compared to 164,595 ounces a year earlier.

Cash production costs per ounce for the quarter and six months were $246 and $247 per ounce respectively compared to $249 and $285 per ounce during the same period in 1989. Lower cash costs reflect lower cash production costs at the Canadian operations and the consolidation of the BIG operations.

A total of 495,665 ounces of gold was delivered during the first half of 1990 of which LAC's share was 372,202 ounces at an average realized price of $405 per ounce. Comparative figures for the first half of 1989 were 169,378 ounces at an average price of $406 per ounce.

LAC Minerals Ltd. is an international gold mining company with operating gold mines in Canada, Chile and the United States. The company is actively exploring for gold and other metals in North and South America.

CINCINNATI (AUG. 8) PR NEWSWIRE - The Charter Company (NYSE: CHR) reported a net loss of $17.8 million ($.38 per share) for the second quarter of 1990 primarily due to a $20 million loss provision on its preferred stock investment in The Circle K Corporation (NYSE: CKP) which filed Chapter 11 bankruptcy on May 15, 1990. Charter had previously recorded a provision of $25 million on this investment during the fourth quarter of 1989. As a result of these provisions, Charter's $50 million investment in Circle K is now carried at $5 million. Comparable net earnings for the second quarter of 1989 were $5.3 million ($.11 per share). For the first half of 1990 Charter's net loss was $12.6 million ($.27 per share) compared to earnings of $16.0 million ($.33 per share) for 1989.

Charter's pretax earnings excluding the Circle K provision were $2.4 million in the second quarter of 1990 compared to $5.9 million in 1989. On the same basis, results for the first half of 1990 were $7.8 million compared to $15.7 million in the prior year. Other items which adversely affected 1990 earnings were lower market demand for residual fuel oil and the absence of $1.9 million and $3.7 million of deferred income recognized during the second quarter and first six months of 1989.

Charter is engaged primarily in petroleum marketing and the production and sale of crude oil from a 24.5 percent production interest in an oil concession located in the Persian Gulf.

American Financial Corporation owns 51 percent of Charter's 46.8 million shares. Charter's common stock trades on the New York and Pacific Stock Exchanges under the symbol CHR and CHRP, respectively.

BOSTON (AUG. 8) PR NEWSWIRE - David Mugar, chairman and chief executive officer of the New England Television Corporation, today announced that Sy Yanoff, president and general manager of WHDH-TV, has been promoted to the position of executive vice president of New England Television, the parent company of WHDH.

Yanoff's new role will consist of handling long-range strategic planning for New England Television. Yanoff will continue serving as a member of New England Television's board of directors and will continue reporting directly to Mugar in his new postion.

Prior to his present position, Marson served as senior vice president for programming at Metromedia Producers Corporation, a position he took after 10 years at WCVB-TV, where he served as vice president for programming. Marson began his career in broadcasting in 1961 at the old WHDH-TV. In accepting his new position, Marson said, "We've got a wonderful team here at Channel 7 and I'm delighted to be given the opportunity to expand my role in charting the station's future."

And Mugar added, "Bruce Marson has been a vital and positive force in Channel 7's development for quite some time now. Obviously, I have tremendous confidence in his ability to help me continue the progress we have made over the years."

DANVILLE, VA (AUG. 8) PR NEWSWIRE - Dibrell Brothers, Incorporated (NASDAQ-NMS: DBRL) ("Dibrell") announced today that it has terminated the previously proposed sale to Universal Leaf Tobacco Company, Incorporated ("Universal") of the Brazilian tobacco leaf processing business formerly

owned by R.J. Reynolds Tabacos do Brasil, Ltd. ("RJR Brasil"). Mr. Claude B. Owen, Jr., Chairman and Chief Executive Officer of Dibrell, stated that Dibrell has determined that the leaf tobacco assets and business of RJR Brasil have greater strategic and financial value for Dibrell's present business needs and long-term growth than previously anticipated. Accordingly, Dibrell has decided to retain the RJR Brasil leaf tobacco business and today assumed full operational and administrative control over its facilities. Universal had been operating the leaf business for Dibrell's account during the pendency of the negotiations for the proposed sale.

The leaf business was one of the two types of operations sold by R.J. Reynolds Tobacco Company ("RJR") on April 9, 1990, pursuant to a Stock Purchase Agreement dated March 2, 1990, between Dibrell and RJR. Simultaneously with such sale, Dibrell signed the agreement-in-principle with Universal to sell the leaf business, and sold the assets related to RJR's Brazilian cigarette business to Philip Morris Marketing, S.A. Dibrell also obtained the leaf tobacco export contracts of RJR Brasil as part of the acquisition, which have not been affected by Dibrell's termination of the proposed sale of the RJR Brasil leaf tobacco business. Mr. Owen stated that the increasingly clear efficiency of servicing these export contracts with RJR Brasil leaf tobacco business was one of the reasons Dibrell determined to retain the business.

As a result of these developments, Dibrell will review its capital structure and will explore various methods of financing this acquisition.

MINNEAPOLIS (AUG. 8) PR NEWSWIRE - TCF Bank Savings fsb (TCF) today announced that it will resume education loan operations, including disbursements of loan checks and processing of loan applications, following discussions with student loan industry officials.

Pending this resolution, TCF had temporarily suspended funding of education loans.

"We've now received the assurances we have been asking for," said William A. Cooper, TCF chairman and chief executive office. "We're encouraged by the attention being given to the guarantee situation and believe the Department of Education will take action to ensure the continued viability of education loan programs."

TCF will promptly disburse education loan funds to the schools the student borrowers attend. Applications will continue to be processed so funds

will be available for the start of the fall term.

TCF is the largest education loan provider in Minnesota and one of the largest in the nation. Overall, 70 percent of TCF's education loans are to students attending four-year colleges and universities, 25 percent to students of community or technical colleges, and 5 percent to students attending proprietary schools. The default rate for TCF education loan originations is comparatively low for the industry, due primarily to TCF's conservative underwriting standards.

TCF Bank Savings fsb, a federal savings bank, operates 55 branches in Minnesota and 20 branches in northern Illinois.

WILMOT, WI (AUG. 8) PR NEWSWIRE - Continued control of operating expenses coupled with concentrated growth, enabled Gander Mountain, Inc. (NASDAQ-NMS: GNDR) to today report record earnings for the year ended June 30, 1990. Net income jumped 178.5 percent to $2.3 million. The mail order and retailer of outdoor sporting goods also reported that fourth-quarter results improved 56.0 percent over the same period in 1989.

Ralph L. Freitag, chairman and president, stated, "The record performance of the company demonstrates our ability to manage our growth in sales and control expenses to achieve strong financial performance and increased shareholder value. During the past year, we devoted significant attention to our core business and to building the infrastructure necessary to grow this business in the future."

RESULTS OF OPERATIONS The company's net income for fiscal 1990 increased 178.5 percent to $2.3 million, up from the $0.8 million for 1989. Earnings per share rose to $.84 per share from $.30 per share reported in 1989.

For the fourth quarter of 1990, a traditionally poor quarter for the company, the net loss was $0.4 million, an improvement from the loss of $0.9 million in the same period last year. The loss per share in the fourth quarter of 1990 was $.14, compared to a loss of $.33 per share for the same quarter last year.

Annual net sales increased to $115.7 million for the year, up from the $113.8 million from the prior year. Fourth-quarter net sales were $20.3 million, down from the $21.2 million in the same quarter of 1989.

Total operating expense declined $1.8 million to $35.2 million for the

year ended June 30, 1990, and other expense declined $1.1 million to $1.0 million for the same period.

PERFORMANCE ANALYSIS Freitag indicated that the company has embarked upon a focused strategy for the future expanding in areas where it has market strength and a competitive advantage. This strategic plan to build the core business included the sale of its two closely related mail-order subsidiaries Western Ranchman Outfitters and Master Animal Care. These subsidiaries were sold on Aug. 31, 1989, and May 14, 1990, respectively.

"When removing the effects of the two subsidiaries from the sales performance of the company, the core business sales increased over 10 percent. This shows the effect of our continued emphasis on customer service combined with our improved merchandising and marketing efforts," Freitag added.

"We are continuing our emphasis toward development of new operational programs, information systems and filling our key management positions. In particular, our efforts to improve inventory management have greatly improved our cash flow, thus lowering borrowing costs," said Freitag.

MARKET INFORMATION Gander Mountain, Inc. is a customer-oriented specialty merchandiser primarily serving the outdoor recreation market through mail-order catalogs and retail outlets. The company's stock trades on the NASDAQ National Market System; its symbol is GNDR.

#90220p3571 08/08/1990 ~PR Newswire

NEW YORK (AUG. 8) PR NEWSWIRE - Larry D. Horner today announced that he will not seek re-election as chairman and chief executive of KPMG Peat Marwick when his six-year term ends in October. He will continue as chairman of the international firm until December when that term of office expires.

Under partnership rules, Horner would have been eligible to serve an additional three years as U.S. chairman, but he declined, saying, "The firm needs a chairman who can serve a full six-year term to implement our strategies.

"Over the past six years we have built the world's largest accounting and consulting firm with the KPMG merger," Horner said. "It is my view that

KPMG is in the best strategic position of any of the Big Six firms." "We believe the benefits of the merger have been validated with recent client acquisitions such as PepsiCo., Varity Corp., Beckman Instruments, Rolls Royce and others. We have just completed a record year for the firm; it is now time to turn over the leadership to new people. I'm confident that the partners will select a new leader who can capitalize on the opportunities that lie ahead."

The U.S. firm's chairman is elected by a majority vote of the 1,850 partners at its annual meeting, which will be held this year on Oct. 3. Nominations for the positions of chairman, deputy chairman, and other board vacancies will be finalized by Sept. 20.

KPMG Peat Marwick is the U.S. practice of KPMG, the world's largest professional services organization. In fiscal 1989, KPMG posted revenues of $4.3 billion. The firm has 6,100 partners and 69,000 staff in 117 countries.

#90220p3575 08/08/1990 ~PR Newswire

BELLINGHAM, WA (AUG. 8) PR NEWSWIRE - Contract negotiations begin today with the Association of Western Pulp and Paper Workers and its Local Union No. 309 representing the employees of Georgia-Pacific Corp.'s (NYSE: GP) tissue operations at Bellingham.

"These negotiations are very important to Georgia-Pacific and our employees and, indeed, are critical to Bellingham's long-term viability," said A.D. Correll, executive vice president - pulp and paper. "Every pulp and paper manufacturer is having to consider ways to operate in today's world-wide markets. Some in our industry have decided to move operations to foreign countries where the cost of doing business, including the cost of labor, is lower. This is not an option we want to consider, but we must be able to compete.

"Approximately 15,000 Georgia-Pacific paperworkers in all parts of the country, except the Northwest, have agreed to terms similar to those being proposed at the Bellingham mill. They understood and agreed with the changes necessary to help keep their facilities competitive.

"In addition to the critical impact of foreign competition, our collective bargaining proposals reflect the cyclical nature of our pulp and paper industry, bargaining trends in the majority of our industry and the need to continue to make capital investments.

"If we are to preserve the long-term viability of our operations here, and provide an equitable working environment across the Georgia-Pacific system we must take seriously our position on workrule flexibility, containment of the increases of healthcare costs and Sunday premium pay.

"Premium pay and overtime pay are not the same things. Federal and state laws clearly provide for overtime pay for hours worked in excess of 40 hours in one week. Premium pay, in the case of the Bellingham mill, is one-and-a-half times pay for all hours worked on Sunday whether or not any other work has been performed in the week. This is also sometimes referred to as pay for 'Sunday-as-such'. In today's intensely competitive environment, it is unrealistic to pay a premium simply for Sunday work.

"We have a responsibility to our shareholders to earn a return on their investments in Georgia-Pacific that is better than they could earn elsewhere. We have an obligation to provide our customers with superior products and superior services. The company also has a responsibility to provide an equitable and fair work environment for all its employees," Correll concluded.

#90220p3577 08/08/1990 ~PR Newswire

NEW YORK (AUG. 8) PR NEWSWIRE - The Navigators Group, Inc. (NASDAQ: NAVG) reported today that net after-tax income for the first six months of 1990 was $4,806,000 compared to $5,278,000 in 1989, a decrease of 9 percent. On a per-share basis, net income was $1.38 compared to $1.52. However, included in pre-tax income were $136,000 and $1,625,000 in realized capital gains in the first half of 1990 and 1989, respectively. On an after-tax basis these gains added $90,000, or $.03 per share, in 1990 compared to $1,073,000, or $.31 per share, in 1989 to the group's net after-tax income.

For the first six months of 1990 net written premium was $29,222,000 as contrasted to $20,815,000 last year, an increase of 40 percent. Net earned premium was $32,612,000 compared to $21,540,000 an increase of 51 percent. Net investment income was $5,183,00 as contrasted to $4,237,000, representing a 22 percent increase. The statutory combined ratio was 94.1 percent for the first six months of 1990 vs. 94.5 percent for the same period last year.

For the second quarter of 1990, net income was $2,461,000, or $.71 per share, as compared to $2,990,000, or $.86 per share, a decrease of 18 percent. These results included $140,000 in realized capital gains for the second quarter of 1990 compared to $1,336,000 for the same period last

year. On a per-share after-tax basis these gains increased net income by $.03 in the second quarter of 1990 vs. $.25 in the second quarter of 1989.

Net written premium for the quarter was $9,732,000 compared to $9,537,000, representing a slight increase. Net earned premium for the quarter increased 12 percent from $9,836,000 to $11,057,000 and net investment income increased 15 percent from $2,118,000 last year to $2,437,000 for the second quarter of 1990. The statutory combined ratio for the quarter was 92 percent compared to 94.8 percent last year.

Shareholders' equity at June 30, 1990, was $66,901,000, an increase of more than 6 percent since Dec. 31, 1989, and 15 percent since June 30, 1989.

As stated in the first-quarter report, when comparing the results of 1990 with 1989 it should be noted that in January 1990 Navigators Insurance Company and Progressive Casualty Insurance Company entered into an agreement whereby Navigators assumed $12.3 million in Progressive's net loss and unearned premium reserves attributable to its participation in the marine pools managed by Navigators' underwriting affiliates. Navigators received in return an equal amount of cash, $11.3 million of which was recorded as written premium. Since there were no expenses related to the assumption, the transaction had the effect of increasing Navigators' loss ratio and decreasing its expense ratio for the first six months of 1990.

"Navigators' second-quarter operating results are essentially the same as the first-quarter results," said Terence N. Deeks, chairman of Navigators. "The company continues to be on target for our 1990 business plan. We are seeing increasing signs of hardening in the market particularly in the reinsurance area, however, as yet we have seen no real evidence of rates improving on the direct side of the business. We continue to expect that 1990 will be a successful one for Navigators and are very optimistic about our opportunities over the next several years."

SAN FRANCISCO (AUG. 8) PR NEWSWIRE - Chevron Corp. (NYSE: CHV) Chairman Ken Derr at a news conference here today pledged strong support of the President's actions in the Middle East crisis, including his call for gasoline pricing restraint. He said the following:

The President has called for oil companies to exercise restraint in pricing their products. I have sent the President a wire to tell him that Chevron will and is exercising restraint in passing on sharply higher raw-material costs to its customers, and I also told him that we'll do everything we can to augment the supply of oil to the American consumer.

Our recent wholesale gasoline price increases to dealers, ranging in different areas from 5 to 8 cents per gallon since last Friday, have fallen far short of recovering our increased costs for our raw material, namely crude oil. Crude oil prices have skyrocketed from about $16 per barrel in late June to a high of $28 per barrel yesterday (8/7), an increase of $12 per barrel (about 29 cents per gallon).

Nevertheless, we will increase our prices only when it becomes absolutely necessary, and we are calling today on our dealers and jobbers throughout the country to join us in exercising restraint.

Since last Friday, when we increased our wholesale prices to our dealers 5 cents per gallon, there has been a tremendous expression of concern about gasoline prices from our customers, government officials and the news media. We understand the reaction to gasoline price increases and we're very much concerned about how our customers feel about the situation.

However, many of the reports we've seen and many of the statements that have been made demonstrate misconceptions and a lack of understanding of the complexity of the economic world and of our business.

For example, people have not understood that we pay for a tanker of imported crude at the market price for crude oil at the time the cargo is delivered, not when we load the tanker in a foreign port, weeks earlier. If the price for crude oil is skyrocketing, the only way we can recover the enormous increased costs for our imported oil, and ensure continued supplies for our millions of customers, is to raise the price we charge for our finished product.

In fact, our raw-material has increased in cost since early last month by

about 50 percent, while our wholesale product prices have been raised by less than 20 percent.

The current crisis in the Middle East again demonstrates how overly dependent the American people -- including every one of Chevron's employees and their families -- are on receiving a critically important commodity from an historically unstable and unpredictable part of the world.

The current situation is the third major disruption in the crude oil market in the last 20 years. At the same time, our dependence on foreign sources of oil in this country has increased to almost 50 percent. In part, this is because it has become increasingly difficult to explore for and to produce U.S. resources, as areas of high-resource potential in this country are placed off limits to exploration or production.

In the short term, while we continue to work hard to ensure continued supply, Chevron sees the following additional steps that it can take as the nation's largest refiner and marketer of petroleum products to counteract what's happening in the world oil market. For example:

-- Yesterday, we decided to increase spending by an additional $100 million this year on U.S. production projects where we feel we can in a very short time increase the amount of oil flowing from existing fields;

-- We are operating our seven refineries in the continental United States at maximum rates possible to ensure that we are manufacturing as much gasoline and other important products as our customers need;

-- Our crude oil supply experts have been working hard since the Middle East conflict began to further diversify Chevron's crude oil sources from all over the world so that we can avoid any oil shortages;

(AUG. 8) UPI - Officials with two John F. Kennedy assassination research centers have asked the Texas attorney general to investigate yet another theory about who killed the president. A Midland man... Ricky Don White... claims his father, a former Dallas police officer, was one of three C-I-A operatives who killed J-F-K as he traveled by motorcade through downtown Dallas on November 22nd, 1963. White says presumed Kennedy assassin Lee Harvey Oswald was set up to take the blame but NEVER fired a shot.

The late Sammy Davis Junior left most of his estate to his widow... but he

also left a ''Gary Cooper'' gun to actor Clint Eastwood. The song-and-dance man's will filed in Los Angeles Superior Court lists two-Million dollars worth of personal property and two-Million dollars in real estate. Davis, who died May 16th of cancer, also left 100-thousand dollars each to Morehouse Teachers College in Atlanta and to his housekeeper.

(AUG. 8) UPI - Fighter jets were seen leaving Langley Air Force Base in northern Virginia and paratroopers at Fort Bragg, North Carolina, reportedly were leaving Tuesday night for Saudi Arabia. Defense sources say President Bush Tuesday ordered U-S warplanes and ground troops sent to Saudi Arabia to guard against a possible Iraqi attack. The White House says the president will address the nation Wednesday morning, but there's NO advance word on what he'll say.

Mexican authorities say the cities of Tuxpan and Tamiahua, 15 miles to the north, bore the brunt of Hurricane Diana... which slammed ashore with 100 mile-an-hour winds Tuesday afternoon. At least two people were killed and four injured by the storm, which also damaged homes and communication lines before being downgraded to a tropical storm late Tuesday. Diana's rains flooded highways and rivers in northern Veracruz and southern Tamaulipas states. Fallen trees left a number of roads impassable.

China and Indonesia formally resumed diplomatic relations Wednesday in a palatial ceremony in Jakarta that ends a 23-year freeze. China's prime minister and the Indonesian president witnessed the signing of the document by Indonesia's foreign minister and his Chinese counterpart. Indonesia is the second country to establish ties with China since the suppression of pro-democracy demonstrators in Beijing's Tiananmen Square in June 1989. Saudi Arabia was the first.

Reports say an AIDS patient from New York died shortly after undergoing an experimental blood-heating treatment by an Atlanta doctor working in Mexico. The patient, who was said to be near death before the treatment, was the third person to undergo the controversial procedure. He died a week ago, 18 hours after the treatment. One man who underwent the procedure at Atlanta Hospital in May claims he was cured of the AIDS virus. Doctors say the second patient has shown only slight progress.

(AUG. 8) UPI - Police in Dallas say a woman suffered minor cuts to her finger and back after she took away stereo and Nintendo privileges from her teen-age children, and they attacked her. Detectives say 31-year-old Verma Conley's 14-year-old son pulled a pocketknife and her 13-year-old

daughter struck her with a telephone late Monday. Another person called police, but the children fled by the time they arrived. The girl was later apprehended. The boy is still at large.

In Los Angeles, a would-be actor is suing Star Magazine and one of its reporters for 10-Million dollars. Roy Emerald claims the magazine libeled him by publishing a story in May linking him romantically with then-hospitalized actress Elizabeth Taylor. The story was published in the Star and by other news organizations who'd been called by a person claiming to be Taylor's New York publicist. The story was followed up by others accusing Emerald of perpetrating the hoax for publicity.

(AUG. 8) UPI - TRANSACTIONS:

Baseball

Chicago (NL) - Placed pitcher Shawn Boskie on the 15-day disabled list; called up pitcher Lance Dickson from Charlotte of the Southern League (AA).

Kansas City - Called up outfielder Brian McRae from Memphis of the Southern League (AA); placed outfielder Jeff Schulz on the 15-day disabled list; moved outfielder Bo Jackson from 15-day to 21-day disabled list; moved pitcher Mark Gubicza from 21-day to 60-day disabled list.

Philadelphia - Placed pitcher Ken Howell on 21-day disabled list; recalled pitcher Jason Grimsley from Scranton/Wilkes-Barre of the International League (AAA).

Pittsburgh - Purchased the contracts of pitcher Mark Ross and infielder Mark Ryal from Buffalo of the International League (AAA); placed pitcher Ted Power on the 15-day disabled list; optioned pitcher Rick Reed to Buffalo.

Basketball

Cedar Rapids (CBA) - Named Todd DeMoss trainer.

Houston - Signed forward David Wood to 1-year contract.

Portland - Signed forward Alaa Abdelnaby to 4-year contract.

College

NCAA - Placed Upsala basketball team on five years' probation and banned school from Division III postseason for three years for paying players.

Football

Green Bay - Signed linebacker Brian Noble; cut nose tackle Deatrick Wise.

NY Jets - Claimed linebacker Dan Murray on waivers from Cincinnati.

NY Giants - Signed defensive end Eric Dorsey to 2-year contract.

Philadelphia - Signed center David Alexander to a 4-year contract and defensive end Steve Kaufusi to a 2-year contract.

Phoenix - Waived running backs Stump Mitchell and Donnie Riley and kicker Kevin Nicholl.

Pittsburgh - Waived offensive tackle Jeff Fryar.

San Diego - Signed safety Vencie Glenn; released cornerback Keith Collins.

Hockey

Minnesota - Acquired center Bobby Smith from Montreal Canadiens for fourth-round choice in 1992 draft.

NY Islanders - Signed left winger Randy Wood and goaltender Glenn Healy to multi-year contracts.

Soccer

St. Louis (MSL) - Signed goalkeeper David Brcic and defenders Mark Frederickson and David Eise.

U.S. National Team - Lent defender Steve Trittschuh to Sparta Prague of Czechoslovakian League through June 15, 1991.

(AUG. 8) UPI - Around the world... around the clock... U-P-I brings you the latest news.

F-15 fighter jets began taking off from Langley Air Force Base in Virginia last night, apparently part of a group of warplanes headed for Saudi Arabia. President Bush also ordered troops to the Persian Gulf nation to help defend against a possible attack by Iraq. Bush is to speak to the nation on the matter this morning.

Thousands of people are fighting a dozen forest fires in Oregon state... part of some 170 wildfires burning in Oregon, California and Utah. Many of the fires were started by lightning. At least 92 blazes are burning in California, including more than 50 in the Sierra National Forest.

Preparations are moving forward for next month's launch of the repaired shuttle Columbia on a long-delayed astronomy mission. The leaking shuttle Atlantis is to be hauled off the launch pad today to make room for Columbia, which is set to begin its rollout to the launch pad tomorrow.

Vice President Quayle led the U-S delegation to the inauguration of new Colombian President Cesar Gaviria, who was sworn in yesterday in Bogota. Quayle urged Gaviria to continue extraditions of suspected drug lords to the United States.

Authorities in Pakistan ordered airports to bar legislators of Benazir Bhutto's Pakistan People's Party from leaving the country. Bhutto was dismissed as prime minister Monday, and her government was dissolved because of what the president termed ''corruption and nepotism.''

BANGKOK, THAILAND (AUG. 8) UPI - Burmese security forces opened fire Wednesday on protesting Buddhist monks and students in the central city of Mandalay, reportedly killing four people, diplomats said.

''A (security force) captain was hit on the head by a rock and that started the shooting,'' said a diplomat contacted by telephone from Bangkok.

The diplomat, who asked not to be identified, said reports from Mandalay, 300 miles north of Rangoon, indicated two monks and two students were killed and two other people were wounded in the shooting.

No Burmese government officials could immediately be contacted to comment on the account, which came amid tension between the military and the winning party in recent elections.

The incident came on the second anniversary of major anti-government demonstrations that led to harsh military repression in 1988.

All schools in Mandalay, Burma's second-largest city, have been closed and army troops have moved in to secure the center of the town, the diplomat said.

He quoted witnesses as saying the incident began at 6:00 a.m. with a large procession of Buddhist monks with begging bowls apparently commemorating

the 1988 demonstrations.

The monks were joined by anti-government students, including members of the youth wing of the National League for Democracy, which the won May general elections, he said. The military has so far delayed turning over power to the elected representatives.

The diplomat said the monks' procession continued peacefully for more than 90 minutes until a student tried to raise the ''fighting peacock'' flag that symbolizes student defiance of the government.

A security official tried to arrest the student, leading to a scuffle, rock-throwing and the shooting, he said.

There were no reports of violent incidents in the capital, Rangoon, but troops patrolled the streets and searched some students heading to classes diplomats said.

The incident in Mandalay followed anti-government demonstrations by hundreds of Buddhist monks and high school students.

Witnesses said a crowd of about 300 students hurled firecrackers at troops stationed in a Buddhist temple, but no violence was reported.

Rangoon radio Tuesday night took the unusual step of denying rumors that several protesters were killed in the earlier demonstrations.

The radio said there had been demonstrations by monks in one temple and by students from five high schools, but no one was wounded.

''About 200 monks came out of the compound making loud noises,'' the radio said. ''They dispersed when security personnel arrived.

''The rumors that are quite different from the truth are purposely being spread by those unscrupulous people who want to take advantage of the situation, to disrupt peace and tranquility,'' the radio said.

The demonstrations followed statements by the military government that it would not transfer power to the legislature elected May 27 until a new constitution, acceptable to the military and approved by the people, was promulgated.

The opposition National League for Democracy swept 80 percent of the seats in the elections, but the military has repeatedly refused to meet the party or release party leaders still in detention.

The military has said it would never allow the massive pro-democracy demonstrations that erupted two years ago.

The military finally crushed the demonstrations, killing hundreds, if not thousands of people.

#90220u0336 08/08/1990 ~United Press International

(AUG. 8) UPI - Heavy showers blew into New England Wednesday, flooding Massachusetts and New Hampshire, while thunderstorms rolled over the South and temperatures dropped in the Southern Plains as Hurricane Diana died south of the Mexico border.

Slow-moving rainstorms drifted across Connecticut, Rhode Island and Massachusetts early Wednesday, causing heavy showers in some areas, the National Weather Service said.

Heavy storms caused flooding in eastern New Hampshire, dumping more than 4 inches of rain in less than 24 hours over North Groton. A flood watch was posted for central Massachusetts as heavy storms flooded roads in poor-drainage areas.

Partly cloudy skies covered parts of Maryland, Pennsylvania, West Virginia and New Jersey early Wednesday as scattered showers dotted Maryland. Overnight lows ranged mostly in the 50s and 60s.

High pressure pushed into the South, following a cold front that produced thundershowers across much of the region. The front moved over coastal areas Wednesday, causing spotty showers in south Georgia, the coastal Carolinas and the Gulf Coast and Florida Keys.

High pressure spread over New Mexico, Texas, Oklahoma, Arkansas and Louisiana Wednesday, keeping overnight temperatures in the 60s and daytime readings in the 80s, as much as 10 degrees below normal.

The remnants of Hurricane Diana caused only isolated showers Wednesday over Brownsville, at the southern tip of Texas. ''It's poopin' out pretty quick,'' said Stanley Christmas, a NWS forecaster in Fort Worth.

The hurricane whipped Veracruz state in Mexico Tuesday with 110 mph winds and heavy rains that flooded homes, cut telephone service and toppled trees, killing two people and injuring four, authorities said.

Diana was upgraded from tropical storm to hurricane Tuesday, then lost momentum after hitting the mountains of the eastern Sierra Madre and was downgraded again. Peak winds fell to about 46 mph Wednesday, officials said.

An unstable weather pattern over California kicked up winds of 50 mph in

the desert community of Palmdale near Los Angeles, triggering dust storms Tuesday that resulted in chain-reaction accidents involving dozens of cars.

Unexpected wind gusts slammed four hot-air balloons down for hard landings Tuesday near Napa, Calif., injuring 17 helpless riders. They were caught by a surprise thunderstorm and fierce winds that came out of clear skies.

Hot weather and gusty winds in California, Oregon and Utah kept at least 170 wildfires - many started by lightning - burning over a total of 42,000 acres.

#90220u0337 08/08/1990 ~United Press International

(AUG. 8) UPI - In South Africa, far-right and left-wing groups are questioning the motives of the African National Congress, which has suspended its nearly 30-year guerrilla war against white rule. Religious and human rights leaders joined the A-N-C in warning President Frederik de Klerk to keep control of his security forces.

Andrew Young's bid to become Georgia's first black governor fell short as he lost the Democratic gubernatorial primary runoff to Lieutenant Governor Zell Miller. With 93 percent of yesterday's vote counted, Miller had 65 percent compared to Young's 35 percent. Young is a former U-N ambassador and former Atlanta mayor.

A clandestine Palestinian group says it plans to release two Swiss nationals being held hostage in Lebanon within 24 hours. It's the first claim of responsibility for the abduction of the two Swiss Red Cross workers, who were kidnapped October 6th, 1989, on the outskirts of Sidon .

A tentative, 920-thousand-dollar settlement is reported in an anti-war protester's suit against the government and the crew of a Navy weapons train that ran over him. Brian Willson lost both legs when he was run over by the train in September 1987, while sitting on tracks outside the Concord Naval Weapons Station in California.

China and Indonesia formally resumed diplomatic relations today in a ceremony in Jakarta that ends a 23-year break. Indonesia is the second country to establish diplomatic relations with China since the bloody crackdown on pro-democracy demonstrators in Beijing last year. Saudi Arabia earlier resumed diplomatic ties.

#90220u0358 08/08/1990 ~United Press International

WINDOW ROCK, Ariz. (AUG. 8) UPI - Former Navajo Tribal Chairman Peterson Zah and suspended leader Peter McDonald took the top two spots in the

primary race for tribal leader and will face each other in the November general election.

Unofficially, Zah finished first in Tuesday's voting with 13,785 votes and MacDonald 10,322. Election officials said absentee ballots were included but challenge votes were being tabulated Wednesday.

In a surprise finish, Interim Tribal President Leonard Haskie finished with 9,729 votes, falling short of MacDonald's total by 593.

Zah lead the primary throughout the night as the precinct reports were announced by election officials.

Overall, out of 96,840 registered voters, 45,515 showed up at the primary election polls. Election experts earlier estimated a voter turnout of 50,000.

#90220u0361 08/08/1990 ~United Press International

RICHLAND, Wash. (AUG. 8) UPI - A scientist activist sent jam made from radioactive mulberries to Gov. Booth Gardner and Energy Secretary James Watkins as an object lesson on mismanagement of nuclear waste at the Hanford Nuclear Reservation.

Norm Buske, owner of a private research company that for years has studied ground-water contamination at Hanford, said Tuesday he made the jam from berries he picked at N-Springs along the Hanford shoreline of the Columbia River.

He said no harm was intended, and added that the level of strontium 90 in the mulberries used in the jam was not sufficient to be dangerous.

But he did not recommend that either the governor or Watkins try the jam on toast. Each jar contains 1,300 units of strontium 90, he said - about 80 times more strontium 90 than is allowed for daily consumption under drinking-water standards.

Buske notified officials that he was sending the jam.

Roger Woodruff, an environmental scientists for Battelle Pacific Northwest a Hanford contractor, said officials are aware that vegetation along this stretch of the river is contaminated. And he disputed the application of drinking water standards to jam.

''That is why it is posted - to preclude public access,'' he said.

The area is posted with a ''no tresspassing'' sign, and one contaminated

area 70 yards away was marked with radiation-warning signs.

Buske said his examination revealed higher concentrations of strontium 90 in plant life than was known to officials managing Hanford. He said Hanford managers were not aware of edible vegetation in the area, but that point was disputed by Battelle officials.

The radioactivity, he said, stems from ground water flowing from the nuclear reservation to the river.

''They've got a problem out there,'' Buske said about officials in charge of Hanford. ''If they can't see what their present problems are, how well-directed are they in spending billions of dollars cleaning the thing up.''

Hanford officials have admitted they don't know the location of every contaminated spot.

Buske said the area of the contaminated mulberry patch also has edible green plants called curly dock, which are 200 times as radioactive as the mulberries. He said a 1.75-ounce sample of the curly dock contains all the strontium 90 that he legally can possess.

Dick Milne, spokesman for Gov. Gardner, said state health officials would conduct an independent analysis of potential health risks at the site of the mulberry patch.

-30- 2735

#90220u0493 08/08/1990 ~United Press International

CAIRO, EGYPT (AUG. 8) UPI - Iraqi Foreign Minister Tareq Aziz has disappeared from public view amid the crisis of Iraq's invasion of Kuwait, puzzling Western diplomats who speculated Wednesday he may have been ousted in a power struggle.

The diplomats said Aziz dropped out of sight Friday about the time Iraq announced it had executed 120 military officers for allegedly plotting a coup against President Saddam Hussein at the instigation of an unnamed foreign power.

Initially, Baghdad Radio reported the officers were executed for refusing to participate in the invasion of a fellow Arab nation but later cited the alleged coup plot.

The diplomats said Aziz did not as expected attend an emergency summit by Arab League foreign ministers Friday in Cairo, which ended with a condemnation of Iraq's invasion of Kuwait the day before.

They also were mystified at the veteran diplomat's absence during Baghdad's frantic shuttle diplomacy throughout the Middle East during the crisis.

Instead, Baghdad's diplomatic blitz to bring other Arab nations into line with its stand on Kuwait has been conducted by Ezaat Ibrahim, vice chairman of Baghdad's secretive ruling Revolutionary Command Council. Ibrahim attended the Arab League summit Friday.

The diplomats said they believed Aziz was connected to a power struggle within the council, linked to the executions of the officers who were sentenced by a military tribunal and whose death warrants, according to Baghdad radio, were signed by Saddam.

The diplomats also said official Iraqi newspapers had recently carried file photographs, rather than new images, of Aziz.

Aziz is regarded as third in line from Saddam after First Deputy Prime Minister Taha Yassin Ramadhan. He is a Protestant, unlike most other senior figures in the Islamic republic. Aziz also has served as a right-hand man to Saddam after helping him in the 1958 revolution that brought the Ba'ath Party to power.

-30- 2168

#90220u0494 08/08/1990 ~United Press International

(AUG. 8) UPI - The wild pitch that Dodger reliever Tim Crews unleashed Tuesday night proved dangerous to himself.

With the bases loaded, Crews entered the scoreless game against National League West-leading Cincinnati in the eighth inning. On an 0-2 pitch, Crews unraveled, hurling past catcher Mike Scioscia and scoring Billy Hatcher to hand the Cincinnati Reds a 1-0 victory over Los Angeles.

''My spike caught in the clay and I just fell down and lost control of the ball,'' Crews said. ''Then I started to get heartburn, all of a sudden. I picked a bad time to fall on my face and then when I tried to get up I fell again. And that's when I panicked.''

Hatcher had reached first when his one-out grounder was misplayed by shortstop Alfredo Griffin for an error. Barry Larkin then walked and Hatcher took third on Ray Searage's wild pitch. Paul O'Neill walked to load the bases.

The Reds, which lead second-place San Francisco by six games, survived an eighth inning threat by the Dodgers. Starter Tom Browning, 11-6, gave up singles to Eddie Murray and Hubie Brooks before walking Mickey Hatcher to load the bases. But unlike Crews, Browning maintained his composure and

got Rick Dempsey to fly out.

Crews might benefit from listening to Browning, who was roughed up by San Diego in an 8-5 loss in his last start.

''I just went out and pitched my ballgame,'' Browning said. ''I moved the ball in and out and I got some great fielding plays behind me, particularly by Larkin. I didn't worry about that last game, because those things happen and you have to put them behind you.''

Browning scattered eight hits in eight shutout innings, striking out five and walking two. Myers retired the Dodgers in the ninth for his 22nd save.

Rookie Jim Neidlinger, 0-1, making his second major league start, limited the Reds to two hits over 7 2-3 innings. He struck out six and walked two, giving up both hits to O'Neill.

--- AROUND THE NL ---

In other National League games, Chicago downed St. Louis 5-3, Philadelphia pummeled New York 9-0, Pittsburgh edged Montreal 4-3 in 12 innings, San Diego swept a double-header from Atlanta 7-2 and 11-9, and Houston blanked San Francisco 4-0.

Cubs 5, Cardinals 3

At Chicago, Ryne Sandberg hit a two-run homer in the seventh inning, giving the Cubs their fourth straight victory. With the score 3-3 in the seventh, Jerome Walton reached on an error and Sandberg his homer off Scott Terry, 1-6. Paul Assenmacher, 4-2, was the winner in relief.

Phillies 9, Mets 0

At New York, Jose DeJesus pitched a two-hitter, scored a run and drove in another run to lead Philadelphia. New York's loss, coupled with a 12-inning victory by Pittsburgh, increased the Pirates' lead in the NL East to 2 1-2 games. DeJesus improved to 3-3. Frank Viola, 15-6, was the loser.

Pirates 4, Expos 3 (12 innings)

At Pittsburgh, Jose Lind scored on Jay Bell's sacrifice fly in the 12th inning. Mark Ross, 1-0, the fifth Pittsburgh pitcher, was the winner. Lind opened with a double off Dale Mohorcic, 1-2, and was sacrificed to third. Sid Bream was intentionally walked and Bell lifted a fly to right.

Padres 7-11, Braves 2-9

At Atlanta, Andy Benes, 8-8, scattered eight hits over eight innings in

the opener for the Padres. Loser Tom Glavine, 6-8, allowed eight hits over seven innings.Garry Templeton, Joe Carter and Mike Pagliarulo drove in two runs each in the nightcap. Eric Show, 3-8, was the winner and Marty Clary, 1-9, took the loss.

Astros 4, Giants 0

At Houston, Mark Portugal pitched a five-hitter over 7 1-3 innings and struck out a season-high nine to help Houston win its sixth straight and hand the Giants their third consecutive loss. Portugal, 5-9 this season, improved his lifetime record against the Giants to 5-0. Dave Smith garnered his 19th save. San Francisco starter John Burkett dropped to 10-4.

-30- 4114

#90220u0543 08/08/1990 ~United Press International

(AUG. 8) UPI - Stock prices on the Tokyo Stock Exchange rebounded sharply Wednesday as investors snapped up bargain-priced issues after five straight losing sessions triggered by Iraqi's invasion of Kuwait.

The blue-chip Nikkei Average of 225 selected issues, which plunged 946.46 points Tuesday, soared 856.07 points - or 3.1 percent - to 28,509.14.

The broader-based Toyko Stock Exchange Price Index of all major listed shares, which plunged 52.11 points Tuesday, recovered 53.60 points to 2,100.02.

Advances widely outnumberd declines 819 to 173, while 102 issues remained unchanged.

An estimated 580 milion shares changed hands, compared with 527 million shares Tuesday.

Analysts said the rally was a natural reversal after a more than 10 percent drop of Nikkei Average in five consecutive trading days.

''Investors thought stock prices could not fall further after a substantial plunge since last week,'' said Mitsuhiro Nakano, a strategist for Daiwa Securities Co.

The Nikkei average has lost more than 3,300 points, or 10.8 percent of its value, since Iraq began its invastion of Kuwait last Thursday.

On Tuesday, the Nikkei average posted the year's lowest closing of 27,653.07 in the wake of Monday's plunge on world stock markets.

Brokers kept a close watch to the Middle East situation, but a lack of new

developments in the conflict prompted some investors to buy bargain-priced issues.

''Gainers were almost across the board,'' said Daiwa Securities dealer Toshiyuki Nishiguchi.

''The rally was led by natural resource issues first and then some steels and construction brought prices higher.''

Oil issues led the rally with Teikoku Oil and Nippon Oil surging sharply.

Elsewhere on the trading floor, steel and construction issues also gained.

Elsewhere in Asia, stocks posted gains in brisk trading on the Hong Kong Stock Exchange amid reports that oil production will be stepped up to quell higher prices sparked by Iraq's invasion of Kuwait.

The blue-chip Hang Seng Index, which eased 9.29 points Tuesday, surged 46.88 points to 3,145.57.

Among the narrower indexes, financials added 14.07 points, oil sensitive utilities shot up 174.34 points, industrials inched up 10.56 and interest related properties rose 29.29 points.

The volume was described as brisk as an estimated 2.87 billion shares changed hands, down from the 3.28 billion shares Tuesday, the most active trading session of the year.

The market opened the day sharply higher, rising more than 43 points in the first few minutes of action.

Buying gave way to light profit-taking, trimming the early gains, analysts said. The morning session closed up 27.95 points.

''The Hang Seng Index opened higher, following yesterday's rebound,'' said Albert Leung, a broker with ChinTung Investments.

''There was a rumor during the morning that Saudi Arabia had been attacked by Iraq - this pushed prices down. Later, a number of Middle East countries announced they were producing more oil to meet the demand.''

Bargain hunters, particularly in the utilities, snapped up shares before mid-afternoon selling took hold, analysts said.

''The market is still volatile, but sentiment is better. Oil prices will stabilize and this news stabilized the Hong Kong market,'' Leung said.

Iraq's invasion of oil-rich Kuwait last Thursday caused international oil

prices to soar and threw stock markets around the globe into a tail spin.

In Singapore, stocks rebounded in fairly heavy trading on the Singapore Stock Exchange amid a round of healthy bargain hunting.

The closely-watched Straits Times Industrial Index, which plunged 54.54 points Tuesday, rebounded 15.24 points to 1,375.72.

The narrower All Singapore Index rose 3.51 points to 393.26.

An estimated 143.7 million shares changed hands compared with 139.7 million shares Tuesday.

Analysts said bargain hunters flooded the market picking up good buys throughout the day.

The market rebounded as crisis in Middle East become relatively calmer, observers noted.

Brokers said unless Iraq further aggravated the Middle East tension by invading Saudi Arabia, the market was expected to climb back.

On the trading floor, Keppel Corp. paced the advance followed by Singapore Airline foreign shares, Far East Shipping, Development Bank of Singapore foreign shares and Neptune Orient Lines.

Oriental Holdings led the declining issues followed by Singapore Land warrants, Overseas Union Enterprise, Singapore Airlines, Singapore Land common and Singapore Press foreign shares.

In Bangkok, stock prices closed higher in active trading on the Stock Exchange of Thailand as bargain hunters pushed prices up 3.8 percent after two days of sharp drops.

The closely-watched Stock Exchange Thailand Index surged 35.52 points to 957.87.

An estimated 6.07 billion shares changed hands with approximately 5.7 billion in trades from domestic investors.

Analysts said bargain hunters pushede prices higher across the board.

Market watchers noted that shortly before the market closed, some profit-takers and overseas selling pressure came into play.

The main influence in the market was the crisis in Middle East.

''Market movements will depend on the price of oil and the next development in the military situation - especially if Iraq invades Saudi Arabia,'' one local analyst said.

Analysts noted that local stocks were suffering even though Thailand had nothing to do with the crisis and the Thai economy was doing well.

In Seoul, stocks, reeling under the shock of the Middle East conflict, hit a two years low in on the South Korean Stock Exchange.

The closely-watched Composite Stock Price Index fell 9.85 points to 646.03 its lowest level since May 11, 1988 when the index stood at 636.68.

Declines hammered advances, 537 to 149 among the 793 issues traded.

Analysts said reports of escalating tension in the Middle East and possible U.S. military intervention were largely to blame.

In Australia, stock prices on the Sydney Sharemarket closed higher backgrounded by bargain hunting and strong demand for blue-chip issues.

The blue-chip All Ordinaries Index, which eased 0.6 points Tuesday, climbed 20.9 points to 1,568.4.

The All Industrials Index rose 26.7 points to 2,365.8 and the All Resources index gained 15.8 points to 951.0.

An estimated 86.7 million shares chnaged hands, compared with 96.2 million shares Tuesday.

Analysts said there was strong buying demand across the boards.

Brokers said Tokyo's rebound and strong demand for BHP Oil underwrote the bargain hunting.

BHP stormed 30 cents higher to $11.15, just 40 cents short of its all-time high.

Elsewhere in the oil patch, Santos Oil rose 4 cents to $4.94 while Woodside Oil slipped 1 cent to $3.12.

Base metal resource issues found strong support. WMC rose 12 cents to $5.38 and MIM Mining added 2 cents to $2.48.

In the industrial sector, Elders IXL rose 8 cents to $1.78 supported by speculation that Canadian brewer Molson intends to buy 30 percent of the company.

In Johannesburg, a firm but drifting gold price had little effect on stock prices, which were mixed on the Johannesburg Stock Exchange.

Gold was pegged at $383.40 to $383.90 per ounce.

The Kuwait effect on shares now seems to have tailed off, one dealer said.

The closely-watched All Gold Index stood at 1642.0, marginally down from Tuesday's close of 1644.0.

On the trading floor, heavyweight Vaal Reefs eased 50 cents to 307.50 and Harmony added 25 cents at 32.25.

Among marginals, Elsburg was unchanged at 4 and Zandpan added 5 cents at 4.10.

De Beers lost 25 cents to 88.50 and Anglos eased 25 cents at 117.

-30- 8034

#90220u0550 08/08/1990 ~United Press International

(AUG. 8) UPI - Andrew Young's bid to become Georgia's first black governor failed as the former U.N. ambassador lost a primary runoff to Lt. Gov. Zell Miller, who parlayed a state lottery into the Democratic nomination.

With 93 percent of Tuesday's vote counted, Miller, the nation's longest-serving lieutenant governor, had 65 percent of the vote to Young's 35 percent.

''Today's election is a victory for new ideas, new solutions and new approaches,'' Miller said. ''Most of all, today's election is a victory for the Georgia that can be. For too long, we've been told Georgia can't move ahead. Tonight, the people of Georgia said, 'Yes, we can.'''

Young, also a former Atlanta mayor and congressman, disavowed any suggestion that race played a role in his failure to become the first black governor in the Deep South and the second in the nation. Virginia Gov. Douglas Wilder became the first black governor last November.

''I have met with and been supported by some of the most wonderful people on this earth, and I've been all over this world,'' Young said to hundreds of supporters as they chanted, ''Andy, Andy.''

''Really and truly, everywhere we went and everywhere we worked, we achieved the kind of support we have from you tonight,'' Young said, adding, ''I don't really get disappointed unless I don't do my best. I did

my best.''

Miller now faces Republican state Rep. Johnny Isakson and Libertarian Carol Ann Rand in the November general election to determine who will succeed Democratic Gov. Joe Frank Harris. Harris is leaving office after the maximum two terms allowed by law.

Isakson, who would be the first GOP governor in Georgia in 122 years if he wins the race, was to meet with President Bush at the White House Wednesday to seek help in his well-financed campaign, and he was slated to launch a television commercial blitz.

Isakson said he wants voters to realize that a Republican governor can do what no Democrat can - ''take Georgia issues to Washington.''

Earlier in the day, Young attributed his failure in the polls to an opponent whose campaign was better financed and organized, rather than racial attitudes in the one-time Confederate state.

''I have not found this was a backward, racist state that was not ready to receive a black candidate,'' he said. ''Everywhere I have gone, I have been well-received.''

Young spent the latter part of the campaign trying to shore up support among black voters in urban areas, a group he neglected prior to the primary in search of white votes, and kept campaigning until the polls closed.

Miller, whose key issues have been promoting a state lottery to benefit educational improvements and the establishment of military-style boot camps for first-time drug offenders, took a casual approach on Election Day, opting to spend time with his grandchildren after voting in his mountain hometown, Young Harris.

Miller collected up to 20 percent of the black vote in the primary, striking a blow to Young's hopes of getting support of at least 95 percent of the group.

Young, a minister and former confidant of Martin Luther King Jr., ended the day Monday on the church circuit in the heart of his Atlanta stronghold, commemorating the 25th anniversary of the 1965 Voting Rights Act and reminding blacks of their struggle for the ballot.

''I don't believe anyone marched, and I don't believe anyone went to jail or died ... for a lottery,'' he said on a statewide tour.

Tuesday's runoff was necessary because neither candidate captured more than 50 percent of the vote in the July 17 voting.

''We did everything we could in the primary, and that wasn't enough,'' said Young, who finished more than 10 percentage points behind Miller in the primary.

While the Georgia showdown was the top race of the day, primaries also were held in three other states.

The top races included:

-Michigan: Rep. William Schuette, R-Mich., won the Republican Senate nomination despite a stronger than expected showing by conservative attorney Clark Durant. As expected, Senate Majority Leader John Engler swamped political outsider John Lauve in the race for the GOP gubernatorial nomination.

Gov. James Blanchard and Sen. Carl Levin, both running for third terms, were unopposed in the Democratic primary.

-Missouri: All nine of Missouri's congressmen - five Democrats and four Republicans - were nominated as expected. Five of the incumbents won nomination without effort because they did not have opponents in the primary.

-Kansas: Republican Gov. Mike Hayden battled off a challenge from real estate executive Nestor Wiegand to win nomination for a second term.

#90220u0554 08/08/1990 ~United Press International

SAN DIEGO (AUG. 8) UPI - The threat of an oil cutoff from the Persian Gulf is reviving the campaign for domestic offshore oil drilling, much to the dismay of environmentalists.

In congressional testimony Tuesday on the emerging oil crisis, American Petroleum Institute President Charles DiBona urged that ''more of the outer continental shelf should be made available (for drilling), especially areas which already have been leased.''

DiBona and other drilling advocates, including a handful of elected officials, have long argued that instability in the Middle East was a compelling reason to explore offshore drilling at home.

That argument held little weight during a decade of quiet and surplus. Republican state Assemblywoman Carol Bentley of El Cajon, Calif., who has long favored offshore development, said, ''My political consultants have always told me, 'You're not in tune with the voters on this issue. We show 75 percent are opposed to offshore drilling.'''

But the Iraqi invasion of Kuwait has resurrected public fear of long lines at gasoline stations, an image probably as disconcerting as oil rigs on the Pacific horizon.

''If people find themselves waiting in line again, they're going to turn to officeholders and ask, 'What have you been doing about this?' And we'll have to say, 'Well, we stopped offshore drilling,''' Bentley said.

Bob Gore, a spokesman for Gov. George Deukmejian, said the governor's consistent (and largely futile) support for offshore oil development now appears prescient.

''The events in the Middle East certainly illuminate the governor's point that, given responsible environmental controls and carefully selected sites, offshore oil production is a national responsibility,'' Gore said.

''California cannot continue to consume far more oil than it produces. It's just not economically possible,'' he said.

Environmentalists who have kept Deukmejian at bay vowed to relinquish no ground and said drilling proponents are behaving like political predators this week.

''The people from the oil industry are probably salivating at the prospect of a Middle East crisis allowing them to pursue drilling in sensitive areas,'' said Michael Paparian, the Sierra Club's California state director.

''The oil companies seem intent on exploiting this crisis to their advantage,'' said Assemblyman Tom Hayden, the Santa Monica Democrat and state environmental leader.

''First, they raise gas prices for motorists. Then they renew the call for offshore drilling. That's nonsense. We ought to be saving energy instead of allowing the oil industry to profit from its waste. How many Middle East crises do we have to have before we get serious about energy conservation?'' Hayden said.

Hayden and other drilling opponents say offshore drilling cannot produce substantial amounts of oil and will not produce oil any time soon. Industry sources say the supply is there and could be tapped fairly quickly.

''In California, at Point Arguello off Santa Barbara, Chevron and several other companies are ready to produce 80,000 barrels of oil a day. That's about one-seventh of the 600,000 barrels we've been getting from Iraq and Kuwait,'' said API Vice President William O'Keefe.

For the time being, President Bush's moratorium on oil development off most of California's coast will keep the rigs quiet. And drilling opponents in the state can take heart that the next governor, whether it be Republican Pete Wilson or Democrat Dianne Feinstein, has taken a firm stand against offshore exploration.

But some Californians fear that, as American troops move into Saudi Arabia the entire nation will take another hard look at oil production at home - and especially out West.

That's the view of Dan Lungren, Republican candidate for attorney general and one of the few statewide contenders favoring offshore exploration (''Our group could meet in a phone booth,'' he quipped).

''I've always said if we find ourselves in the midst of an oil crisis, the other 49 states are likely to turn to California and say, 'You've been obstinate about oil drilling. Now we're just going to go in there and drill where we please,''' he said.

''I don't like the idea of having any oil wells off any beach, but if I have to face a parent whose child is being sent off to fight in the Middle East, I want to be able to say with a clear conscience that I've done everything I can to solve the energy crisis,'' Lungren said.

#90220u0610 08/08/1990 ~United Press International

(AUG. 8) UPI - President Bush ordered U.S. troops to Saudi Arabia but Iraqi President Saddam Hussein rebuffed mounting international economic and military pressure to withdraw his forces from Kuwait, saying Iraq will fight for ''Arab honor.''

With Iraqi troops also poised near Kuwait's border with Saudi Arabia, the first of the U.S. troops reportedly arrived and a group of Americans held in Baghdad was released in Jordan.

The tension in the Middle East was compounded by a Washington Post report that Iraq was loading up chemical weapons.

State-run Baghdad Radio, in a broadcast Wednesday morning, called on all Arabs to tune in that evening for ''an important statement in a day of joy in the history of your struggle.''

Also Wednesday, state-run Cairo Radio reported there had been ''a complete shutdown in the flow of Iraqi oil through the Saudi and Turkish pipelines.'' Iraq had earlier reduced the flow of oil through Turkey, apparently because of reduced demand in the wake of international

sanctions. Turkey said Tuesday it would not allow Iraqi oil to be loaded onto tankers.

U.S. Embassy officials in Amman, Jordan, said an Iraqi Airways plane arrived in Amman Wednesday from Baghdad, carrying ''about two dozen Americans,'' 12 Britons and 100 Arabs. It was not immediately clear if the passengers had been among the foreigners held by Iraq in Baghdad.

The latest move to thwart Saddam came Tuesday in Washington when Bush, who planned to address the nation Wednesday morning, ordered U.S. warplanes and thousands of troops to bases in Saudi Arabia to help repulse a possible Iraqi attack. Saudi Arabia is the main supplier of oil to the United States.

U.S. defense sources said members of the 82nd Airborne Division at Fort Bragg, N.C., were preparing to leave for Saudi Arabia. The United States also was sending U.S.-based F-15 fighter jets and B-52 bombers from the Indian Ocean island of Diego Garcia.

The British Broadcasting Corp. reported Wednesday the first deployment of U.S. troops had arrived in the eastern province of Saudi Arabia. But in Washington, a Pentagon spokesman said, ''Since we never said troops are leaving, it would be hard to say that they have arrived.''

The White House and Pentagon officially declined comment other than to express continuing concern over the presence of Iraqi troops on the Kuwaiti border of a neutral oil extraction zone owned by Kuwait and Saudi Arabia. Saudi troops have moved to their side of the zone to counter a potential Iraqi attack.

Iraq invaded Kuwait, sent its leadership into exile and installed a provisional government last week after accusing its oil-rich neighbor of overproducing crude and driving down prices.

International observers have said Saddam seized Kuwait in hopes of infusing Iraq's troubled economy with Kuwaiti riches and in an effort to appease his military supporters.

U.S. defense sources said the U.S. plan calls for sending aircraft and several thousand U.S. troops to serve in a defensive, rather than offensive, capacity.

A group of U.S. F-111 bombers arrived Tuesday in Turkey from bases in England. Officials said the planes were on a routine training mission to the NATO ally bordering Iraq.

Officials in Washington said that in 10 days the United States would have 49 ships in the region, including three aircraft carriers, more than 200

aircraft and about 2,100 Marines.

Also, Soviet and French ships were steaming toward the region, displaying an unprecedented united front.

Egypt is believed to be sending troops, the U.S. defense sources said. Egypt is allied to Iraq, but has denounced the invasion. Its role and military muscle are now regarded as crucial should Saudi Arabia's 95,000-strong military engage the superior Iraqis.

Diplomatic sources said the United States offered logistical and air support to Egypt as part of a wider plan to rally the Arab world to confront Iraq. They said if Egypt became involved, it would require a massive airlift to take Egyptian troops to the conflict.

U.S. sources said Defense Secretary Dick Cheney raised the proposal during his meeting Tuesday with Egyptian President Hosni Mubarak, but Cairo rejected the idea.

The Egyptian Defense Ministry said it does not intend to send any forces to join U.S. troops in Saudi Arabia.

Egypt's semi-official news agency MENA reported Wednesday that a U.S. battle group including the USS Eisenhower, a nuclear-powered aircraft carrier, had passed through the Suez Canel from the Mediterranean and was in the Red Sea.

In further diplomatic efforts by the United States to gather worldwide support, Defense Secretary Dick Cheney went to Morocco Tuesday for consultations. A day earlier, Cheney won Saudi King Fahd's approval to allow U.S. forces to use the bases, clearing the way for the U.S. mobilization.

Cheney arrived back in the United States early Wednesday, hours before President Bush was scheduled to address the nation from the White House.

In a statement Tuesday in Saddam's name read in Baghdad and translated by Cable News Network in Amman, Jordan, the Iraqi president defended his conquest of Kuwait, exalting his country as ''a most honorable country which fights for the Arab muscle and Arab honor.''

The Washington Post, quoting unnamed U.S. intelligence officials, said Wednesday Iraqi military forces apparently loaded poison gas weaponry aboard combat aircraft. The officials said the loading of chemical weapons was ''most plausible explanation for what we have seen'' of Iraq's operations Tuesday.

The Post report did not specify where the loading took place or what

possible role it could play in the current crisis. Iraq is believed to have several tons of the deadly chemicals and used the gases in its eight-year war with Iran and against its own Kurdish ethnic minority.

The Pentagon had no immediate comment on the Post report.

Baghdad, in an apparent gesture to ease fears that Iraq had taken Western hostages, said it was considering freeing about 400 foreigners seized in Kuwait.

The State Department said 39 Americans, including 11 oil workers in Iraqi custody since the invasion Thursday, and a number of U.S. citizens taken from three hotels in Kuwait city were being held in a Baghdad hotel and told they could not leave.

There have been no indications the foreigners have been mistreated.

In keeping with the overwhelming U.N. Security Council decision Monday to impose tough sanctions against Iraq - five days after the world body condemned the invasion and demanded Iraq pull its forces from Kuwait - Turkey said it closed two Iraqi pipelines running through its territory.

Turkish President Turgut Ozal said in an interview with CBS News, ''The Turkish ... pipeline is not giving any drop of oil to the tankers.''

But the nation's oil minister later clarified that Turkey would not close the pipeline, but would instead store Iraqi oil and block it from leaving the country.

The pipelines, running about 700 miles from the Kirkuk oilfields in northern Iraq to a Mediterranean terminal at Yumurtalik, transport about 1.5 million barrels of Iraqi oil daily.

The United States hopes an oil embargo on Iraq engineered by closing the Turkish and Saudi pipelines will compel Saddam to leave Kuwait.

But the official Iraqi News Agency quoted a government spokesman as saying ''We do not believe that Saudi Arabia would cut the flow of oil through its territory because such a measure would seriously harm Iraq.''

Iraq and Saudi Arabia have a non-aggression pact, and most analysts believe closing the pipeline in Saudi Arabia would be construed as a declaration of war.

In Baghdad, Saddam met Lt. Col. Alaa Hussein, the prime minister and military commander of the ''provisional free Kuwait government,'' which was installed by Iraq after it overthrew the Kuwaiti leadership. ''Kuwait and Iraq share the same destiny,'' Alaa was quoted by the Iraqi News

Agency as saying.

The news agency said Saddam assured Alaa, ''Iraq will confront any imperialist, Zionist attack against the Kuwaiti uprising,'' referring to a rebellion Iraq claims it had to intervene to support.

Iraqi media also reported that a flood of volunteers across Iraq had led to the creation of 25 new military divisions - about 250,000 men - to prop up the provisional government believed made up of Iraqi military officers.

Before the invasion, Iraq was estimated to have a 1 million-strong battle-tested military and about 700,000 reserves.

(AUG. 8) UPI - In Iraq, state-run Baghdad Radio is urging all Arabs to tune in later for- quoting- ''an important statement in a day of joy in the history of'' their struggle, possibly a union of Iraq and Kuwait. In Washington, President Bush addresses the nation later this morning on the crisis in the Persian Gulf. Bush yesterday ordered U-S warplanes and troops to Saudi Arabia to help defend against a possible attack by Iraq.

Good news on the Tokyo Stock Exchange. Share prices rebounded today, with investors snapping up bargain-priced issues after five straight losing sessions triggered by Iraq's invasion of Kuwait. Tokyo's key Nikkei average rose more than 856 points, after falling more than 946 yesterday. In New York yesterday, prices dipped because of nervousness about the Persian Gulf crisis.

A Liberian rebel leader wants a peace-keeping force sent in to end Liberia's civil war, and it looks like he might get his wish. Seven African countries have agreed to send a peace-keeping force to the West African nation. Rebel leader Prince Johnson is holding one American and at least seven other foreigners hostage. He says he will keep holding the captives until the peace-keeping forces arrive.

Diplomats in Thailand say security forces in Burma opened fire today on protesting Buddhist monks and students in the central city of Mandalay. Reports from Mandalay indicate two monks and two students were killed and two other people wounded. The incident comes amid tension between the military and the winning party in recent elections. Mandalay is 300 miles north of Rangoon.

#90220u0646 08/08/1990 ~United Press International

(AUG. 8) UPI - The flap between Health Secretary Louis Sullivan and

California Congressman Fortney Stark apparently is over. Sullivan yesterday accepted a written apology from Stark. The California Democrat last week called Sullivan a ''disgrace to his profession and his race'' because he opposes national health insurance and abortion funds for the poor. Stark calls his own comments ''inaccurate'' and ''inept.''

The New York Times says a mirror flaw in a new one-BILLION-dollar weather satellite system could delay its launch. Experts found that the flat mirrors in the Geostationary Operational Environmental Satellites would warp when exposed to the Sun's heat. That would keep the weather telescopes from properly relaying weather information back to Earth.

Mental instabililty is a growing problem among Chinese university students and the government is trying to do something about it. The state-run China Daily says social scientists are prescribing psychological counseling for the students. They are encouraged to seek psychotherapy, a new discipline in China, in order to overcome depression, feelings of frustration, and other problems.

Former Marine Corps Commandant Lemuel Shepherd died this week in San Diego. He was 94. Shepherd fought in three wars during his 42-year military career, and was the only Marine four-star general. He attended the Virginia Military Institute and was commissioned as a second lieutenant in 1917. He fought in World War One, World War Two and the Korean War.

#90220u0723 08/08/1990 ~United Press International
(AUG. 8) UPI - President Bush is scheduled to address the nation this morning, to discuss the Persian Gulf crisis. Defense Secretary Cheney returned from Saudi Arabia and Egypt this morning and went straight to the White House.

Bush has ordered U-S warplanes and troops to Saudi Arabia out of concern over a possible attack by Iraqi forces. U-S defense officials say paratroopers of the 82nd Airborne Division at Fort Bragg, North Carolina, are leaving for Saudi Arabia. Members of the 82nd Airborne jumped into Panama in December.

President Saddam Hussein is dismissing international pressure to withdraw from Kuwait, saying he'll fight for ''Arab honor.'' State-run Baghdad Radio this morning urged Arabs to tune in tonight for an ''important

statement.'' It's NOT clear what the statement may be.

Official sources in Pakistan say the provisional government is considering setting up special courts to try leaders of Benazir Bhutto's ousted administration and her family. Bhutto was dismissed as prime minister by Pakistan's president on Monday.

Former Atlanta Mayor Andrew Young was defeated yesterday in his bid to forGeorgia's Democratic gubernatorial nomination. Lieutenant Governor Zell Miller will face Republican state Representative Johnny Isakson in November.

More than 170 wildfires are burning across valuable forest land in California, Oregon and Utah. Hot weather, strong winds and lightning sparks are to blame for the blazes. More than 42-thousand acres have been consumed.

#90220u0742 08/08/1990 ~United Press International
NEW YORK (AUG. 8) UPI - The New York Stock Exchange reported Wednesday these odd lot transactions by principal dealers through NYSE facilities for August 7: Purchases of 667,958 shares and sales of 716,285 shares including 53,476 shares sold short.

-30- 401
#90220u0811 08/08/1990 ~United Press International
(AUG. 8) UPI - The United States is toughening its stance toward Iraq. U-S troops and warplanes reportedly are en route to Saudi Arabia to help deter a possible attack by Iraq. Reports out of Egypt say a U-S battle group including the nuclear-powered aircraft carrier U-S-S Eisenhower passed through the Suez Canal from the Mediterranean and is in the Red Sea.

President Bush is to address the nation this morning on the situation. The White House and Pentagon officially declined comment except to voice concern about Iraqi troops along Kuwait's border with Saudi Arabia. Saudi troops moved to their side of the border to counter any potential attack.

The increasingly volatile situation in the Middle East is affecting oil prices. Crude oil prices ended higher in New York yesterday after sharp fluctuations. Volume was a heavy 179-thousand estimated contracts. Traders say news that U-S troops were being sent to Saudi Arabia came too late to affect the market yesterday.

Pakistan's president removed Benazir Bhutto as prime minister on Monday and dismissed her 20-month-old administration. And now the provisional government reportedly is considering setting up special courts to try officials of Bhutto's administration and members of her family. One source says officials were told ''NOT to spare anyone.''

Flooding is reported in Massachusetts and New Hampshire as heavy showers blew into New England today. Slow-moving rainstorms drifted across Connecticut, Rhode Island and Massachusetts, causing heavy showers in some areas. Forecasters say one inch of rain fell in half an hour in Taunton in southeast Massachusetts.

-30- 1809
#90220u0814 08/08/1990 ~United Press International
WASHINGTON (AUG. 8) UPI - Text of President Bush's Wednesday morning address to the nation on his decision to send troops to Saudi Arabia:

In the life of a nation, we're called upon to define who we are and what

we believe. Sometimes these choices are not easy. Today, as president, I ask for your support in the decision I have made to stand up for what is right and condemn what is wrong, all in the cause of peace.

At my direction, elements of the 82nd Airborne Division, as well as key units of the United States Air Force are arriving today to take up defensive positions in Saudi Arabia. I took this action to assist the Saudi Arabian government in the defense of its homeland. No one commits America's armed forces to a dangerous mission lightly. But after, perhaps unparalleled international consultation, and exhausting every alternative, it became necessary to take this action. Let me tell you why.

Less than a week ago in the early morning hours of Aug. 2, Iraqi armed forces, without provocation or warning, invaded a peaceful Kuwait. Facing negligible resistance from its much smaller neighbor, Iraq's tanks stormed in blitzkrieg fashion in a few short hours. With more than 100,000 troops along with tanks, artillery and surface-to-surface missiles, Iraq now occupies Kuwait. This aggression came just hours after Saddam Hussein specifically assured numerouus countries in the area that there would be no invaison. There is no justification whatsoever for this outrageous and brutal act of aggression.

A puppet regime, imposed from the outside, is unacceptable. The acquisition of territory by force is unacceptable. No one, friend or foe, should doubt our desire for peace and no one should underestimate our determination to confront aggression.

Four simple principles guide our policy.

First, we seek the immediate, unconditional and complete withdrawal of all Iraqi forces form Kuwait.

Second, Kuwait's legitimate government must be restored to replace the puppet regime.

And third, my administration, as has been the case with every president, from President Roosevelt to President Reagan, is commited to the security and stability of the Persian Gulf.

And fourth, I am determined to protect the lives of American citizens abroad.

Immediately after the Iraqi invasion, I ordered an embargo of all trade with Iraq. And together with many other nations, announced sanctions that both froze all Iraqi assets in this country and protected Kuwait's assets.

The stakes are high. Iraq is already a rich and powerful country that possesses the world's second largest reserves of oil and over a million

men under arms. The fourth largest military in the world. Our country now imports nearly have the oil it consumes and could face a major threat to its economic independence. Much of the world is even more dependent on imported oil and is even more vulnerable to Iraqi threats.

We succeeded in the struggle for freedom in Europe because we and our allies remained stalwart. Keeping the peace in the Middle East will require no less. We are beginning a new era. This new era can be full of promise, an age of freedom, a time of peace for all peoples. But if history teaches us anything, it is that we must resist aggression or it will destroy our freedoms. Appeasement does not work.

As was the case in the 1930s, we see in Saddam Hussein an aggressive dictator threatening his neighbors. Only 14 days ago, Saddam Hussein promised his friends he would not invade Kuwait. And four days ago he promised the world he would withdraw. And twice we have seen what his promises mean: his promises mean nothing.

In the last few days, I've spoken with political leaders from the Middle East, Europe, Asia, the Americas and I met with Prime Minister Thatcher, Prime Minister Mulroney and NATO general secretary Woerner. And all agree that Iraq cannot be allowed to benefit from its invasion of Kuwait. We agree that this is not an American problem, or a European problem or a Middle East problem. It is the world's problem. And that's why, soon after the Iraqi invasion, the United Nations Security Council, without dissent, condemned Iraq, calling for the immediate and unconditional withdrawal of all of its troops from Kuwait.

-30- 4519

#90220u0836 08/08/1990 ~United Press International

CHICAGO (AUG. 8) UPI - The Chicago Board of Trade has confirmed its former chairman will receive $120,000 in severance pay. A spokesman said Tuesday that Karsten "Cash" Mahlmann, who resigned last week, will be paid the remainder of his $240,000 salary "in recognition of his efforts on behalf of the Board of Trade."

Mahlmann's one-year term would have expired Jan. 22, 1991. He resigned as chairman of the Stotler Group Aug. 1 and later that day also resigned as chairman of the CBOT.

His actions followed allegations that a Stotler subsidiary illegally defrauded customers by using investors' money to make at least $5.5 million in loans to the parent company. A "special master" was appointed to oversee the operation of Stotler's three commodity pools and Stotler was forced into involuntary bankruptcy.

U.S. District Judge Milton Shadur was told by Stotler attorneys at a

hearing Tuesday that $2.8 million wired out of Stotler late Friday was being returned to the special master, Kenneth Rosenzweig.

That transfer apparently violated an order by Shadur freezing all assets of Stotler, although Stotler attorneys said the firm had the authority to make the transfer.

A class action lawsuit was filed Monday charging the Stotler Group with misleading investors about the company's financial condition and internal controls.

ATLANTA (AUG. 8) UPI - An AIDS patient from New York died shortly after undergoing an experimental blood-heating treatment by an Atlanta doctor working in Mexico, it was reported Wednesday.

The patient, whose death was announced Tuesday by his doctor in New York, was the third person to undergo the controversial procedure. He died a week ago, 18 hours after the treatment, the Atlanta Constitution reported.

Dr. Kenneth Alonso, one of two Atlanta physicians using the blood-heating treatment, called hyperthermia, said he agreed to treat the New York man at his doctor's request. The patient reportedly was near death before undergoing the procedure.

Alonso told Cable News Network the death of the 48-year-old patient in Mexico was no surprise. Guzman said the patient, who was not identified, was suffering from ''horrendous tumors in his throat, aorta and lungs.''

''What concerns me is that people are expecting miracles,'' he said. ''We're not offering miracles.''

One man who underwent the procedure at Atlanta Hospital in May claims the treatment eliminated the AIDS virus from his body. The second patient has shown only slight progress, doctors said.

Alonso began working in Mexico last month after Georgia health officials shut down Atlanta Hospital for violations unrelated to the hyperthermia experiment. Alonso has said he hopes to use the treatment on up to 10 patients in Mexico.

But Dr. Joseph Guzman, an associate of Alonso, told The Atlanta Constitution that Mexican officials are trying to stop further hyperthermia treatments in that country.

Federico Chavez Peon, director of the Mexican government's National Council for AIDS Prevention and Control, opposed Alonso's efforts to move his experiment to Mexico, calling for a ''more profound investigation of this procedure.''

Guzman said the patient's father paid $50,000 for the procedure.

Dr. William Logan, an Atlanta heart specialist who first advocated use of hyperthermia to treat AIDS-related cancers, is negotiating with hospitals in Illinois and Georgia to perform hyperthermia experiments.

But officials at the National Institute of Allergy and Infectious Diseases are reviewing the records of the first two cases to determine whether the procedure lives up to claims made by the doctors and by AIDS patient Carl Crawford, who claims the most benefit.

The second patient, Tony Mascio of Chicago, has shown minimal improvement.

#90220u0880 08/08/1990 ~United Press International
WASHINGTON (AUG. 8) UPI - President Bush, warning the task could be long and costly, appealed to the American people Wednesday to ''stand up for what is right and condemn what is wrong'' and support his deployment of U.S. troops in Saudi Arabia to deter a possible attack by Iraq.

Bush, in a televised Oval Office address, stressed that Iraqi leader Saddam Hussein's ''blitzkrieg-fashion'' invasion of neighboring Kuwait could not be allowed to stand and he argued that the lessons learned in World War II proved such an ''outrageous and brutal act of aggression'' must not go unanswered.

With a formidable buildup of air, ground and naval forces under way, Bush said the U.S. military role in Saudi Arabia would be ''wholly defensive'' in guarding against aggression by an ''enormous war machine'' of Iraqi forces poised along the Kuwaiti border.

The president said Iraq, which has the world's fourth-largest military, had moved ''more than 100,000 troops, along with tanks, artillery and surface-to-surface missiles'' into Kuwait. Before Bush's speech, it had not been known that Iraq had transported the missiles into Kuwait.

Administration officials have not given details of which U.S. forces are being moved into Saudi Arabia, although sources said thousands of paratroopers and at least 48 F-15 fighters were arriving Wednesday. A light infantry division was expected to be sent later. The United States already has 34 warships in the area, with more en route.

Warning that it would be ''unwise and unrealistic'' to assume that Saddam's adventurism would end with the takeover of Kuwait, Bush said the deployment of U.S. force became necessary only after ''exhausting every alternative.''

''I want to be clear about what we are doing and why,'' Bush said. ''America does not seek conflict, nor do we seek to chart the destiny of other nations. But America will stand by her friends.''

''In a life of a nation, we are called upon to define who we are and what we believe,'' he said. ''Sometimes these choices are not easy. Today, as president, I ask for your support in the decision I've made to stand up for what is right and condemn what is wrong, all in the name of peace.''

''The stakes are high. Iraq is already a rich and powerful country that possesses the world's second largest reserves of oil and over a million men under arms,'' Bush said. ''It's the fourth largest military in the world.''

The president added, ''If history teaches us anything, it is that we must resist aggression or it will destroy our freedoms. Appeasement does not work. As was the case in the 1930s, we see in Saddam Hussein an aggressive dictator threatening his neighbors.''

But while appealing to the public, the president also warned Americans that the job may not be easy and he asked them not to waver in their support.

''Standing up for our principles is an American tradition. As it has so many times before, it may take time and tremendous effort, but most of all it will take unity of purpose,'' Bush said. ''America has never wavered when her purpose is driven by principle. On this August day, at home and abroad, I know she will do no less.''

Many military analysts believe the U.S. deployment of troops in Saudi Arabia may help deter Iraq from invading that oil-rich nation, but most say the forces being sent would be inadequate to drive Hussein from Kuwait.

U.S. officials have emphasized that the combat troops are being sent to protect air bases that would launch attacks against Iraqi armored and air forces in the event of a high-risk push into Saudi Arabia.

Bush said the U.S. forces will ''work together with those of Saudi Arabia and other nations'' in trying to deter and intimidate Saddam, whose lightning strike into Kuwait almost a week ago has led to international condemnation.

Still unclear, however, was whether other Arab nations, such as Egypt and Morocco, would participate in what U.S. officials hoped to see emerge as a multinational force capable of standing up to Saddam.

''No one, friend or foe should doubt our desire for peace and no one should underestimate our determination to confront aggression,'' Bush said.

In the meantime, Bush, who has worked tirelessly in recent days to line up international support for the U.S. position, said the United States would be ''working around the clock to deter Iraqi aggression.''

But Bush made no mention of a new, ominous development in the confrontation: A Washington Post report that U.S. intelligence had detected possible preparations by Iraq to equip its warplanes with chemical weapons.

On Capitol Hill, House Armed Services Committee Chairman Les Aspin, D-Wis. acknowledged reports that the Iraqis had ''loaded and then downloaded'' chemical weapons on aircraft ''rather publicly'' in ''a rather deliberate move'' to send a warning to other countries.

(AUG. 8) UPI - U-S officials in Jordan say an Iraqi Airways plane landed in Amman today from Baghdad. They say the plane was carrying ''about two dozen Americans,'' 12 Britons and 100 Arabs. It's NOT clear if the passengers were among the foreigners held by Iraq in Baghdad. Also today, state-run Cairo Radio in Egypt reports there has been ''a complete shutdown in the flow of Iraqi oil through the Saudi and Turkish pipelines.''

Iraqi President Saddam Hussein appears to be standing firm against mounting international pressure to withdraw from Kuwait, saying Iraq will fight for ''Arab honor.'' State-run Baghdad radio has announced there will be an ''important message'' broadcast today. It is NOT clear what the statement may be.

NASA engineers at Cape Canaveral will haul the leaking shuttle Atlantis off the launch pad today to make way for the shuttle Columbia, which is supposed to lift off around September 1st. Columbia is tentatively scheduled to begin the three-and-a-half-mile trip to the same launch pad tomorrow. The spaceplane has been fitted with a new fuel line after a defective one forced the grounding of a May flight.

#90220u0904 08/08/1990 ~United Press International
INDIANAPOLIS (AUG. 8) UPI - T. Boone Pickens says the rise in gasoline prices at Indiana's service stations in recent weeks is due not to the Iraqi invasion of Kuwait but to "greed ... by some oil companies."

Pickens, an iconoclastic Texas oilman also known as a corporate raider, made the comments Tuesday in Indianapolis before a campaign fund-raiser for Rep. Dan Burton, R-Ind. "I think what you're seeing is greed has set in by some oil companies," Pickens said.

He said gasoline now at Indiana service stations was refined long before Iraq's invasion. But prices since then have increased an average of ten cents per gallon, according to the AAA Hoosier Motor Club. "So I think they've been a little quick to draw," Pickens said. "They are taking advantage of the situation."

Americans should, however, expect higher gasoline and oil prices in the coming months, he said. "The Iraqis are heavy in the game and they're going to push the price up," he said. "I think this time next year you could very well be at $25 or $30 (for a barrel of) oil." That's likely even if Iraq pulls out of Kuwait, he said.

"There won't be anybody cheating at OPEC," Pickens said. "They understand the (production) quota now." Pickens said there is a good side to the high prices in that people will be more careful about conserving energy.

#90220u0911 08/08/1990 ~United Press International

(AUG. 8) UPI - Andrew Young lost his bid yesterday to become Georgia's first black governor. The former Atlanta mayor faced Lieutenant Governor Zell Miller in a Democratic gubernatorial primary election run-off and was defeated by a wide margin. With 93 percent of the vote counted, Miller had 65 percent of the vote compared to Young's 35 percent. Young denies race played a role in his defeat.

The jury in the drug and perjury trial of Washington, D-C, Mayor Marion Barry has reached a verdict on one of 14 federal charges facing the mayor. But the panel yesterday chose NOT to reveal its decision. Judge Thomas Penfield Jackson says the jury can return verdicts as they are decided if they choose. Today will be the sixth day of deliberations.

New York police say a 16-year-old boy sprayed bullets into a crowd of young people at an East Side housing project last night, striking three youths. The shooting occurred just hours after members of various community associations gathered in the crime-ridden neighborhood to hold a cook-out and rally against violence. Hospital officials say the victims are in stable condition.

A scientist activist has sent jam made from radioactive mulberries to Washington Governor Booth Gardner and Energy Secretary James Watkins. Norm Buske says he sent the jam to alert officials to the effects of mismanagement of nuclear waste at the Hanford Nuclear Reservation. Buske notified officials he was sending the jam and says the jam is NOT harmful.

CAIRO, EGYPT (AUG. 8) UPI - President Hosni Mubarak called Wednesday for an emergency Arab summit within 24 hours and opened the door to a possible joint Arab peace force to help resolve the Iraq-Kuwait conflict.

The Egyptian President said he feared Iraq could experience a ''severe blow from any direction'' and predicted ''an aggression which could be terrifying and destructive'' if negotiations failed to begin.

Mubarak urged Iraqi President Saddam Hussein to withdraw his forces from the tiny Persian Gulf state and restore legitimacy to the deposed regime of Sheikh Jaber al Ahmad al Sabah, the emir of Kuwait. Mubarak said the present danger in the Middle East had ''no precedent.''

The Egyptian leader, in an address broadcast live on state-run Egyptian television, also criticized Arab nations for their slow response to the Iraqi invasion, indicating the United States, Britain and France had been forced to fill the gap by the Arab world's inaction.

At the moment, Mubarak said, no Egyptian forces were involved in the conflict. U.S. forces arrived in Saudia Arabia Wednesday and U.S. ships were steaming toward the Gulf.

''I appeal from this forum (to) President Saddam Hussein and the Iraqi leadership to respond to the Arab umbrella and withdraw their forces from Kuwait and restore legitimacy to Kuwait ... There are no objections that a joint Arab force will be stationed between the two sides,'' Mubarak said in calling for negotiations to to resolve the conflict.

''I'm sure that this can be effective,'' he said.

But Mubarak also cast a shadow on the reliability of Saddam's words, outlining in detail his discussions with the Iraqi president before the invasion, during which he said he was assured no attack would occur and that the Iraqi forces were only on maneuvers.

''My thought was, as a matter of fact, paralyzed,'' Mubarak said in describing his reaction to first hearing about the Iraqi invasion. ''As a military man I can easily assess the consequences of such a situation ... I couldn't believe what was happening ... Iraq and Kuwait fighting each other - two Arab countries!''

In a 40-minute speech to reporters at the Presidential Palace, Mubarak indicated the Arab nations lacked confidence in each other.

''When you said you wouldn't launch an aggression and you launched an aggression. You say you won't launch an aggression against Saudi Arabia. I don't believe Saudi Arabia will believe it,'' Mubarak said during his speech.

Mubarak's call for an Arab summit within 24 hours, possibly in Egypt, was his latest move in trying to resolve the Iraq-Kuwait conflict. Iraq invaded Kuwait Aug. 2 after talks on oil and border disputes broke down between the two sides.

In reaction to apparent criticism for allowing U.S. ships to traverse the Suez Canal, Mubarak said he could not prevent passage to any country's naval fleet unless Egypt was at war with that country.

#90220u0963 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - President Bush likened Iraq's Saddam Hussein to Germany's Adolf Hitler Wednesday in explaining why he ordered U.S. forces into the Persian Gulf.

''If history teaches us anything, it is that we must resist aggression or it will destroy our freedom,'' a grim-faced Bush said in a nationally televised address from the Oval Office.

''As was the case in the 1930s,'' when Hitler's forces marched through Europe, ''we see in Saddam Hussein an aggressive dictator threatening his neighbors,'' Bush said.

''Only 14 days ago, Saddam Hussein promised his friends he would not invade Kuwait,'' Bush said. ''Four days ago, he promised the world he would withdraw. And twice we have seen what his promises mean. His promises mean nothing.''

The president said he sent U.S. troops into Saudi Arabia to counter a possible attack by Iraqi forces now stationed in Kuwait. ''America will stand by her friends,'' he said.

Bush, who served as a Navy pilot during World War II, said, ''We succeeded in the struggle for freedom in Europe because we and our allies remained stalwart. Keeping the peace in the Middle East will require no less.''

#90220u0972 08/08/1990 ~United Press International

MONROVIA, LIBERIA (AUG. 8) UPI - Rebel leader Prince Johnson has freed Western hostages held by his troops, including an American and at least seven other foreigners, the British Embassy said Wednesday.

''They were released earlier today (Wednesday),'' a British Foreign Office spokesman said the embassy informed London. He said four Britons were among those who were freed in Monrovia, ''but they are not in our hands.''

Details were sketchy because the embassy had not yet talked with the former hostages, the spokesman said.

Earlier reports said Prince Johnson, who is leading an insurgency against President Samuel Doe, held three Britons, two West Germans, a Dutchman, an Argentinian and a U.S. mining contractor identified as Chris Mendes, 27, of California.

The discrepancy in the number of British hostages could not be immediately reconciled.

Seven African countries agreed Tuesday to send a peace-keeping force to Liberia after Johnson threatened to attack the U.S. Embassy in Monrovia in order to provoke international intervention in his country's civil war.

Johnson said he would attack Marines protecting the U.S. Embassy unless a U.S. or West African peace-keeping force was sent to end the fighting. Johnson also said he would hold the foreigners until the peace-keeping forces arrived.

The hostages were abducted from a Monrovia hotel Monday, the day after U.S. Marines evacuated 62 U.S. government employees, relatives and civilians from the war-torn country.

Diplomatic sources said representatives of the seven African countries, meeting in Banjul, Gambia, wanted to hold talks on Liberia that would include all political parties and ethnic groups in order to find a solution to the conflict.

The other rebel leader, Charles Taylor, has been fighting for more than six months to overthrow Doe, who took power in a coup a decade ago. When the rebels reached the capital of Monrovia last month, a splinter group led by Johnson broke from Taylor. Doe has remained in his presidential palace.

The United States evacuated U.S. Embassy personnel Sunday when Johnson threatened to kill foreigners in a bid to force international intervention in the dispute.

State Department spokeswoman Margaret Tutwiler said in Washington the Marines would not intervene in the war.

''The U.S. Marines are in Liberia to defend the embassy, with force if necessary,'' she said. ''They are not there to intervene in the fighting.''

The State Department said about 41 embassy personnel, including the U.S. ambassador, would remain in Monrovia with about 300 other Americans.

African diplomats said they did not know how many soldiers would be included in the peace-keeping force or when it would be sent to Liberia.

Gambian President Dawouda Jawara, the host of the talks, said it was no longer possible to allow the situation in Liberia to deteriorate given the high death toll in recent weeks.

The heads of state from the seven countries - Ghana, Gambia, Mali, Nigeria Togo, Sierra Leone, and Guinea - said it would like to organize a provisional Liberian government that would not be dominated by any one of the four main tribes in Liberia, which was founded in 1922 by former American slaves.

If it becomes reality, the peace-keeping force will mark the third time that an all-African army has intervened in a local conflict. Similar peace-keeping operations have been previously conducted in Chad and Zaire.

LONDON (AUG. 8) UPI - Libyan leader Moammar Gadhafi contacted Arab leaders to discuss the ''danger'' posed by U.S. troops being deployed in Arab lands, the Libyan news agency said Wednesday.

President Bush ordered U.S. warplanes and troops to Saudi Arabia to guard against a possible attack by Iraq, which last week invaded and took control of Kuwait. The first deployment reportedly arrived in the Saudis' eastern province Wednesday.

Gadhafi telephoned seven Arab leaders to talk about the ''danger posed to Arab freedom and dignity'' by the deployment of U.S. forces on Arab land, said a report by the Libyan news agency JANA monitored by the British Broadcasting Corp.

The contacts, which took place late Tuesday and early Wednesday, covered ''the crisis in the Arab Gulf, the start of the landing of American forces on Arab territories, and the danger this poses for Arab freedom and dignity,'' JANA said.

Gadhafi talked to Algerian President Bendjedid Chadli, Yemen President Ali Abdullah Saleh, Tunisian President Zine el Abidine Ben Ali, King Hassan of Morocco, King Hussein of Jordan, Egyptian President Hosni Mubarak and Palestine Liberation Organization leader Yasser Arafat, the agency said.

#90220u0983 08/08/1990 ~United Press International

CHICAGO (AUG. 8) UPI - The American Bar Association House of Delegates Wednesday narrowly voted to rescind their pro-choice abortion stance and adopt a neutral position on the issue.

Following nearly two hours of debate, the delegates voted 200-188 to remain neutral on abortion, affirming an 885-837 vote taken Monday by the ABA General Assembly.

The neutrality position now becomes ABA policy.

The vote followed hints from the administration that the ABA's influence in Washington would dwindle unless it reversed its pro-choice stance. Attorney General Dick Thornburgh Monday told the lawyers' group the administration might pay less attention to ABA judge ratings if the pro-choice stance was not rescinded.

''Choosing sides is unnecessary and harmful to the association as a whole '' said Charles Weiss of St. Louis at the opening of Wednesday's debate.

''While we in the past have taken stands on controversial issues none have struck such a deep cord as (the abortion stand).''

Weiss said rescinding the policy ''is the right thing to do. It is in the best interest of the association as whole. It will allow many of our colleagues to remain a part of us.''

Shortly after the ABA adopted its pro-choice stance in February, hundreds of its 360,000 members dropped out of the group. The ABA Board of Governors previously recommended scrapping the pro-choice position.

Abortion rights activists have spent the week lobbying to defeat the neutrality resolution.

Gloria Allred, an attorney representing Norma McCorvey, the Jane Roe of the landmark U.S. Supreme Court case that granted women the right to an abortion, said those supporting neutrality are just trying to ''neutralize the power and the influence of the ABA.''

''I don't think the ABA should be neutral on an issue of such import, such significance,'' she said earlier this week. ''And, really, to be neutral, I think, is to buy into the anti-choice position, and that's why we're opposed to this so-called position of neutrality.''

#90220u0984 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - President Bush called on oil companies Wednesday to ''show restraint'' and not to exploit the Persian Gulf crisis with unnecessary price hikes, and asked Americans ''to do their part'' with conservation.

In a nationwide address, Bush also said he will call on oil-producing nations to increase production ''in order to minimize any impact that oil flow reductions'' in the Middle East will have on the world economy.

The United States imports nearly half of its oil, much of it from the Persian Gulf, where Iraqi forces have occupied Kuwait and now pose a threat to Saudi Arabia.

Since Iraq's invasion of Kuwait last Thursday, gasoline prices in the United States have increased an average of 12.6 cents per gallon, triggering charges of price gouging by consumer groups and lawmakers.

Bush, concerned about the impact of the energy supply and prices on the economy, also said, ''I will explore whether we and our allies should draw down on our strategic petroleum reserves,'' which now holds about 600 million barrels.

''Conservation measures can also help,'' Bush said in a televised speech

from the Oval Office, during which he formally announced the deployment of U.S. troops to Saudi Arabia.

''Americans everywhere must do their part,'' the president said. ''I'm asking the oil companies to do their fair share. They should show restraint and not abuse today's uncertainties to raise prices.''

Oil industry officials deny the American consumer is being cheated. They say that fuel price increases are legitimate and directly linked to higher costs caused by Middle East turmoil.

But lawmakers vowed Tuesday to seek anti-price gouging legislation against oil companies, saying the government is powerless to stop ''virtual thievery'' by the industry in raising the cost of fuel.

''The American public is angry,'' Sen. Richard Bryan, D-Nev., told the oil executives at a Senate Commerce Committee hearing. ''They are mad as ell.''

At congressional hearings, some legislators and economists urged the Bush administration to sell oil from the Strategic Petroleum Reserve as a way to reduce market concerns about future supply shortages and, thus, slow rising crude oil prices.

Administration officials said that action was not warranted and that the reserve should be used only to cope with shortages, not to counter price swings.

An Energy Department official said the U.S.-led embargo against Iraq oil could trigger a ''severe energy supply interruption'' requiring use of the 590 million barrel reserve.

Oil industry officials also suggested the government might want to tap the reserve to calm oil markets and make up shortfalls.

But they spent most of their time rejecting intense criticism from lawmakers, some of whom accused the industry of being unpatriotic in imposing potentially ruinous gasoline price hikes on the U.S. economy.

The oil executives denied they were taking advantage of American consumers and said the price increases were the natural result of crude oil price hikes of $8 a barrel since the Iraqi invasion of Kuwait.

Bryan said most Americans were prepared to accept some sacrifices to stop Iraq, but he added: ''That in no way justifies the virtual thievery that we have seen over the last few days. The giant coprorations are plundering the American consumer.''

Sen. John Kerry, D-Mass., went further, saying of the industry's behavior:

"It raises questions even about patriotism and the best interests of the country."

Legislators said the price hikes were especially galling because they followed two similar episodes last year - volcanic gasoline price rises in the wake of the Exxon Valdez oil spill in Alaska last March and the huge heating oil price increases during last December's cold snap.

Despite growing public outrage, administration officials and lawmakers agreed the president had no authority to roll back such price hikes, no matter how suspicious they seemed.

They said Bush's only options were ''jawboning'' the industry to reduce prices or launching an anti-trust investigation into possible collusion by oil companies to boost prices - a tough crime to prove.

The Justice Department expressed concern about the price hikes Monday and said it would closely examine oil industry behavior for possible anti-competitive activity. Kerry said Attorney General Dick Thornburgh had ''already articulated a kind of powerlessness.''

-30- 4724

#90220u0988 08/08/1990 ~United Press International

GALVESTON, TX (AUG. 8) UPI - The Coast Guard and state officials said Wednesday that oil-eating microbes used on the spill in Galveston Bay appear to be working but it will be weeks before test results can confirm it.

Meanwhile, cleanup crews worked on isolated pockets of oil around Houston Point in the northern reaches of the bay. The 700,000-gallon spill began July 28 when a Greek tanker collided with three barges.

A ban on shrimp and oyster harvesting in the bay remains in effect but might be lifted soon, Texas Water Commission Chairman B.J. ''Buck'' Wynne said.

Laboratory results from the Texas Department of Health will determine when the partial fishing ban will be lifted. Richard Thompson, director of the division of shell fish sanitation control for the health department, said lab results should be completed Wednesday afternoon.

''I would expect to see the shrimp come out OK, but I'm not as optimistic about the crabs and oysters coming out OK,'' Thompson said. ''I hope to get an answer so these shrimpers can get out and make a living.''

Wynne and Coast Guard Capt. Thomas Greene late Tuesday surveyed Marrow Marsh near Cedar Bayou on Houston Point, where oil-eating microbes were

sprayed Sunday and Monday.

Both men said they could see some change in the oil since the microbes were applied. The Environmental Protection Agency is testing water samples taken before and after the microbe application.

''It's beginning to break up in little blotches and there was white bubbles, kind of a froth, that was evidence of the microbe activity. It was even more pronounced in areas where there was a slick on the water itself in this little inlet,'' Wynne said.

In bioremediation, a powder of dried microbes is mixed with water and sprayed onto oil-stained water, beaches or marshlands. The microbes reduce oil to an emulsion of fatty acid that sinks and is consumed by marine life. The microbes die when the oil is gone.

''We saw some oil there against the boom,'' Greene said. ''There are some changes going on. On top, it looks like regular oil, but when you stir it with a stick, there is light oil underneath. I'm told ... there's some kind of bioremediation going on.''

Greene said most of the remaining oil - the largest area having about 1,000 gallons - will be cleaned up by using vacuum trucks and absorbent pads. All cleanup efforts should be completed by the end of the week, he said.

#90220u1004 08/08/1990 ~United Press International

ORLANDO, FL (AUG. 8) UPI - A Florida man has apparently become the first American convicted of counterfeiting Polish currency and faces 20 years in prison and a fine of $500,000.

Longwood resident Joseph Hill, 61, was convicted Tuesday of charges he manufactured 3 million zlotys, an amount worth about $316, said Rick Johnson, head of the Secret Service office in Orlando.

''The guy could have printed a boxcar full of them and not have enough to buy an expensive suit,'' Johnson said. ''We can only speculate that he was going to return to Poland and live like a king.''

According to Secret Service records, no other American has been convicted of counterfeiting Polish currency, Johnson said. A spokeswoman for the Polish Embassy in Washington said that it takes 9,500 zlotys to equal $1.

Hill, a former building contractor, also was convicted of counterfeiting an unspecified amount of U.S. notes. The jury deliberated about 90 minutes before returning its verdict.

Hill faces $500,000 in fines and up to 20 years in prison when sentenced on Oct. 17.

Hill was arrested on June 15 after police arrested Timothy Clayton, 25, for passing two counterfeit $20 bills at a gas station. Clayton led authorities to Hill's home, where Secret Service agents found burned pieces of $20, $50 and $100 bills in a fireplace. Charges against Clayton were dropped.

Investigators found a color laser copier and 15 Polish bills in 200,000 zloty denominations.

Hill, who is married to a Polish woman and traveled to Poland earlier this year, testified that he was not involved in the scheme. He said he got the $19,000 laser copier to duplicate greeting cards and make wallpaper.

NAGASAKI, JAPAN (AUG. 8) UPI - Despite having been shot barely six months ago, the mayor of Nagasaki said Wednesday he would again denounce Japan's World War II behavior on the 45th anniversary of his city's demolition by an atomic bomb.

''I cannot say there is no danger,'' Mayor Hitoshi Motoshima, 68, told reporters. ''But at this age, I'm not going to change my beliefs.''

Motoshima said that in his annual ''peace declaration'' on Thursday he wouldurge the Japanese government to make reparations to the thousands of Chinese, Koreans and other foreigners who were in Nagasaki when the atom bomb fell on Aug. 9, 1945, three days after a similar U.S. atomic attack on Hiroshima.

''We brought those people (to the city) by force. Just apologizing does not solve anything,'' Motoshima said.

Motoshima enraged right-wing extremists in 1988 by saying the late Emperor Hirohito bore some responsibilty for World War II.

This year, the mayor was shot in the back Jan. 18 as he was leaving City Hall. The bullet passed through his lung, narrowly missing the heart. His alleged assailant, arrested on the spot, was a well-known rightist.

Motoshima now lives under 24-hour police protection and the threats continue. The leader of a right-wing group, in an interview published Saturday in The Japan Times, said the mayor will eventually be attacked again for his views.

Nevertheless, Motoshima continues to speak out, both against the bombing that claimed 78,000 lives in Nagasaki and the war that provoked it.

He calls the bombing a crime against humanity, but adds, ''It resulted from 100 years of Japanese aggression against other countries.

''People around the world, and especially in Asia, were jumping for joy when the bomb fell. That gives us cause to reflect deeply.''

Motoshima, a former high school teacher, stands out among Japanese for his candor. Those who know him say his belief in Catholicism compels him to speak his conscience, even at the risk of assassination.

Nagasaki was for four centuries the center of Japan's tiny Christian community. The Christians were driven underground by government persecution that begin in the 17th century. But the faith persisted and re-emerged in the 19th century after Japan reopened to the world.

The atomic bomb, nicknamed ''Fat Man,'' exploded with the power of 22,000 tons of dynamite over the heart of Nagasaki's Catholic community. It shattered the Urakami Cathedral and killed or maimed most of the 15,000 Catholics who lived nearby.

Although the city has rebuilt, many of the survivors, Christians and others, continue to suffer.

Special hospitals and rest homes have been set up for them. Even those who were not burned, crippled or maimed now face a high risk of cancer from their exposure to the bomb's radiation, medical authorities said.

Many lost their entire families and have no one to depend on in their old age.

In his declaration Thursday, Motoshima said he plans to ask the government to provide care for all atom-bomb survivors, inside and outside Japan.

(AUG. 8) UPI - President Bush appealed to the American people this morning to- as he put it- ''stand up for what's right and condemn what's wrong'' by supporting his movement of U-S troops to Saudi Arabia. In a nationally broadcast address, Bush called the Iraqi invasion of Kuwait an ''outrageous and brutal act of aggression.'' Bush said the American troops in Saudi Arabia are on a purely defensive mission... to guard against further aggression by the more than 100-thousand troops Iraq has in Kuwait.

Bush says the American troops in Saudi Arabia will work with the Saudis and forces of other nations. The president has worked tirelessly since the Iraqi invasion of Kuwait to build a multi-national response to the attack. Bush acknowledged that the stakes are high in the Persian Gulf and said the U-S goal is to secure an unconditional Iraqi withdrawal from Kuwait and restoration of the emirate's government.

Several American units have been deployed to Saudi Arabia, including the 82nd Airborne Division, the 24th Light Infantry Division, B15 fighters from Virginia. Defense Secretary Cheney secured permission from Egypt for the nuclear carrier U-S-S Eisenhower to move through the Suez Canal to the Red Sea.

Iraqi President Saddam Hussein says his nation will fight on for what he termed ''Arab honor.'' And state-run Baghdad Radio called on the Arab world to tune in for ''an important statement'' this evening. There are reports that Iraq will announce the annexation of Kuwait. Cairo Radio, meanwhile, reported a total shutdown of the movement of Iraqi oil in pipelines through Turkey and Saudi Arabia.

Western diplomats say the Iraqi foreign minister may have been ousted in a power struggle. They point out that Foreign Minister Tareq Aziz disappeared from public view amid the crisis over the invasion of Kuwait. The diplomats say Aziz dropped out of sight on Friday... at about the time Iraq announced the execution of some 120 military officers who refused to take part in the invasion of Kuwait.

RASHAYA, LEBANON (AUG. 8) UPI - Rival Shiite groups clashed Wednesday in the Syrian-policed Bekaa Valley in eastern Lebanon, killing two people and wounding nine others, police and security sources said.

Gunmen from both the pro-Syrian Amal movement and the Iranian-backed Hezbollah exchanged machine-gun fire and rocket propelled grenades in the village of Sohmor in southwestern Bekaa valley, 28 miles east of Beirut, police said.

Police sources said an Amal militiaman was killed and five others were wounded. They said a Lebanese soldier was also killed and a Lebanese Army officer was injured when an army force, stationed at the entrance of Sohmor, tried to intervene and stop the clashes.

Security sources said Amal militiamen ambushed the convoy of Sheikh Abdallah Badaoui, a prominent Hezbollah leader, in the nearby Majdal Balhees village.

Sheikh Badaoui along with his family escaped unharmed while eight of his bodyguards were taken prisoner by Amal, security sources said. They said three of the bodyguards were injured.

Amal and Hezbollah have been engaged in fierce fighting for control of the strategic district of Iqlim Al Toffah, east of the port city of Sidon, 24 miles south of Beirut, since last December.

More than 1,000 people have been killed since rival groups started fighting three years ago for control of Lebanon's estimated 1.5 million Shiites.

#90220u1059 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - President Bush said Wednesday the United States was moving troops and aircraft to Saudi Arabia for defensive reasons and the ''protection of American life,'' but insisted the nation was not at war in the Middle East.

At a White House news conference only hours after he appealed for public support for the military deployment, Bush said the main purpose of the move was defensive and not to try to drive Iraqis out of Kuwait.

''We are hoping the economic boycott will do that,'' Bush said. ''Nobody can stand up forever to total economic deprivation.''

''We're not in a war,'' Bush told reporters. ''We've sent forces to defend Saudi Arabia.''

Bush stressed that the United States, as well as other countries he would not identify, were moving troops into Saudi Arabia at the request of the Saudi government.

''Hopefully our presence there will prevent (Iraqi) adventurism into other gulf countries,'' Bush said.

Bush said he did not want to heighten tensions in the Persian Gulf, but added: ''I can provide only the assurance that I consider the protection of American fife fundamental to my job and responsibilities as president.''

As he did in his speech to the nation, Bush refused to delve into details of the U.S. military operation, although he indicated that other countries including Great Britain and other Arab nations, would join the United States in defending Saudi Arabia.

Bush said he would leave it up to Saudi Arabia to announce which other countries were asked to help defend the country, but he added that Egyptian President Hosni Mubarek was in ''very close agreement with him'' for the need of a multinational presence.

He added that he believed the Soviet Union had ''been very responsible in my view. They've joined the United Nations resolution (calling for sanctions against Iraq). I can't ask for a more favorable response.''

Asked his reaction to reports that Iraq was showing signs of using chemical weapons in the region, the president said such a step would be ''intolerable and would be dealt with very, very severely.''

Bush appeared tired but firm as he answered questions in the middle of the biggest foreign policy crisis of his administration.

''If this international lesson is taught well, Saddam Hussein would behave differently in the future,'' Bush said.

''A line has been drawn in the sand and I must say we are getting very, very firm support from around the world,'' the president added. ''I would hope that all of this would result in (Iraqi leader) Saddam Hussein or some calmer heads in Iraq'' pulling out of Kuwait.

Bush said despite the tensions in the Middle East and the boyvott of oil from Kuwait and Iraq, he hoped prices would drop once it was understood there were sufficient oil reserves.

''We have a reserve,'' Bush said. ''I hope that this rapid spike on oil prices will not be permanent.''

Bush insisted the United States had tried ''very hard'' to improve

relations with Iraq, but ''that had to stop with this type of agression. We've still been very, very wary all along of his intentions.''

The president also said he had no information on rumors from the Middle East that Hussein was dead.

-30- 3470

#90220u1071 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - Rising oil prices from the Middle East crisis, coupled with poor domestic economic policy desisions, have propelled the U.S. economy toward recession, economists said Wednesday.

"While Iraqi adventurism in the Middle East is exacerbating this country's economic weakness, the impending recession is due to bad economic policy by the U.S. government," said Richard Rahn, vice president and chief economist of the U.S. Chamber of Commerce.

"The Federal Reserve Board has left the economy no margin for error, and by fulfilling Murphy's law, the Iraqi invasion of Kuwait only makes a bad situation worse," Rahn said.

The chamber said "anti-growth Fed high-interest rate policy," which has been used to fight inflation, has brought the economy down faster and further than intended.

Last month, Fed Chairman Alan Greenspan told Congress that the economy was edging toward recession and hinted that interest rates might be lowered if the budget deficit is trimmed substantially. Lower interest rates would loosen corporate pursestrings and encourage spending.

The forecast of a "mild" recession was compiled before last week's invasion of Kuwait by Iraq, which heightened tensions in the oil-rich and volatile Middle East, Rahn added.

The economy is in a recession when economic growth shows little, no, or negative growth for two consecutive quarters. The last recession to hit the U.S. economy in 1981-82.

"We anticipate that the economy will grind to a virtual standstill during the thrid quarter of this year and actually contract by 1.4 percent in the fourth quarter," Rahn said.

Since the invasion, oil prices have skyrocketed worldwide, leading to a sharp increase in gasoline prices of an average of 12.6 cents per gallon. With the U.S economy already showing signs of softness in several sectors, rising oil prices have cut into corporate spending plans and consumers' pocketpooks.

"The oil price rise will aggravate the economic downturn," Rahn said, adding that a $5 per barrel increase in the price of oil could reduce U.S. economic growth by 0.5 percent.

Oil is currently selling for about $28 a barrel and several economist believe a mild recession could last for about six months if oil settles at about $25 a barrel. Should prices push beyond $30 a barrel, the recession could last longer.

Phillip Verleger, a visiting fellow at the Institute of International Economics, told the Joint Economic Committee that a price runup appears inevitable because oil exporting nations will not be able to replace more than one-third of the oil lost from Kuwait and Iraq due to the embargo.

"Prices will undoubtedly go higher, possibly reaching $40 (a barrel) to $50 (a barrel) in the absence of action by consuming nations," he said. "This new price shock will almost certainly trigger a recession in both the United States and possibly throughout the industrialized world."

Verleger said real GNP will decline by one or two percent in the current quarter and three to four percent in the fourth. Unemployment could rise to 7.5 percent by the middle of 1991, he said.

However, Joel Popkin, an economist, told the panel that oil prices would probably stabilize due to natural reaction of the market. He said as prices rise, supplies will increases and demand will slacken, providing downward pressure on prices.

But Popkin said the price increase was "badly timed," coming before Federal Reserve had succeeded in its battle against inflation. "If oil prices stay up for 2-3 months, a recession could become a reality," he said.

President Bush, in his address to the nation, said he will look to other countries to offset oil shortages created by the embargo against Iraq and Kuwait and explore whether oil should be drawn from the 600 million-barrel U.S. Strategic Petroleum Reserve, intended for use in acute emergencies.

In the face of a sharp rise in gasoline prices, which has provoked charges of price gouging at the pump, Bush vowed efforts to "minimize any impact that oil flow reductions will have on the world economy" and urged oil companies not to "abuse today's uncertainties to raise prices."

Rahn said the economy could rebound by the third quarter of next year if the Fed, Congress, and the Bush administration adopts pro-growth economic policies.

The chamber called on the White House and Congress to restrain the level

of federal spending, cut the capital gains tax rate, enact a moratorium on new economic regulations and open to the public the Fed's decision-making process.

"There is nothing the Fed can do to lessen the economic impact of a protracted rise in the price of oil, and if it attempts to do so, it will repeat the experience of the 1970s and give us more inflation," Rahn said.

#90220u1099 08/08/1990 ~United Press International
WASHINGTON (AUG. 8) UPI - The Federal Reserve warned Wednesday the pace of economic growth is weakening and that consumer prices are rising dramatically in many parts of the country.

Although the data in the Fed's regular "beige book" assessment of the economy was collected before the start of hostilities in the Mideast and subsequent jump in energy prices, it echoes the concerns of many economists.

"Business and banking contacts... generally report continued economic growth, though most noted that the pace was slow or had slackened recently " the Fed's report said.

"Wages were reported as rising in a range of three to five percent, in most cases excluding benefits," the Fed said. "Reports on prices did not display as much consensus, with some reporting widespread increases and other noting difficulty in passing on cost increases."

But gas and oil companies and farmers appeared to be optimistic, "reflecting better weather conditions in major crop and livestock producing areas and an improved energy sector," the report said.

Retail sales showed marginal improvement over last year, the report indicated, but demand has fallen off for "big ticket" goods, such as

expensive household appliances.

In some regions of the country, "retailers indicated they had become less optimistic about the outlook for the rest of the year, though in others they were anticipating a slight pickup in sales," the Fed said.

Manufacturing was flat, real estate and construction remained weak and borrowed money was difficult to obtain in many places, further evidence of a "credit crunch" on businesses by banks and other lenders. The 12 Federal Reserve Districts reported the following regional observations:

Boston - Growth appears to be "slow and slowing." Retailers and wholesalers report soft sales, intense price competition, inventory trimming. Most businesses expected weak economic conditions through 1991.

New York - Unemployment below national average, but retailers have varied sales. Despite pickup in office leasing, vacancy rates have moved somewhat higher in Manhattan. Homebuilding activity weakening.

Philadelphia - Pace of growth easing. Manufacturers report slowdown. Retailers report sales down. Auto sales off. Bankers report loan growth slowing overall, but consumer lending up.

Cleveland - Revival reported in manufacturing sector. Consumer spending improving after slump earlier in year. Retailers "cautiously optimistic about sales prospects for fall season."

Richmond - Business conditions weakening. Tourism not as strong as past summers. Retail sales off. Manufacturing activity softening. Port activity mostly unchanged. Crop conditions improved.

Atlanta - More slow growth expected. Businesses report increased efforts to conserve cash by not paying suppliers promptly. Factories posting modest growth. Real estate and business lending up.

Chicago - Mixed economic conditions. Employment rebounded in May after two months of modest declines. Crop prices volatile, but weather conditions ideal. Manufacturing reports modest gains.

St. Louis - Sluggish economic growth. Manufacturers plan to eliminate several thousand jobs in near future. Retail growth generally flat. Loan growth slowed at largest banks in region.

Minneapolis - Economic conditions moderately good. Labor markets strengthening. Retail sales growing. Tourism strong. But new cars selling slowly and housing activity has been lackluster.

Kansas City - Moderate growth reported. Oil and gas drilling has picked up

recently, remaining well above level of a year ago. Winter wheat yields are average or better.

Dallas - Slow growth reported. Retail sales outpacing rest of nation. Oil and gas drilling "has reached a plateau." Low soil moisture causing problems for farmers. Small upturn in construction.

San Francisco - Conditions remain satisfactory. Many real esate markets exhibit "robust activity," but factory activity appears flat. Retailers report satisfactory sales.

#90220u1101 08/08/1990 ~United Press International
(AUG.8) UPI - CHRONOLOGY: CONFLICT IN THE MIDDLE EAST

The following is a chronology of recent conflicts in the Middle East.
1948:

The United Nations voted to partition Palestine to create a Jewish homeland and Israel became an independent nation. Arab nations attacked the new state the following day. It took a year for cease-fire agreements to be negotiated.

1956:

Israel invaded Egypt after President Gamel Nasser closed the Suez Canal to Israeli ships. First British and French and then U.N. forces occupied the canal banks until a cease-fire was negotiated the following year.

1957:

U.S. Marines were dispatched to Beirut at the request of Lebanese President Camille Chamoun, who had failed to put down a Moslem insurrection even with the help of a U.N. peace-keeping force. The turmoil eventually faded and Chamoun served to the end of his term.

1967:

Egypt closed the Gulf of Aqaba to Israeli ships, sparking the Six-day War that pitted Israel against a united Egypt, Jordan and Syria. The fighting halted June 10 under a U.N.-arranged cease-fire, leaving Israel in possession of Arab East Jerusalem and the West Bank, (formerly Jordan), the Golan Heights, (formerly Syria), and the Gaza Strip and Sinai Peninsula, (formerly Egypt).

1970:

Jordanian troops defeated Palestinian guerrillas in the short Black September civil war and drove the Palestine Liberation Organization from the country.

1973:

The Yom Kippur War began on that Jewish holiday Oct. 6, when Egypt and Syria attacked Israel to regain their lost territories. A cease-fire took effect Oct. 24.

1975:

Civil war broke out in Lebanon between Christian Phalangists and leftist Moslems. Syria sent troops into the conflict the following year as part of an Arab peace-keeping force.

1978:

Israeli Prime Minister Menachim Begin and President Anwar Sadat of Egypt signed the Camp David peace accord on Oct. 12, under which Israel ended its occupation of some of Egyptian territory. Most Arab nations broke relations with Egypt in retaliation.

1979:

Shah Mohammed Reza Pahlavi was overthrown in Iran and replaced by the Islamic fundamentalist Ayatollah Ruhollah Khomeini, whose militants seized the U.S. Embassy in Tehran and held Americans hostage until January 1981. A rescue attempt failed when U.S. military helicopters crashed in the Iranian desert.

1980:

Iraq invaded Iran after months of border clashes, starting a deadly war that raged off and on for eight years and killed hundreds of thousands on both sides.

1981:

Sadat was assassinated Oct. 6 while reviewing a military parade in Cairo and was replaced by Hosni Mubarak, who vowed to continue Sadat's peace efforts.

On Dec. 14, Israel annexed Syria's Golan Heights, which it had occupied since the 1967 war.

1982:

Israel invaded Lebanon and occupied Beirut, forcing out the PLO. A U.N. peace-keeping force that included U.S. Marines was dispatched to the troubled country and Israeli troops retreated to a self-proclaimed security zone in Southern Lebanon.

1983:

Terrorists blew up the U.S. Marine barracks in Beirut, killing 241 Americans in a protest against U.S. presence in Lebanon. The United States withdrew its peace-keeping forces from the country the following year.

1985:

Jordan and the PLO announced a Middle East peace plan that called for the return of occupied Arab land in exchange for Arab recognition of Israel, but Israel rejected the offer and refused to negotiate.

The year was unamatched in terrorism in the Middle East, including the seizure of the luxury liner Achille Lauro in the Mediterranean, five hijackings, car bombs, kidnappings and air strikes between Lebanon and Israel.

1986:

The United States staged an air attack on Libya in retaliation for alleged terrorist acts, bombing leader Moammar Gadhafi's headquarters in Tripoli and killing dozens of Libyans.

1988:

Iraq and Iran agreed to an uneasy cease-fire negotiated by the United Nations, ending the eight-year Persian Gulf war.

1990:

Iraq invaded the tiny oil-rich emirate of Kuwait in a dispute over oil production quotas and borders. The United States led the world in an economic boycott of Iraq and sent troops to Saudi Arabia to guard against an invasion of the kingdom.

-30- 4556

#90220u1123 08/08/1990 ~United Press International

JAKARTA, INDONESIA (AUG. 8) UPI - Chinese Premier Li Peng said Wednesday Beijing will never support the Khmer Rouge as the dominant power in Cambodia and ruled out a battlefield solution to the 11-year-old conflict.

Li, the first Chinese prime minister to visit Indonesia in 25 years, made

the remarks after China and Indonesia formally resumed diplomatic relations in a ceremony at Merdeka Palace ending a 23-year freeze.

In a wide-ranging news conference, Li also said he has no objections to President Bush ordering U.S. ground troops and combat aircraft to bases in Saudi Arabia to help Saudi forces defend against a possible Iraqi attack.

''In general terms, China is opposed to the military involvement of big powers in the Middle East because the situation in the Middle East is complicated enough,'' Li said.

''However, Saudi Arabia is a sovereign state,'' Li said. ''If it wants to invite U.S. armed forces to help maintain its safety out of security considerations, then we respect the decision of Saudi Arabia.''

Li and President Suharto witnessed the signing of the historic document by Indonesian Foreign Minister Ali Alatas and his Chinese counterpart, Qian Qichen.

The two sides agreed to provide temporary offices for embassies in Beijing and Jakarta and to dispatch advance teams to resolve the technical matters concerning the opening of their respective embassies.

Jakarta broke off relations with Beijing in 1967, charging China with complicity in an unsuccessful coup attempt, an accusation China has steadfastly denied.

Indonesia followed Saudi Arabia to become the second country establishing diplomatic relations with China since the suppression of pro-democracy demonstrators in June 1989.

Li heads to Singapore Saturday to accelerate restoration of diplomatic ties with the island nation. Prime Minister Lee Kuan Yew has said Singapore would follow Indonesia in normalizing links.

Although China arms the Khmer Rouge, the most powerful of the three resistance factions fighting the Hanoi-backed government in Cambodia, Li said, ''China will never support the Khmer Rouge to dominate power.''

Criticizing the recent U.S. policy shift withdrawing diplomatic recognition of the resistance at the United Nations, Li said, ''The seat should be left as it is.'' He adopted the same stance as the six-member Association of Southeast Asian Nations, still bristling over the U.S. move.

Li said China would stop arming the Khmer Rouge ''if other countries stop their military assistance.'' The Soviet Union bankrolls Hanoi, and the United States provides non-lethal aid to the non-communist factions headed by Prince Norodom Sihanouk.

U.S. officials have stressed the main reason for the turnaround was the fear the Khmer Rouge could fight their way back into power. The Khmer Rouge are blamed for the deaths of more than 1 million Cambodians during their harsh, communist rule from 1975 to 1979 when they were toppled by the Vietnamese.

In response to the urgings of Suharto that China convince the Khmer Rouge peaceful negotiations are the best way to end the bloodshed, Li said, ''China is ready to make its due effort for seeking a political settlement''

He said, however, ''China cannot order anyone around or act as a surrogate for the Cambodian factions.''

Backing a power-sharing arrangement pending free elections under U.N. supervision, Li said, ''Any solution must have the agreement of all four '' including the Phnom Penh government.

#90220u1130 08/08/1990 ~United Press International

WASHINGTON (AUG. 8) UPI - President Bush, drawing a line in the sand of the Arabian desert, said Wednesday he ordered U.S. troops and warplanes to Saudi Arabia to defend the oil kingdom from possible attack by Iraq.

Bush, in a televised Oval Office address, stressed that Iraqi leader Saddam Hussein's ''blitzkrieg'' invasion of Kuwait could not be allowed to stand and he argued that the lessons learned in World War II proved such an ''outrageous and brutal act of aggression'' must not go unanswered.

With a formidable buildup of air, ground and naval forces under way, Bush said the U.S. military role in Saudi Arabia would be ''wholly defensive'' in guarding against aggression by an ''enormous war machine'' of Iraqi forces poised along the Kuwaiti border.

At a later news conference, the president stressed, ''We are not in a war '' but underlined his determination to challenge Saddam by declaring, ''A line has been drawn in the sand. ... This kind of international behavior is unacceptable.''

While saying the U.S. forces - including a massive naval presence - are ''not there to drive Iraqi forces out of Kuwait,'' Bush said his aim is to ''try to reverse out this aggression.''

Bush said he expects Iraq will be forced to withdraw by the effects of international economic sanctions approved the United Nations and said there will be other ''steps taken to be sure they are effective'' - an

indication a full-scale blockade may be used to choke Iraq's oil-dominated economy.

In his early morning speech, Bush said Iraq has ''the world's fourth-largest military'' with 1 million men under arms and had moved ''more than 100,000 troops, along with tanks, artillery and surface-to-surface missiles'' into Kuwait. Bush's revelation was the first word Iraq had transported the missiles into Kuwait.

Under questioning later, Bush said he was ''concerned about'' reports Iraq was mobilizing chemical weapons units. He noted Iraq has used chemical warfare in the past but ''it would be intolerable'' if U.S. forces were attacked with poison gas and ''would be dealt with very, very severely.''

A tired-looking Bush, in his morning address, announced what had been revealed late Tuesday: ''At my direction, elements of the 82nd Airborne Division as well as key units of the United States Air Force are arriving today to take up defensive positions in Saudi Arabia.''

Pentagon officials later said some paratroopers had landed inside Saudi Arabia by late Wednesday morning and scheduled an afternoon briefing to provide some details.

Sources said thousands of paratroopers and at least 48 F-15 fighters were arriving Wednesday. A mechanized infantry division was expected to be sent later. The United States already has 34 warships in the area, with more on the way, including the battleship USS Wisconsin.

The Pentagon said the nuclear-powered aircraft carrier USS Eisenhower, which had been in the Mediterranean, transited the Suez Canal with the permission of the Egyptian government and was in the Red Sea near Saudi Arabia. It is headed to the northern Arabian Sea, where the aircraft carrier USS Independence is already deployed.

Warning that it would be ''unwise and unrealistic'' to assume that Saddam's adventurism would end with the takeover of Kuwait, Bush said he ordered U.S. troops and planes to the Arabian penninsula only after ''exhausting every alternative.''

''I want to be clear about what we are doing and why,'' Bush said. ''America does not seek conflict, nor do we seek to chart the destiny of other nations. But America will stand by her friends.''

''In a life of a nation, we are called upon to define who we are and what we believe,'' he said. ''Sometimes these choices are not easy. Today, as president, I ask for your support in the decision I've made to stand up for what's right and condemn what's wrong, all in the name of peace.''

''The stakes are high. Iraq is already a rich and powerful country that possesses the world's second largest reserves of oil and over a million men under arms,'' Bush said.

The president added, ''If history teaches us anything, it is that we must resist aggression or it will destroy our freedoms. Appeasement does not work. As was the case in the 1930s, we see in Saddam Hussein an aggressive dictator threatening his neighbors.''

But while appealing to the public, the president also warned Americans that the job may be easy and he asked them not to waver in their support.

''Standing up for our principles is an American tradition. As it has so many times before, it may take time and tremendous effort, but most of all it will take unity of purpose,'' Bush said. ''America has never wavered when her purpose is driven by principle. On this August day, at home and abroad, I know she will do no less.''

(AUG. 8) UPI - Crude oil prices tumbled up to $3 a barrel in early trading on world markets Wednesday after reports that Saudi Arabia would pump 2 million barrels a day extra to help make up for oil output lost in the embargo of Iraq and Kuwait.

''Prices are moving down on the reports late Tuesday that Saudi Arabia is willing to raise its production by 2 million barrels a day,'' said Tom Bentz, director of trading for United Energy Inc. in New York.

''If there's a war, the whole market will take off. Meanwhile, it looks like things are easing,'' Bentz said.

''Traders feel that the Saudi move eases some of the output tension,'' agreed Randall Rothenberg of Dean Witter Reynolds' International Energy Futures Group in New York.

On the European cash markets, Dubai light, the key Mideast crude produced by the Organization of Petroleum Exporting Countries that is shipped mainly to the Far East, was being quoted at $22.70 a barrel at midday, down $3 from late Tuesday.

Britain's widely traded North Sea Brent crude dove $2.70 to $25.75 a barrel.

On the New York Mercantile Exchange, the U.S. benchmark West Texas Intermediate crude for September delivery had fallen $1.61 to $26.70 a barrel by midday.

Unleaded gasoline for September delivery had slumped 3.99 cents by midday on the Merc to 78.40 cents a gallon, while September heating oil dropped 3.04 cents to 72.10 cents a gallon.

Unconfirmed reports of the Saudi increase came late Tuesday after the oil markets had closed in conjunction with reports that the United States would send ground troops and warplanes to Saudi Arabia to defend the kingdom from Iraqi forces that invaded neighboring Kuwait last Wednesday.

Venezuela also was reported to be ready to raise its output by 500,000 barrels a day.

Iraq had been pumping more than 3.1 million barrels a day and Kuwait was producing 1.5-2.0 million barrels a day prior to the invasion, after which theUnited Nations ordered an embargo of oil shipments from the two nations.

Saudi Arabia, the OPEC cartel's largest producer, has been pumping about 5.5 million barrels daily and has the capability to produce several million more.

Peter Gignoux of Shearson Lehman Hutton's London office said: ''I think we're on a collision course with Iraqi leader Saddam Hussein. President Bush couldn't be clearer. He wants a restoration of the Kuwaiti government.''

SEATTLE (AUG. 8) UPI - Police say a young mother loaded up her infant son, stuffed a .22-caliber pistol into his diaper bag and took a cab to stick up a local bank.

The woman asked the unsepecting cab driver to wait and watch her son while she walked into Security Pacific Bank in Ballard and gave a teller a note demanding cash, police said Tuesday.

The woman handed the teller a shopping bag for the cash and then took it and left the bank, re-entering the cab and telling the driver to speed off. However, police alerted by a silent alarm caught up with the cab, found the pistol in the diaper bag and confiscated an undisclosed amount of cash.

''It was all very quiet, very subdued,'' a witness to the Monday afternoon robbery said. ''There were about 10 customers in the bank. She walked in with the bag and not a one of us was aware of what was going on until she left.''

Police said the woman was arrested on suspicion of bank robbery and the baby was turned over to Child Protective Services for placement in a foster home.

CAIRO, EGYPT (AUG. 8) UPI - The United States called on Americans Wednesday to defer travel to Saudi Arabia, Bahrain, Qatar and the United Arab Emirates as thousands of foreign workers fled oil-rich Persian Gulf states fearing an escalation in the Iraq-Kuwait crisis.

The U.S. dollar banknote became the most sought-after commodity in the region with anxious expatriates and locals seeking to switch their savings into a hard currency and transfer the cash abroad.

Spokesmen for airlines in the gulf states of Saudi Arabia, Bahrain, Qatar and the United Arab Emirates said flights to most European and Asian destinations were fully booked for the next month.

Banks in the gulf reported long lines and heavy demand for U.S. dollar and British pound sterling banknotes and travelers' checks, and even Asian currencies such as Indian rupees, as they tried to get rid of potentially worthless Saudi riyals and other gulf national currencies.

''We have no more dollar banknotes left ... people are just asking for all their savings in cash,'' said a spokesman for the Standard Chartered Bank in Bahrain.

''If the Iraqis go into Saudi Arabia, the Saudi riyal will become Monopoly money, and I don't think people will want to hold large amounts of other Gulf currencies either,'' said a banker in Dubai, UAE.

The State Department issued a travel advisory calling on U.S. citizens to defer travel to the Eastern Province of Saudi Arabia, Qatar, Bahrain and the United Arab Emirates ''due to the Iraqi military invasion of Kuwait and the continuing unstable condition in the region.''

''The Department is permitting dependants of U.S. government officials to depart the area on a voluntary basis,'' it said.

The advisory said Americans in areas of Saudi Arabia other than the Eastern Province, ''can continue to pursue normal daily activities.''

There are some 28,000 Americans living in Saudi Arabia, according to the U.S. Embassy in Riyadh, and several thousand more in the other gulf states. But many are away on summer holidays.

Banks trading with Kuwaiti funds or owned by Kuwait were brought to a standstill after the Iraqi occupation of the oil-rich emirate. One Bahrain-based bank partly owned by Kuwaiti interests, the Arab Banking Corporation, was reported to have laid off large numbers of staff.

Hotels in gulf states such as Bahrain were packed with refugees from Kuwait, many with no funds to support themselves.

Hundreds of British and American gulf residents meanwhile were reported to have flocked to the consulates of their embassies to register in case of evacuation.

''There is no normal life here ... everybody is just worried about the Iraq-Kuwait business spreading to the gulf,'' said Maureen Forland, an Australian advertising executive in Dubai.

''If the Iraqis go into Saudi Arabia, the United Arab Emirates is within easy reach,'' she said. ''Talk of war is dominating everything.''

#90220u1165 08/08/1990 ~United Press International

MENANDS, NY (AUG. 8) UPI - Police in upstate New York said Wednesday they were searching for a bandit who used a fishhook to snag a bag of money from a supermarket night deposit box.

Police said the theft occurred sometime early Monday, when the angling bandit lowered a large fishhook into a safe in the office of a Great American supermarket in the Albany County village of Menands.

The thief managed to pull out a bag containing more than $5,600 in cash, $928 in food stamps and $4,400 in checks.

Employees from an armored car company discovered the theft Monday morning when, upon opening the safe, discovered only four of the usual five money bags and the fishhook.

''The employees of the armored car company have the keys to the door but don't have the combination to the safe. The store employees have the combination but not keys to the door. It was supposed to be a 'fail safe' system,'' Patrolman David Klefback told the Albany Times Union.

#90220u1166 08/08/1990 ~United Press International

(AUG. 8) UPI - President Bush asked the nation today to support his decision to send U-S forces to Saudi Arabia to defend it against a possible attack by Iraq. He described Iraq's blitzkrieg-style invasion of

neighboring Kuwait as an ''outrageous and brutal act of aggression'' and said it must NOT go unanswered.

Bush said in a nationally broadcast speech that the U-S presence in Saudi Arabia- involving air, naval and ground forces- will be ''wholly defensive'' and could be long and costly. He warned that it's ''unwise and unrealistic'' to assume that Iraq's adventurism would end with the takeover of Kuwait.

Bush made NO mention of a published report that U-S intelligence had detected possible preparations by Iraq to equip its warplanes with chemical weapons. Bush won strong bi-partisan backing from Congress for his decision to send troops to Saudi Arabia and mass forces near the Persian Gulf.

On the economic front, Bush said he will look to other countries to offset oil shortages created by the embargo against Iraq and Kuwait. And in the face of a sharp rise in gasoline prices, Bush asked oil companies to ''do their fair share'' and NOT take advantage of the situation by raising prices.

British Foreign Secretary Hurd says British naval and air forces will join a multi-national effort confronting Iraq in the Persian Gulf. Hurd made the announcement after Prime Minister Thatcher met with Cabinet officials in response to Saudi King Fahd's request for military assistance to stop Iraq from attacking Saudi Arabia.

#90220u1189 08/08/1990 ~United Press International

(AUG. 8) UPI - It's day six of deliberations for the jury in the drug and perjury trial of Washington, D-C, Mayor Marion Barry. Jurors reached a verdict on one misdemeanor cocaine charge yesterday but refused to reveal the decision... choosing to continue deliberating on the remaining 13 counts. Barry said outside the federal courtroom- quoting here- ''The anxiety is great.''

The American Bar Association House of Delegates meeting in Chicago opened debate today on rescinding its pro-choice abortion stance. The move comes after Attorney General Thornburgh indicated that the Bush administration may give less weight to A-B-A ratings of judges if the lawyers' group fails to return to neutrality on the abortion issue.

Former Pakistan Prime Minister Benazir Bhutto accuses the military of engineering her dismissal and says she fears a military takeover of Pakistan in the next few weeks. Speaking in the port city of Karachi, Bhutto told reporters- quoting now- ''the military is running the show.''

#90220u1295 08/08/1990 ~United Press International

FLINT, MI (AUG. 8) UPI - About 3,200 hourly workers walked off the job Wednesday at General Motors Corp.'s AC Rochester West Stamping plant, and a company spokesman said a prolonged walkout could close many of GM's vehicle assembly plants by early next week as the parts pipeline dries up.

Representatives of the United Auto Workers local 659 said the union has been angered over work speed-ups, subcontracting and a lapse in health and safety conditions at the plant, which makes gas tanks, engine valves and exhaust manifolds and other parts for GM vehicles.

''Some of these issues have now been hanging for over a year, some as much as two years,'' said Ruben Burkes, director of the UAW's Region 1C. ''The company has not responded with anything favorable thus far.''

Talks between the union and GM were slated to resume Thursday morning, Burkes said.

The union served GM with a five-day letter of intention to strike the AC West plant on Aug. 1, giving the two sides five working days to settle their differences.
